## Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  1. You must give any other recipients of the Work or Derivative Works a copy of this License; and
  2. You must cause any modified files to carry prominent notices stating that You changed the files; and

3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any

such warranty or additional liability.

The FreeType Project LICENSE

-----

2006-Jan-27

Copyright 1996-2002, 2006 by

David Turner, Robert Wilhelm, and Werner Lemberg

## Introduction

=====

The FreeType Project is distributed in several archive packages; some of them may contain, in addition to the FreeType font engine, various tools and contributions which rely on, or relate to, the FreeType Project.

This license applies to all files found in such packages, and which do not fall under their own explicit license. The license affects thus the FreeType font engine, the test programs, documentation and makefiles, at the very least.

This license was inspired by the BSD, Artistic, and IJG (Independent JPEG Group) licenses, which all encourage inclusion and use of free software in commercial and freeware products alike. As a consequence, its main points are that:

- o We don't promise that this software works. However, we will be interested in any kind of bug reports. ('as is' distribution)
- o You can use this software for whatever you want, in parts or full form, without having to pay us. ('royalty-free' usage)
- o You may not pretend that you wrote this software. If you use it, or only parts of it, in a program, you must acknowledge somewhere in your documentation that you have used the FreeType code. ('credits')

We specifically permit and encourage the inclusion of this software, with or without modifications, in commercial products.

We disclaim all warranties covering The FreeType Project and assume no liability related to The FreeType Project.

Finally, many people asked us for a preferred form for a credit/disclaimer to use in compliance with this license. We thus encourage you to use the following text:

\*\*\*\*

Portions of this software are copyright © <year> The FreeType Project ([www.freetype.org](http://www.freetype.org)). All rights reserved.

\*\*\*\*

Please replace <year> with the value from the FreeType version you actually use.

## Legal Terms

=====

### 0. Definitions

-----

Throughout this license, the terms 'package', 'FreeType Project', and 'FreeType archive' refer to the set of files originally distributed by the authors (David Turner, Robert Wilhelm, and Werner Lemberg) as the 'FreeType Project', be they named as alpha, beta or final release.

'You' refers to the licensee, or person using the project, where 'using' is a generic term including compiling the project's source code as well as linking it to form a 'program' or 'executable'.

This program is referred to as 'a program using the FreeType engine'.

This license applies to all files distributed in the original FreeType Project, including all source code, binaries and documentation, unless otherwise stated in the file in its original, unmodified form as distributed in the original archive.

If you are unsure whether or not a particular file is covered by this license, you must contact us to verify this.

The FreeType Project is copyright (C) 1996-2000 by David Turner, Robert Wilhelm, and Werner Lemberg. All rights reserved except as specified below.

#### 1. No Warranty

-----

THE FREETYPE PROJECT IS PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OR THE INABILITY TO USE, OF THE FREETYPE PROJECT.

#### 2. Redistribution

-----

This license grants a worldwide, royalty-free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the FreeType Project (in both source and object code forms) and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions:

- o Redistribution of source code must retain this license file ('FTL.TXT') unaltered; any additions, deletions or changes to the original files must be clearly indicated in accompanying documentation. The copyright notices of the unaltered, original files must be preserved in all copies of source files.

- o Redistribution in binary form must provide a disclaimer that states that the software is based in part of the work of the FreeType Team, in the distribution documentation. We also encourage you to put an URL to the FreeType web page in your documentation, though this isn't mandatory.

These conditions apply to any software derived from or based on the FreeType Project, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

#### 3. Advertising

-----

Neither the FreeType authors and contributors nor you shall use the name of the other for commercial, advertising, or promotional purposes without specific prior written permission.

We suggest, but do not require, that you use one or more of the following phrases to refer to this software in your documentation or advertising materials: 'FreeType Project', 'FreeType Engine', 'FreeType library', or 'FreeType Distribution'.

As you have not signed this license, you are not required to accept it. However, as the FreeType Project is copyrighted material, only this license, or another one contracted with the authors, grants you the right to use, distribute, and modify it.

Therefore, by using, distributing, or modifying the FreeType Project, you indicate that you understand and accept all the terms of this license.

#### 4. Contacts

-----

There are two mailing lists related to FreeType:

o [freetype@nongnu.org](mailto:freetype@nongnu.org)

Discusses general use and applications of FreeType, as well as future and wanted additions to the library and distribution.

If you are looking for support, start in this list if you haven't found anything to help you in the documentation.

o [freetype-devel@nongnu.org](mailto:freetype-devel@nongnu.org)

Discusses bugs, as well as engine internals, design issues, specific licenses, porting, etc.

Our home page can be found at

<http://www.freetype.org>

--- end of FTL.TXT ---

The TWAIN Toolkit is distributed as is. The developer and distributors of the TWAIN Toolkit expressly disclaim all implied, express or statutory warranties including, without limitation, the implied warranties of merchantability, noninfringement of third party rights and fitness for a particular purpose. Neither the developers nor the distributors will be liable for damages, whether direct, indirect, special, incidental, or consequential, as a result of the reproduction, modification, distribution or other use of the TWAIN Toolkit.

## **Main Components and Their Use**

---

- **Main Components**
- **Power Supply**
- **Loading Paper**
- **Placing Multi-purpose Tray**
- **Loading Originals**
- **Inserting the Memory Card**

## **Main Components**

---

- **Front View**
- **Rear View**
- **Inside View**
- **Operation Panel**

## Front View

### A: Document Cover

Open to load an original on the platen.

### B: Platen

Place the original on the platen glass. When replacing ink tanks, lift the scanner unit that includes the platen glass to open.

### C: Operation Panel

Use to change the settings of the printer or to operate it. The panel is pushed open by the paper output tray before printing starts.

When closing, push gently toward the printer.

➔ [Operation Panel](#)

## D: Rear Tray

Two or more sheets of the same size and type of paper can be loaded at the same time, and fed automatically one sheet at a time.

➔ [Loading Photo Paper / Plain Paper in Rear Tray](#)

➔ [Loading Envelopes in Rear Tray](#)

## E: Paper Guides

Align with both sides of the paper stack.

## F: Rear Tray Cover

Open to load paper in the rear tray.

## G: Paper Support

Extend to load paper in the rear tray.

## H: Feed Slot Cover

Prevents anything from falling into the feed slot.

Open it to slide the paper guides, and close it before printing.

## I: Paper Output Tray

Printed paper is ejected. Pull out it before printing.

## J: Paper Output Support

Open to support ejected paper.

## K: Cassette Cover

Detach to load paper in the cassette.

## L: Paper Guides

Align with right/left/front sides of the paper stack.

## M: Multi-purpose Tray

Use when printing on printable discs, etc. Store behind the cassette when not using.

➔ [How to Detach / Attach Multi-purpose Tray](#)

## N: Cassette

Load A4, B5, A5 or Letter-sized plain paper into the cassette, and insert it into the printer.

➔ [Loading Plain Paper in Cassette](#)

**O: Access lamp**

Lights or flashes to indicate the memory card status.

➔ [Inserting the Memory Card](#)

**P: Card Slot**

Insert a memory card.

➔ [Before Inserting the Memory Card](#)

## Rear View

### A: USB Port

Plug in the USB cable to connect the printer with a computer.

### B: Power Cord Connector

Plug in the supplied power cord.

### C: Rear Cover

Detach when removing jammed paper.

### D: Transport Unit

Open when removing jammed paper. When removing the unit, do so after placing a finger on the depression in the center right.

## ▶▶▶ Important

- Do not touch the metal casing.
- Do not plug in or unplug the USB cable while the printer is printing or scanning with the computer. This can cause trouble.

## Inside View

### A: Scanning Unit / Cover

Scans originals. Also, lift and open it to replace an ink tank or to remove jammed paper inside the printer.

### B: Print Head Holder

The print head is pre-installed.

### ▶▶▶ Note

- For details on replacing an ink tank, see [Replacing Ink Tanks](#).

## Operation Panel

---

### A: ON lamp

Lights after flashing when the power is turned on.

### B: ON button

Turns the power on or off. Before turning on the power, make sure that the document cover is closed.

➡ [Turning the Printer On and Off](#)

### C: Touch Screen

Displays messages, menu items, and operating status. Touch the screen lightly with your finger to select a menu item or button.

➡ [Using Touch Screen](#)

## Using Touch Screen

The HOME screen on the touch screen appears when the printer is turned on.

Touch the HOME screen on the touch screen with your finger tip to select menus for copying, scanning, and other functions.

- ➔ [HOME Screen](#)
- ➔ [Icons on Touch Screen](#)
- ➔ [Basic Operation of the touch screen](#)

### HOME Screen

#### A: Switching the HOME screen

There are three types of HOME screens in addition to the standard HOME screen. You can switch to any of the HOME screens.

The icon will appear if a password is set for the HOME screen and it is unlocked.

- ➔ [Editing HOME Screens](#)

#### B: Basic menu

Select to copy or scan using the operation panel.

#### C: Network

Displays the current network status. Select to display the basic network information or to change the network settings.

The icon differs depending on the network of use or the network status.

Wi-Fi is enabled and the printer is connected to the wireless router.

#### ▶▶▶ Note

- Depending on the signal state, the icon will change.

(Signal strength: 81 % or more): You can use the printer over Wi-Fi without any problems.

(Signal strength: 51 % or more): The problem such as the printer cannot print may occur according to the network status. We recommend placing the printer near the wireless router.

(Signal strength: 50 % or less): The problem such as the printer cannot print may occur. Place the printer near the wireless router.

Wi-Fi is enabled but the printer is not connected to the wireless router.

Wireless Direct is enabled.

Wi-Fi and Wireless Direct are disabled.

#### D: Wireless connect

Select to connect the printer to a smartphone/tablet over Wi-Fi through Easy wireless connect.

Tap this button to display a confirmation screen for starting a connection.

➔ Easy wireless connect

The printer has been already put into the standby mode for easy wireless connect and smartphone

when a  is displayed.

#### E: Setup

Displays the printer's setting menus or the maintenance menus.

(NEW) appears when there is an information from PIXMA/MAXIFY Cloud Link.

➔ Using PIXMA/MAXIFY Cloud Link

#### F: Hint

Displays quick guides about such procedures as loading paper and troubleshooting and such information as estimated ink level and system information.

If you set **Notification settings** to Enable,  (NEW) is displayed when notification is sent to Canon.

➔ [Notification settings](#)

#### ▶▶▶ Note

- For details on how to change settings, refer to [Changing Settings from Operation Panel](#).

## Icons on Touch Screen

While operating on the touch screen, some icons are displayed on the touch screen.

**(HOME)**

Displays the HOME screen.

**(Back)**

Returns the touch screen to the previous screen.

**(Black)**

Starts black & white copying and scanning etc.

**(Color)**

Starts color copying and scanning etc.

**(Stop)**

Cancels operation when print, copy, or scan job is in progress.

## Basic Operation of the touch screen

Touch the touch screen lightly with your finger tip or move your finger to access various functions or settings.

### ►►► Important

- When operating the touch screen, make sure to avoid the followings, which may cause the printer to malfunction or damage the printer.

- Strongly pressing the touch screen.
- Pressing the touch screen with other than your finger (especially with sharpened tips, such as on ballpoint pens, pencils, or nails).
- Touching the touch screen with wet or dirty hands.
- Placing any objects on the touch screen.
- Do not attach a protective sheet on the touch screen. Removing it may damage the touch screen.

### **Tap**

Touch lightly with your finger tip and immediately release.

Use to select an item or photo on the screen.

### **Touch**

Touch lightly with your finger tip.

To move forward (or go back) menus or photos continuously, keep touching the forward (or back) mark.

### **Flick**

Flick your finger on the screen up, down, left, or right.

Use to switch menus or move forward or backward through photos.

### **Drag**

While lightly touching the screen, move your finger up, down, left, or right.

Use to view lists of items or move sliders.

➔ [Entering Numbers, Letters, and Symbols](#)

## Entering Numbers, Letters, and Symbols

In the printer, you can enter (or correct) the characters and numbers when the keyboard is displayed on the screen.

The character is allocated to each key displayed on the screen. Tap the key to enter the character.

After entry is completed, tap  for determination.

 Switch the character entry mode.

 Switch the upper-/lower-case letters or symbols on a keyboard.

 Delete the characters entered just before.

 Insert a blank (space).

 Determine the contents of entered data.

 Move the cursor.

To insert the character, move the cursor to the character on the right of the position where you want to insert the character.

To delete the character, move the cursor to the character you want to delete.

### ▶▶▶ **Note**

- Only the input modes or characters available for input appear in their respective screens.
- You can switch the layout of a keyboard.

➡ [Other printer settings](#)

## Power Supply

---

- ▶ **Turning the Printer On and Off**

## Turning the Printer On and Off

- ➔ [Checking that Power Is On](#)
- ➔ [Turning on the printer](#)
- ➔ [Turning off the printer](#)

### Checking that Power Is On

The **ON** lamp is lit when the printer is turned on.

Even if the touch screen is off, if the **ON** lamp is lit, the printer is on.

#### ➤➤➤ Note

- The touch screen display will turn off if the printer is not operated for about 10 minutes. To restore the display, touch the touch screen. The display is also activated again when an original is printed from a computer.

### Turning on the printer

Press the **ON** button to turn on the printer.

The **ON** lamp flashes and then remains lit.

#### ➤➤➤ Note

- It may take a while for the printer to start printing immediately after you turn on the printer.
- If an error message is displayed on the touch screen, see [When Error Occurred](#).
- You can set the printer to automatically turn on when a print or scan operation is performed from a computer connected by USB cable or wireless network. This feature is set to off by default.

From the printer

## Turning off the printer

1. Press the **ON** button to turn the printer off.

### ➤➤➤ Note

- You can set the printer to automatically turn off when no operations are performed or no print jobs are sent to the printer for a certain interval. This feature is set to on by default.

2. Confirm that the **ON** lamp is off.

### ➤➤➤ Important

- When you unplug the power cord, press the **ON** button, then confirm that the **ON** lamp is off. Unplugging the power cord while the **ON** lamp is lit or flashing may cause drying or clogging of the print head and print quality may be reduced.

## **Loading Paper**

---

- **Paper Sources**
- **Loading Photo Paper / Plain Paper in Rear Tray**
- **Loading Plain Paper in Cassette**
- **Loading Envelopes in Rear Tray**

## Paper Sources

The printer has two paper sources for feeding paper, the rear tray and cassette. With the plain paper loaded in a cassette, you can also load paper on the rear tray to make prints.

- ➔ [Rear tray](#)
- ➔ [Cassette](#)

### Rear tray

You can load all supported paper such as photo paper and plain paper on the rear tray.

- ➔ [Loading Photo Paper / Plain Paper in Rear Tray](#)
- ➔ [Loading Envelopes in Rear Tray](#)

### Cassette

You can load A4, B5, A5 or Letter-sized plain paper in the cassette.

➔ [Loading Plain Paper in Cassette](#)

## »» Note

- For details on paper that can be used in this printer:
  - ➔ [Supported Media Types](#)
- Your model used may differ from a product series name when you gain access to this manual from a QR code. Select a product name from the link below when you want to refer to the manual of your model.
  - ➔ [Paper Sources](#)

## Loading Photo Paper / Plain Paper in Rear Tray

You can load photo paper or plain paper.

You can also load envelopes on the rear tray.

### ➔ [Loading Envelopes in Rear Tray](#)

#### 1. Prepare paper.

Align the edges of paper. If paper is curled, flatten it.

#### »» Note

- Align the edges of paper neatly before loading. Loading paper without aligning the edges may cause paper jams.
- If paper is curled, hold the curled corners and gently bend them in the opposite direction until the paper becomes completely flat.

For more details on handling curled paper, see **Check 3** in [Paper Is Smudged/Printed Surface Is Scratched/Ink Blots/Paper Curl](#).

- When using **Photo Paper Plus Semi-gloss SG-201**, even if the sheet is curled, load one sheet at a time as it is. If you roll up this paper to flatten, this may cause cracks on the surface of the paper and reduce the print quality.

#### 2. Open rear tray cover (A). Pull straight up and fold back paper support (B).

#### 3. Open the feed slot cover (C).

4. Slide right paper guide (D) to open both paper guides.

5. Load paper stack in portrait orientation WITH THE PRINT SIDE FACING UP.

## ▶▶▶ Important

- Always load paper in portrait orientation (E). Loading paper in landscape orientation (F) can cause paper jams.

### 6. Move the right paper guide and adjust the guides to both edges of the paper stack.

Do not slide the paper guides too tightly against the paper. The paper may not be fed properly.

## ▶▶▶ Note

- Do not load sheets of paper higher than the load limit mark (G).

### 7. Close feed slot cover gently.

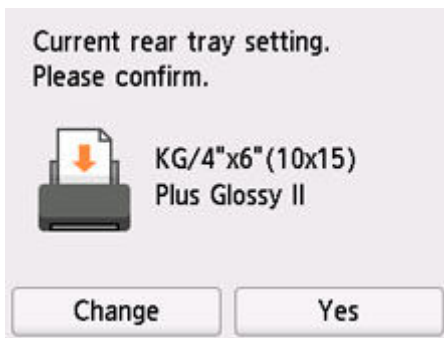

After closing the feed slot cover, the envelope setting confirmation screen for the rear tray appears on the touch screen.

8. If page size and media type on touch screen match size and type of paper loaded in rear tray, select **Yes**.

If not, select **Change** to change the settings in accordance with the size and type of the loaded paper.

#### ▶▶▶ Note

- See [Detect paper width](#) when you want to hide the screen for confirming the setting of paper.

#### ▶▶▶ Note

- There are various types of paper, such as paper with a special surface coating for printing photos at optimal quality and paper suitable for documents. Each media type has specific preset settings (how ink is used and sprayed, distance from nozzles, etc.), that allow you to print to that type with optimal image quality. The wrong paper settings may cause poor printout color quality or scratches on the printed surface. If you notice blurring or uneven colors, increase the print quality setting and try printing again.
- To prevent incorrect printing, this printer has a function that detects whether the settings for the paper loaded on the rear tray matches the paper settings. Before printing, make print settings in accordance with the paper settings.

## Related Information

➔ [Supported Media Types](#)

## Loading Plain Paper in Cassette

You can load A4, B5, or A5 plain paper in the cassette.

### 1. Prepare paper.

Align the edges of paper. If paper is curled, flatten it.

### ►► Note

- Align the edges of paper neatly before loading. Loading paper without aligning the edges may cause paper jams.
- If paper is curled, hold the curled corners and gently bend them in the opposite direction until the paper becomes completely flat.

For more details on handling curled paper, see **Check 3** in [Paper Is Smudged/Printed Surface Is Scratched/Ink Blots/Paper Curl](#).

### 2. Pull out the cassette (A) from the printer.

### 3. Remove the cassette cover (B).

4. Slide right paper guide (C) to open both paper guides.

5. Slide the paper guide (D) in front according to the page size.

- For A5 size

- For B5 size

- For A4 size

6. Load paper stack in portrait orientation WITH THE PRINT SIDE FACING DOWN, and place it along the paper guide in front.

Place A4-sized paper to conform with the front of the cassette.

**»» Important**

- Always load paper in portrait orientation (E). Loading paper in landscape orientation (F) can cause paper jams.

E

F

### ►► Note

- Keep the paper stack height below the tabs (G) of the paper guides.

7. Move the right paper guide and adjust the guides to edges of the paper stack.

Do not slide the paper guide too tightly against the paper. The paper may not be fed properly.

**8.** Install the cassette cover.

**9.** Insert cassette into printer.

Push the cassette into the printer until it stops.

## ▶▶▶ Note

- To prevent incorrect printing, this printer has a function that detects whether the settings for the paper loaded in the cassette matches the paper settings. Before printing, make print settings in accordance with the paper settings.

## ▮ Related Information

## Loading Envelopes in Rear Tray

You can load envelopes on the rear tray.

The address is automatically rotated and printed according to the envelope's direction by specifying with the printer driver properly.

### Important

- Do not use the following envelopes. They could jam in the printer or cause the printer to malfunction.
  - Envelopes with an embossed or treated surface
  - Envelopes with a double flap
  - Envelopes whose gummed flaps are already moistened and adhesive

#### 1. Prepare envelopes.

- Press down on all four corners and edges of the envelopes to flatten them.

- If the envelopes are curled, hold the opposite corners and gently twist them in the opposite direction.

- If the corner of the envelope flap is folded, flatten it.
- Use a pen to press the leading edge in the inserting direction flat and sharpen the crease.

The figures above show a side view of the leading edge of the envelope.

### Important

- The envelopes may jam in the printer if they are not flat or the edges are not aligned. Make sure that no curl or puff exceeds 0.12 in. (3 mm).

#### 2. Open rear tray cover (A). Pull straight up and fold back paper support (B).

3. Open the feed slot cover (C).

4. Slide right paper guide (D) to open both paper guides.

5. Load envelopes in portrait orientation WITH THE PRINT SIDE FACING UP.

Up to 10 envelopes can be loaded at once.

Fold flap of the envelope and load the envelope in portrait orientation with the address side facing up.

**6.** Move the right paper guide and adjust the guides to both edges of the envelopes.

Do not slide the paper guides too tightly against the envelopes. The envelopes may not be fed properly.

**►► Note**

- Do not load envelopes higher than the load limit mark (E).

**7.** Close feed slot cover gently.

After closing the feed slot cover, the envelope setting confirmation screen for the rear tray appears on the touch screen.

8. If page size and media type shown on touch screen match size and type of envelopes loaded in rear tray, select **Yes**.

If not, select **Change** to change the settings in accordance with the size and type of the loaded envelopes.

#### ▶▶▶ Note

- See [Detect paper width](#) when you want to hide the screen for confirming the setting of paper.

#### ▶▶▶ Note

- To prevent incorrect printing, this printer has a function that detects whether the settings for the paper loaded on the rear tray matches the paper settings. Before printing, make print settings in accordance with the paper settings.

---

- **Cautions When Printing with Multi-purpose Tray**
- **Placing/Removing a Printable Disc**
- **How to Detach / Attach Multi-purpose Tray**

## Cautions When Printing with Multi-purpose Tray

---

### Cautions Common to using Multi-purpose Tray

- Be sure to use the multi-purpose tray supplied with this printer.
- Do not mount the multi-purpose tray while the printer is in operation.
- Do not remove the multi-purpose tray while the printer is in operation. Doing so may damage the printer, the multi-purpose tray, or the media.
- Do not get dirt on the multi-purpose tray or scratches on the reflectors. The printer may not be able to recognize that a media is loaded, or printing may become misaligned. If the multi-purpose tray becomes dirty, wipe the reflector clean with a soft and dry cloth, taking care not to scratch it.
- After printing, allow the printing surface of the media to dry naturally. Do not use hairdryers or expose the media to direct sunlight to dry the ink. Do not touch the printing surface until the ink has dried.

### Cautions When Printing onto Printable Disc

- Remove any dirt from the multi-purpose tray before placing printable discs on it. Loading discs on a dirty multi-purpose tray may scratch the recording surface of the discs.
- Do not print onto printable discs that are not compatible with inkjet printing. The ink will not dry and may cause problems with the disc itself or DVD players or other devices it is loaded into.
- Do not print onto a printable disc's recording surface. Doing so will make data recorded onto discs unreadable.
- Hold printable discs by their edges. Do not touch either the label surface (printing surface) or recording surface.
- The multi-purpose tray may become dirty if software other than Easy-PhotoPrint Editor is used.

## Placing/Removing a Printable Disc

- [Before Placing a Printable Disc](#)
- [Placing a Printable Disc](#)
- [Removing a Printable Disc](#)

### Before Placing a Printable Disc

A printable disc differs from regular disc (BD/DVD/CD, etc.) in that its label surface has been specially processed or printing by an inkjet printer.

The following items are needed to print onto the printable disc.

- Multi-purpose tray (supplied with the printer)

The multi-purpose tray is stored in the multi-purpose tray storage compartment of the paper output tray.

