** Applicazione macchina/batteria raccomandata per ottenere prestazioni ottimali.

IMPORTANTE Dove è previsto l'utilizzo di 2 batterie, entrambe devono essere presenti nell'apposito alloggiamento. In caso di una sola batteria inserita la macchina non funziona.

Per le migliori prestazioni si raccomanda che le due batterie abbiano la stessa capacità e siano completamente cariche.

[1] BG - ТЕХНИЧЕСКИ ДАННИ [2] Номинална мощност * [3] Максимална скорост на функциониране на двигателя * [4] Напрежение на захранване MAX [5] Напрежение на захранване NOMINAL [6] Тегло на машината * [7] Ширина на косене [8] Код на инструмента за рязане [9] Ниво на звуково налягане (max.) [10] Несигурност на измерване [11] Измерено ниво на акустична мощност (max.) [12] Гарантирано ниво на акустична мощност [13] Ниво на вибрации (max.) [14] принадлежности по поръчка [15] Набор за "Mulching" [16] Акумулатори, модел [17] Зарядно устройство, модел * За специфични данни, вижте посоченото на идентификационния етикет на машината. ** Препоръчително приложение за машина/акумулатор за оптимална работа. ВАЖНО Когато се предвижда използването на 2 акумулатора, и двата трябва да присъстват в съответното гнездо. В случай на само един поставен акумулатор, машината не работи. За отлична работа се препоръчва двата акумулатора да имат еднакъв капацитет и да са напълно заредени.	[1] BS - TEHNIČKI PODACI [2] Nazivna snaga * [3] Maks. brzina rada motora * [4] Napon napajanja MAX [5] Napon napajanja NOMINAL [6] Težina mašine * [7] Širina košenja [8] Sifra rezne glave [9] Razina zvučnog pritiska (max.) [10] Mjerna nesigurnost [11] Izmjerena razina zvučne snage (max.) [12] Garantovana razina zvučne snage [13] Razina vibracija (max.) [14] Dodatna oprema na zahtjev [15] Pribor za malčiranje [16] Baterije, mod. [17] Punjač baterije, mod. * Za specifični podatak, pogledajte što je navedeno na identifikacijskoj naljepnici mašine. ** Preporučena primjena mašine/akumulatora za optimalne performanse. VAŽNO Ako se koriste samo 2 akumulatora, oba moraju biti prisutna u odgovarajućem kućištu. Ako je umetnut samo jedan akumulator, mašina ne radi. Za najbolje performanse preporučuje se da akumulatori budu istog kapaciteta i da budu potpuno napunjeni.	[1] CS - TECHNICKÉ PARAMETRY [2] Jmenovitý výkon * [3] Maximální rychlost činnosti motoru * [4] Napájecí napětí MAX [5] Napájecí napětí NOMINAL [6] Hmotnost stroje * [7] Šířka sečení [8] Kód sekacího zařízení [9] Úroveň akustického tlaku (max.) [10] Nepřesnost měření [11] Úroveň naměřeného akustického výkonu (max.) [12] Úroveň zaručeného akustického výkonu [13] Úroveň vibrací (max.) [14] Příslušenství na požádání [15] Sada pro Mulčování [16] Akumulátor, mod. [17] Nabíječka akumulátoru, mod. * Ohledně uvedeného údaje vycházejte z hodnoty uvedené na identifikačním štítku stroje. ** Doporučené použití stroje / akumulátoru pro dosažení optimálních výkonů. DŮLEŽITÉ Tam, kde se předpokládá použití dvou akumulátorů, je potřeba, aby byly oba v místě svého uložení. Při zapojení jen jednoho akumulátoru stroj nebude fungovat. Pro nejlepší výkony doporučujeme, aby oba akumulátory měly stejnou kapacitu a byly plně nabité.
[1] DA - TEKNISKE DATA [2] Nominel effekt * [3] Motorens maks. driftshastighed * [4] Forsyningsspænding MAX [5] Forsyningsspænding NOMINAL [6] Maskinens vægt * [7] Klippebredde [8] Skæreanordningens varenr [9] Lydtryksniveau (max.) [17] Akumulatoriaus įkroviklis, mod. * Konkretūs specifiniai duomenys yra pateikti įrenginio identifikavimo etiketėje. ** Rekomenduojamas mašinos / akumulatoriaus pritaikymas optimaliam našumui užtikrinti. SVARBU Jei naudojami 2 akumulatoriai, abu jie turi būti tinkamame korpuse. Jei įstatytas tik vienas akumulatorius, įrenginys neveikia. Norint užtikrinti geriausią našumą, rekomenduojama, kad abu akumulatoriai būtų vienodos talpos ir visiškai įkrauti.	[1] LV - TEHNISKIE DATI [2] Nominālā jauda * [3] Maks. dzinēja griešanās ātrums * [4] Barošanas spriegums MAX [5] Barošanas spriegums NOMINAL [6] Mašinas svars * [7] Plaušanas platums [8] Griežējierīces kods [9] Skaņas spiediena līmenis (max.) 1. GENERAL INFORMATION