➔ [Detaching Multi-purpose Tray](#)

- 4.72 in. (12 cm) printable disc

Obtain a printable disc with a label surface compatible with inkjet printing.

### Placing a Printable Disc

To print onto a printable disc, place it on the supplied multi-purpose tray, and then insert it into the printer.

This procedure also applies to printing from a computer.

#### ➤➤➤ Important

- Do not mount the multi-purpose tray until the message prompting you to load the printable disc appears. Doing so can damage the printer.

#### ➤➤➤ Note

- If test printing is executed onto test printing paper, depending on the paper type, the printer may not be able to read its size correctly, preventing the border areas from being printed. Test printing paper should be used for purposes of checking the envisioned layout.

1. When message prompting you to load printable disc appears, detach multi-purpose tray (B) from back of cassette (A).

Insert the removed cassette back into the printer.

2. Place printable disc on multi-purpose tray.

**»» Important**

- Check that there is no dirt on the multi-purpose tray before placing a printable disc on it.
- When placing a printable disc on the multi-purpose tray, do not touch the printing surface of the disc or the reflectors (C) on the multi-purpose tray.

1. WITH PRINT SIDE FACING UP, place printable disc, and press it against lock (D) at bottom.

2. While pressing down lock with printable disc, insert top of printable disc into slits (E).

3. Check the placement location of the multi-purpose tray.

4. Place multi-purpose tray on the printer.

5. Insert multi-purpose tray straight in in horizontal direction until arrow (▼) on the printer is approximately aligned with arrow (▲) on multi-purpose tray.

**▶▶▶ Important**

- Do not insert the multi-purpose tray beyond the arrow (▼) on the printer.

### ►► Note

- The multi-purpose tray may be ejected after a certain amount of time passes. In such a case, follow the on-screen instructions to place the multi-purpose tray again.

## Removing a Printable Disc

1. Pull out multi-purpose tray.

2. While pressing down lock (A), take out printable disc from slits (B) on multi-purpose tray, and remove it.

### ►► Important

- Do not touch the printing surface when removing the disc from the multi-purpose tray.

### ►► Note

- Allow the printing surface to dry before removing the disc. If you see printing on the multi-purpose tray or on the transparent parts of the inner or outer diameters of the printable disc, wipe them clean after the printing surface has dried.

3. Store multi-purpose tray under cassette.

➔ [Attaching Multi-purpose Tray](#)

## **Related Information**

- ➔ [Cautions When Printing with Multi-purpose Tray](#)
- ➔ Print Area (Printable Discs)

## How to Detach / Attach Multi-purpose Tray

### Detaching Multi-purpose Tray

1. Take the cassette (A) out of the printer and remove the cassette cover (B).
2. Turn cassette over and remove multi-purpose tray (C).

Slide the multi-purpose tray, take it out of the six tabs, and then lift it.

### ►► Important

- Be sure to remove any orange shipping tape on the multi-purpose tray.

## Attaching Multi-purpose Tray

1. Take cassette out of printer.

Be sure to remove any paper.

2. Turn cassette over and attach multi-purpose tray to it.

Turn the multi-purpose tray so that its underside faces up, align it with the six tabs, and then slide to attach.

**»» Important**

- Insert the multi-purpose tray, making sure that its holes are aligned with the tabs on the back of the cassette. If the multi-purpose tray is not properly attached, it may be damaged when the cassette is inserted into the printer.

## **Loading Originals**

---

- **Loading Originals on Platen**
- **Loading Based on Use**
- **Supported Originals**
- **How to Detach / Attach the Document Cover**

## Loading Originals on Platen

---

1. Open the document cover (A).

2. Load original WITH THE SIDE TO SCAN FACING DOWN on platen.

- ➔ [Loading Based on Use](#)
- ➔ [Supported Originals](#)

### »» Important

- Be sure to observe the following when loading the original on the platen. Failure to observe the following may cause the scanner to malfunction or the platen glass to break.
  - Do not place any objects weighing 4.4 lb (2.0 kg) or more on the platen glass.
  - Do not put any pressure of 4.4 lb (2.0 kg) or more on the platen glass, such as pressing down the original.

3. Close the document cover gently.

## **»» Important**

- After loading the original on the platen, be sure to close the document cover before starting to copy or scan.

## Loading Based on Use

Load the original in the correct position according to the function to use. If you do not load the original correctly, it may not be scanned properly.

Originals	Function	How to Load
Magazines, Newspapers, and Documents	<b>Copying</b>	➡ <a href="#">Loading the Original to Be Aligned with the alignment mark</a>
	<b>Scanning by detecting the type and size of the original automatically</b> If you scan using the operation panel, select <b>Auto scan</b> for <b>Doc.type</b> in <b>Scan</b> .	
	<b>Scanning by specifying a standard size (A4, Letter, etc.)</b> If you scan using the operation panel, select <b>Document</b> or <b>Photo</b> for <b>Doc.type</b> in <b>Scan</b> and specify a standard size (A4, Letter, etc.) for <b>Scan size</b> to scan originals.	
Photos, Postcards, Business Cards, and Disc (BD/DVD/CD)	<b>Scanning only one original</b> If you scan using the operation panel, follow the operation below. <ul style="list-style-type: none"> <li>• Select <b>Auto scan</b> for <b>Doc.type</b> in <b>Scan</b>.</li> <li>• Select <b>Photo</b> for <b>Doc.type</b> in <b>Scan</b> and specify <b>Auto scan</b> for <b>Scan size</b> to scan originals.</li> </ul>	➡ <a href="#">Loading Only One Original in Center of Platen</a>
	<b>Scanning two or more originals</b> If you scan using the operation panel, follow the operation below. <ul style="list-style-type: none"> <li>• Select <b>Auto scan</b> for <b>Doc.type</b> in <b>Scan</b>.</li> <li>• Select <b>Photo</b> for <b>Doc.type</b> in <b>Scan</b> and specify <b>Auto multi scan</b> for <b>Scan size</b> to scan two or more originals.</li> </ul>	➡ <a href="#">Loading Two or More Originals on Platen</a>

## Loading the Original to Be Aligned with the alignment mark

Place the original WITH THE SIDE TO SCAN FACING DOWN on the platen and align it with the alignment mark . Portions placed on the diagonally striped area cannot be scanned.

### ▶▶▶ Important

- The printer cannot scan the striped area (A) (0.04 in. (1 mm) from the edges of the platen glass).

### Loading Only One Original in Center of Platen

Place the original WITH THE SIDE TO SCAN FACING DOWN, with 0.40 in. (1 cm) or more space between the edges (diagonally striped area) of the platen. Portions placed on the diagonally striped area cannot be scanned.

## Loading Two or More Originals on Platen

Place the originals WITH THE SIDE TO SCAN FACING DOWN. Allow 0.40 in. (1 cm) or more space between the edges (diagonally striped area) of the platen and the originals, and between the originals. Portions placed on the diagonally striped area cannot be scanned.

You can place up to 12 items.

B: More than 0.40 in. (1 cm)

### ►► Note

- The Skew Correction function automatically compensates for the originals placed at an angle of up to approximately 10 degrees. Slanted photos with a long edge of 7.1 in. (180 mm) or more cannot be corrected.
- Non-rectangular or irregular shaped photos (such as cut out photos) may not be scanned properly.

## Supported Originals

Item	Details
Types of originals	Text document, magazine, or newspaper Printed photo, postcard, business card, or disc (BD/DVD/CD, etc.)
Size (width x height)	Max. 8.5 x 11.7 in. (216 x 297 mm)

### ▶▶▶ Note

- When loading a thick original such as a book on the platen, you can load it by removing the document cover from the printer.

➡ [How to Detach / Attach the Document Cover](#)

## How to Detach / Attach the Document Cover

### Detaching the document cover:

Hold up the document cover in portrait orientation and then tip it back.

### Attaching the document cover:

Fit both hinges (A) of the document cover into the holder (B) and insert both hinges of the document cover vertically.

## **Inserting the Memory Card**

---

- **Before Inserting the Memory Card**
- **Inserting the Memory Card**
- **Removing the Memory Card**

## Before Inserting the Memory Card

The following types of memory cards and image data are compatible with the printer.

### ▶▶ Important

- Format the memory card using a digital camera compliant with the Design rule for Camera File system (Exif 2.2/2.21/2.3 compliant), TIFF (Exif 2.2/2.21/2.3 compliant). The memory card may not be compatible with the printer if it is formatted on a computer.

### Memory Cards that Do Not Require a Card Adapter

- SD Secure Digital memory card, SDHC memory card, SDXC memory card

### Memory Cards that Require a Card Adapter

Be sure to attach the special card adapters to the following memory cards before inserting into the card slot.

- miniSD Card, miniSDHC Card

Use the special "SD Card Adapter".

- microSD Card, microSDHC Card, microSDXC Card

Use the special "SD Card Adapter".

### ▶▶ Important

- If one of the following memory cards is inserted without the card adapter, you may not be able to remove the memory card.

➡ Cannot Remove Memory Card

### Printable Image Data

- This printer accepts JPEG data taken with cameras conforming to Design Rule for Camera File System specifications, as well as TIFF images. Other image or movie types such as RAW images cannot be printed.
- The printer accepts images scanned and saved with the printer when **Doc.type** is set to **Photo** and **Format** is set to **JPEG** (file extension ".jpg").

**»» Note**

- This device incorporates exFAT technology licensed from Microsoft.

## Inserting the Memory Card

### Important

- When a memory card is inserted into the card slot, the **Access** lamp is lit. When the **Access** lamp is flashing, the printer is accessing the memory card. In this case, do not touch the area around the card slot.

### Note

- When **Read/write attribute** is set to **Writable from USB PC**, you cannot print image data from the memory card using the operation panel of the printer. After using the card slot as the memory card drive of a computer, remove the memory card, select **Other printer settings** in **Printer settings**, then set **Read/write attribute** to **Write-protected from PC**.
  - ➔ [Setting Up Card Slot as Memory Card Drive of Computer](#)
- When you use a computer to edit or enhance photos saved on a memory card, be sure to print them from the computer. If you use the operation panel, the photos may not be printed properly.

#### 1. Prepare your memory card.

Attach a special card adapter if your memory card requires one.

- ➔ [Before Inserting the Memory Card](#)

#### 2. Insert the memory card into the card slot.

Insert your memory card straightforward WITH THE LABELED SIDE FACING UP into the card slot.

When the memory card is inserted properly, the **Access** lamp (A) will light up.

### Important

- Part of the memory card will protrude from the card slot, but do not force it into the slot any further. This can damage the printer or the memory card.

- Make sure that the memory card is correctly oriented before inserting it into the card slot. If you force the memory card into the card slot in the wrong orientation, the memory card or the printer can be damaged.

## Removing the Memory Card

---

### ▶▶ Important

- If you used the card slot as the memory card drive of a computer, you must perform the "safe removal" operation on your computer before physically removing the memory card from the printer.

### **Make sure that the Access lamp is lit, and remove the memory card.**

Hold the part of the memory card that is protruding and remove it straightforward from the printer.

### ▶▶ Important

- Do not remove the memory card while the **Access** lamp is flashing. The **Access** lamp flashes while the printer is reading or writing data from/to the memory card. If you remove the memory card or turn off the power while the **Access** lamp is flashing, the data saved on the memory card can be damaged.

## **Replacing Ink Tanks**

---

- **Replacing Ink Tanks**
- **Checking Ink Status on the Touch Screen**

## Replacing Ink Tanks

When remaining ink cautions or errors occur, the message will appear on the touch screen to inform you of the error. In this state, the printer cannot print or scan. Take appropriate action according to the message.

➔ [When Error Occurred](#)

### ▶▶▶ Note

- For precautionary notes on handling ink tanks, see [Notes on ink tanks](#).

## Replacing Procedure

When you need to replace an ink tank, follow the procedure below.

1. [Check that printer is turned on.](#)
2. Open the scanning unit / cover (A).

The print head holder (B) moves to the replacement position.

### ⚠ Caution

- Do not hold the print head holder to stop or move it forcibly. Do not touch the print head holder until it stops completely.

### ▶▶▶ Important

- Do not touch the metallic parts or other parts inside the printer.

3. Remove the ink tank where the ink runs out.

Push the tab (C) and lift the ink tank to remove.

**Important**

- Do not touch other parts besides the ink tanks.

4. Take a new ink tank out of its package, remove the orange tape (D) completely, then remove the protective film (E) completely.

**Important**

- If the orange tape remains on the Y-shape air hole (F), ink may splash or the printer may not print properly.

5. Hold the ink tank with the orange protective cap (G) pointing up while being careful not to block the Y-shape air hole.

6. Lift up the tab on the orange protective cap to remove it off GENTLY.

**»» Important**

- Do not push the sides of the ink tank. If you push the sides of the ink tank with the Y-shape air hole blocked, ink may splash.
- Do not touch the inside of the orange protective cap or the open ink port (H). The ink may stain your hands if you touch them.

7. Insert the front end of the ink tank into the print head at a slant.

Make sure that the position of the ink tank matches the label.

8. Press on the top of the ink tank until the ink tank snaps firmly into place.

**»» Important**

- You cannot print if the ink tank is installed in the wrong position. Be sure to install the ink tank in the correct position according to the label on the print head holder.
- You cannot print unless all the ink tanks are installed. Be sure to install all the ink tanks.

9. Close the scanning unit / cover.

To close the scanning unit / cover, lift it up slightly and then lower it gently.

### **⚠ Caution**

- When closing the scanning unit / cover, be careful not to get your fingers caught.

## **Notes on ink tanks**

### **▶▶▶ Important**

- If you remove an ink tank, replace it immediately. Do not leave the printer with the ink tank removed.
- Use a new ink tank for replacement. Installing a used ink tank may cause the nozzles to clog. Furthermore, with such an ink tank, the printer will not be able to inform you when to replace the ink tank properly.
- Once an ink tank has been installed, do not remove it from the printer and leave it out in the open. This will cause the ink tank to dry out, and the printer may not operate properly when it is reinstalled. To maintain optimal printing quality, use an ink tank within six months of first use.

### **▶▶▶ Note**

- Color ink may be consumed even when printing a black-and-white document or when black-and-white printing is specified. Every ink is also consumed in the standard cleaning and deep cleaning of the print head, which may be necessary to maintain the performance of the printer.

When an ink tank is out of ink, replace it immediately with a new one.

➔ [Ink Tips](#)

## Checking Ink Status on the Touch Screen

1. [Check that printer is turned on.](#)

2. Select  (Hint) on HOME screen.

➔ [Using Touch Screen](#)

The hint menu screen will appear.

3. Select  **Estimated ink levels.**

A symbol appears in the area A if there is any information about the remaining ink level.

-  The ink is running low. Prepare a new ink tank.
-  Ink has run out. Replace the ink tank with a new ink tank.

➔ [Replacing Ink Tanks](#)

-  This appears when remaining ink level is not known.

### ▶▶▶ Note

- The above screen shows estimated ink levels.
- To access the ink purchasing site, select **Order ink now** on this screen and display the QR code. Cost of connecting to Internet is to be born by the customer.
- Selecting **Ink model no.** displays the **Ink model number** screen for checking ink numbers.
- You can also check the ink status on a screen of the touch screen displayed while printing.
- You can also check the ink status on the computer screen.
  - For Windows:
    - ➔ [Checking Ink Status from Your Computer](#)
  - For macOS:
    - ➔ [Checking Ink Status from Your Computer](#)

## Restrictions

When connecting another device while a device (such as a computer) is already connected to the printer, connect it using the same connection method as the connected device.

If you connect using a different connection method, the connection to the device in use will be disabled. However, you can use a Wi-Fi connection and Wireless Direct at the same time.

For restrictions, see the following.

### Connect via wireless router

- Make sure your device and the wireless router are connected. For details on checking these settings, see the manual supplied with the wireless router or contact its manufacturer.  
As for a device already connected to the printer without using a wireless router, reconnect it via a wireless router.
- Configuration, router functions, setup procedures and security settings of wireless routers vary depending on the system environment. For details, see the manual for your wireless router or contact its manufacturer.
- Depending on your country or region, this printer does not support wireless networking standards using the 5 GHz band.
- If the current channel bandwidth setting on your device does not include 20 MHz, TKIP cannot be used for a security protocol. Change the setting to something that includes 20 MHz. For improved security, we recommend that you set to AES together with WPA2 or higher security.  
The connection between your device and the wireless router will be temporarily disabled while the setting is changed. Do not proceed to the next screen of this guide until setup is complete.
- When connecting to Wi-Fi outdoors, do not connect to a 5 GHz network (SSID).  
The 5 GHz band available for use with the printer includes the channels that are allowed for indoor use only, depending on your country or region.  
For details on the 5 GHz network (SSID) of your wireless router, see the manual supplied with the wireless router, or contact its manufacturer.
- For office use, consult your network administrator.
- Note that if you connect to a network with no security protection, your personal information could be disclosed to a third party.

### Wireless Direct

#### ▶▶ Important

- If a device is connected to the Internet via a wireless router, and you then connect it to a printer in Wireless Direct mode, the existing connection between the device and wireless router will be disabled. In that case, the connection of the device may switch to a mobile data connection automatically depending on your device. When you connect to the Internet using a mobile data connection, charges may apply depending on your contract.
  - When you connect a device and the printer using Wireless Direct, the connection information will be saved to Wi-Fi settings. The device may be connected to the printer automatically even after disconnecting it or connecting it to another wireless router.

- To prevent automatic connection to the printer in Wireless Direct mode, change the connection mode after using the printer, or set not to connect automatically in the Wi-Fi settings of the device.

For details on changing the settings of your device, see the manual supplied with the device or contact its manufacturer.

- If you connect a device and the printer using Wireless Direct, Internet connection may become unavailable depending on your environment. In that case, web services for the printer cannot be used.
- In Wireless Direct mode, you can connect up to five devices at the same time. If you try to connect a sixth device while five devices are already connected, an error will appear.  
If an error appears, disconnect a device that does not use the printer, and then redo the settings.
- Wireless Direct connects a device (such as a computer) to the printer at 2.4 GHz.  
To connect at 5 GHz, enable Wireless Direct, and then set the frequency band to 5 GHz.  
Depending on your country or region, this printer does not support Wireless Direct using the 5 GHz band.
- Devices connected to the printer using Wireless Direct cannot communicate with each other.
- When a device has been connected to the printer without using a wireless router and you want to set it up again using the same connection method, disconnect it first. Disable the connection between the device and printer in the Wi-Fi setting screen.

## Detect Same Printer Name

When the printer is detected during setup, plural printers with the same name may appear on the results screen.

Select a printer with checking the printer settings against those on detection result screen.

- **For Windows:**

Check the printer's MAC address or serial to select the correct printer from the results.

- **For macOS:**

The printer names appear with the MAC address added at the end or as the printer name specified by Bonjour.

Check identifiers such as the MAC address, the printer name specified by Bonjour, and the printer's serial number to select the printer from among those that appear.

### ▶▶▶ Note

- Serial number may not appear on result screen.

To check the printer's MAC address and the serial number, print out the network settings information.

➡ [Printing Network Settings](#)

### ▶▶▶ Note

- You can check the serial number by displaying on the operation panel.

➡ [System information](#)

## Switching Printer's Connection to Network or Devices

Check the following items when connecting a newly added computer to the LAN environment to the printer, changing the connection method from USB to LAN, or changing the wireless LAN (Wi-Fi) connection method.

1. Connects to Another Computer via LAN/Changes from USB to LAN Connection

2. Switching LAN Connection Method

3. Reconfiguration Method of Wi-Fi Connection

### 1. Connects to Another Computer via LAN/ Changes from USB to LAN Connection

To connect an additional computer to the printer via LAN, or to change from USB to LAN connection, refer to Setup Guide to setup.

### 2. Switching LAN Connection Method

If you want to switch to USB connection when the printer is used with a LAN connection, check the following item.

#### For Windows:

Refer to Setup Guide to setup.

#### For macOS:

Refer to Setup Guide to setup.

### 3. Reconfiguration Method of Wi-Fi Connection

- If you want to switch to **Wireless Direct** when using the printer with **Wi-Fi** connection:

➔ [Connecting with Wireless Direct](#)

- **Switching to a Wi-Fi connection when using the printer **Wireless Direct**:**

If you connect the printer to your computer or smartphone via a wireless router for the first time to print, or if you want to change the connection frequency between the printer and the wireless router, perform the setup.

#### For Windows:

Refer to Changing the Connection Mode.

#### For macOS:

Refer to Setup Guide and redo setup.

## **Network Connection Tips (Windows/macOS)**

---

- **Detect Same Printer Name**
- **Switching Printer's Connection to Network or Devices**

## Detect Same Printer Name

When the printer is detected during setup, plural printers with the same name may appear on the results screen.

Select a printer with checking the printer settings against those on detection result screen.

- **For Windows:**

Check the printer's MAC address or serial to select the correct printer from the results.

- **For macOS:**

The printer names appear with the MAC address added at the end or as the printer name specified by Bonjour.

Check identifiers such as the MAC address, the printer name specified by Bonjour, and the printer's serial number to select the printer from among those that appear.

### ▶▶▶ Note

- Serial number may not appear on result screen.

To check the printer's MAC address and the serial number, print out the network settings information.

➡ [Printing Network Settings](#)

### ➤➤➤ **Important**

- Some functions may not be available depending on your model and software version.

## Wi-Fi Connection Assistant

Wi-Fi Connection Assistant allows you to diagnose or repair the network status, and to perform printer settings on network.

Use Wi-Fi Connection Assistant for:

- Searching printers on network and performing initial network setup for detected printers
- Performing initial network setup by connecting the printer and computer using a USB cable (Not available for some models)
- Changing printer network settings
- Diagnosing the settings of the printer and those of computer on which Wi-Fi Connection Assistant is installed if anything is wrong with connection. In addition, Wi-Fi Connection Assistant repairs the status of the printer and computer (Not available for some models).

### »» Important

- Depending on the printer you are using, an administrator password is already specified for the printer at the time of purchase. When you change the network settings, authentication by the administrator password is required.

For details:

➡ Administrator Password

For improving security, we recommend to change the administrator password.

➡ Change Administrator Password

- To use the printer over LAN, make sure you have the equipment necessary for the connection type, such as a wireless router or a LAN cable.
- When you install Wi-Fi Connection Assistant, disable block function of firewall.
- Do not change network settings using Wi-Fi Connection Assistant while printing is in progress.

## Starting Up Wi-Fi Connection Assistant

Start up Wi-Fi Connection Assistant as shown below.

In Windows 11, from  (Start button) on the taskbar, select **All apps > Canon Utilities > Wi-Fi Connection Assistant**.

### ▶▶▶ Note

- In Windows 10, select **Start > (All apps > ) > Canon Utilities > Wi-Fi Connection Assistant**.
- In Windows 7, click **Start** and select **All Programs, Canon Utilities, Wi-Fi Connection Assistant**, and then **Wi-Fi Connection Assistant**.

When you start up Wi-Fi Connection Assistant, a message appears. Check the message and select **Yes**. The screen below appears.

Select **Diagnose and Repair** or **Printer Network Setup** on the displayed screen.

- If you select **Diagnose and Repair**:
  - ➔ [Diagnosing and Repairing Network Settings](#)
- If you select **Printer Network Setup**:
  - ➔ [Performing/Changing Network Settings](#)

## Diagnosing and Repairing Network Settings

Wi-Fi Connection Assistant diagnoses and repairs computer settings or connection between the computer and printer when a problem (e.g. cannot print from a printer on the network) occurs.

### ▶▶ Important

- Some models do not support diagnosis and repair function.

For details:

- ➔ [List of Models Which Does Not Support Diagnosis and Repair Function](#)

Follow the procedure below.

1. [Start up Wi-Fi Connection Assistant.](#)
2. Check the displayed message and select **Yes**.
3. Select **Diagnose and Repair** on the displayed screen.