1.1 HOW TO READ THE MANUAL

NOTE or **IMPORTANT** These give details or further information on what has already been said, and aim to prevent damage to the machine.

The symbol highlights danger. Failure to observe the warning can lead to the risk of injury to oneself and others and/or damage.

- * The paragraphs highlighted in a square with
- * grey spots indicate the optional characteristics
- * not on all models documented in this manual.
- * Check if the characteristic is on this model.

Whenever reference is made to a position on the machine "front", "back", "left" or "right" hand side, this refers to the operator's working position.

2. SAFETY REGULATIONS

2.1 TRAINING

Read these instructions carefully before operating the machine. Become acquainted with the controls and the correct use of the machine. Learn how to stop the motor quickly. Failure to follow the warnings and instructions may result in fire and/or serious injury. Keep all warnings and instructions for future reference.

- Never allow children or persons unfamiliar with these instructions to use the machine. Local laws can restrict the minimum age of the operator.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instructions concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Never use the lawnmower while people, especially children, or pets are nearby. Get another adult to keep the children under supervision.
- Never use the machine if the user is tired or unwell, or has taken medicine, drugs, alcohol or any substances which may slow his reflexes and compromise his judgement.
- Bear in mind that the operator or user is responsible for accidents or unexpected events occurring to other people or their property. It is the user's responsibility to assess the potential risk of the area where work is to be carried out and to take all the necessary precautions to ensure their own safety and that of others, particularly on slopes or rough, slippery and unstable ground.
- If the machine is sold or lent to others, make sure that the operator reads the user instructions contained in this manual.

2.2 PRELIMINARY PROCEDURES

- Always wear suitable work attire, hard-wearing safety footwear with non-slip soles and long trousers. Do not operate the machine when barefoot or wearing open sandals. Wear hearing protection devices.
- Never wear scarves, shirts, necklaces, bracelets, loose flowing clothing, laces or ties or any hanging or flapping accessory that could catch in the machine or in any objects or materials in the work area.
- Tie your hair back if it is long.
- Wear protective gloves whenever your hands are at risk.
- Thoroughly inspect the entire work area and remove anything that could be thrown by the machine or damage the blade/rotating units (stones, branches, iron wire, bones, etc.)

2.3 DURING OPERATION

- Do not use the machine in environments at risk of explosion, in the presence of flammable liquids, gas or powder. Power tools create sparks which may ignite the dust or fumes.
- Do not expose the machine to rain or wet environments. Water entering a power tool will increase the risk of electric shock.
- Work only in daylight or with good artificial light in good visibility conditions.
- Avoid working with wet grass, in the rain and when there is a risk of a thunderstorm, especially lightning.
- Pay careful attention to uneven ground (hills, dips), slopes, hidden hazards and obstacles that could limit visibility.
- Be very careful near ravines, ditches or embankments. The machine could overturn if a wheel slides over the edge or if the earth gives way.
- Always mow across a slope and never up and down. Being very careful when changing direction, making sure you have firm footage and that the wheels do not hit any obstacles (such as stones, branches, roots, etc.) that may cause the machine to slide sideways or make you lose control of it.
- The machine must not be used on slopes over 20°, regardless of the mowing direction.
- Do not incline the lawnmower during starting. Start the machine on a flat surface without obstacles or high grass.
- Exercise caution when pulling the lawnmower towards you or moving backwards. Look behind you to make sure there are no obstacles.
- Never run, always walk.
- Do not allow the lawnmower to pull you along.
- Always keep hands and feet away from the blade, when starting and when using the machine.
- Keep away from the discharge opening.
- Never operate the machine with damaged, missing or incorrectly assembled guards (grass catcher, side discharge guards, rear discharge guards).
- Never disengage, deactivate, remove or tamper with the safety systems/micro switches installed.

 **If something breaks or an accident occurs during mowing, turn off the motor immediately and move the machine away to prevent further damage; if an accident occurs with injuries or third parties are injured, carry out the first aid measures most suitable for the situation immediately and contact the medical**

authorities for any necessary health care. Carefully remove any debris which could cause damage or injury to persons or animals if ignored.

2.4 MAINTENANCE, STORAGE

Ensure regular maintenance and correct storage to maintain machine safety and high performance levels.

- Never use the machine with worn or damaged parts. Faulty or worn-out parts must always be replaced and never repaired. Use original replacement parts only.
- Be careful during adjustment of the machine to prevent entrapment of the fingers between moving parts of the blade and fixed parts of the machine.
- To reduce fire risks, do not leave containers with debris inside a room.
- Make sure that machine movements do not cause damage or injuries.

 **The noise and vibration levels shown in these instructions are the maximum levels for use of the machine. The use of an unbalanced cutting blade, the excessive speed of movement, or the absence of maintenance have a significant influence on noise emissions and vibrations. Consequently, it is necessary to take preventive steps to eliminate possible damage due to high levels of noise and stress from vibration. Maintain the machine well, wear ear protection devices, and take breaks whilst working.**

2.5 BATTERY / BATTERY CHARGER

IMPORTANT The following safety instructions are in addition to the safety requirements provided in the specific battery and battery charger manual delivered with this machine.

- Only use battery chargers recommended by the manufacturer to recharge batteries. An inadequate battery charger may cause electric shock, overheating or corrosive liquid to leak from the battery.
- Use only batteries specifically designed for your power tool. The use of other batteries may cause injuries and fire risks.
- Make sure that the machine is switched off before inserting the battery. Inserting a battery in a machine which is switched on can cause a fire.
-

2.6 ENVIRONMENTAL PROTECTION

- Comply with local regulations for the disposal of packaging, deteriorated parts or any elements with a strong environmental impact; this waste must not be disposed of as normal waste, it must be separated and taken to specified waste disposal centres where the material will be recycled.
- Comply with local regulations for the disposal of waste materials.
- When the machine is withdrawn from service, do not dispose of it in the environment, but take it to a waste disposal facility in accordance with the local regulations in force.

Do not throw electrical equipment away with domestic waste. According to the European Directive 2012/19/UE on electrical and electronic equipment waste and its implementation, according to UK Regulation The waste

electrical and electronic equipment regulations 2013 (as amended), in compliance with national standards, old electrical equipment must be collected separately, for eco-compatible recycling. If electrical equipment is disposed of in dumps or in landfills, hazardous substances can leak into the groundwater and contaminate the food chain, damaging your health and well-being. For further information on the disposal of this product, contact your dealer or a domestic waste collection service.

At the end of their working life, dispose of batteries paying due attention to the environment.

Batteries contain material classified as hazardous for you and the environment. They must be removed and disposed of separately at a facility that accepts lithium-ion batteries.

Separate waste collection of the products and packaging used allows the materials to be recycled and reused. Reuse of recycled materials help to prevent environmental pollution and reduces the demand for raw materials.