Perform operations following the instructions on the screen.

### ▶▶ Note

- This function checks the following items:
  - whether the computer is connected to the router
  - whether a web page on the Internet can be viewed
  - whether the printer can be detected on the network
  - whether the signal strength or communication level is sufficient (when using Wi-Fi)
  - whether the printer port setting matches with the network setting

## Canon Wi-Fi Connection Assistant Screen

- ➔ [Items on Canon Wi-Fi Connection Assistant Screen](#)
- ➔ [Menus on Canon Wi-Fi Connection Assistant Screen](#)
- ➔ [Items on Canon Wi-Fi Connection Assistant Screen Toolbar](#)

### Items on Canon Wi-Fi Connection Assistant Screen

The screen below appears when you start up Wi-Fi Connection Assistant and select **Printer Network Setup**. Detected printers are listed on the screen and the items below are shown.

#### A: Product Name

Displays the product name of detected printer. The icon below appears on the left if the printer cannot be used.

 : Appears when the printer requires setup or has not been configured.

 : Appears when the IP address is duplicated to another printer.

 : Appears when you cannot communicate with the printer.

#### ➤➤➤ Note

- If a printer you want to use is not detected, try to set the criteria for printer search.
  - ➔ [Setting Criteria for Printer Search/Searching Specific Printer](#)
- Right-clicking a printer displays setting items or items to confirm.

#### B: Serial Number (Last 5 Digits)

Displays the last five digits of printer's serial number.

#### C: Status

Displays the printer status as shown below.

- **Available**  
Indicates the printer is available.
- **Setup Completed**

Appears after performing network setup and clicking **Set** to close the window.

- **Requires Setup**

Indicates the printer is required to perform Wi-Fi setup.

➔ [Performing/Changing Wi-Fi Settings](#)

- **Not Set**

Indicates the printer cannot be used on network, or IPv6 is disabled. Specify an IP address or enable IPv6 on **Network Settings...**

➔ [Performing/Changing Wi-Fi Settings](#)

- **IP Address Overlap**

Indicates the IP address is duplicated to another printer.

- **Unknown**

Indicates the printer recognized as **Available** in the past cannot be used currently.

➔➔➔ **Note**

- If **USB** is selected from the pulldown menu on the toolbar, nothing is displayed.

#### D: IP Address

Displays the printer IP address. Nothing is displayed if the printer status is **Requires Setup**.

➔➔➔ **Note**

- If **USB** is selected from the pulldown menu on the toolbar, "-" is displayed.

#### E: Location

Displays the printer location if it is registered. Nothing is displayed if the printer status is **Requires Setup**.

➔➔➔ **Note**

- If **USB** is selected from the pulldown menu on the toolbar, nothing is displayed.

➔ [Assigning Printer Information](#)

#### F: Connection Method

Displays printer connection method (wired LAN, Wi-Fi, or USB).

➔➔➔ **Note**

- If **USB** is selected from the pulldown menu on the toolbar, **USB** is displayed.
- If the printer supports both of the LAN connection methods, the printer is recognized as two printers and they are displayed separately. (The same numbers are displayed on **Serial Number (Last 5 Digits)**.)
- If the printer does not support wired LAN, wired LAN is not displayed.
- If you are using Wi-Fi Connection Assistant on the computer which does not support Wi-Fi, Wi-Fi is not displayed.

#### G: Setting Method

Displays printer setting method.

- **Auto**

Appears if the printer is used by IP address specified automatically.

- **Manual**

Appears if the printer is used by IP address specified manually.

▶▶▶ **Note**

- If **USB** is selected from the pulldown menu on the toolbar, "-" is displayed.

#### H: MAC Address

Displays the MAC address of the detected printer.

▶▶▶ **Note**

- If **USB** is selected from the pulldown menu on the toolbar, "-" is displayed.

#### I: Device Name

Displays the printer device name if it is registered.

▶▶▶ **Note**

- If **USB** is selected from the pulldown menu on the toolbar, nothing is displayed.
- The printer with **Requires Setup** displayed on **Status** is not displayed.

➔ [Assigning Printer Information](#)

#### J: IPv6

**On** appears when an IPv6 address is assigned for the printer.

▶▶▶ **Note**

- If **USB** is selected from the pulldown menu on the toolbar, "-" is displayed.

#### K: Displays the printer status and operation guides.

Selecting a printer from the printer list displays its current status and what to do next.

## Menus on Canon Wi-Fi Connection Assistant Screen

This section describes menus on **Canon Wi-Fi Connection Assistant** screen.

#### A: Printer Settings menu

➔ Printer Settings Menu

#### B: View menu

➔ View Menu

#### C: Option menu

➔ Option Menu

## D: Help menu

- ➔ Help Menu

## Items on Canon Wi-Fi Connection Assistant Screen Toolbar

This section describes items on **Canon Wi-Fi Connection Assistant** Screen toolbar.

### A: Perform wired or Wi-Fi setup.

#### ➤➤➤ Note

- This item has the same function as **Network Settings...** in the **Printer Settings** menu.

### B: Redetects printers.

#### ➤➤➤ Note

- This item has the same function as **Update** in the **View** menu.

### C: Stops detecting printers.

#### ➤➤➤ Note

- This item has the same function as **Cancel** in the **View** menu.

### D: Switches the printer list. (IPv4, IPv6, or USB printers)

#### ➤➤➤ Note

- This item has the same function as **Switch View** in the **View** menu.
- You can also display the USB connected printer list. (Not available for some models.) In this case, select **USB**.

### E: Displays this guide.

#### ➤➤➤ Note

- This item has the same function as **Online Manual** in the **Help** menu.

## **Performing Network Settings**

---

- **Performing/Changing Wired LAN Connection (Ethernet Cable) Settings**
- **Performing/Changing Wi-Fi Settings**
- **Assigning Printer Information**

## Performing/Changing Wired LAN Connection (Ethernet Cable) Settings

Follow the procedure below to perform/change wired LAN settings.

### ▶▶▶ Note

- For some models, you can perform network setup for a USB connected printer using Wi-Fi Connection Assistant. Select **USB** on **Switch View** under the **View** menu to display printers for which you can perform setup.

#### 1. [Start up Wi-Fi Connection Assistant.](#)

2. Check the displayed message and select **Yes**.

3. Select **Printer Network Setup** on the displayed screen.

Detected printers are listed.

4. Select printer to perform/change settings from printer list.

Select the printer with **Wired LAN** displayed on **Connection Method** and **Available** displayed on **Status** to perform settings.

You can perform settings for a printer with **Available** not displayed on **Status** via USB connection.

To perform setup for a USB connected printer, select **USB** from the pulldown menu on the toolbar and select the printer to perform/change settings.

5. Select **Network Settings...** on **Printer Settings** menu.

The **Confirm Printer Password** screen appears.

For more on the password, refer to Administrator Password.

### ▶▶▶ Note

- Clicking the  icon allows you to perform/change settings.
- If you select a USB connected printer on step 4, the screen below appears after the **Confirm Printer Password** screen appears

Select **Wired LAN** and click **OK**.

6. Enter password and click **OK**.

The **Network Settings** screen appears.

## 7. Perform/change settings.

You can switch the screen between IPv4 and IPv6. Click the tab to switch the protocol.

- IPv4 settings

### A: Use IPv4 address

Always selected. (displayed in a gray out state)

### B: Get IP address automatically

Select this option to use an IP address automatically assigned by a DHCP server. DHCP server functionality must be enabled on your router.

### C: Use next IP address

Select this option if no DHCP server functionality is available in your setup where you use the printer, or you want to use a fixed IP address.

Enter the IP address, subnet mask, and default gateway.

- IPv6 settings

## ▶▶▶ Note

- If you select a USB connected printer on step 4, you cannot perform IPv6 settings depending on the printer you are using.

For details, see [List of Models Which Does Not Support IPv6 Configuration via USB Connection](#).

**A: Use IPv6 address**

Select when you use the printer with IPv6 environment.

**B: Use Stateless Address:**

Select when you use an IP address assigned automatically. Use a router compatible with IPv6.

**➤➤➤ Note**

- This setting item is not available depending on the printer you are using.

**C: Use Manual Address:**

Select this option if no DHCP server functionality is available in your setup where you use the printer, or you want to use a fixed IP address.

Enter the IP address and IP address prefix length.

**➤➤➤ Note**

- This setting item is not available depending on the printer you are using.

**D: Use DHCPv6:**

Select when you obtain an IP address using DHCPv6.

**➤➤➤ Note**

- This setting item is not available depending on the printer you are using.

**8. Click Set.**

## Performing/Changing Wi-Fi Settings

Follow the procedure below to perform/change Wi-Fi settings.

### ▶▶▶ Important

- Enable Easy wireless connect (Cableless setup) before performing printer setup. (Not required if you change the IP address.) For details, search for "NR049" on your printer's online manual and see the page shown.
- If you plan to use a printer over Wi-Fi, make sure you perform security settings for the Wi-Fi network.

### ▶▶▶ Note

- For some models, you can perform network setup for a USB connected printer using Wi-Fi Connection Assistant. Select **USB** on **Switch View** under the **View** menu to display printers.

#### 1. [Start up Wi-Fi Connection Assistant.](#)

#### 2. Check the displayed message and select **Yes**.

#### 3. Select **Printer Network Setup** on the displayed screen.

Detected printers are listed.

#### 4. Select printer to perform/change settings from printer list.

Select the printer with **Wi-Fi** displayed on **Connection Method** and **Available** or **Requires Setup** displayed on **Status** to perform settings.

You can perform settings for a printer with **Available** or **Requires Setup** not displayed on **Status** via USB connection.

To perform setup for a USB connected printer, select **USB** from the pulldown menu on the toolbar and select the printer to perform/change settings.

#### 5. Select **Network Settings...** on **Printer Settings** menu.

The **Confirm Printer Password** screen appears.

For more on the password, refer to Administrator Password.

### ▶▶▶ Note

- Clicking the  icon allows you to perform/change settings.
- If you select a USB connected printer on step 4 and the selected printer is compatible with wired LAN, the screen below appears after the **Confirm Printer Password** screen appears

Select **Wi-Fi** and click **OK**.

**6.** Enter password and click **OK**.

The **Network Settings** screen appears.

**7.** Perform/change settings.

You can switch the screen between IPv4 and IPv6. Click the tab to switch the protocol.

- IPv4/IPv6 settings

**A: Network Type:**

Select the Wi-Fi mode.

- **Infrastructure**

Connects the printer to the Wi-Fi with a wireless router.

- **Direct**

Connects the printer to wireless communication devices (smartphone or tablet) without a wireless router.

**▶▶▶ Note**

- If Wi-Fi is enabled on the computer and if you select a USB connected printer on step 4, you can select **Direct** depending on the printer you are using.
- If **Direct** is selected, all items are displayed in a gray out status and you cannot perform any settings.

In addition, you cannot connect to Internet from your computer depending on your operating environment.

**B: Network Name (SSID):**

The network name (SSID) of the Wi-Fi currently used is displayed.

The network name (SSID) for Wireless Direct appears while in Wireless Direct.

### C: Search...

The **Detected Wireless Routers** screen is displayed to select a wireless router to connect to. For a wireless router already connected to the computer, **Available** is displayed on **Communication Status**.

If you select a wireless router with **Not Connected** on **Communication Status** from the list, clicking **Set** displays the WPA/WPA2 or WEP setting screen for a wireless router.

- ➔ If WEP Details Screen Appears
- ➔ If WPA/WPA2 Details Screen Appears

### D: Encryption Type:

Displays the encryption method used over the Wi-Fi.

- IPv4 settings

### ▶▶▶ Note

- The setting items below are available only when **Infrastructure** is selected for **Network Type**:

If **Direct** is selected, all items are displayed in a gray out status and you cannot perform any settings.

### A: Use IPv4 address

Always selected. (displayed in a gray out state)

### B: Get IP address automatically

Select this option to use an IP address automatically assigned by a DHCP server. DHCP server functionality must be enabled on your wireless router.

### C: Use next IP address

Select this option if no DHCP server functionality is available in your setup where you use the printer, or you want to use a fixed IP address.

Enter the IP address, subnet mask, and default gateway.

- IPv6 settings

### ▶▶▶ Note

- If you select a USB connected printer on step 4, you cannot perform IPv6 settings depending on the printer you are using.

For details, see [List of Models Which Does Not Support IPv6 Configuration via USB Connection](#).

- The setting items below are available only when **Infrastructure** is selected for **Network Type**:

If **Direct** is selected, all items are displayed in a gray out status and you cannot perform any settings.

#### A: Use IPv6 address

Select when you use the printer with IPv6 environment.

#### B: Use Stateless Address:

Select when you use an IP address assigned automatically. Use a router compatible with IPv6.

### ▶▶▶ Note

- This setting item is not available depending on the printer you are using.

#### C: Use Manual Address:

Select this option if no DHCP server functionality is available in your setup where you use the printer, or you want to use a fixed IP address.

Enter the IP address and IP address prefix length.

### ▶▶▶ Note

- This setting item is not available depending on the printer you are using.

**D: Use DHCPv6:**

Select when you obtain an IP address using DHCPv6.

**▶▶ Note**

- This setting item is not available depending on the printer you are using.

**8. Click Set.**

## Assigning Printer Information

Follow the procedure below to assign/change printer location name or device name.

The names appear on **Device Name:** and **Location:** on the **Canon Wi-Fi Connection Assistant** screen.

### ▶▶▶ Note

- If **USB** is selected from the pulldown menu on the toolbar, this setting item is not available.

1. [Start up Wi-Fi Connection Assistant.](#)
2. Check the displayed message and select **Yes**.
3. Select **Printer Network Setup** on the displayed screen.  
Detected printers are listed.
4. Select printer to assign location name and device name.  
Select the printer with **Available** displayed on **Status**.
5. Select **Detailed Printer Settings...** on **Printer Settings** menu.  
The **Confirm Printer Password** screen appears.  
For more on the password, refer to Administrator Password.
6. Enter password and click **OK**.  
The **Detailed Printer Settings** screen appears.
7. Perform/change settings.

The setting items below are available.

**A: Device Name:**

Assigns the device name.

**B: Location:**

Assigns the location name.

8. Click **Set**.

## List of Models Which Does Not Support Diagnosis and Repair Function

## Wi-Fi Connection Assistant (macOS)

---

- **Wi-Fi Connection Assistant**
- **Starting Up Wi-Fi Connection Assistant**
- **Diagnosing and Repairing Network Settings**
- **List of Models Which Does Not Support Diagnosis and Repair Function**

### ➤➤ Important

- Some functions may not be available depending on your model and software version.

## Wi-Fi Connection Assistant

---

If anything is wrong with connection, Wi-Fi Connection Assistant diagnoses the settings of the printer and those of computer on which it is installed. In addition, Wi-Fi Connection Assistant restores the status of the printer and computer.

### »» Important

- To use the printer over LAN, make sure you have the equipment necessary for the connection type, such as a wireless router or a LAN cable.
- When you install Wi-Fi Connection Assistant, disable block function of firewall.

## Starting Up Wi-Fi Connection Assistant

---

Start up **Launchpad**, select **Canon Utilities**, and then select Wi-Fi Connection Assistant.

When you start up Wi-Fi Connection Assistant, the screen below appears.

Enter the password specified for your computer and select **Install Helper**. Wi-Fi Connection Assistant starts diagnosis and repair of network.

➔ [Diagnosing and Repairing Network Settings](#)

## Diagnosing and Repairing Network Settings

Wi-Fi Connection Assistant diagnoses and repairs computer settings or connection between the computer and printer when a problem (e.g. cannot print from a printer on the network) occurs.

### ▶▶▶ Important

- Some models do not support diagnosis and repair function.

For details:

- ➔ [List of Models Which Does Not Support Diagnosis and Repair Function](#)

Wi-Fi Connection Assistant starts checking the computer settings when it starts up. Perform operations following the instructions on the screen.

### ▶▶▶ Note

- This function checks the following items:
  - whether the computer is connected to the router
  - whether the printer can be detected on the network
  - whether the signal strength or communication level is sufficient (when using Wi-Fi)
  - whether the printer port setting matches with the network setting

## List of Models Which Does Not Support Diagnosis and Repair Function

## **Performing Maintenance Functions from the Printer**

---

- **Maintenance Procedure**
- **Printing the Nozzle Check Pattern**
- **Examining the Nozzle Check Pattern**
- **Cleaning the Print Head**
- **Deep Print Head Cleaning**
- **Aligning the Print Head**
- **Aligning the Print Head Manually**

## Maintenance Procedure

If print results are blurred, colors are not printed correctly, or print results are unsatisfactory (e.g. misaligned printed ruled lines), perform the maintenance procedure below.

### ►►► Important

- Do not rinse or wipe the print head and ink tank. This can cause trouble with the print head and ink tank.

### ►►► Note

- Make sure that the orange protective tape does not remain on the ink tank.

- Check if ink remains in the ink tanks.
  - ➔ [Checking Ink Status on the Touch Screen](#)
- For Windows, increasing the print quality in the printer driver settings may improve the print result.
  - ➔ [Set Media Type, Quality, etc. \(Media/Quality Tab\)](#)

## When the Print Results Are Blurred or Uneven:

**Step 1** Print the nozzle check pattern.

From the printer

- ➔ [Printing the Nozzle Check Pattern](#)

**Step 2** [Examine the nozzle check pattern.](#)

**If there are missing lines or horizontal streaks in the pattern:**

**Step 3** Clean the print head.

From the printer

- ➔ [Cleaning the Print Head](#)

After cleaning the print head, print and examine the nozzle check pattern: ➔ [Step 1](#)

If the problem is not resolved after performing from step 1 to step 3 twice:

**Step 4** Clean the print head deeply.

From the printer

➔ [Deep Print Head Cleaning](#)

### ➤➤➤ Note

- When you have performed the procedure until step 4 and the problem has not been resolved, turn off the power and clean the print head deeply again after 24 hours.

If the problem is still not resolved, the print head may be damaged. Contact Canon to request a repair.

## When the Print Results Are Not Even such as the Ruled Lines Are Misaligned:

**Step** Align the print head.

From the printer

➔ [Aligning the Print Head](#)

From the computer

- For Windows:
  - ➔ [Adjusting Print Head Position Automatically](#)
- For macOS:
  - ➔ [Adjusting Print Head Position](#)

## Printing the Nozzle Check Pattern

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzle.

### ►► Note

- If the remaining ink level is low, the nozzle check pattern will not be printed correctly. [Replace the ink tanks](#) whose ink is low.

You need to prepare: a sheet of A4 plain paper

1. [Check that printer is turned on.](#)
2. Load a sheet of A4 plain paper in the cassette.  
➔ [Loading Plain Paper in Cassette](#)

3. Select  (Setup) on HOME screen.  
➔ [Using Touch Screen](#)

The setup menu screen will appear.

4. Select  **Maintenance**.  
The **Maintenance** screen will appear.

5. Select **Nozzle Check**.

The confirmation screen will appear.

6. Select **Yes**.

The operation panel is opened and the paper output tray is pulled out automatically.

The nozzle check pattern will be printed and two pattern confirmation screens will appear on the touch screen.

7. [Examine the nozzle check pattern.](#)

## Examining the Nozzle Check Pattern

Examine the nozzle check pattern, and clean the print head if necessary.

1. Check if there are missing lines in the pattern C or horizontal streaks in the pattern D.

A: No missing lines/No horizontal streaks

B: Lines are missing/Horizontal streaks are present

2. Select the pattern that is closer to the printed nozzle check pattern on the confirmation screen.

Which pattern is closest to your printed pattern?

A B

All A

Also B

**For A (no missing lines or no horizontal streaks) in both the pattern C and pattern D:**

The cleaning is not required. Select **All A**, confirm the message, then select **OK**.

The screen will return to the **Maintenance** screen.

**For B (lines are missing or horizontal streaks are present) in the pattern C or pattern D, or in both patterns:**

The cleaning is required. Select **Also B**, then select **Yes** on the cleaning confirmation screen.

The printer starts cleaning the print head.

➔ [Cleaning the Print Head](#)

**If the pattern C or any color in the pattern D is not printed:**

(Example: Magenta pattern is not printed)

The cleaning is required. Select **Also B**, then select **Yes** on the cleaning confirmation screen.

The printer starts cleaning the print head.

➔ [Cleaning the Print Head](#)

## Cleaning the Print Head

Clean the print head if lines are missing or if horizontal streaks are present in the printed nozzle check pattern. Cleaning unclogs the nozzles and restores the print head condition. Cleaning the print head consumes ink, so clean the print head only when necessary.

**You need to prepare: a sheet of A4 plain paper**

1. [Check that printer is turned on.](#)
2. Load a sheet of A4 plain paper in the cassette.  
➔ [Loading Plain Paper in Cassette](#)

3. Select  (Setup) on HOME screen.  
➔ [Using Touch Screen](#)

The setup menu screen will appear.

4. Select  **Maintenance**.

The **Maintenance** screen will appear.

5. Select **Cleaning**.

The confirmation screen will appear.

6. Select **Yes**.

The printer starts cleaning the print head.

Do not perform any other operations until the printer completes the cleaning of the print head.

The pattern print confirmation screen will appear.

7. Select **Yes**.

The operation panel is opened and the paper output tray is pulled out automatically.

The nozzle check pattern will be printed.

8. [Examine the nozzle check pattern.](#)

»» Note

- If the problem is not resolved after cleaning the print head twice, [clean the print head deeply.](#)

## Deep Print Head Cleaning

If print quality does not improve by the standard cleaning of the print head, clean the print head deeply. Cleaning the print head deeply consumes more ink than the standard cleaning of the print head, so clean the print head deeply only when necessary.

**You need to prepare: a sheet of A4 plain paper**

1. [Check that printer is turned on.](#)
2. Load a sheet of A4 plain paper in the cassette.

➔ [Loading Plain Paper in Cassette](#)

3. Select  (Setup) on HOME screen.

➔ [Using Touch Screen](#)

The setup menu screen will appear.

4. Select  **Maintenance**.

The **Maintenance** screen will appear.

5. Select **Deep Cleaning**.

The confirmation screen will appear.

6. Select **Yes**.

The printer starts cleaning the print head deeply.

Do not perform any other operations until the printer completes the deep cleaning of the print head.

The pattern print confirmation screen will appear.

7. Select **Yes**.

The operation panel is opened and the paper output tray is pulled out automatically.

The nozzle check pattern will be printed.

8. When the completion message appears, select **OK**.

9. [Examine the nozzle check pattern](#).

If a particular color is not printed properly, [replace the ink tank](#) of that color.

If the problem is not resolved, turn off the power and clean the print head deeply again after 24 hours.

If the problem is still not resolved, the print head may be damaged. Contact Canon to request a repair.

## Aligning the Print Head

If printed ruled lines are misaligned or print results are otherwise unsatisfactory, adjust the print head position.

### ▶▶▶ Note

- If the remaining ink level is low, the print head alignment sheet will not be printed correctly.  
If the remaining ink level is low, [replace ink tanks](#).
- If ink runs out as the print head alignment sheet is printed, an error message appears on the touch screen.

➔ [When Error Occurred](#)

You need to prepare: two sheets of A4 plain paper

1. [Check that printer is turned on.](#)
2. Load two sheets of A4 plain paper in cassette.  
➔ [Loading Plain Paper in Cassette](#)

3. Select  (Setup) on HOME screen.

➔ [Using Touch Screen](#)

The setup menu screen will appear.

4. Select  **Maintenance**.

The **Maintenance** screen will appear.

5. Select **Print Head Alignment - Auto**.

The confirmation screen will appear.

6. Confirm the message, then select **Yes**.

The operation panel is opened and the paper output tray is pulled out automatically.

The print head alignment sheet is printed, and the print head is aligned automatically.