3. GETTING TO KNOW THE MACHINE

3.1 DESCRIPTION OF THE MACHINE AND PLANNED USE

This machine is a pedestrian controlled lawnmower.

The machine is essentially composed of a motor which drives a blade enclosed in a casing, equipped with wheels and a handle.

The operator is able to operate the machine and use the main controls, always staying behind the handle at a safe distance from the rotating blade. If the operator leaves the machine, the motor and blade will stop within a few seconds.

3.1.1 Intended use

This machine was designed and manufactured for cutting grass in gardens and grassy areas, carried out by a pedestrian operator.

Generally speaking this machine can:

1. Mow the grass and collect it in the grass catcher.
2. Mow the grass and discharge it on the ground from the rear section.
3. Mow, cut and deposit the grass on the ground (mulching effect - if provided).

The use of special attachments provided for by the Manufacturer as original equipment or which may be purchased separately, allows this work to be done in various operating modes, illustrated in this manual or the instructions that accompany the single attachments.

3.1.2 Improper use

Any other usage not in keeping with the aforementioned ones may be hazardous and harm persons and/or damage things.

Examples of improper use may include, but are not limited to:

- Allowing children, animals or other passengers to ride on the machine as they could fall off and injure themselves or compromise safe driving by the operator.
- Letting oneself be transported by the machine.
- Using the machine to tow or push loads.
- Using the blade on surfaces other than grass.

- Using the machine for leaf or debris collection.
- Using the machine to trim hedges, or for cutting vegetation other than grass.
- Use of the machine by more than one person.

IMPORTANT *Improper use of the machine will invalidate the warranty, relieve the Manufacturer from all liabilities, and the user will consequently be liable for all and any damage or injury to himself or others.*

3.1.3 User types

This machine is intended for use by consumers, i.e. non-professional operators. It is intended for "DIY" use only..

IMPORTANT *The machine must be used by one operator.*

3.2 MAIN COMPONENTS (Fig. 1)

- Chassis:** this is the casing that houses the rotating blade.
- Motor:** the driving force for the blade.
- Cutting blade:** the element designed to cut the grass.
- Rear discharge guard:** it is a safety device which prevents objects drawn up by the blade from being hurled away from the machine.
- Grass catcher:** as well as collecting the grass cuttings, this is also a safety element that stops any objects drawn up by the blade from being hurled away from the machine.
- Handle:** this is the operator's work station. It is long enough to ensure the operator remains at a safe distance from the rotary blade whilst working.
- Control lever:** starts/stops the motor and simultaneously engages/disengages the blade.
- Hatch for accessing the battery compartment**
- Safety key (Deactivation device):** The key enables / disables the machine's electric circuit.
- Battery** (*if it is not supplied with the machine, see chapter 13 "attachments on request"*): provides the energy for starting the motor. Its specifications and regulations for use are described in a specific manual.
- Battery charger** (*if it is not supplied with the machine, see chapter 13 "attachments on request"*): device used to recharge the battery.

3.3 IDENTIFICATION LABEL (Fig. 1)

1. Sound power level.
2. Conformity marking.
3. Year of manufacture.
4. Type of machine.

5. Serial number.
6. Name and address of Manufacturer.
7. Article code.
8. Max. motor operation speed.
9. Weight in kg.
10. Power voltage.
11. Electrical protection rating.
12. Nominal power.

IMPORTANT Quote the information on the product identification label whenever you contact an authorised service dealer.

IMPORTANT The example of the Declaration of Conformity is provided on the last pages of the manual.

3.4 SAFETY SIGNS (Fig. 2).

The machine has various symbols on it. Meaning of symbols:

Warning. Read the instructions before operating the machine.

Danger! Risk of thrown objects. Keep all persons away from the work area whilst working.

Be careful when using the sharp blade. Do not put hands or feet near or under the opening of the blade. The blade continues to turn even after the motor has been switched off. Remove the safety key (deactivation device) before doing maintenance.

Only for electric lawnmowers powered by mains supply.

Only for electric lawnmowers powered by mains supply.

IMPORTANT Any damaged or illegible decals must be replaced. Order replacement decals from an authorised service dealer.

4. ASSEMBLY

The safety regulations to follow are described in chap. 2. Strictly comply with these instructions to avoid serious risks or dangers.

For storage and transport purposes, some components of the machine are not installed in the factory and have to be assembled after unpacking. Follow the instructions below.

Unpacking and completing the assembly should be done on a flat and stable surface, with enough space for moving the machine and its packaging,

always making use of suitable equipment. Do not use the machine until all the instructions provided in the "ASSEMBLY" section have been carried out.

Before assembling, make sure the safety key is not inserted in its housing.

4.1 UNPACKING (Fig.3)

4.2 GRASS CATCHER ASSEMBLY (Fig.4 - 6)

4.3 HANDLE ASSEMBLY (Fig.7 -15)

5. CONTROLS

5.1 SAFETY KEY (DEACTIVATION DEVICE)

The key (Fig. 16.A) found inside the battery compartment enables / disables the machine's electric circuit. Removing the key, the electric circuit is completely deactivated to prevent uncontrolled use of the machine.

IMPORTANT Remove the safety key whenever the machine is unused or left unattended.

5.2 SWITCH COMMAND

The switch control (Fig.17.A, Fig.17.A.1) starts/stops the engine and at the same time engages/disengages the cutting blade:

Start-up. To start, press the safety button (fig. 17.A.1) and pull the lever (fig. 17.A).

Blade engagement. When the engine starts, the cutting blade is also engaged.

Stop. The engine stops automatically when the lever (Fig. 17.A) is released.

6. USING THE MACHINE

The safety regulations to follow are described in chap. 2. Strictly comply with these instructions to avoid serious risks or dangers.

6.1 PRELIMINARY PROCEDURES

Make sure that the safety key is not inserted in its slot.

Place the machine in a stable horizontal position on the ground;

Carry out this operation when the cutting blade is stationary.

6.1.1 Checking and recharging the battery (Fig.18)

6.1.2 Preparation for grass cutting and collection in the grass catcher (Fig.19))

6.1.3 Cutting height adjustment (Fig.20÷21)

6.1.4 Handle height/inclination adjustment (Fig.15)

6.2 SAFETY CHECKS

Always carry out the safety checks before use.

6.2.1 General safety check

Object	Result
Grips	Clean, dry.
Handle	Fixed firmly to the machine.
Blade	Clean, not damaged or worn, well sharpened.
Rear discharge guard; grass catcher	Good condition. No damage. Properly installed. Replace if damaged.
Switch command	The lever must move freely, it must not need forcing and should return automatically and rapidly back to the neutral position.
Battery	No damage to the casing, no liquid leakage.
Screws/nuts on the machine and on the cutting blade	Correctly tightened (not loose). Not damaged or worn.
Cooling air ducts	Not clogged
Machine	No signs of damage or wear. No abnormal vibrations. No abnormal sound.

Action	Result
1. Start the machine (par. 6.3). 2. Release the switch control (Fig.28).	1. The blade should move. 2. The lever should automatically and quickly return to neutral position, the engine must switch off and the blade must stop within a few seconds.

If any of the results fail to match the indications provided in the tables, do not use the machine! Contact an authorised service dealer to have it checked and repaired if necessary.

6.3 START-UP (Fig.22-25)

NOTE Start up the machine on a flat surface without obstacles or high grass.

Start of the motor simultaneously engages the cutting blade.

6.4 OPERATION (Fig.26)

IMPORTANT If the motor stops because it is overheated whilst mowing, you must wait approximately 5 minutes before restarting it.

6.4.1 Grass cutting (Fig.27)

NOTE Regulate the forward speed and the cutting height considering the conditions of the lawn (the height, density and dampness of the grass) and the amount of grass collected.

6.4.2 Emptying the grass catcher (Fig.28-29)

6.5 STOP (Fig.28)

When you have stopped the machine, it will take a few seconds for the cutting blade to stop.