### ▶▶▶ Note

- If automatic print head alignment fails, an error message appears on the touch screen.
  - ➔ [When Error Occurred](#)

7. When the completion message appears, select **OK**.

### ▶▶▶ Note

- If the print results are still not satisfactory after adjusting the print head position as described above, [adjust the print head position manually](#).
  - For Windows:  
You can also align the print head manually from a computer.
    - ➔ [Adjusting Print Head Position Manually](#)
- To print and check the current head position adjustment values, select **Print the Head Alignment Value** on the **Maintenance** screen.

## Aligning the Print Head Manually

Try aligning the print head manually after automatic print head alignment if printing results are not as expected, as when printed ruled lines are misaligned.

You need to prepare: three sheets of A4 plain paper

1. [Check that printer is turned on.](#)
2. Load three sheets of A4 plain paper in cassette.  
➔ [Loading Plain Paper in Cassette](#)

3. Select  (Setup) on HOME screen.  
➔ [Using Touch Screen](#)

The setup menu screen will appear.

4. Select  **Maintenance**.

The **Maintenance** screen will appear.

5. Select **Print Head Alignment - Manual**.

The confirmation screen will appear.

### ▶▶▶ Note

- To print and check the current head position alignment values, select **Print the Head Alignment Value**.

6. Check message and select **Yes**.

The operation panel is opened and the paper output tray is pulled out automatically.

The print head alignment pattern will be printed.

7. When **Did the patterns print correctly?** appears, make sure pattern was printed correctly, and if so, select **Yes**.

8. Check message and select **Next**.

The input screen for head position alignment values is displayed.

Print Head Alignment - Manual	
A	0
B	0
C	0
D	0

OK

9. Examine first patterns and tap **A**. Select the number of the pattern in column A in which streaks/lines are least noticeable.

**Note**

- If all patterns look different, choose the pattern in which vertical stripes are least noticeable.

Subtle vertical stripes

Noticeable vertical stripes

- If all patterns look different, choose the pattern in which horizontal streaks are least noticeable.

Subtle horizontal streaks

Noticeable horizontal streaks

10. Repeat these steps until you have finished entering pattern numbers for columns B to H, and then select **OK**.

11. Check message and select **OK**.

The second set of patterns is printed.

12. Examine second patterns and select I. In column I, find pattern in which stripes are least noticeable, and then select the number of that pattern.

### ▶▶▶ Note

- If all patterns look different, choose the pattern in which vertical stripes are least noticeable.

Subtle vertical stripes

Noticeable vertical stripes

13. Repeat these steps until you have finished entering pattern numbers for columns J to P, and then select **OK**.

14. Check message and select **OK**.

The third set of patterns is printed.

15. Examine third patterns and select **a**. In column a, find pattern in which stripes are least noticeable, and then select the number of that pattern.

►► Note

- If all patterns look different, choose the pattern in which horizontal streaks are least noticeable.

Subtle horizontal streaks

Noticeable horizontal streaks

2. Repeat these steps until you have finished entering pattern numbers for columns b to h, and then select **OK**.
3. When confirmation message appears, select **OK**.

## **Performing Maintenance Functions from Your Computer (macOS)**

---

- **Opening Remote UI for Maintenance**
- **Cleaning the Print Heads**
- **Adjusting Print Head Position**
- **Checking Ink Status from Your Computer**

## Opening Remote UI for Maintenance

---

You can perform maintenance of printer and change the settings from a Remote UI. The following is the procedure to open a Remote UI.

1. Open **System Settings**, and select **Printers & Scanners**
2. Select your model from the printer list, and click **Options & Supplies...**
3. Click **Show Printer Webpage...** in **General** tab

Remote UI starts.

### ▶▶▶ Note

- The password may have to be entered after Remote UI starts. In such a case, enter the password and click **OK**. In case you do not know the password, see "Passwords and cookies."

## Related Topics

- ➔ [Adjusting Print Head Position](#)
- ➔ [Checking Ink Status from Your Computer](#)
- ➔ [Printing a Nozzle Check Pattern](#)
- ➔ [Managing the Printer Power](#)
- ➔ [Changing the Printer Operation Mode](#)
- ➔ [Reducing the Printer Noise](#)

## Cleaning the Print Heads

The print head Cleaning and Deep Cleaning functions allow you to clear up clogged print head nozzles. Perform print head Cleaning if printing results are not satisfactory or if a specific color fails to print, even though there is enough ink.

### Cleaning

1. Select **Utilities** from [Remote UI](#)

2. Click **Cleaning**

Before performing Cleaning, check the following items:

Check whether the printer is on and open the printer's cover.

Check the following items for each ink. Then, if necessary, perform **Cleaning**.

- [Is there ink remaining?](#)
- Did you push in the ink completely until you heard a clicking sound?
- If the orange tape is there, has it been peeled off completely?  
Any remaining tape will hinder ink output.
- Did you install the inks in their correct positions?

3. Perform Cleaning

Click **Yes**.

Print head Cleaning starts.

4. Complete Cleaning

Next, the message for Nozzle Check pattern printing is displayed.

5. Check the results

To check whether the print quality has improved, click **Yes**. To cancel the check process, click **No**.

If cleaning the head once does not resolve the print head problem, clean it once more.

### »» Important

- **Cleaning** consumes a small amount of ink.  
Cleaning the print head frequently will rapidly deplete your printer's ink supply. Perform Cleaning only when necessary.

### Deep Cleaning

**Deep Cleaning** is more thorough than Cleaning. Perform Deep Cleaning when two **Cleaning** attempts do not resolve the print head problem.

1. Select **Utilities** from [Remote UI](#)

## 2. Click **Deep Cleaning**

Before performing Deep Cleaning, check the following items:

Check whether the printer is on and open the printer's cover.

Check the following items for each ink. Then, if necessary, perform **Deep Cleaning**.

- [Is there ink remaining?](#)
- Did you push in the ink completely until you heard a clicking sound?
- If the orange tape is there, has it been peeled off completely?  
Any remaining tape will hinder ink output.
- Did you install the inks in their correct positions?

## 3. Perform Deep Cleaning

Click **Yes**.

Print head Deep Cleaning starts.

## 4. Complete Deep Cleaning

Next, the message for Nozzle Check pattern printing is displayed.

## 5. Check the results

To check whether the print quality has improved, click **Yes**. To cancel the check process, click **No**.

### ▶▶ Important

- **Deep Cleaning** consumes a larger amount of ink than **Cleaning**.  
Cleaning the print head frequently will rapidly deplete your printer's ink supply. Perform Deep Cleaning only when necessary.

### ▶▶ Note

- If there is no sign of improvement after **Deep Cleaning**, turn off the printer, wait 24 hours, and then perform **Deep Cleaning** again. If there is still no sign of improvement, the ink may have run out or the print head may be worn. For details on the remedial action to be taken, see "[Ink Does Not Come Out/Blurry or Fuzzy/Inaccurate or Bleeding Colors/Streaks](#)."

## Related Topic

- ➔ [Printing a Nozzle Check Pattern](#)

## Adjusting Print Head Position

---

Any error in the print head installation position can cause color and line shifts. Adjusting the print head position improves print results.

### Print Head Alignment - Auto

1. Select **Utilities** from [Remote UI](#)
2. Click **Print Head Alignment - Auto**

A message appears.

3. Load paper in printer

Load two sheets of A4 size or Letter size plain paper into the cassette.

4. Run head position adjustment

Check that the printer power is on, and then click **Yes**.

Head alignment starts. Proceed with the operations in accordance with the messages on the screen.

#### ▶▶ Important

- Do not open the scanning unit / cover while printing is in progress; otherwise, printing will stop.

#### ▶▶ Note

- You can print and check the current settings by clicking on **Print the head alignment value**.

## Checking Ink Status from Your Computer

---

You can check the detailed information such as the remaining ink level and the ink tank types of your model.

If you select **Printer status** from [Remote UI](#), the ink status appears as an illustration.

### Estimated ink levels

You can check the types and levels of ink.

When ink levels are running low or an error occurs because there is no ink, a notification icon will appear.

### Ink model number

You can look up the correct ink tank for your printer.

### »» Note

- To check the ink status, you can also display **Printer Info** in the Print dialog and select **Supply Levels**.

## Cleaning

---

- **Cleaning Exterior Surfaces**
- **Cleaning Platen and Document Cover**
- **Cleaning Paper Feed Rollers**
- **Cleaning Inside the Printer (Bottom Plate Cleaning)**
- **Cleaning Cassette Pads**

## Cleaning Paper Feed Rollers

If a paper feed roller is dirty or paper powder is attached to it, paper may not be fed properly. In this case, perform Roller Cleaning. Cleaning will cause wear on rollers, so perform this only when necessary.

**You need to prepare: three sheets of A4 or Letter-sized plain paper**

### ▶▶▶ Note

- Prepare A4-sized plain paper when cleaning the cassette's paper feed rollers.

1. [Check that printer is turned on.](#)

2. Select  (Setup) on HOME screen.

➔ [Using Touch Screen](#)

The setup menu screen will appear.

3. Select  **Maintenance**.

The **Maintenance** screen will appear.

4. Select **Roller Cleaning**.

The confirmation screen will appear.

5. Select **Yes**.

6. Select the paper source to use for cleaning.

7. Follow the message to remove any paper from the paper source.

If you clean the paper feed roller of cassette, remove any paper from the cassette, then push it back.

8. Select **OK**.

The operation panel is opened and the paper output tray is pulled out automatically.

The paper feed rollers will rotate as they are cleaned without paper.

9. Make sure that the paper feed roller has stopped rotating, then follow the message to load the three sheets of A4 or Letter-sized plain paper in the paper feed point where the paper feed roller is being cleaned.

- ➔ [Loading Photo Paper / Plain Paper in Rear Tray](#)

- ➔ [Loading Plain Paper in Cassette](#)

10. Select **OK**.

The printer starts cleaning. The cleaning will be complete when the paper is ejected.

11. When the completion message appears, select **OK**.

If the problem is not resolved after cleaning, contact Canon to request a repair.

## Cleaning Inside the Printer (Bottom Plate Cleaning)

Remove stains from the inside of the printer. If the inside of the printer becomes dirty, printed paper may get dirty, so we recommend performing cleaning regularly.

**You need to prepare: a sheet of A4 plain paper\***

\* Be sure to use a new piece of paper.

1. [Check that printer is turned on.](#)

2. Select  (Setup) on HOME screen.

➔ [Using Touch Screen](#)

The setup menu screen will appear.

3. Select  **Maintenance**.

The **Maintenance** screen will appear.

4. Select **Bottom Plate Cleaning**.

The confirmation screen will appear.

5. Select **Yes**.
6. Follow the message to remove any paper from the cassette, then select **OK**.
7. Fold a single sheet of A4 plain paper in half widthwise, then unfold the paper.
8. Fold one side of the opened paper in another half, aligning the edge with the center crease, unfold the paper, then select **OK**.

9. Load only this sheet of paper in the cassette with the ridges of the creases facing up and the edge of the half with no crease facing to the far side.

10. Mount cassette cover (A) and insert cassette into printer.

11. Select **OK**.

The operation panel is opened and the paper output tray is pulled out automatically.

The paper cleans the inside of the printer as it feeds through the printer.

Check the folded parts of the ejected paper. If they are smudged with ink, perform Bottom Plate Cleaning again.

12. When the completion message appears, select **OK**.

### ▶▶▶ Note

- When performing Bottom Plate Cleaning again, be sure to use a new piece of paper.

If the problem is not resolved after performing cleaning again, the protrusions inside the printer may be stained. Wipe off any ink from the protrusions using a cotton swab or the like.

### ▶▶▶ Important

- Be sure to turn off the power and unplug the power cord before cleaning the printer.

## **Changing Settings**

---

- **Changing Printer Settings from Your Computer (Windows)**
- **Changing Printer Settings from Your Computer (macOS)**
- **Changing Settings from Operation Panel**

## **Changing Printer Settings from Your Computer (Windows)**

---

- **Changing the Print Options**
- **Setting the Ink to be Used**
- **Changing the Printer Operation Mode**

## Changing the Print Options

---

You can change the detailed printer driver settings for print data that is sent from an application software.

Check this check box if part of the image data is cut off, the paper source during printing differs from the driver settings, or printing fails.

1. Open the [printer driver setup window](#)
2. Click **Print Options...** on the **Page Setup** tab

The **Print Options** dialog box opens.

3. Change the individual settings

If necessary, change the setting of each item, and then click **OK**.

The **Page Setup** tab is displayed again.

## Setting the Ink to be Used

This feature enables you to specify the most appropriate ink tank among installed ink tanks according to an intended use.

1. Open the [printer driver setup window](#)
2. Click **Print Options...** on the **Page Setup** tab  
The **Print Options** dialog box appears.
3. Select the ink tank to be used from **Print With**  
Select the ink tank to be used for printing and click **OK**.
4. Click **OK** on the **Page Setup** tab  
When you perform printing, the specified ink tank will be used.

### »» Important

- When the following settings are specified, **Only PGBK (Black)** does not function because the printer uses an ink tank other than PGBK (Black) to print documents.
  - Other than **Plain Paper**, **Envelope**, **Ink Jet Hagaki (A)**, **Hagaki K (A)**, **Hagaki (A)**, or **Hagaki** is selected for **Media Type** on the **Media/Quality** tab
  - A checkmark is added to **Borderless Printing** on the **Page Setup** tab
- Do not detach the ink tank that is not in use. Printing cannot be performed while either ink tank is detached.

## Changing the Printer Operation Mode

---

If necessary, switch between various modes of printer operation.

1. Open the **Maintenance** Tab
2. Check that the printer power is on, and click **Custom Settings**

The [Custom Settings dialog box](#) opens.

### ▶▶▶ Note

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status.  
If this happens, click **OK** to display the most recent settings specified on your computer.

3. Configure settings

If necessary, switch between various modes of printer operation.

4. Apply the settings

Click **OK** and when the confirmation message appears, click **OK**.

The printer operates with the modified settings hereafter.

## **Changing Printer Settings from Your Computer (macOS)**

---

- **Managing the Printer Power**
- **Changing the Printer Operation Mode**

## Managing the Printer Power

---

Printer power supply is operated from Remote UI.

### Energy saving settings

**Energy saving settings** allow you to set Auto power off and Auto power on.

Auto power off is the function wherein the printer automatically turns itself off, when data is not sent or the printer remains inactive for a certain period.

The Auto power on function automatically turns on the printer when data is received.

1. Selecting **Printer settings** from [Remote UI](#)

2. Click **Energy saving settings**

3. Complete the following settings:

#### **Auto power off**

Specify the time from the list. Printer automatically turns itself off, when data is not sent within the specified time or the printer has remained inactive.

#### **Auto power on**

When you check this check box, the printer automatically turns itself on when data is sent.

4. Apply the settings

Click **OK**.

The printer will operate with the changed settings hereafter.

## Changing the Printer Operation Mode

---

If necessary, switch between various modes of printer operation.

1. Check whether the printer is on and select **Printer settings** from [Remote UI](#)

2. If necessary, complete the following settings:

### **Print settings - Prevent paper abrasion**

The printer can increase the gap between the print head and the paper during high-density printing to prevent paper abrasion.

Check this check box to prevent paper abrasion.

### **Custom settings - Detect paper setting mismatch**

If the check box is deselected, at the time of printing from PC, you can continue to print without the message display even if the paper settings set in the Print dialog differs from the paper information registered to the printer.

### **Ink drying wait time**

You can set the length of the printer rest time until printing of the next page begins. The wait time becomes longer as the value set in the list increases, and shorter as the value decreases.

If the paper gets stained because the next page is ejected before the ink on the printed page dries, increase the ink drying wait time.

3. Apply the settings

Click **OK**.

The printer operates with the modified settings hereafter.

## **Changing Settings from Operation Panel**

- **ECO settings**
- **Quiet setting**
- **System information**
- **Checking the Total Number of Uses of Printer**

## Changing Settings from Operation Panel

This section describes the procedure to change the settings, using the operation for setting amount of extension as an example.

1. [Check that printer is turned on.](#)

2. Select (Setup) on the HOME screen.

➔ [Using Touch Screen](#)

3. Select **Printer settings**.

The **Printer settings** screen is displayed.

4. Select a setting item to adjust.

The setting screen for the selected item is displayed.

5. Select a setting item.

6. Select a setting to specify.

For more on setting items on the operation panel:

➡ [Setting Items on Operation Panel](#)

## Setting Items on Operation Panel

---

### Items for Printer

- ➔ [Other printer settings](#)
- ➔ [Language selection](#)
- ➔ [Web service setup](#)
- ➔ [ECO](#)
- ➔ [Quiet setting](#)

### Items for Paper/Printing

- ➔ [Print settings](#)
- ➔ Smartphone photo print settings
- ➔ [Feed settings](#)

### Items for Maintenance/Management

- ➔ [LAN settings](#)
- ➔ [Firmware update](#)
- ➔ [Reset settings](#)
- ➔ [System information](#)
- ➔ [Usage stats](#)

## Print settings

Select this setting item from **Printer settings** in  (Setup).

- **Prevent paper abrasion**

Use this setting only if the print surface becomes smudged.

**»» Important**

- Be sure to set this back to **OFF** after printing since it may result in lower printing speed or lower print quality.

- **Amount of extension**

Selects the amount of image that extends off the paper when printing in borderless (full).

When performing Borderless Printing, slight cropping may occur at the edges since the printed image is enlarged to fill the whole page. You can change the width to be cropped from the borders of the original image as needed.

**»» Important**

- Settings will become ineffective in the following situations:
  - Printing from a handwritten navigation sheet.
  - Printing from a standard form.

**»» Note**

- When performing settings from application software or the printer driver, these settings will be prioritized.
- If printouts contain margins even though you are printing in Borderless, specifying **Extended amount: Large** for this setting may help solve the problem.

- **Adjust disc print area**

You can adjust the disc printing area if the image is not aligned with the printable disc. You can adjust the printing area in increments of 0.004 in. (0.1 mm) between -0.04 in. (-0.9 mm) and +0.04 in. (+0.9 mm).

- **Auto photo fix settings**

When **ON** is selected, the Exif information recorded in the images is given preference for printing.

- **Adjust horizontal print position**

Adjusts the print position when the left/right margins are not aligned.

You can adjust the left/right margins in increments of 0.004 in. (0.1 mm) between -0.12 in. (-3 mm) and +0.12 in. (+3 mm) centered on the horizontal center of the paper.

## ▶▶▶ Important

- For Letter-sized or Legal-sized paper, you can adjust the left/right margins between -0.06 in. (-1.5 mm) and +0.06 in. (+1.5 mm) even if you specify the value over 0.06 in. (1.5 mm).

### • **Print charts and diagrams vividly**

Use this setting when you want to print charts and diagrams in documents vividly on plain paper.

This feature gives preference to printer driver settings.

When you want to give preference to printer settings, select **Use Printer Settings** in the **Print charts and diagrams in documents more vividly (plain paper)** in **Print Options** dialog box in the printer driver settings below.

➔ [Page Setup Tab Description](#)

## ▶▶▶ Note

- This feature will be implemented with the following settings.
  - Plain paper
  - Color printing
  - Borderless printing OFF
  - Size is a template size or a user-defined size within the range of a template size
- \* The feature may not be implemented even when the above settings are selected, depending on other setting details.
- Processing may differ depending on settings and may result in the same data having different tones. Turn this setting **OFF** if you want to avoid differences in tone.

## LAN settings

Select this setting item from **Printer settings** in  (Setup).

- ➔ [Wi-Fi](#)
- ➔ [Wireless Direct](#)

To print the network settings, select **Print details** and select **Yes**.

- ➔ [Printing Network Settings](#)

### Important

- The network settings printout contains important information about your network. Handle it with care.

## Wi-Fi

- **See settings**

The network settings information of the printer appears when it is connected by Wi-Fi. (Some setting items are not displayed depending on the printer settings.)

Items	Setting
<b>Connection</b>	Enabled (connected)/Enabled (disconnected)/Disable
<b>Network name (SSID)</b>	XXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXX
<b>Frequency</b>	2.4 GHz/5 GHz
<b>Wi-Fi security</b>	Inactive/WPA-PSK(TKIP)/WPA-PSK(AES)/WPA2-PSK(TKIP)/WPA2-PSK(AES)/WPA3-SAE(AES)
<b>Signal strength (%)</b>	XXX
<b>IPv4 address</b>	XXX. XXX. XXX. XXX
<b>IPv4 subnet mask</b>	XXX. XXX. XXX. XXX
<b>IPv4 default gateway</b>	XXX. XXX. XXX. XXX
<b>IPv6 link-local address</b>	XXXX: XXXX: XXXX: XXXX: XXXX: XXXX: XXXX: XXXX
<b>MAC address (Wi-Fi)</b>	XX:XX:XX:XX:XX:XX
<b>Printer name</b>	XXXXXXXXXXXXXXXXXX
<b>Bonjour service name</b>	XXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXX

("XX" represents alphanumeric characters.)

- **Enable/disable Wi-Fi**

Enables/disables Wi-Fi.

- **Wi-Fi setup**

Selects the setup method for Wi-Fi connection.

- **Easy wireless connect**

Select if you specify the settings of the access point information to the printer directly from a device (e.g. smartphone, or tablet) without operating the wireless router. Follow the on-screen instructions of the connecting device for the setup procedure.

- **Manual connect**

Select when you perform settings for Wi-Fi manually using the operation panel of the printer.

- **WPS (Push button method)**

Select when you perform settings for Wi-Fi using a wireless router supporting a Wi-Fi Protected Setup (WPS) push button method. Follow the on-screen instructions during setup.

- **Other connection types**

- **WPS (PIN code method)**

Select when you perform settings for Wi-Fi using a wireless router supporting a Wi-Fi Protected Setup (WPS) PIN code method. Follow the on-screen instructions during setup.

- **Advanced**

For details on each setting item:

➔ [Advanced setup](#)

## Wireless Direct

- **See settings**

The network settings information of the printer appears when it is connected by the wireless direct. (Some setting items are not displayed depending on the printer settings.)

Items	Setting
Connection	Enable/Disable
Network name (SSID)	DIRECT-XXXXXXXXXX XXXXXXXXXXXXXXXXXX
Password	XXXXXXXXXX
Frequency	2.4 GHz/5 GHz
Wi-Fi security	WPA2-PSK(AES)
No. of printers connected now	XX/XX
IPv4 address	XXX. XXX. XXX. XXX
IPv4 subnet mask	XXX. XXX. XXX. XXX
IPv4 default gateway	XXX. XXX. XXX. XXX
IPv6 link-local address	XXXX: XXXX: XXXX: XXXX: XXXX: XXXX: XXXX: XXXX
MAC address (Wi-Fi)	XX:XX:XX:XX:XX:XX

<b>Printer name</b>	XXXXXXXXXXXXXXXXXX
<b>Bonjour service name</b>	XXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXX

("XX" represents alphanumeric characters.)

- **Connect to smartphone**

Enables to connect the smartphone to the printer by reading the QR code displayed on the touch screen with the smartphone, or also by manually obtaining the network name and password.

- **Enable/disable Wireless Direct**

Enables/disables Wireless Direct.

- **Change network name (SSID)**

Changes the identifier (SSID/the printer's name displayed on a Wi-Fi Direct compatible device) for Wireless Direct.

- **Change password**

Changes the password for Wireless Direct.

- **Connection request confirmation**

Selecting **ON** displays the confirmation screen when a Wi-Fi Direct compatible device is connecting the printer.

- **2.4GHz/5GHz Switch**

Select the frequency of Wireless Direct.

- **Advanced**

For details on each setting item:

➔ [Advanced setup](#)

## Advanced setup

- **Set printer name**

Specifies the printer name. You can use up to 15 characters for the name.

### ▶▶ Note

- You cannot use the same printer name as that already used for other LAN connected devices.
- You cannot use a hyphen for the initial or last character of the printer name.

- **TCP/IP settings**

Performs IPv4 or IPv6 setting.

- **WSD settings**

Setting items when you use WSD (one of the network protocols supported in Windows).