IMPORTANT Always stop the machine:

- When moving between work areas.
- When driving on grass free surfaces.
- Every time it is necessary to overcome an obstacle.
- Before adjusting the cutting height.
- Whenever you remove or reattach the grass catcher.

6.6 AFTER USE

1. Open the hatch and remove the safety key.
2. Remove the battery from its housing and recharge it (par 7.2.3).
3. Allow the engine to cool before storing in an enclosed space.
4. Clean (par. 7.3).
5. Make sure there are no loose or damaged components. If necessary, replace the damaged components and tighten any screws and loose bolts or contact the authorised service dealer.
6. Check there are no damages to the machine. If necessary contact the authorised service dealer.

IMPORTANT Remove the safety key whenever the machine is unused or left unattended.

7. MAINTENANCE

The safety regulations to follow are described in chap. 2. Strictly comply with these instructions to avoid serious risks or dangers.

Before conducting any inspections, cleaning or maintenance/adjustment interventions on the machine:

- **Stop the machine.**
- **Remove the safety key, (never leave the key in the ignition or within reach of children or unauthorised persons).**
- **Remove the battery.**
- **Make sure that all moving parts have come to a complete stop.**
- **Allow the motor to cool before storing in an enclosed space.**
- **Use suitable clothing, protective gloves and goggles.**
- **Read the relevant instructions.**

7.1 BATTERY

7.1.1 Battery power reserve

Battery power reserve (the mowable lawn surface before recharging is required) mainly depends on:

- Environmental factors that cause higher energy requirements:**
 - Mowing dense, high and/or wet grass.
- Machine cutting width;** the wider the width, the greater the energy needed.
- Operator behaviour that should be avoided:**
 - Switching the machine on and off frequently whilst working.
 - Setting a cutting height that is too low for the lawn conditions.
 - Working at a speed that is too high in relation to the amount of grass to be removed.

NOTE *During use, the battery is protected against total drainage with a protective device that switches off the machine and stops it from working.*

To optimise battery power reserve, it is always recommended to:

- Cut the grass when the lawn is dry.
- Cut the grass frequently so that it doesn't grow too tall.
- Set a higher cutting height when the grass is very tall, then set a lower height and cut the lawn again.
- Do not use the machine in "mulching" mode when the grass is very tall.

If the need arises to use the machine for sessions which exceed the capability of a standard battery, it is possible to:

- Purchase a second standard battery to immediately replace the discharged battery, without compromising the continuity of operations.

Purchase a battery with an extended power reserve compared to the standard version (par. 13.2)..

7.1.2 Battery removal and recharging (Fig.30-33)

NOTE *The battery is equipped with a guard that inhibits recharging if the environmental temperature is not between 0 and +45 °C.*

NOTE *The battery can be recharged at any time, even partially, with no risk of damaging it.*

7.2 CLEANING

Clean thoroughly following the instructions below every time it is used.

7.2.1 Cleaning the machine

- Do not spray water onto the motor and electrical components and prevent them from getting wet.
- Do not use aggressive liquids to clean the chassis.
- To reduce fire hazards, keep the lawnmower and, in particular, the motor free of grass, leaves, or excessive grease.

7.2.2 Cleaning the cutting blade assembly

IMPORTANT *Tilt the machine laterally and make sure that it is stable before starting any work.*

Remove grass debris and mud accumulated in the chassis to prevent it from drying and causing problems the next time the lawnmower is used.

7.2.3 Cleaning the cooling air vents

To avoid overheating and damage to the motor or the battery, always keep the cooling air vents clean and free of debris.

Proceed as follows:

1. Tilt the machine laterally and make sure that it is stable.
2. Blow a jet of compressed air through the cooling air vents (fig 34).

7.2.4 Cleaning the grass catcher

1. Empty the grass catcher
2. Shake it to remove grass cuttings and soil residue
3. Wash it, rinse it and fit it back so as to facilitate quick drying.

7.3 BLADE

Badly sharpened blades pull at the grass and cause the lawn to turn yellow.