- **Enable/disable WSD**

Selects whether WSD is enabled or disabled.

➤➤➤ **Note**

- When this setting is enabled, the printer icon is displayed on the Network Explorer in Windows.

- **Optimize inbound WSD**

Selecting **Enable** allows you to receive the WSD printing data faster.

- **WSD scan from this printer**

Selecting **Enable** allows you to transfer the scanned data to the computer using WSD. To transfer the scanned data, tap **Color**.

➤➤➤ **Note**

- When you forward the scanned data to the computer searched using WSD, you cannot select the document type.

- **Timeout settings**

Specifies the timeout length.

- **Bonjour settings**

Setting items when you use Bonjour.

- **Enable/disable Bonjour**

Selecting **Enable** allows you to use Bonjour to perform the network settings.

- **Service name**

Specifies the Bonjour service name. You can use up to 48 characters for the name.

➤➤➤ **Note**

- You cannot use the same service name as that already used for other LAN connected devices.

- **LPR protocol settings**

Enables/disables the LPR setting.

- **RAW protocol**

Enables/disables RAW printing.

- **LLMNR**

Enables/disables LLMNR (Link-Local Multicast Name Resolution). Selecting **Enable** allows the printer to detect printer's IP address from the printer name without a DNS server.

- **IPP settings**

Selecting **Enable** allows you to print via the network with the IPP protocol.

- **Wi-Fi DRX settings**

Selecting **Enable** allows you to activate discontinuous reception when using Wi-Fi (discontinuous reception).

**»» Note**

- Depending on the Wi-Fi router used, discontinuous reception may not be activated even though **Enable** is selected.
- Discontinuous reception is enabled only while the printer is on standby. (The touch screen is in the screen saver mode.)

• **IPsec settings**

Selecting **Enable** allows you to specify the IPsec security.

## Other printer settings

Select this setting item from **Printer settings** in  (Setup).

- **Date display format**

Selects the date display format.

### ▶▶▶ Note

- When **ON** is selected for **Print date** on the print settings screen in printing from a memory card, the date is printed in the date display format you selected.
  - ➔ [Setting Items for Photo Printing Using Operation Panel](#)

- **Read/write attribute**

Selects whether to allow data to be written onto memory cards from a computer.

### ▶▶▶ Important

- Remove the memory card before changing this setting.
  - ➔ [Setting Up Card Slot as Memory Card Drive of Computer](#)
- If you set this setting to **Writable from USB PC**, you cannot print photos on a memory card using the operation panel of the printer. After you finish operation of the memory card dedicated drive, be sure to set it back to **Write-protected from PC**. When you turn off the printer, **Writable from USB PC** will be canceled and the setting is returned to **Write-protected from PC** when you turn on the printer next time.
- When **Writable from USB PC** is selected, the auto power off setting is inactive.

For more on the auto power off setting:

  - ➔ [ECO settings](#)

- **Sound control**

Selects the volume.

- **Keypad volume**

Selects the beep volume when pressing the touch screen or the buttons on the operation panel.

- **Alarm volume**

Selects the alarm volume.

- **Energy saving settings**

Allows you to turn on/off the printer automatically to save electricity.

- **Auto power off**

Specifies the length of time to turn off the printer automatically when no operation is made or no printing data is sent to the printer.

- **Auto power on**

Selecting **ON** enables the printer to turn on automatically when a scanning command from a computer or printing data is sent to the printer.

- **Original removal reminder**

Selects whether the printer will display the reminder screen in case you forget to remove the original from the platen after scanning.

**»» Important**

- Depending on the type of original or the state of the document cover, forgetting to remove the original may not be detected.

- **Auto retract paper output tray**

When **ON** is selected, the confirmation screen asking if you retract the paper output tray automatically appears after pressing the **ON** button to turn off the printer.

- **Wi-Fi pairing settings**

In order to connect Canon PRINT, multiple configurations will be performed.

- **Enable/disable pairing**

Set the printer's Wi-Fi pairing function to enable or disable.

- **Allow/block additional pairing**

On another function permit or prohibit Canon PRINT pairing.

- **Delete paired devices**

Cancel all Canon PRINT pairing.

- **Keyboard layout**

Select the keyboard layout from the following three types.

- **QWERTY**

- **QWERTZ**

- **AZERTY**

- **Notification settings**

All notification screens are not displayed if you select **OFF**.

## Language selection

---

Select this setting item from **Printer settings** in  (Setup).

Changes the language for the messages and menus on the touch screen.

Japanese / English / German / French / Italian / Spanish / Portuguese / Dutch / Danish / Norwegian / Swedish / Finnish / Russian / Ukrainian / Polish / Czech / Slovene / Hungarian / Slovak / Croatian / Romanian / Bulgarian / Turkish / Greek / Estonian / Latvian / Lithuanian / Simplified Chinese / Korean / Traditional Chinese / Thai / Indonesian / Vietnamese

## Firmware update

Select this setting item from **Printer settings** in  (Setup).

You can update the firmware of the printer, check the firmware version, or perform settings of a notification screen, a DNS server and a proxy server.

### »» Important

- When you use this function, make sure the printer is connected to the Internet.
- Do not turn off the power of a printer while firmware is being updated.

#### • Install update

Performs the firmware update of the printer. If you select **Yes**, the firmware update starts. Follow the on-screen instructions to perform update.

#### • Check current version

You can check the current firmware version.

#### • Update notification settings

You can set the printer to display the firmware update information on the touch screen when the firmware update is available.

When **Idle/Power off** is selected, the printer informs you of the update during idle and the update information also appears when you press the **ON** button.

#### • Auto update settings

Select **ON** to automatically update the firmware to the latest version.

#### • DNS server setup

Performs settings for a DNS server. Select **Auto setup** or **Manual setup**. If you select **Manual setup**, follow the display on the touch screen to perform settings.

#### • Proxy server setup

Performs settings for a proxy server. Follow the display on the touch screen to perform settings.

## Reset settings

Select this setting item from **Printer settings** in  (Setup).

You can set the settings back to the default.

- **Web service setup only**

Sets the Web service settings back to the default.

- **LAN settings only**

Sets the LAN settings back to the default.

- **Settings only**

Returns the settings such as the paper size, media type, or other setting items back to the default.

- **Reset all**

Sets all settings you made to the printer back to the default. The administrator password specified by Remote UI or Wi-Fi Connection Assistant reverts to the default setting.

### »» Note

- You cannot set the following setting items back to the default:
  - The language displayed on the touch screen
  - The current position of the print head
  - The country or region selected for **Country or region**
  - The cumulative usage count of copy, scan, etc. registered in **Usage stats**.
  - CSR (Certificate Signing Request) for encryption method (SSL/TLS) setting

## Feed settings

Select this setting item from (Setup).

### »» Note

- By registering the paper size and the media type, the message can be displayed before printing starts when the paper size or the media type of the loaded paper differs from the paper settings.

➔ [Paper Settings](#)

- **Rear tray paper settings**

Registers the paper size and the media type you load on the rear tray.

- **Cassette paper settings**

Registers the paper size you load in the cassette.

- **Detect paper width**

Select **ON** to automatically detect the paper size when paper is loaded. A screen for confirming the setting of paper is displayed.

### »» Note

- A screen for confirming the setting of paper is not displayed if you select **OFF**. Set the size and type of paper properly in **Rear tray paper settings** or **Cassette paper settings** when making prints.
- For AirPrint of iOS/iPadOS, paper may be printed based on the paper size set during paper loading. It is recommended to set to **ON** when making prints using an AirPrint function.

- **Paper settings mismatch (Other)/Paper settings mismatch (Copy)**

If you select **Enable**, the printer detects whether the paper size and the media type are identical with those registered in **Feed settings**. If printing starts with the settings that do not match, an error message is displayed on the touch screen.

### »» Note

- When **Disable** is selected, the settings in **Feed settings** is disabled.

## Web service setup

---

Select this item from  (Setup).

- **Web service usage registration/Web service usage cancellation**

Registers/Deletes Web service usage to use the printer device information to/from PIXMA/MAXIFY Cloud Link.

- **Web service connection setup**

The following setting items are available.

- **IJ Cloud Printing Center setup**

Registers/Deletes the printer to/from Canon Inkjet Cloud Printing Center and sets the history saving.

- **Check Web service setup**

Make sure whether the printer is registered to Canon Inkjet Cloud Printing Center.

- **Issue registration code**

In order to link the web service and printer, obtain the registration code from the service origin.

- **DNS server setup**

Performs settings for a DNS server. Select **Auto setup** or **Manual setup**. If you select **Manual setup**, follow the display on the touch screen to perform settings.

- **Proxy server setup**

Performs settings for a proxy server. Follow the display on the touch screen to perform settings.

## ECO settings

This setting allows you to use automatic duplex printing as a default to save paper and to turn on/off the printer automatically to save electricity.

- ➔ [Using Power Saving Function](#)
- ➔ [Using Duplex Printing](#)

## Using Power Saving Function

Follow the procedure below to use power saving function.

1. [Check that printer is turned on.](#)

2. Select  (Setup) on the HOME screen.  
➔ [Using Touch Screen](#)

3. Select  **ECO**.

4. Select **Energy saving settings**.

5. Specify settings as necessary.

A: Specify the length of time to turn the printer off automatically when no operation is made or no printing data is sent to the printer.

B: Selecting **ON** enables the printer to turn on automatically when a scanning command from a computer or printing data is sent to the printer.

## Using Duplex Printing

Follow the procedure below to use duplex printing.

1. [Check that printer is turned on.](#)

2. Select  (Setup) on the HOME screen.  
➔ [Using Touch Screen](#)

3. Select  **ECO**.

4. Select **Two-sided print settings**.

5. Specify settings as necessary.

C: Select two-sided copying as a default.

D: Select two-sided printing of template forms on the printer as a default.

## Quiet setting

---

Enables this function on the printer if you want to reduce the operating noise, such as when printing at night.

Follow the procedure below to perform setting.

1. [Check that printer is turned on.](#)

2. Select  (Setup) on the HOME screen.

➔ [Using Touch Screen](#)

3. Select  **Quiet setting.**

4. Select **ON.**

The confirmation screen is displayed and the  icon appears as the **Quiet setting** menu icon.

### »» Important

- Operating speed is reduced compared to when **OFF** is selected.
- This function may not be so effective depending on the printer's setting. Furthermore, certain noise, such as when the printer is preparing for printing, is not reduced.

## System information

---

Select this item from  (Hint).

- **Current version**

Displays the current firmware version.

- **Printer name**

Displays the printer name currently specified.

- **Serial number**

Displays the printer serial number.

- **MAC address (Wi-Fi)**

Displays the MAC address for Wi-Fi.

- **Root cert. thumbprint (SHA-1)**

Shows the root certification thumbprint (SHA-1) of the printer.

- **Root cert. thumbprint (SHA-256)**

Shows the root certification thumbprint (SHA-256) of the printer.

## Checking the Total Number of Uses of Printer

You can check the total number of uses of the printer (e.g. the total number of printing, copying, or scanning).

1. [Check that printer is turned on.](#)

2. Select  (Hint) on HOME screen.

➔ [Using Touch Screen](#)

The hint menu screen will appear.

3. Select  **Usage stats.**

4. Select item to check.

### **Total sheets used on the device**

Displays the total number of printing.

### **No. of sheets used for copying**

Displays the total number of copying.

### **Sheets used for other functions**

Displays the total number of printing other than copying.

### **Number of sheets scanned**

Displays the total number of scanning.

### **Print usage statistics**

The total number of uses of printer can be printed and checked.

### **▶▶▶ Note**

- The record of the total number of uses is not reverted even if the printer is reverted back to the default by **Reset settings** in **Printer settings**.

## Safety Precautions

---

### Safety Precautions

- This manual contains important notices and safety precautions about your printer.

Do not use the printer in ways other than described in the accompanying manuals, as this may result in fire, electric shock or other unexpected accidents.

Safety standard marks and declarations are only valid for the supported voltages and frequencies in the applicable countries or regions.

#### **Warning**

---

- Users with cardiac pacemakers:

This product emits a low-level magnetic flux. If you feel abnormalities, please move away from the product and consult your doctor.

- Do not use the printer in the following cases:

Stop use immediately, unplug the printer and call your local service representative to request repair.

- Metal objects or liquids are spilt inside the printer.
  - The printer emits smoke, strange odors, or makes unusual noises.
  - The power cord or plug overheat or are broken, bent or damaged in any way.
- Failure to adhere to the following may result in fire, electric shock, or injury:
    - Do not place product close to the flammable solvents such as alcohol or thinner.
    - Do not open or modify the printer.
    - Use only the power cord/cables that came with your printer. Do not use these cables with other devices.
    - Do not plug in to voltages or frequencies other than those specified.
    - Plug the power cord into the socket completely.
    - Do not plug in or unplug the power cord with wet hands.
    - Do not damage the power cord or other cables by twisting, bundling, tying, pulling or excessively bending them.
    - Do not place heavy objects on the power cord.
    - Do not connect multiple power cords to a single electrical outlet. Do not use multiple extension cords.
    - Do not leave the printer plugged in during lightning storms.
    - Always unplug the power cord and cables when cleaning. Do not use flammable sprays or liquids such as alcohol or thinners for cleaning.
    - Unplug the power cord once a month to check that it is not overheating, rusted, bent, scratched, split, or otherwise damaged.

#### **Caution**

---

- Do not put your hands inside the printer while printing.
- Do not touch the metal parts of the print head immediately after printing.
- Do not touch moving parts indicated by the sticker shown here. Some models may not have these parts.

### Moving parts

Keep body parts away from moving parts. Keep body parts out of the motion path.

- Ink
  - Keep ink out of reach of children.
  - If ink is accidentally licked or swallowed, rinse out your mouth and drink one or two glasses of water. If irritation or discomfort occurs, obtain medical advice immediately.
  - In case ink gets in contact with eyes, rinse with water immediately. In case ink gets in contact with skin, wash with soap and water immediately. If irritation to eyes or skin persists, obtain medical advice immediately.
- Moving the printer
  - Hold the printer by its sides and carry it with both hands.

## **General Notices**

### **Choosing a Location**

Refer to "[Specifications](#)" in the Online manual for details on operating environment.

- Do not install the printer in a location that is unstable or subject to excessive vibration.
- Do not install the printer in locations that get very hot (direct sunlight, or close to a heating source), very humid or dusty locations, or outdoors.
- Do not place the printer on a thick rug or carpet.
- Do not place the printer flush against a wall.

### **Power Supply**

- Keep the area around the power outlet clear at all times so you can easily unplug the power cord if necessary.
- Never remove the plug by pulling on the cord.

### **General Notices**

- Do not tilt the printer, stand it on end, or turn it upside down. This may cause ink to leak.
- Do not place anything on top of the printer. Be especially careful to avoid metal objects such as paper clips and staples, and containers holding flammable liquids such as alcohol or thinner.
- Be sure to observe the following when loading the original on the platen. Failure to observe the following may cause the scanner to malfunction or the platen glass to break.
  - Do not place any objects weighing 4.4 lb (2.0 kg) or more on the platen glass.
  - Do not put any pressure of 4.4 lb (2.0 kg) or more on the platen glass, such as pressing down the original.
- Do not attempt to open, disassemble or modify the ink tanks. Ink may leak and damage your printer.
- Do not throw print heads or ink tanks in the fire.

## **Regulatory Information**

---

### **Interference**

Do not use the printer around medical equipment or other electronic devices. Signals from the printer may interfere with the correct operation of these devices.

## WEEE

### Only for the United Kingdom

This symbol indicates that this product is not to be disposed of with your household waste, according to the UK Waste Electrical and Electronic Equipment Regulations. This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE). Improper handling of this type of waste could have a possible negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, waste authority, approved WEEE scheme or your household waste disposal service. For more information regarding return and recycling of WEEE products, please visit [www.canon-europe.com/sustainability/approach/](http://www.canon-europe.com/sustainability/approach/).

### Only for European Union and EEA (Norway, Iceland and Liechtenstein)

This symbol indicates that this product is not to be disposed of with your household waste, according to the WEEE Directive (2012/19/EU) and national legislation. This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE). Improper handling of this type of waste could have a possible negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, waste authority, approved WEEE scheme or your household waste disposal service. For more information regarding return and recycling of WEEE products, please visit [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

### Nur für Europäische Union und EWR (Norwegen, Island und Liechtenstein)

Dieses Symbol weist darauf hin, dass dieses Produkt gemäß der EU-Richtlinie über Elektro- und Elektronik-Altgeräte (2012/19/EU) und nationalen Gesetzen nicht über den Hausmüll entsorgt werden

darf. Dieses Produkt muss bei einer dafür vorgesehenen Sammelstelle abgegeben werden. Dies kann z. B. durch Rückgabe beim Kauf eines ähnlichen Produkts oder durch Abgabe bei einer autorisierten Sammelstelle für die Wiederaufbereitung von Elektro- und Elektronik-Altgeräten geschehen. Der unsachgemäße Umgang mit Altgeräten kann aufgrund potentiell gefährlicher Stoffe, die generell mit Elektro- und Elektronik-Altgeräten in Verbindung stehen, negative Auswirkungen auf die Umwelt und die menschliche Gesundheit haben. Durch die umweltgerechte Entsorgung dieses Produkts tragen Sie außerdem zu einer effektiven Nutzung natürlicher Ressourcen bei. Informationen zu Sammelstellen für Altgeräte erhalten Sie bei Ihrer Stadtverwaltung, dem öffentlich-rechtlichen Entsorgungsträger, einer autorisierten Stelle für die Entsorgung von Elektro- und Elektronik-Altgeräten oder Ihrem örtlichen Entsorgungsunternehmen. Weitere Informationen zur Rückgabe und Entsorgung von Elektro- und Elektronik-Altgeräten finden Sie unter [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Zusatzinformationen für Deutschland:**

Dieses Produkt kann durch Rückgabe an den Händler unter den in der Verordnung des Elektro- und Elektronikgerätegesetzes beschriebenen Bedingungen abgegeben werden.

Als Endbenutzer und Besitzer von Elektro- oder Elektronikgeräten sind Sie verpflichtet:

- diese einer vom unsortierten Siedlungsabfall getrennten Erfassung zuzuführen,
- Altbatterien und Altakkumulatoren, die nicht vom Altgerät umschlossen sind, sowie Lampen, die zerstörungsfrei aus dem Altgerät entnommen werden können, vor der Abgabe an einer Erfassungsstelle vom Altgerät zerstörungsfrei zu trennen,
- personenbezogener Daten auf den Altgeräten vor der Entsorgung zu löschen.

Die Bedeutung von dem Symbol der durchgestrichenen Abfalltonne auf Rädern finden Sie oben in dieser Beschreibung.

Die Vertreter von Elektro- oder Elektronikgeräten haben die Pflicht zur unentgeltlichen Rücknahme von Altgeräten. Die Vertreter haben die Endnutzer über die von ihnen geschaffenen Möglichkeiten der Rückgabe von Altgeräten zu informieren.

## **Union Européenne, Norvège, Islande et Liechtenstein uniquement.**

Ce symbole indique que ce produit ne doit pas être jeté avec les ordures ménagères, conformément à la directive DEEE (2012/19/UE) et à la réglementation de votre pays. Ce produit doit être confié au distributeur à chaque fois que vous achetez un produit neuf similaire, ou à un point de collecte mis en place par les collectivités locales pour le recyclage des Déchets des Équipements Électriques et Électroniques (DEEE). Le traitement inapproprié de ce type de déchet risque d'avoir des répercussions sur l'environnement et la santé humaine, du fait de la présence de substances potentiellement dangereuses généralement associées aux équipements électriques et électroniques. Parallèlement, votre entière coopération dans le cadre de la mise au rebut correcte de ce produit favorisera une meilleure utilisation des ressources naturelles. Pour plus d'informations sur les points de collecte des équipements à recycler, contactez vos services municipaux, les autorités locales compétentes, le plan DEEE approuvé ou le service d'enlèvement des ordures ménagères. Pour plus d'informations sur le retour et le recyclage des produits DEEE, consultez le site: [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Uitsluitend bestemd voor de Europese Unie en EER (Noorwegen, IJsland en Liechtenstein)**

Dit symbool geeft aan dat dit product in overeenstemming met de AEEA-richtlijn (2012/19/EU) en de nationale wetgeving niet mag worden afgevoerd met het huishoudelijk afval. Dit product moet worden ingeleverd bij een aangewezen, geautoriseerd inzamelpunt, bijvoorbeeld wanneer u een nieuw gelijksoortig product aanschaft, of bij een geautoriseerd inzamelpunt voor hergebruik van elektrische en elektronische apparatuur (EEA). Een onjuiste afvoer van dit type afval kan leiden tot negatieve effecten op het milieu en de volksgezondheid als gevolg van potentieel gevaarlijke stoffen die veel voorkomen in elektrische en elektronische apparatuur (EEA). Bovendien werkt u door een juiste afvoer van dit product mee aan het effectieve gebruik van natuurlijke hulpbronnen. Voor meer informatie over waar u uw afgedankte apparatuur kunt inleveren voor recycling kunt u contact opnemen met het gemeentehuis in uw woonplaats, de reinigingsdienst, of het afvalverwerkingsbedrijf. U kunt ook het schema voor de afvoer van afgedankte elektrische en elektronische apparatuur (AEEA) raadplegen. Ga voor meer informatie over het inzamelen en recyclen van afgedankte elektrische en elektronische apparatuur naar [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Sólo para la Unión Europea y el Área Económica Europea (Noruega, Islandia y Liechtenstein)**

Este símbolo indica que este producto no debe desecharse con los desperdicios domésticos, de acuerdo con la directiva RAEE (2012/19/UE) y con la legislación nacional. Este producto debe entregarse en uno de los puntos de recogida designados, como por ejemplo, entregándolo en el lugar de venta al comprar un producto similar o depositándolo en un lugar de recogida autorizado para el reciclado de residuos de aparatos eléctricos y electrónicos (RAEE). La manipulación inapropiada de este tipo de desechos podría tener un impacto negativo en el entorno y la salud humana, debido a las sustancias potencialmente peligrosas que normalmente están asociadas con los RAEE. Al mismo tiempo, su cooperación a la hora de desechar correctamente este producto contribuirá a la utilización eficaz de los recursos naturales. Para más información sobre cómo puede eliminar el equipo para su reciclado, póngase en contacto con las autoridades locales, con las autoridades encargadas de los desechos, con un sistema de gestión RAEE autorizado o con el servicio de recogida de basuras doméstico. Si desea más información acerca de la devolución y reciclado de RAEE, visite la web [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Només per a la Unió Europea i a l'Espai Econòmic Europeu (Noruega, Islàndia i Liechtenstein)**

Aquest símbol indica que aquest producte no s'ha de llençar a les escombraries de la llar, d'acord amb la Directiva RAEE (2012/19/UE) i la legislació nacional. Aquest producte s'hauria de lliurar en un dels punts de recollida designats, com per exemple, intercanviant-lo un per un en comprar un producte similar o lliurant-lo en un lloc de recollida autoritzat per al reciclatge de residus d'aparells elèctrics i electrònics (AEE). La manipulació inadequada d'aquest tipus de residus podria tenir un impacte negatiu en l'entorn i en la salut humana, a causa de les substàncies potencialment perilloses que normalment estan associades als AEE. Així mateix, la vostra cooperació a l'hora de llençar correctament aquest producte contribuirà a la utilització efectiva dels recursos naturals. Per a més informació sobre els punts on podeu lliurar aquest producte per procedir al seu reciclatge, adreceu-vos a la vostra oficina municipal, a les autoritats encarregades dels residus, al pla de residus homologat per la RAEE o al servei de recollida de deixalles domèstiques de la vostra localitat. Per a més informació sobre la devolució i el reciclatge de productes RAEE, visiteu [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

### **Solo per Unione Europea e SEE (Norvegia, Islanda e Liechtenstein)**

Questo simbolo indica che il prodotto deve essere oggetto di raccolta separata in conformità alla Direttiva RAEE (2012/19/UE) e alla normativa locale vigente. Il prodotto deve essere smaltito presso un centro di raccolta differenziata, un distributore autorizzato che applichi il principio dell'"uno contro uno", ovvero del ritiro della vecchia apparecchiatura elettrica al momento dell'acquisto di una nuova, o un impianto autorizzato al riciclaggio dei rifiuti di apparecchiature elettriche ed elettroniche. La gestione impropria di questo tipo di rifiuti può avere un impatto negativo sull'ambiente e sulla salute umana causato dalle sostanze potenzialmente pericolose che potrebbero essere contenute nelle apparecchiature elettriche ed elettroniche. Un corretto smaltimento di tali prodotti contribuirà inoltre a un uso efficace delle risorse naturali ed eviterà di incorrere nelle sanzioni amministrative di cui all'art. 255 e successivi del Decreto Legislativo n. 152/06. Per ulteriori informazioni sullo smaltimento e il recupero dei Rifiuti di Apparecchiature Elettriche ed Elettroniche, consultare la Direttiva RAEE, rivolgersi alle autorità competenti, oppure visitare il sito [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

### **Apenas para a União Europeia e AEE (Noruega, Islândia e Liechtenstein)**

Este símbolo indica que o produto não deve ser colocado no lixo doméstico, de acordo com a Directiva REEE (2012/19/UE) e a legislação nacional. Este produto deverá ser colocado num ponto de recolha designado, por exemplo, num local próprio autorizado quando adquirir um produto semelhante novo ou num local de recolha autorizado para reciclar resíduos de equipamentos eléctricos e electrónicos (EEE). O tratamento inadequado deste tipo de resíduo poderá causar um impacto negativo no ambiente e na saúde humana devido às substâncias potencialmente perigosas normalmente associadas aos equipamentos eléctricos e electrónicos. Simultaneamente, a sua cooperação no tratamento correcto deste produto contribuirá para a utilização eficaz dos recursos naturais. Para mais informações sobre os

locais onde o equipamento poderá ser reciclado, contacte os serviços locais, a autoridade responsável pelos resíduos, o esquema REEE aprovado ou o serviço de tratamento de lixo doméstico. Para mais informações sobre a devolução e reciclagem de produtos REEE, vá a [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Gælder kun i Europæiske Union og EØS (Norge, Island og Liechtenstein)**

Dette symbol angiver, at det pågældende produkt ikke må bortskaffes sammen med dagrenovation jf. direktivet om affald af elektrisk og elektronisk udstyr (WEEE) (2012/19/EU) og gældende national lovgivning. Det pågældende produkt skal afleveres på et nærmere specificeret indsamlingssted, f.eks. i overensstemmelse med en godkendt én-til-én-procedure, når du indkøber et nyt tilsvarende produkt, eller produktet skal afleveres på et godkendt indsamlingssted for elektronikaffald. Forkert håndtering af denne type affald kan medføre negative konsekvenser for miljøet og menneskers helbred på grund af de potentielt sundhedsskadelige stoffer, der generelt kan forefindes i elektrisk og elektronisk udstyr. Når du foretager korrekt bortskaffelse af det pågældende produkt, bidrager du til effektiv brug af naturressourcerne. Yderligere oplysninger om, hvor du kan bortskaffe dit elektronikaffald med henblik på genanvendelse, får du hos de kommunale renovationsmyndigheder. Yderligere oplysninger om returnering og genanvendelse af affald af elektrisk og elektronisk udstyr får du ved at besøge [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Μόνο για την Ευρωπαϊκή Ένωση και τον ΕΟΧ (Νορβηγία, Ισλανδία και Λιχτενστάιν)**

Αυτό το σύμβολο υποδηλώνει ότι αυτό το προϊόν δεν πρέπει να απορρίπτεται μαζί με τα οικιακά απορρίμματα, σύμφωνα με την Οδηγία σχετικά με τα Απόβλητα Ηλεκτρικού και Ηλεκτρονικού Εξοπλισμού (ΑΗΗΕ) (2012/19/ΕΕ) και την εθνική σας νομοθεσία. Αυτό το προϊόν πρέπει να παραδίδεται σε καθορισμένο σημείο συλλογής, π.χ. σε μια εξουσιοδοτημένη βάση ανταλλαγής όταν αγοράζετε ένα νέο παρόμοιο προϊόν ή σε μια εξουσιοδοτημένη θέση συλλογής για την ανακύκλωση των αποβλήτων Ηλεκτρικού και Ηλεκτρονικού Εξοπλισμού (ΗΗΕ). Ο ακατάλληλος χειρισμός αυτού του τύπου αποβλήτων μπορεί να έχει αρνητικό αντίκτυπο στο περιβάλλον και την υγεία του ανθρώπου, λόγω δυνητικών επικίνδυνων ουσιών που γενικά συνδέονται με τον ΗΗΕ. Ταυτόχρονα, η συνεργασία σας όσον αφορά τη σωστή απόρριψη αυτού του προϊόντος θα συμβάλει στην αποτελεσματική χρήση των φυσικών πόρων. Για περισσότερες πληροφορίες σχετικά με τα σημεία όπου μπορείτε να απορρίψετε τον εξοπλισμό σας για ανακύκλωση, επικοινωνήστε με το τοπικό γραφείο της πόλης σας, την υπηρεσία απορριμμάτων, το εγκεκριμένο σχήμα ΑΗΗΕ ή την υπηρεσία απόρριψης οικιακών αποβλήτων. Για περισσότερες πληροφορίες σχετικά με την επιστροφή και την ανακύκλωση των προϊόντων ΑΗΗΕ, επισκεφθείτε την τοποθεσία [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Gjelder kun den europeiske union og EØS (Norge, Island og Liechtenstein)

Dette symbolet indikerer at dette produktet ikke skal kastes sammen med husholdningsavfall, i henhold til WEEE-direktiv (2012/19/EU) og nasjonal lov. Produktet må leveres til et dertil egnet innsamlingspunkt, det vil si på en autorisert en-til-en-basis når du kjøper et nytt lignende produkt, eller til et autorisert innsamlingssted for resirkulering av avfall fra elektrisk og elektronisk utstyr (EE-utstyr). Feil håndtering av denne typen avfall kan være miljø- og helseskadelig på grunn av potensielt skadelige stoffer som ofte brukes i EE-utstyr. Samtidig bidrar din innsats for korrekt avhending av produktet til effektiv bruk av naturressurser. Du kan få mer informasjon om hvor du kan avhende utrangert utstyr til resirkulering ved å kontakte lokale myndigheter, et godkjent WEEE-program eller husholdningens renovasjonselskap. Du finner mer informasjon om retur og resirkulering av WEEE-produkter på [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Vain Euroopan unionin sekä ETA:n (Norja, Islanti ja Liechtenstein) alueelle.

Tämä tunnus osoittaa, että sähkö- ja elektroniikkalaiteromua koskeva direktiivi (SER-direktiivi, 2012/19/EU) sekä kansallinen lainsäädäntö kieltävät tuotteen hävittämisen talousjätteen mukana. Tuote on vietävä asianmukaiseen keräyspisteeseen, esimerkiksi kodinkoneliikkeeseen uutta vastaavaa tuotetta ostettaessa tai viralliseen sähkö- ja elektroniikkalaiteromun keräyspisteeseen. Sähkö- ja elektroniikkalaiteromun virheellinen käsittely voi vahingoittaa ympäristöä ja ihmisten terveyttä, koska laitteet saattavat sisältää ympäristölle ja terveydelle haitallisia aineita. Lisäksi tuotteen asianmukainen hävittäminen säästää luonnonvaroja. Lisätietoja sähkö- ja elektroniikkalaiteromun keräyspisteistä saat kaupunkien ja kuntien tiedotuksesta, jätehuoltoviranomaisilta, sähkö- ja elektroniikkalaiteromun kierrätysjärjestelmän ylläpitäjältä ja jätehuoltoyhtiöltä. Lisätietoja sähkö- ja elektroniikkalaiteromun keräyksestä ja kierrätyksestä on osoitteessa [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Endast för Europeiska unionen och EES (Norge, Island och Liechtenstein)

Den här symbolen visar att produkten enligt WEEE-direktivet (2012/19/EU) och nationell lagstiftning inte får sorteras och slängas som hushållsavfall. Den här produkten ska lämnas in på en därför avsedd insamlingsplats, t.ex. på en återvinningsstation auktoriserad att hantera elektrisk och elektronisk utrustning (EE-utrustning) eller hos handlare som är auktoriserade att byta in varor då nya, motsvarande köps (en mot en). Olämplig hantering av avfall av den här typen kan ha en negativ inverkan på miljön och

människors hälsa på grund av de potentiellt farliga ämnen som kan återfinnas i elektrisk och elektronisk utrustning. Din medverkan till en korrekt avfallshantering av den här produkten bidrar dessutom till en effektiv användning av naturresurserna. Kontakta ditt lokala kommunkontor, berörd myndighet, företag för avfallshantering eller ta del av en godkänd WEEE-organisation om du vill ha mer information om var du kan lämna den kasserade produkten för återvinning. För mer information om inlämning och återvinning av WEEE-produkter, se [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Pouze Evropská unie a EHP (Norsko, Island a Lichtenštejsko)**

Tento symbol znamená, že podle směrnice o OEEZ (2012/19/EU) a podle vnitrostátních právních předpisů nemá být tento výrobek likvidován s odpadem z domácností. Tento výrobek má být vrácen do sběrného místa, např. v rámci autorizovaného systému odběru jednoho výrobku za jeden nově prodaný podobný výrobek nebo v autorizovaném sběrném místě pro recyklaci odpadních elektrických a elektronických zařízení (OEEZ). Nevhodné nakládání s tímto druhem odpadu by mohlo mít negativní dopad na životní prostředí a lidské zdraví, protože elektrická a elektronická zařízení zpravidla obsahují potenciálně nebezpečné látky. Vaše spolupráce na správné likvidaci tohoto výrobku současně napomůže efektivnímu využívání přírodních zdrojů. Další informace o místech sběru vašeho odpadního zařízení k recyklaci vám sdělí místní úřad vaší obce, správní orgán vykonávající dozor nad likvidací odpadu, sběrný OEEZ nebo služba pro odvoz komunálního odpadu. Další informace týkající se vracení a recyklace OEEZ naleznete na adrese [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Csak az Európai Unió és az EGT (Norvégia, Izland és Liechtenstein) országáiban**

Ez a szimbólum azt jelzi, hogy a helyi törvények és a WEEE-irányelv (2012/19/EU) szerint a termék nem kezelhető háztartási hulladékként. A terméket a kijelölt nyilvános gyűjtőpontokon kell leadni, például hasonló cserekészülék vásárlásakor, illetve bármelyik, elektromos és elektronikai berendezésekből származó hulladék (WEEE) átvételére feljogosított gyűjtőponton. Az ilyen jellegű hulladékok a nem megfelelő kezelés esetén a bennük található veszélyes anyagok révén ártalmasak lehetnek a környezetre és az emberek egészségére. Továbbá, a termékből származó hulladék megfelelő kezelésével hozzájárulhat a természetes nyersanyagok hatékonyabb hasznosításához. A berendezésekből származó, újrahasznosítható hulladékok elhelyezésére vonatkozó további tudnivalóként forduljon a helyi önkormányzathoz, a közterület-fenntartó vállalathoz, a háztartási hulladék begyűjtését végző vállalathoz, illetve a hivatalos WEEE-képviselőhöz. További tudnivalókat a WEEE-termékek visszajuttatásáról és újrahasznosításáról a [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Tylko dla krajów Unii Europejskiej oraz EOG (Norwegia, Islandia i Liechtenstein)

Ten symbol oznacza, że zgodnie z dyrektywą WEEE dotyczącą zużytego sprzętu elektrycznego i elektronicznego (2012/19/UE) oraz przepisami lokalnymi nie należy wyrzucać tego produktu razem z odpadami gospodarstwa domowego. Produkt należy przekazać do wyznaczonego punktu gromadzenia odpadów, np. firmie, od której kupowany jest nowy, podobny produkt lub do autoryzowanego punktu gromadzenia zużytego sprzętu elektrycznego i elektronicznego w celu poddania go recyklingowi. Usuwanie tego typu odpadów w nieodpowiedni sposób może mieć negatywny wpływ na otoczenie i zdrowie innych osób ze względu na niebezpieczne substancje stosowane w takim sprzęcie. Jednocześnie pozbycie się zużytego sprzętu w zalecany sposób przyczynia się do właściwego wykorzystania zasobów naturalnych. Aby uzyskać więcej informacji na temat punktów, do których można dostarczyć sprzęt do recyklingu, prosimy skontaktować się z lokalnym urzędem miasta, zakładem utylizacji odpadów, skorzystać z instrukcji zatwierdzonej dyrektywą WEEE lub skontaktować się z przedsiębiorstwem zajmującym się wywozem odpadów domowych. Więcej informacji o zwracaniu i recyklingu zużytego sprzętu elektrycznego i elektronicznego znajduje się w witrynie [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Platí len pre štáty Európskej únie a EHP (Nórsko, Island a Lichtenštajnsko)

Tento symbol znamená, že podľa Smernice 2012/19/EÚ o odpade z elektrických a elektronických zariadení (OEEZ) a podľa platnej legislatívy Slovenskej republiky sa tento produkt nesmie likvidovať spolu s komunálnym odpadom. Produkt je potrebné odovzdať do určenej zberne, napr. prostredníctvom výmeny za kúpu nového podobného produktu, alebo na autorizované zberné miesto, ktoré spracúva odpad z elektrických a elektronických zariadení (EEZ). Nesprávna manipulácia s takýmto typom odpadu môže mať negatívny vplyv na životné prostredie a ľudské zdravie, pretože elektrické a elektronické zariadenia obsahujú potenciálne nebezpečné látky. Spoluprácou na správnej likvidácii produktu prispějete k účinnému využívaniu prírodných zdrojov. Ďalšie informácie o mieste recyklácie opotrebovaných zariadení získate od miestneho úradu, úradu životného prostredia, zo schváleného plánu OEEZ alebo od spoločnosti, ktorá zaisťuje likvidáciu komunálneho odpadu. Viac informácií nájdete aj na webovej stránke: [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Üksnes Euroopa Liit ja EMP (Norra, Island ja Liechtenstein)

See sümbol näitab, et antud toodet ei tohi vastavalt elektri- ja elektroonikaseadmete jäätmeid käsitlevale direktiivile (2012/19/EL) ning teie riigis kehtivatele õigusaktidele utiliseerida koos olmejäätmetega. Antud

toode tuleb anda selleks määratud kogumispunkti, nt müügipunkt, mis on volitatud üks ühe vastu vahetama, kui ostate uue sarnase toote, või elektri- ja elektroonikaseadmete jäätmete ümbertöötlemiseks mõeldud kogumispunkti. Täiendava teabe saamiseks elektri- ja elektroonikaseadmetest tekkinud jäätmete tagastamise ja ümbertöötlemise kohta võtke ühendust kohaliku omavalitsusega, asjakohase valitsusasutusega, asjakohase tootjavastutusorganisatsiooniga või olmejäätmete käitlejaga. Lisateavet leitate ka Interneti-leheküljelt [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Tikai Eiropas Savienībai un EEZ (Norvēģijai, Islandei un Lihtenšteinai)**

Šis simbols norāda, ka atbilstoši ES Direktīvai (2012/19/ES) par elektrisko un elektronisko iekārtu atkritumiem (EEIA) un vietējiem tiesību aktiem no šī izstrādājuma nedrīkst atbrīvoties, izmetot to kopā ar sadzīves atkritumiem. Šis izstrādājums ir jānodod piemērotā savākšanas vietā, piemēram, apstiprinātā veikalā, kur iegādājaties līdzīgu jaunu produktu un atstājat veco, vai apstiprinātā vietā izlietotu elektrisko un elektronisko iekārtu pārstrādei. Nepareiza šāda veida atkritumu apsaimniekošana var apdraudēt vidi un cilvēka veselību tādu iespējami bīstamu vielu dēļ, kas parasti ir elektriskajās un elektroniskajās iekārtās. Turklāt jūsu atbalsts pareizā šāda veida atkritumu apsaimniekošanā sekmēs efektīvu dabas resursu izmantošanu. Lai saņemtu pilnīgāku informāciju par vietām, kur izlietoto iekārtu var nodot pārstrādei, sazinieties ar vietējo pašvaldību, atkritumu savākšanas atbildīgo dienestu, pilnvarotu EEIA struktūru vai sadzīves atkritumu apsaimniekošanas iestādi. Lai saņemtu plašāku informāciju par elektrisko un elektronisko iekārtu nodošanu pārstrādei, apmeklējiet tīmekļa vietni [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Tik Europos Sąjungai ir EEE (Norvegijai, Islandijai ir Lichtenšteinui)**

Šis ženkla reiškia, kad gaminio negalima išmesti su buitinėmis atliekomis, kaip yra nustatyta Direktyvoje (2012/19/ES) ir nacionaliniuose teisė aktuose dėl EEĮ atliekų tvarkymo. Šį gaminį reikia atiduoti į tam skirtą surinkimo punktą, pvz., pagal patvirtintą keitimo sistemą, kai perkamas panašus gaminys, arba į elektros ir elektroninės įrangos (EEĮ) atliekų perdirbimo punktą. Netinkamas tokios rūšies atliekų tvarkymas dėl elektros ir elektroninės įrangoje esančių pavojingų medžiagų gali pakenkti aplinkai ir žmonių sveikatai. Padėdami užtikrinti tinkamą šio gaminio šalinimo tvarką, kartu prisidėsite prie veiksmingo gamtos išteklių naudojimo. Jei reikia daugiau informacijos, kaip šalinti tokias atliekas, kad jos būtų toliau perdirbamos, kreipkitės į savo miesto valdžios institucijas, atliekų tvarkymo organizacijas, patvirtintų EEĮ atliekų sistemų arba jūsų buitinių atliekų tvarkymo įstaigų atstovus. Išsamesnės informacijos apie EEĮ atliekų grąžinimo ir perdirbimo tvarką galite rasti apsilankę tinklalapyje [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Samo za Evropsko unijo in EGP (Norveška, Islandija in Lihtenštajn)

Ta simbol pomeni, da tega izdelka v skladu z direktivo OEE0 (2012/19/EU) in državno zakonodajo ne smete odvreči v gospodinjske odpadke. Ta izdelek morate odložiti na ustrezno zbiralno mesto, na primer pri pooblaščenem prodajalcu, ko kupite podoben nov izdelek ali na zbiralno mesto za recikliranje električne in elektronske opreme. Neprimerno ravnanje s takšnimi odpadki lahko negativno vpliva na okolje in človekovo zdravje zaradi nevarnih snovi, ki so povezane z električno in elektronsko opremo. S pravilno odstranitvijo izdelka hkrati prispevate tudi k učinkoviti porabi naravnih virov. Če želite več informacij o tem, kje lahko odložite odpadno opremo za recikliranje, pokličite občinski urad, komunalno podjetje ali službo, ki skrbi za odstranjevanje odpadkov, ali si oglejte načrt OEE0. Če želite več informacij o vračanju in recikliranju izdelkov v skladu z direktivo OEE0, obiščite [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Само за Европейския съюз и ЕИП (Норвегия, Исландия и Лихтенщайн)

Този символ показва, че този продукт не трябва да се изхвърля заедно с битовите отпадъци, съгласно Директивата за ИУЕЕО (2012/19/ЕС) и Вашето национално законодателство. Този продукт трябва да бъде предаден в предназначен за целта пункт за събиране, например на база размяна, когато купувате нов подобен продукт, или в одобрен събирателен пункт за рециклиране на излязло от употреба електрическо и електронно оборудване (ИУЕЕО). Неправилното третиране на този тип отпадъци може да доведе до евентуални отрицателни последици за околната среда и човешкото здраве поради потенциално опасните вещества, които обикновено са свързани с ЕЕО. В същото време Вашето съдействие за правилното изхвърляне на този продукт ще допринесе за ефективното използване на природните ресурси. Повече информация относно местата, където може да предавате излязло от употреба оборудване за рециклиране, може да получите от местните власти, от органа, отговорен за отпадъците и от одобрена система за излязло от употреба ЕЕО или от Вашата местна служба за битови отпадъци. За повече информация относно връщането и рециклирането на продукти от излязло от употреба ЕЕО посетете [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## Doar pentru Uniunea Europeană și EEA (Norvegia, Islanda și Liechtenstein)

Acest simbol indică faptul că acest produs nu trebuie aruncat o dată cu reziduurile menajere, în conformitate cu Directiva DEEE (Directiva privind deșeurile de echipamente electrice și electronice) (2012/19/UE) și legile naționale. Acest produs trebuie transportat la un punct de colectare special, de

exemplu un centru care preia produsele vechi atunci când achiziționați un produs nou similar, sau la un punct de colectare autorizat pentru reciclarea deșeurilor provenite de la echipamentele electrice și electronice (EEE). Mănuirea necorespunzătoare a acestor tipuri de deșeuri poate avea un impact negativ asupra mediului înconjurător și sănătății indivizilor, din cauza substanțelor potențial nocive care sunt în general asociate cu EEE. În același timp, cooperarea dvs. la reciclarea corectă a acestui produs va contribui la utilizarea efectivă a resurselor naturale. Pentru mai multe informații privind locurile de reciclare a deșeurilor provenite de la echipamente, contactați biroul primăriei locale, autoritatea responsabilă cu colectarea deșeurilor, schema DEEE aprobată sau serviciul de colectare a deșeurilor menajere. Pentru mai multe informații privind returnarea și reciclarea produselor DEEE, vizitați [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Samo za Europsku uniju i EEZ (Norveška, Island i Lihtenštajn)**

Ovaj simbol pokazuje da se ovaj proizvod ne smije odlagati s kućnim otpadom sukladno WEEE Direktivi (2012/19/EC) i vašem nacionalnom zakonu. Ovaj proizvod je potrebno predati na posebno mjesto za sakupljanje otpada, npr. na ovlašteno mjesto gdje možete zamijeniti staro za novo ukoliko kupujete novi sličan proizvod ili na ovlašteno mjesto za sakupljanje rabljene električne i elektroničke opreme (EEE) za recikliranje. Nepropisno rukovanje ovom vrstom otpada može imati negativan učinak na okolinu i zdravlje ljudi zbog supstanci koje su potencijalno opasne za zdravlje, a općenito se povezuju s EEE. Istovremeno, vaša će suradnja kroz propisno odlaganje ovog proizvoda doprinijeti efektivnoj uporabi prirodnih resursa. Za više informacija o tome gdje možete odložiti svoj otpad za recikliranje obratite se vašem lokalnom gradskom uredu, komunalnoj službi, odobrenom WEEE programu ili službi za odlaganje kućnog otpada. Ostale informacije o vraćanju i recikliranju WEEE proizvoda potražite na [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Korisnici u Srbiji**

Ovaj simbol označava da ovaj proizvod ne sme da se odlaže sa ostalim kućnim otpadom, u skladu sa WEEE Direktivom (2012/19/EU) i nacionalnim zakonima. Ovaj proizvod treba predati određenom centru za prikupljanje, npr. na osnovi "jedan-za-jedan" kada kupujete sličan novi proizvod, ili ovlašćenom centru za prikupljanje za reciklažu istrošene električne i elektronske opreme (EEE). Nepravilno rukovanje ovom vrstom otpada može da ima moguće negativne posledice po životnu sredinu i ljudsko zdravlje usled potencijalno opasnih materijala koji se uglavnom vezuju za EEE. U isto vreme, vaša saradnja na ispravnom odlaganju ovog proizvoda će doprineti efikasnom korišćenju prirodnih resursa. Za više informacija o tome gde možete da predate vašu staru opremu radi recikliranja, vas molimo, da kontaktirate lokalne gradske vlasti, komunalne službe, odobreni plan reciklaže ili Gradsku čistoću. Za više informacija o vraćanju i recikliranju WEEE proizvoda, posetite stranicu [www.canon-europe.com/weee](http://www.canon-europe.com/weee).