Do not touch the blade until the key has been removed and the blade is completely stationary. Bear in mind that, even though the key has been removed, the blade can still move.

All work on the blade (disassembly, sharpening, balancing, repairing, reassembly and/or replacing) are demanding jobs that require special skills as well as

special tools; for safety reasons, these jobs are best carried out at an authorised service dealer.

Make sure damaged, misshapen or worn blades are replaced, together with the screws in place to preserve balance.

IMPORTANT Always use original blade bearing the code indicated in the "Technical Data".

Given product evolution, the blade listed in the "Technical Data" table may be replaced in time with others having similar interchangeable and operating safety features.

8. STORAGE

8.1 STORING THE MACHINE

Store the machine only in a horizontal position and safely positioned on the ground. Do not store the machine upright.

When the machine is to be stored away:

1. Wait for the engine to cool
2. Remove the safety key.
3. Remove the battery from its slot and recharge it (par 7.2.2).
4. Clean (par. 7.3).
5. Store the machine:
 - in a dry place
 - protected from inclement weather
 - covered with a sheet if possible
 - in a place out of children's reach
 - making sure that keys or tools used for maintenance are removed.

8.2 STORING THE BATTERY

If the battery is not charged for a long period of time, it must be kept in a cool, shaded place without humidity, with environmental temperature between 0–45°C.

NOTE If unused for any length of time, recharge the battery every two months to prolong its working life.

9. HANDLING AND TRANSPORT

Whenever the machine is to be handled, lifted, transported or tilted you must:

- Stop the machine (par. 6.5)
- Remove the safety key
- Make sure that all moving parts have come to a complete stop
- Wear protective work gloves
- Hold the machine in the points offering a safe grip, taking into account the weight and its layout.
- Use an appropriate number of people for the weight of the machine and the characteristics of the transport vehicle or the place where it must be placed or collected.
- Make sure that machine handling does not cause damage or injuries.

When transporting the machine on a vehicle or trailer, always:

1. Use an access ramp of suitable strength, width and length
2. Lower the cutting blade assembly.
3. Position it so that it does not cause a hazard to anyone.
4. Fasten it firmly to the means of transport using ropes or chains to prevent it from tipping over.

10. ASSISTANCE AND REPAIRS

This manual provides all the necessary information to run the machine and for correct basic maintenance operations which can be performed by the user. Any regulations and maintenance operations not described herein must be carried out by your Dealer or Authorised Service Dealer. Any operations performed by unauthorised dealers or by unqualified persons will totally invalidate the Warranty and all obligations and responsibilities of the Manufacturer. Non-original parts and attachments are not approved; use of non-original spare parts and attachments will jeopardise the safety of the machine and relieve the Manufacturer from all obligations or liabilities. Original spare parts are supplied by authorised Dealers and by Authorised Service Dealers.

11. WARRANTY

The warranty conditions are intended for consumers only, i.e. non-professional operators. The warranty covers all material quality and manufacturing defects recognised during the warranty period by your Dealer or Authorised Service Dealer. The warranty is restricted to the repair or replacement of components recognised as faulty. It is advisable to send your machine once a year to an Authorised Service Dealer for servicing, assistance and safety inspection. The warranty only applies to machines subjected to regular maintenance. The user must follow all the instructions provided in the accompanying documentation. The warranty does not cover damages resulting from:

- Failure to become familiar with the documentation accompanying the machine (Owner's manual).
- Professional use.
- Carelessness, negligence.
- External causes (lightning, impact, presence of foreign bodies inside the machine) or incidents.
- Incorrect use or assembly or prohibited by the manufacturer.
- Poor maintenance.
- Modification to the machine.
- Use of non-genuine spare parts (adaptable parts).
- Use of attachments not supplied or not approved by the manufacturer.

The warranty does not cover:

- The routine/occasional maintenance operations (described in the instruction manual).
- Normal wear and tear of consumables such as blades, wheels, safety bolts and wiring.
- Normal wear and tear.
- Deterioration in the appearance of the machine due to use.
- Cutting blades supports.
- Any ancillary expenses related to the enforcement of the warranty, such as costs incurred to travel to

the user's location, transfer of the machine to the Dealer, rental of replacement equipment or calling of independent enterprises to perform maintenance work.