## **Handling Precautions**

---

- **Canceling Print Jobs**
- **Legal Restrictions on Scanning/Copying**
- **Printer Handling Precautions**
- **Transporting Your Printer**
- **When Repairing, Lending, or Disposing of the Printer**
- **Keeping Print Quality High**
- **Ink Tips**

## Legal Restrictions on Scanning/Copying

---

Scanning, printing, copying, or modifying copies of the following may be punishable under law.

This list is non-exhaustive. When in doubt, check with a local legal representative.

- Paper money
- Money orders
- Certificates of deposit
- Postage stamps (canceled or uncanceled)
- Identification badges or insignia
- Selective service or draft papers
- Checks or drafts issued by governmental agencies
- Motor vehicle licenses and certificates of title
- Traveler's checks
- Food stamps
- Passports
- Immigration papers
- Internal revenue stamps (canceled or uncanceled)
- Bonds or other certificates of indebtedness
- Stock certificates
- Copyrighted works or works of art, without the owner's consent

## Printer Handling Precautions

### Do not place any object on the document cover!

Do not place any object on the document cover. It will fall into the rear tray when the document cover is opened and cause the printer to malfunction. Also, place the printer where objects will not fall on it.

## Transporting Your Printer

When relocating the printer for changing your living place, make sure of the following.

### ▶▶▶ Important

- Pack the printer in a sturdy box so that it is placed with its bottom facing down, using sufficient protective material to ensure safe transport.
- With the print head and ink tank left installed in the printer, press the **ON** button to turn off the power. This allows the printer to automatically cap the print head, thus preventing it from drying.
- After packing, do not tilt the box containing the printer or turn it on its side or upside down. Doing so may cause the ink to leak during transport and cause damage to the printer.
- When a shipping agent is handling transport of the printer, have its box marked "THIS SIDE UP" to keep the printer with its bottom facing down. Mark also with "FRAGILE" or "HANDLE WITH CARE".

#### 1. [Turn the printer off.](#)

Retract the paper output tray following the message.

The paper output tray is retracted and the power will go off.

#### 2. Close operation panel.

#### 3. Check that **ON** lamp is off and unplug power cord.

### ▶▶▶ Important

- Do not unplug the printer while the **ON** lamp is lit or flashing, as it may cause malfunction or damage to the printer, making the printer unable to print.

#### 4. Retract paper support, then close the rear tray cover.

#### 5. Unplug the printer cable from the computer and from the printer, then unplug the power cord from the printer.

#### 6. Use adhesive tape to secure all the covers on the printer to keep them from opening during transportation. Then pack the printer in the plastic bag.

**7.** Attach the protective material to the printer when packing the printer in the box.

## When Repairing, Lending, or Disposing of the Printer

---

If you have entered personal data, passwords and/or other security settings on the printer, such information may be stored in the printer.

To keep your personal information safe, please be sure to reset all printer settings when sending the printer for repair, lending or transferring the printer to another person, or disposing of the printer.

➔ [Reset settings](#)

## Keeping Print Quality High

---

The key to printing with the optimal printing quality is to prevent the print head from drying or clogging. Always observe the following rules for optimal printing quality.

### ▶▶▶ Note

- Depending on the type of paper, ink may blur if you trace the printed area with a highlight pen or paint-stick, or bleed if water or sweat comes in contact with the printed area.

### Never unplug the power cord until the power is turned off!

If you press the **ON** button to turn off the power, the printer caps the print head (nozzles) automatically to prevent from drying. If you unplug the power cord from the wall outlet before the **ON** lamp is turned off, the print head will not be capped properly and this will cause drying or clogging.

When [unplugging the power cord](#), check that the **ON** lamp is not lit.

### Print periodically!

Just as the tip of a felt pen becomes dry and unusable if it has not been used for a long time, even if it is capped, the print head too, may become dried or clogged if the printer has not been used for a long time. We recommend you to use the printer at least once a month.

## Ink Tips

---

### How is ink used for various purposes other than printing?

Ink may be used for purposes other than printing.

When you use the Canon printer for the first time after you install the bundled ink tanks, the printer consumes a small amount of ink in the amount to enable printing by filling the nozzles of the Print Head with ink. For this reason, the number of sheets that can be printed with the first ink tanks is fewer than the succeeding ink tanks.

The printing costs described in the brochures or websites are based on the consumption data from not the first ink tank /ink cartridge but the succeeding ink tank /ink cartridge.

Ink is sometimes used to maintain the optimal printing quality.

To keep printer's performance, Canon printer performs cleaning automatically according to its condition. When the printer performs cleaning, a small amount of ink is consumed. In this case, all colors of ink may be consumed.

#### [Cleaning function]

The cleaning function helps the printer to suck air bubbles or ink itself from the nozzle and thus prevents print quality degradation or nozzle clogging.

### Does black-and-white printing use color ink?

Black-and-white printing may use ink other than black ink depending on the type of printing paper or the settings of the printer driver. So, color ink is consumed even when printing in black-and-white.

### Why does the printer have two black ink tanks?

There are two kinds of black ink in the printer: dye ink (BK) and pigment ink (PGBK).

The dye ink is used mainly for printing photos, illustration, etc., and the pigment ink is used for text-based documents. Each has different purposes so that even if one runs out, another will not be used instead. If either of them runs out, the ink tank replacement is required.

These two inks are automatically used depending on the type of printing paper or the settings of the printer driver. You cannot change the usage of these inks yourself.

# Supported Paper Sizes and Weights

## Page Sizes

You can use the following page sizes.

### ▶▶ Note

- Page sizes and media types the printer supports differ depending on the OS you are using.

### Standard sizes:

- Letter
- Legal
- A5
- A4
- B5
- KG/4"x6"(10x15)
- 5"x7"(13x18cm)
- 7"x10"(18x25cm)
- 8"x10"(20x25cm)
- L(89x127mm)
- 2L(127x178mm)
- Square 3.5"
- Square 5"
- Hagaki
- Hagaki 2
- Envelope Com 10
- Envelope DL
- Nagagata 3
- Nagagata 4
- Yougata 4
- Yougata 6
- Card 2.17"x3.58"

### Special sizes

- Minimum size: 2.17 x 3.50 in. (55.0 x 89.0 mm)
- Maximum size: 8.50 x 26.61 in. (215.9 x 676.0 mm)

## Paper Weight

You can use paper in the following weight range.

- Plain paper: From 17 to 28 lb (64 to 105 g /m<sup>2</sup>)

## Paper Load Limit

This section shows the paper load limits of the rear tray, the cassette, and the paper output tray.

- ➔ [Paper Load Limits of Rear Tray and Cassette](#)
- ➔ [Paper Load Limit of Paper Output Tray](#)

### ▶▶▶ Note

- Page sizes and media types differ depending on the country or region where the paper is sold. For details on page sizes and media types, access the Canon website.

## Paper Load Limits of Rear Tray and Cassette

### Genuine Canon Paper

Paper for printing documents:

Media Name <Model No.>	Rear Tray	Cassette
Canon Red Label Superior <WOP111>	Approx. 100 sheets	Approx. 100 sheets
Canon Océ Office Colour Paper <SAT213>	Approx. 80 sheets	Approx. 80 sheets
High Resolution Paper <HR-101N> <a href="#">*1</a>	Approx. 80 sheets	N/A

Paper for printing photos:

Media Name <Model No.>	Rear Tray
Glossy Photo Paper "Everyday Use" <GP-501/ GP-508> <a href="#">*2</a>	A4, Letter, 5"x7"(13x18cm), 8"x10"(20x25cm), 2L(127x178mm): 10 sheets
Photo Paper Glossy <GP-701> <a href="#">*2</a>	KG/4"x6"(10x15), L(89x127mm), Square 3.5", Square 5", Hagaki: 20 sheets

<b>Double sided Matte Paper &lt;MP-101D&gt;</b>	20 sheets
---	-----------

## Paper other than Genuine Canon Paper

Common Name	Rear Tray	Cassette
Plain Paper (including recycled paper)*1	Approx. 100 sheets (Legal: 10 sheets)	Approx. 100 sheets
Envelopes	10 envelopes	N/A

\*1 Normal feeding at maximum capacity may not be possible with some types of paper, or under very high or low temperature or humidity. In this case, load half the amount of paper or less.

\*2 Feeding from a loaded stack of paper may leave marks on the printed side or prevent efficient feeding. In this case, load one sheet at a time.

## Paper Load Limit of Paper Output Tray

### Genuine Canon Paper

Paper for printing documents:

Media Name <Model No.>	Paper Output Tray
<b>Canon Red Label Superior &lt;WOP111&gt;</b> <b>Canon Océ Office Colour Paper &lt;SAT213&gt;</b> <b>High Resolution Paper &lt;HR-101N&gt;</b>	Approx. 50 sheets

### Paper other than Genuine Canon Paper

Common Name	Paper Output Tray
Plain Paper (including recycled paper)	Approx. 50 sheets (Legal: 10 sheets)

When continuing printing with paper other than the above, we recommend removing already printed paper from the paper output tray to avoid smearing or discoloration.

## Supported Media Types

For best results, choose paper designed for how you are printing. A variety of paper for documents as well as photos or illustrations is available from Canon. Use genuine Canon paper to print important photos, when possible.

➔ [Supported Paper Sizes and Weights](#)

➔ [Unsupported Media Types](#)

### ▶▶▶ Note

- Refer to [Handling Paper](#) before use.
- Page sizes and media types differ depending on the country or region where the paper is sold. For details on page sizes and media types, access the Canon website.
- Genuine Canon paper is not available in some countries or regions. Note that in the United States, Canon paper is not sold by model number. Instead, purchase paper by name.

## Recommended Genuine Canon Paper According to Purpose

### Paper for printing documents:

- **Canon Red Label Superior** <WOP111>
- **Canon Océ Office Colour Paper** <SAT213>
- **High Resolution Paper** <HR-101N>

### Paper for printing photos:

- **Glossy Photo Paper "Everyday Use"** <GP-501/GP-508>
- **Photo Paper Glossy** <GP-701>
- **Photo Paper Plus Glossy II** <PP-201/PP-208/PP-301>
- **Photo Paper Pro Luster** <LU-101>
- **Photo Paper Plus Semi-gloss** <SG-201>
- **Matte Photo Paper** <MP-101>

### Paper for making original goods:

- **Photo Stickers (16 stickers per sheet)** <PS-108>
- **Photo Stickers (Free Cutting)** <PS-208>
- **Photo Stickers (Variety Pack)** <PS-808>
- **Restickable Photo Paper** <RP-101>
- **Removable Photo Stickers** <PS-308R>
- **Magnetic Photo Paper** <MG-101/PS-508>
- **Light Fabric Iron-on Transfers** <LF-101>
- **Double sided Matte Paper** <MP-101D>

## **Usable Media Types Other Than Genuine Canon paper**

- Plain Paper (including recycled paper)
- Envelopes

➔ [Paper Settings on the Printer Driver and the Printer \(Media Type\)](#) (Windows)

### **▶▶ Note**

- When using art paper, see [Before Printing on Art Paper](#).

## Unsupported Media Types

---

Do not use the following types of paper. Using such paper will cause not only unsatisfactory results, but also the printer to jam or malfunction.

- Folded, curled, or wrinkled paper
- Damp paper
- Paper thinner than a postcard, including plain paper or notepad paper cut to a small size (when printing on paper smaller than A5)
- Picture postcards
- Postcards affixed with photos or stickers
- Envelopes with a double flap
- Envelopes with an embossed or treated surface
- Envelopes whose gummed flaps are already moistened and adhesive
- Any type of paper with holes
- Paper that is not rectangular
- Paper bound with staples or glue
- Paper with an adhesive surface on the back such as label seal
- Paper decorated with glitter, etc.

## Handling Paper

---

- For warnings on use of the non-printable side, see each product's usage information.
- Be careful not to rub or scratch the surfaces of any types of paper when handling.
- Hold the paper as closely as possible to its edges and try not to touch the printing surface. The print quality may be degraded if the printing surface is smudged with sweat or oil that comes from your hands.
- Do not touch the printed surface until the ink is dried. Even when the ink is dried, be careful not to touch the printed surface as much as possible when handling. Due to the nature of the pigment ink, the ink on the printed surface may be removed when being rubbed or scratched.
- Take out only the necessary number of paper from the package, just before printing.
- To avoid curling, when you do not print, put unused paper back into the package and keep it on a level surface. And also, store it avoiding heat, humidity, and direct sunlight.

## Before Printing on Art Paper

When using art paper, dust is liable to be generated. It is therefore recommended that paper dust be removed on art paper just before printing.

### You will need a soft hair brush (or similar brush used to clean office automation equipment).

The wider the brush, the more effective it will be.

OK - soft brush made from material such as polypropylene, polyethylene, horse hair or goat hair.

### »» Important

- Be sure not to use brushes as shown below. The printing surface may be damaged.

Not OK - brush made from hard material, cloth or washcloth, sticky and abrasive materials.

### Paper dust removal procedure:

1. Check that the brush is not wet and free from dust or dirt.
2. Brush the overall printing surface carefully in one direction.

### »» Important

- Be sure to brush all the way across the paper; do not start brushing at the middle or stop halfway.
- Be careful not to touch the printing surface as much as possible.

3. To complete the removal of paper dust, brush the paper in the other direction from top to bottom.

## **Printing**

---

- **Printing Photos and Documents**
- **Printing Hagaki and Envelopes**
- **Other Various Printing Features**

## **Printing Photos and Documents**

---

- **Printing from Computer**
- **Printing from Smartphone/Tablet**
- **Printing Using Operation Panel**
- **Using PIXMA/MAXIFY Cloud Link**

## **Printing from Computer**

---

- **Printing from Application Software (Windows Printer Driver)**
- **Printing from Application Software (macOS AirPrint)**
- **Printing Using Canon Application Software**
- **Printing from Chrome OS**

## Printing from Application Software (Windows Printer Driver)

---

- **Basic Printing Setup** 📌 **Basic**
- **Main Controls (Basic Settings Tab)**
- **Set Media Type, Quality, etc. (Media/Quality Tab)**
- **Set the Layout of Printed Documents (Page Setup Tab)**
- **Perform maintenance or settings (Maintenance tab)**
- **Overview of the Printer Driver**
- **Updating the Driver**

## Basic Printing Setup

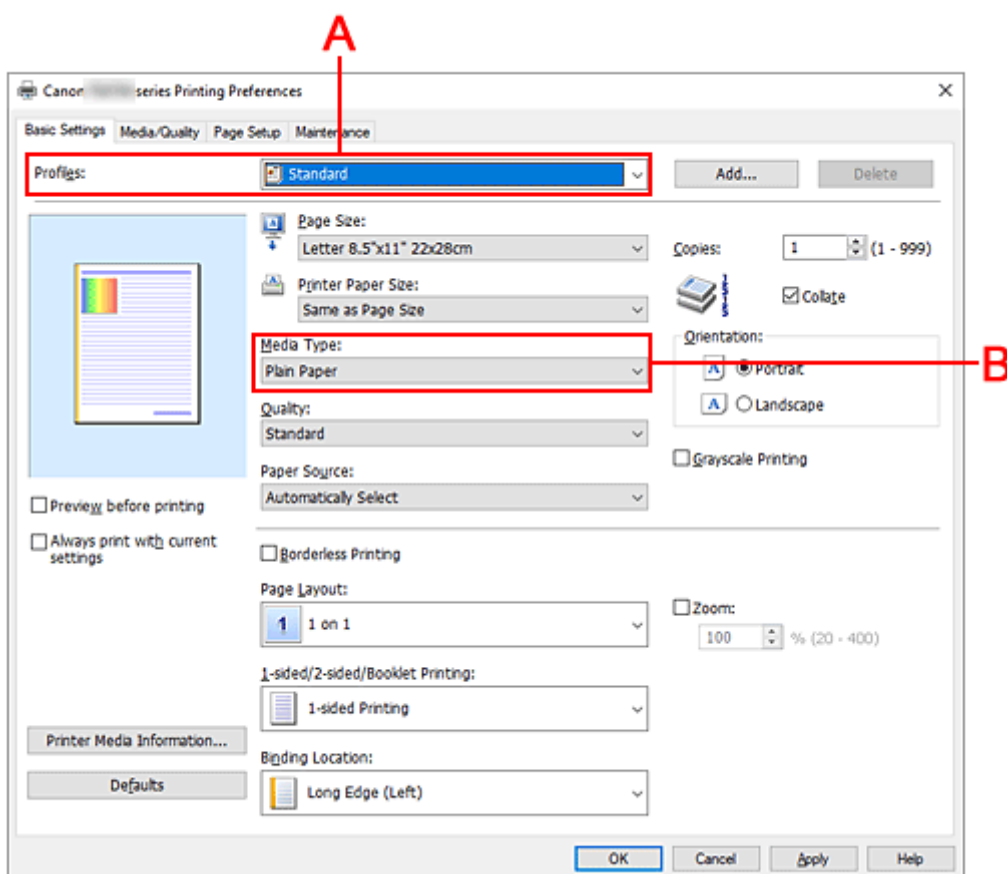

In the [Basic Settings tab](#), you can print in various ways according to your purpose.

1. [Check that printer is turned on](#)
2. Open [printer driver's setup screen](#)
3. Select Profile (A)

Select the print settings according to your purpose in **Profiles** on the **Basic Settings** tab.  
If you select a print setting, **Paper Size** and **Media Type** will change automatically.

### ►►► Note

- When the paper size to be printed is selected from **Printer Paper Size**, the zoom level is automatically set according to the selected paper size.  
To select a zoom level of your choice, add a checkmark to **Zoom** and enter a number.

4. Select Media Type (B) According to Requirements
5. [Set Paper](#)
6. Click **OK**

## »» Note

- For details about the paper information to be registered to the printer driver and on the printer, see the following:
  - [Paper Settings on the Printer Driver and the Printer \(Media Type\)](#)
  - [Paper Settings on the Printer Driver and the Printer \(Paper Size\)](#)

## **Main Controls (Basic Settings Tab)**

---

- **Basic Settings Tab Description**
- **Paper Settings on the Printer Driver and the Printer (Media Type)**
- **Paper Settings on the Printer Driver and the Printer (Paper Size)**

## Basic Settings Tab Description

The **Basic Settings** tab is for registering commonly used print settings. When you select a registered setting, the printer automatically switches to the preset items.

- [Profiles](#)
- [Settings Preview](#)
- [Preview before printing](#)
- [Always print with current settings](#)
- [Page Size](#)
- [Printer Paper Size](#)
- [Media Type](#)
- [Quality](#)
- [Paper Source](#)
- [Copies](#)
- [Collate](#)
- [Orientation](#)
- [Grayscale Printing](#)
- [Borderless Printing](#)
- [Page Layout](#)
- [Zoom](#)
- [1-sided/2-sided/Booklet Printing](#)
- [Binding Location](#)

### Profiles

The names and icons of frequently used printing profiles are registered. When you select a printing profile according to the purpose of the document, settings that match the purpose are applied.

You can also change a printing profile and register it under a new name. You can delete the registered printing profile.

### **Standard**

These are the factory settings.

If **Page Size**, **Orientation**, and **Copies** were set from the application software, those settings have priority.

### **Photo Printing**

If you select this setting when printing a photo, the photo paper and photo size generally used are set. The **Borderless Printing** check box is checked automatically.

If **Orientation** and **Copies** were set from the application software, those settings have priority.

### **Paper Saving**

Select this setting to save paper when printing a general document. **Page Layout** is set to **2 on 1**, and **1-sided/2-sided/Booklet Printing** is set to **2-sided Printing**.

If **Page Size**, **Orientation**, and **Copies** were set from the application software, those settings have priority.

### **Envelope**

If you select this setting for printing an envelope, **Media Type** is set automatically to **Envelope**. In the **Envelope Size Setting** dialog box, select the size of the envelope to be used.

### **Greeting Card**

When selected for printing a greeting card, the **Media Type** is automatically set to **Inkjet Greeting Card**. The **Quality** is also set to **High**, and a check-mark is added to **Borderless Printing**.

### **▶▶▶ Note**

- You cannot change the order of print settings.

### **Add...**

Displays the [Add to Profiles dialog box](#).

Click this button when you want to save the information that you set on the **Basic Settings**, **Media/Quality**, and **Page Setup** tabs to **Profiles**.

### **Delete**

Deletes a registered printing profile.

Select the name of the setting to be deleted from **Profiles**, and click **Delete**. When a confirmation message is displayed, click **OK** to delete the specified printing profile.

### **▶▶▶ Note**

- Printing profiles that are registered in the initial settings cannot be deleted.

### **Settings Preview**

The paper illustration shows how the original will be laid out on a sheet of paper.

You can check an overall image of the layout.

### **Preview before printing**

Shows what the print result will look like before you actually print the data.

Check this check box to display a preview before printing.

Uncheck this check box if you do not want to display a preview.

## Always print with current settings

Prints documents with the current settings starting from the next print execution.

When you select this function and then close the [printer driver setup window](#), the information that you set on the **Basic Settings**, **Media/Quality**, and **Page Setup** tabs are saved and printing with the same settings is possible starting from the next print execution.

### »»» Important

- If you log on with a different user name, the settings that were set when this function was enabled are not reflected in the print settings.
- If a setting was specified on the application software, it has priority.

## Page Size

Selects a page size.

Ensure that you select the same page size as you selected within the application.

If you select **Custom...**, the [Custom Paper Size dialog box](#) opens and allows you to specify any vertical and horizontal dimensions for the paper size.

## Printer Paper Size

Selects the size of paper actually loaded into the printer.

Normally, it will appear as **Same as Page Size**, and the document is printed with no scaling.

If you select a paper size that is smaller than the **Page Size**, the document size will be reduced. If you select a paper size that is larger, the document size will be enlarged.

Also if you select **Custom...**, the [Custom Paper Size dialog box](#) opens and allows you to specify any vertical and horizontal dimensions for the paper size.

## Media Type

Selects a type of printing paper.

Select a media type that matches the paper that is loaded in the printer. This ensures that printing is carried out properly for the specified paper.

## Quality

Selects your desired printing quality.

Select one of the following to set the print quality level that is appropriate for the purpose.

To set the print quality level individually, click the **Media/Quality** tab, and for **Quality**, select **Custom**.

The **Set...** becomes enabled. Click **Set...** to open the [Custom dialog box](#), and then specify the desired settings.

### High

Gives priority to print quality over printing speed.

### Standard

Prints with average speed and quality.

### Draft

This setting is appropriate for test printing.

## Paper Source

Shows the source from which paper is supplied.

You may be able to switch the paper source with the printer driver.

### Automatically Select

Based on the paper settings in the printer driver and the paper information registered on the printer, the printer automatically determines the paper source and feeds paper.

## Rear Tray

Paper is always supplied from the rear tray.

## Cassette

Paper is always supplied from the cassette.

### »» Important

- Depending on the media type and size, the **Paper Source** settings that can be selected may differ.

## Copies

Specifies the number of copies you want to print. You can specify a value from 1 to 999.

### »» Important

- When the application software that you used to create the document has the same function, specify the settings on the printer driver. However, if the print results are not acceptable, specify the function settings on the application software.

## Collate

Check this check box to group together the pages of each copy when you want to print multiple copies. Uncheck this check box when you want to print with all pages of the same page number grouped together.

### »» Important

- When the application software that you used to create the document has the same function, give priority to the printer driver settings. However, if the print results are not acceptable, specify the function settings on the application software. When you specify the number of copies and the printing order with both the application and this printer driver, the number of copies may be multiplied numbers of the two settings or the specified printing order may not be enabled.

## Orientation

Selects the printing orientation.

If the application used to create your document has a similar function, select the same orientation that you selected in that application.