The user is protected by his or her own national legislation. The user's rights under the national laws or his or her own country are not in any way restricted by this warranty.

12. TROUBLESHOOTING

If problems persist after having performed the above operations, contact your dealer or authorised service dealer.

PROBLEM	PROBABLE CAUSE	SOLUTION
1. The engine does not start when using the switch	Safety key is not inserted or is inserted incorrectly.	Insert the key (Fig. 16.A).
	Battery is not inserted or is inserted incorrectly.	Open the hatch and check that the battery is fitted in its housing correctly (Fig. 23)
	Low battery.	Check the battery status and recharge if necessary (Par. 7.1.2).
	Motor start-up is slow.	Press and hold the control lever for 2-3 seconds (Fig. 25).
	The thermal protection has tripped due to overheating of the motor.	Wait for at least 5 minutes, then restart the machine.
2. The engine is running but the blade does not rotate	The blade fittings are loose.	Immediately turn off the motor and remove the safety key. Contact an authorised service dealer for checks, replacements or repairs (par. 7.3).
3. The motor shuts down whilst working	Battery is not inserted correctly.	Open the hatch and check that the battery is fitted in its housing correctly (Fig. 23).
	Low battery.	Check the battery status and recharge if necessary (par. 7.1.2).
	Obstructions that prevent the cutting blade rotating	Remove the safety key, put on your work gloves and remove any grass remains or debris from the lower part of the machine and/or the discharge channel.
	The thermal protection has tripped due to overheating of the motor.	Clean the cooling air vents (par. 7.2.3). Wait for at least 5 minutes, then restart the machine.
	Thermal protection has tripped due to excessive current absorption caused by: - Excessive high grass cutting. - Obstructions that prevent rotation of the blade. - Too much grass debris accumulated in the chassis and discharge channel.	- Set a higher cutting height when the grass is very tall, then set a lower height and cut the lawn again . - Remove the obstructions (par. 7.2.2). - Clean the machine (par. 7.2.1, 7.2.2, 7.2.3) Wait for at least 5 minutes, then restart the machine.

4. The cut grass is no longer collected in the grass catcher	The blade hit a foreign object	Turn off the motor and remove the safety key. Check if there is any damage and contact a Authorised Service Dealer to replace the blade if necessary. (par. 7.3)
	The inner part of the chassis is soiled	Clean the inner part of the chassis to facilitate the evacuation of the grass toward the grass catcher (par. 7.2.2)
5. Mowing is difficult.	The blade is not in good condition	Contact an authorised service dealer for the sharpening or replacement of the blade.
6. Excessive noise and/or vibration is experienced whilst working.	Blade fittings are loose or the blade is damaged.	Immediately turn off the motor and remove the safety key. Contact an authorised service dealer for checks, replacements or repairs (par. 7.3).
7. Battery power reserve is low.	Severe working conditions requiring greater current absorption.	Optimise operations (par. 7.1.1).
	Battery is insufficient for operating requirements.	Use a second battery or extended battery (par. 13.1).
8. The battery charger is not recharging the battery.	Battery is not correctly inserted in the battery charger.	Check it is correctly inserted (par. 7.1.2).
	Unsuitable environmental conditions.	Recharge the battery in places with suitable temperatures (see battery/ battery charger instruction manual).
	Dirty contacts.	Clean the contacts.
	The battery charger is not energised.	Check it is plugged in and the power socket is energised.
	Faulty battery charger.	Replace with an original spare part.
		If the problem persists, refer to the battery/battery charger manual.

13. ATTACHMENTS ON REQUEST

13.1 BATTERIES

Different capacity batteries are available to suit specific operating requirements (Fig.35). The list of approved batteries for this machine is found in the "Technical Data" table.

13.2 BATTERY CHARGER

Device used to recharge the battery (Fig. 36).