### Portrait

Prints the document so that its top and bottom positions are unchanged relative to the paper feed direction. This is the default setting.

### Landscape

Prints the document by rotating it 90 degrees relative to the paper feed direction.

You can change the rotation direction by going to the [Maintenance tab](#), opening the **Custom Settings** dialog box, and then using **Rotate 90 degrees left when orientation is [Landscape]** check box.

To rotate the document 90 degrees to the left when printing, select the **Rotate 90 degrees left when orientation is [Landscape]** check box.

## Grayscale Printing

This function converts the data to monochrome data when printing your document.

## Borderless Printing

Performs borderless printing without any margins on the paper.

With the borderless printing function, the document to be printed is enlarged, so that it extends slightly off the paper. In other words, the document is printed without any margin.

To adjust the amount that the document extends beyond the paper, click the **Page Setup** tab, add a checkmark to **Borderless Printing**, and enter the value in **Amount of Extension**.

## Page Layout

Selects the size of the document you want to print and the type of printing.

### 1 on 1 to 16 on 1

Multiple pages of document can be printed on one sheet of paper.

To change the page order, click **Preferences...** In the [Page Layout Printing dialog box](#) that appears, specify **Page Order**.

### Poster (1 x 2) to Poster (4 x 4)

This function enables you to enlarge the image data and divide the enlarged data into several pages to be printed. You can also glue together these sheets of paper to create large printed matter, such as a poster.

#### Preferences...

Opens the [Poster Printing dialog box](#).

Click this button to set details on poster printing.

## Zoom

Specifies an enlargement or reduction ratio for the document you want to print.

## 1-sided/2-sided/Booklet Printing

### 1-sided Printing

Select when performing single-sided printing.

### 2-sided Printing

Select when performing duplex printing.

#### Automatic

Selects whether duplex printing is to be performed automatically or manually.

To perform duplex printing manually, uncheck this check box.

### Booklet Printing

The booklet printing function allows you to print data for a booklet. Data is printed on both sides of the paper. This type of printing ensures that pages can be collated properly, in page number order, when the printed sheets are folded and stapled at the center.

#### Automatic

Selects whether duplex printing is to be performed automatically or manually.

To perform duplex printing manually, uncheck this check box.

#### Preferences...

Opens the [Booklet Printing dialog box](#).

Click this button to set details on booklet printing.

## Binding Location

Selects the stapling margin position. The printer analyzes the **Orientation** and **Page Layout** settings, and automatically selects the best stapling margin position. Check **Binding Location**, and select from the list to change it.

To specify the width of the binding margin, set it from the **Page Setup** tab.

## Printer Media Information...

Displays [Printer Media Information dialog box](#).

You can check the printer settings and apply the checked settings to the printer driver.

## Defaults

Restores all the settings you have changed to their default values.

Click this button to return all settings on the **Basic Settings**, **Media/Quality**, and **Page Setup** tabs to their default values (factory settings).

## Add to Profiles dialog box

This dialog box allows you to save the information that you set on the **Basic Settings**, **Media/Quality**, and **Page Setup** tabs and add the information to the **Profiles** list on the **Basic Settings** tab.

### Name

Enter the name for the printing profile you wish to save.

Up to 255 characters can be entered.

The name appears, with its associated icon, in the **Profiles** list on the **Basic Settings** tab.

### Options...

Opens the [Add to Profiles dialog box](#).

Changes the details of printing profile to be saved.

## Add to Profiles dialog box

Select the icons of the printing profiles to be registered to **Profiles**, and change the items to be saved in the printing profiles.

### Icon

Select the icon for the printing profile you wish to save.

The selected icon appears, with its name, in the **Profiles** list on the **Basic Settings** tab.

### Save the paper size setting

Saves the paper size to the printing profile in **Profiles**.

To apply the saved paper size when the printing profile is selected, check this check box.

If this check box is unchecked, the paper size is not saved, and consequently the paper size setting is not applied when the printing profile is selected. Instead the printer prints with the paper size specified with the application software.

### Save the orientation setting

Saves the **Orientation** to the printing profile in **Profiles**.

To apply the saved print orientation when the printing profile is selected, check this check box.

If this check box is unchecked, the print orientation is not saved, and consequently the **Orientation** setting is not applied when the printing profile is selected. Instead the printer prints with the print orientation specified with the application software.

### Save the copies setting

Saves the **Copies** setting to the printing profile in **Profiles**.

To apply the saved copies setting when the printing profile is selected, check this check box.

If this check box is unchecked, the copies setting is not saved, and consequently the **Copies** setting is not applied when the printing profile is selected. Instead the printer prints with the copies setting specified with the application software.

## Custom Paper Size dialog box

This dialog box allows you to specify the size (width and height) of the custom paper.

### Units

Select the unit for entering a user-defined paper size.

### Paper Size

Specifies the **Width** and the **Height** of the custom paper. Measurement is shown according to the units specified in **Units**.

## Page Layout Printing dialog box

This dialog box allows you to select the number of document pages to be placed on one sheet of paper, the page order, and whether a page border line is to be printed around each document page. The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.

### Page Order

Specifies the document orientation to be printed on a sheet of paper.

### Page Border

Prints a page border line around each document page. Check this check box to print the page border line.

### Exclude single page documents from Page Layout Printing

If you add a checkmark, single-page documents are printed on a single sheet without performing Page Layout Printing.

## Poster Printing dialog box

This dialog box allows you to select the size of the image to be printed. You can also make settings for cut lines and paste markers which are convenient for pasting together the pages into a poster.

The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.

### Print "Cut/Paste" in margins

Specifies whether to print the words "Cut" and "Paste" in the margins. These words serve as guidelines for pasting together the pages into a poster. Check this check box to print the words.

#### ▶▶▶ Note

- Depending on the environment of the printer driver you are using, this function may not be available.

### Print "Cut/Paste" lines in margins

Specifies whether to print cut lines that serve as guidelines for pasting together the pages into a poster. Check this check box to print the cut lines.

### Print page range

Specifies the printing range. Select **All** under normal circumstances.  
Select **Pages** to specify a specific page or range.

## »» Note

- If some of the pages have not been printed well, specify the pages that do not need to be printed by clicking them in the settings preview of the **Page Setup** tab. Only the pages shown on the screen will be printed this time.

## Booklet Printing dialog box

This dialog box allows you to set how to bind the document as a booklet. Printing only on one side and printing a page border, can also be set in this dialog box.

The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.

### Preview Icon

Shows the settings made on the **Booklet Printing** dialog box.

You can check what the document will look like when printed as a booklet.

### Margin for stapling

Specifies which side of the booklet is to be stapled.

### Insert blank page

Selects whether to print the document on one side or both sides of the booklet.

Check this check box to print the document on one side of the booklet and select the side to be left blank from the list.

### Margin

Specifies the width of the stapling margin.

The specified width becomes the stapling margin from the center of the sheet.

### Page Border

Prints a page border line around each document page.

Check this check box to print the page border line.

## Printer Media Information dialog box

This dialog box allows you to check the printer settings and apply the checked settings to the printer driver.

### Paper Source

Check the setting or select a new paper source.

### Media Type

Displays the **Media Type** that is currently set on the printer.

To apply the displayed setting to the printer driver, click **Set**.

### Page Size

Displays the **Page Size** that is currently set on the printer.

To apply the displayed setting to the printer driver, click **Set**.

## Paper Settings on the Printer Driver and the Printer (Media Type)

When you use this printer, selecting a media type and [paper size](#) that matches the print purpose will help you achieve the best print results.

Depending on the media type you are using, specify the media type settings on the printer driver or the printer's operation panel as described below.

### Canon genuine papers (Document Printing)

## Printing on Postcards

1. [Load postcard](#) on the printer

2. Open the [printer driver setup window](#)

3. Select commonly used settings

Display the **Basic Settings** tab, and for **Profiles**, select **Standard**.

4. Select the paper size

For **Printer Paper Size**, select **Hagaki 100x148mm** or **Hagaki 2 200x148mm**.

### ▶▶▶ Important

- Return postcards can be used only when you print them from the computer.
- When printing a return postcard, always set the paper size to **Hagaki 2 200x148mm** from your application software or the printer driver.
- Do not fold the return postcard. If a crease is formed, the printer will not be able to feed the postcard properly, and this condition will cause line shifts or a paper jam.
- With return postcards, automatic duplex printing and borderless printing cannot be used.

5. Select the media type

Select the Hagaki you want to use from **Hagaki** in **Media Type**.

### ▶▶▶ Important

- This printer cannot print on postcards that have photos or stickers attached.
- When you use the automatic duplex printing function to print a postcard, print the address side first and then print the message side.
- When printing on each side of a postcard separately, you will get cleaner printing if you print the message side first and then print the address side.
- The paper settings on the printer driver are different, depending on whether you are printing on the address side or the message side.  
For details about the paper information to be registered to the printer driver and on the printer, see the following:
  - [Paper Settings on the Printer Driver and the Printer \(Media Type\)](#)
  - [Paper Settings on the Printer Driver and the Printer \(Paper Size\)](#)
- When you use the automatic duplex printing function, register the paper information for the side to be printed first.

6. Set the print orientation

To print the address horizontally, set **Orientation** to **Landscape**.

7. Select the print quality

For **Quality**, select the quality according to your purpose.

**8. Click OK**

When you perform printing, the data will be printed onto the postcard.

## Setting Up Envelope Printing

1. [Load envelope](#) on the printer

2. Open the [printer driver setup window](#)

3. Select the media type

Select **Envelope** from **Profiles** on the **Basic Settings** tab.

4. Select the paper size

When the **Envelope Size Setting** dialog box is displayed, select the envelope size you want to use, and then click **OK**.

5. Set the orientation

To print the addressee horizontally, select **Landscape** for **Orientation**.

### ▶▶▶ Note

- If **Envelope Com 10**, **Envelope DL**, **Yougata 4 4.13"x9.25"**, or **Yougata 6 3.86"x7.48"** is selected for **Printer Paper Size**, the printer rotates the paper 90 degrees to the left to print, regardless of the **Rotate 90 degrees left when orientation is [Landscape]** setting for **Custom Settings** in the [Maintenance tab](#).

6. Select the print quality

For **Quality**, select the quality according to your purpose.

7. Click **OK**

When you perform print, the information is printed on the envelope.

### ▶▶▶ Important

- When you perform envelope printing, guide messages are displayed. To hide the guide messages, check the **Do not show this message again** check box. To show the guide again, click the **View Printer Status** button on the **Maintenance** tab, and start the Canon IJ Status Monitor. Then click **Envelope Printing** from **Display Guide Message** of the **Option** menu to enable the setting.

## Registering a Frequently Used Printing Profile

You can register the frequently used printing profile to **Profiles** on the **Basic Settings** tab. Unnecessary printing profiles can be deleted at any time.

### Registering a Printing Profile

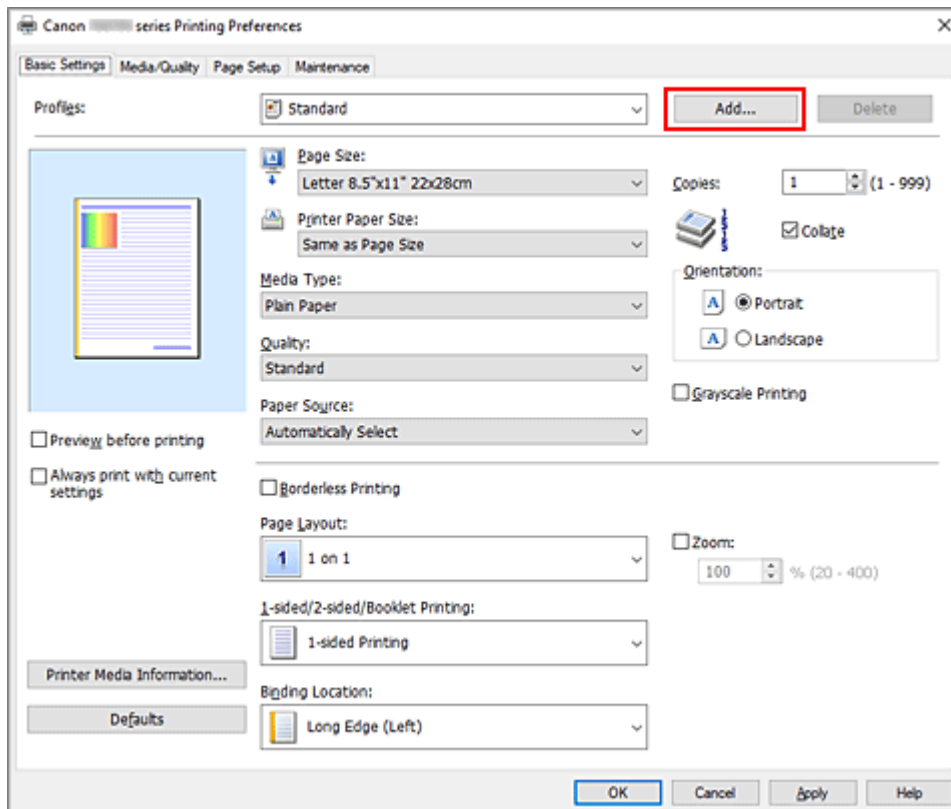

1. Open the printer driver setup window

2. Set the necessary items

From **Profiles** on the **Basic Settings** tab, select the printing profile to be used and if necessary, change each of the settings.

You can also register necessary items on the **Media/Quality** and **Page Setup** tabs.

3. Click **Add...**

The **Add to Profiles** dialog box opens.

#### 4. Save the settings

Enter a name for the print settings to register in the **Name** field. If necessary, click **Options...**, set the items, and then click **OK**.

In the **Add to Profiles** dialog box, click **OK** to save the print settings and return to the **Basic Settings** tab.

The name and icon are displayed in **Profiles**.

#### ▶▶▶ Important

- To save the page size, orientation, and number of copies that was set in each sheet, click **Options...**, and check each item.

#### ▶▶▶ Note

- When you re-install the printer driver or upgrade the printer driver version, the print settings that are already registered will be deleted from **Profiles**.  
Registered print settings cannot be saved and preserved. If a profile is deleted, register the print settings again.

## Deleting Unnecessary Printing Profile

### 1. Select the printing profile to be deleted

Select the printing profile you want to delete from the **Profiles** list on the **Basic Settings** tab.

### 2. Delete the printing profile

Click **Delete**. When the confirmation message appears, click **OK**.

The selected printing profile is deleted from the **Profiles** list.

#### ▶▶▶ Note

- Printing profiles that are registered in the initial settings cannot be deleted.

## **Set Media Type, Quality, etc. (Media/Quality Tab)**

---

- ▶ **Media/Quality Tab Description**
- ▶ **Adjust Colors**
- ▶ **Specifying Color Correction**
  - Optimal Photo Printing of Image Data
  - Adjusting Colors with the Printer Driver
  - Printing with ICC Profiles

## Media/Quality Tab Description

The **Media/Quality** tab allows you to create a basic print setup in accordance with the media type. You can also adjust the print quality and color tones.

- [Settings Preview](#)
- [Media Type](#)
- [Paper Source](#)
- [Quality](#)
- [Color/Intensity](#)
- [Grayscale Printing](#)
- [Preview before printing](#)

### Settings Preview

The paper illustration shows how the original will be laid out on a sheet of paper.

You can check an overall image of the layout.

The printer illustration shows how to load paper to match the printer driver settings.

Check whether the printer is set up correctly by looking at the illustration before you start printing.

### Media Type

Selects a type of printing paper.

Select a media type that matches the paper that is loaded in the printer. This ensures that printing is carried out properly for the specified paper.

### Paper Source

Shows the source from which paper is supplied.

You may be able to switch the paper source with the printer driver.

### Automatically Select

Based on the paper settings in the printer driver and the paper information registered on the printer, the printer automatically determines the paper source and feeds paper.

### Rear Tray

Paper is always supplied from the rear tray.

### Cassette

Paper is always supplied from the cassette.

### ►►► Important

- Depending on the media type and size, the **Paper Source** settings that can be selected may differ.

## Quality

Selects your desired printing quality.

Select one of the following to set the print quality level that is appropriate for the purpose.

### ►►► Important

- Depending on the **Media Type** settings, the same print results may be produced even if the **Quality** is changed.

### High

Gives priority to print quality over printing speed.

### Standard

Prints with average speed and quality.

### Draft

This setting is appropriate for test printing.

### Custom

Select this to set the print quality level individually.

### Set...

Select **Custom** in **Quality** to make it clickable.

Open the [Custom dialog box](#) to set individual print quality levels.

## Color/Intensity

Selects color adjustment method.

### Auto

**Cyan, Magenta, Yellow, Brightness, Contrast**, and so on are adjusted automatically.

### Manual

Select when you set the individual settings such as **Cyan, Magenta, Yellow, Tone, Brightness, Contrast**, etc. and **Color Correction** method.

### Set...

Select **Manual** for **Color/Intensity** to enable this button.

In the **Manual Color Adjustment** dialog box, you can adjust individual color settings such as **Cyan, Magenta, Yellow, Tone, Brightness**, and **Contrast** on the [Color Adjustment tab](#), and select the **Color Correction** method on the [Matching tab](#).

### ►►► Note

- If you want to use an ICC profile to adjust colors, use the **Manual Color Adjustment** dialog box to set the profile.

## Grayscale Printing

This function converts the data to monochrome data when printing your document.

Check this check box to print a color document in monochrome.

## Preview before printing

Shows what the print result will look like before you actually print the data.

Check this check box to display a preview before printing.

## Defaults

Restores all the settings you have changed to their default values.

Clicking this button restores all the settings on the current screen to their default values (factory settings).

## Custom dialog box

Set the quality level, and select the desired print quality.

### Quality

You can use the slider bar to adjust the print quality level.

#### Important

- Certain print quality levels cannot be selected depending on the settings of **Media Type**.

#### Note

- The **High**, **Standard**, or **Draft** print quality modes are linked with the slider bar. Therefore when the slider bar is moved, the corresponding quality and value are displayed on the left. This is the same as when the corresponding radio button is selected for **Quality** on the **Media/Quality** tab.

## Color Adjustment Tab

This tab allows you to adjust the color balance by changing the settings of the **Cyan**, **Magenta**, **Yellow**, **Tone**, **Brightness**, and **Contrast** options.

### Preview

Shows the effect of color adjustment.

The color and brightness change when each item is adjusted.

#### Note

- The graphic is in monochrome when the **Grayscale Printing** check box is checked.

### View Color Pattern

Displays a pattern for checking color changes produced by color adjustment.

If you want to display the preview image with a color pattern, check this check box.

### Cyan / Magenta / Yellow

Adjusts the strengths of **Cyan**, **Magenta**, and **Yellow**.

Moving the slider to the right makes a color stronger, and moving the slider to the left makes a color weaker.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

This adjustment changes the relative amount of ink of each color used, which alters the total

color balance of the document. Use your application if you want to change the total color balance significantly. Use the printer driver only if you want to adjust the color balance slightly.

### **Tone**

Sets the color adjustment for monochrome printing.

Moving the slider to the right produces warm colors (Warm), and moving the slider to the left produces cool colors (Cool).

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

#### **▶▶▶ Important**

- This function is not available for certain **Media Type** settings.

### **Brightness**

Adjusts the brightness of your print. You cannot change the levels of pure white and black. However, the brightness of the colors between white and black can be changed. Moving the slider to the right brightens (dilutes) the colors, and moving the slider to the left darkens (intensifies) the colors. You can also directly enter brightness values that are linked to the slider bar. Enter a value in the range from -50 to 50.

### **Contrast**

Adjusts the contrast between light and dark in the image to be printed.

Moving the slider to the right increases the contrast, moving the slider to the left decreases the contrast.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

## **Matching Tab**

Allows you to select the method for adjusting colors to match the type of document to be printed.

### **Color Correction**

Allows you to select **Driver Matching**, **ICM**, or **None** to match the purpose of the print operation.

#### **Driver Matching**

With Canon Digital Photo Color, you can print sRGB data with color tints that most people prefer.

#### **ICM**

Adjusts the colors by using an ICC profile when printing.

#### **▶▶▶ Important**

- If the application software is set so that ICM is disabled, **ICM** is unavailable for **Color Correction** and the printer may not be able to print the image data properly.

#### **None**

Disables color adjustment with the printer driver. Select this value when you are specifying an individually created printing ICC profile in an application software to print data.

## **Set the Layout of Printed Documents (Page Setup Tab)**

---

- **Page Setup Tab Description**
- **Setting the Number of Copies and Printing Order**
- **Perform Borderless Printing**

## Page Setup Tab Description

The **Page Setup** tab allows you to determine how a document is to be arranged on the paper. Also, this tab allows you to set the number of copies and the order of printing. If the application which created the document has a similar function, set them with the application.

- [Settings Preview](#)
- [Page Size](#)
- [Printer Paper Size](#)
- [Copies](#)
- [Print from Last Page](#)
- [Collate](#)
- [Orientation](#)
- [Rotate 180 degrees](#)
- [Borderless Printing](#)
- [Page Layout](#)
- [Zoom](#)
- [1-sided/2-sided/Booklet Printing](#)
- [Binding Location](#)
- [Specify Margin](#)
- [Print Options](#)
- [Stamp/Background](#)

### Settings Preview

The paper illustration shows how the original will be laid out on a sheet of paper. You can check an overall image of the layout.

The printer illustration shows how to load paper to match the printer driver settings.  
Check whether the printer is set up correctly by looking at the illustration before you start printing.

### Page Size

Selects a page size.

Ensure that you select the same page size as you selected within the application.

If you select **Custom...**, the [Custom Paper Size dialog box](#) opens and allows you to specify any vertical and horizontal dimensions for the paper size.

### Printer Paper Size

Selects the size of paper actually loaded into the printer.

The default setting is **Same as Page Size** to perform normal-sized printing.

If you select a paper size that is smaller than the **Page Size**, the document size will be reduced. If you select a paper size that is larger, the document size will be enlarged.

Also if you select **Custom...**, the [Custom Paper Size dialog box](#) opens and allows you to specify any vertical and horizontal dimensions for the paper size.

### Copies

Specifies the number of copies you want to print. You can specify a value from 1 to 999.

#### ▶▶▶ Important

- If the application used to create your document has a similar function, specify the number of copies with the application without specifying it here.

### Print from Last Page

Check this check box when you want to print from the last page in order. If you do this, you do not need to sort the pages into their correct order after printing.

Uncheck this check box to print your document in normal order, starting from the first page.

### Collate

Check this check box to group together the pages of each copy when you want to print multiple copies. Uncheck this check box when you want to print with all pages of the same page number grouped together.

#### ▶▶▶ Important

- When the application software that you used to create the document has the same function, give priority to the printer driver settings. However, if the print results are not acceptable, specify the function settings on the application software. When you specify the number of copies and the printing order with both the application and this printer driver, the number of copies may be multiplied numbers of the two settings or the specified printing order may not be enabled.

### Orientation

Selects the printing orientation.

If the application used to create your document has a similar function, select the same orientation that you selected in that application.

#### Portrait

Prints the document so that its top and bottom positions are unchanged relative to the paper feed direction. This is the default setting.

#### Landscape

Prints the document by rotating it 90 degrees relative to the paper feed direction.

You can change the rotation direction by going to the [Maintenance tab](#), opening the **Custom**

**Settings** dialog box, and then using **Rotate 90 degrees left when orientation is [Landscape]** check box.

To rotate the document 90 degrees to the left when printing, select the **Rotate 90 degrees left when orientation is [Landscape]** check box.

### **Rotate 180 degrees**

Prints the document by rotating it 180 degrees against the paper feed direction.

The width of print area and the amount of extension that are configured in other application software will be reversed vertically and horizontally.

### **Borderless Printing**

Chooses whether you are printing on a full page without any page margins or printing with page margins.

In borderless printing, originals are enlarged to extend slightly off the paper. Thus, printing can be performed without any margins (border).

Use **Amount of Extension** to adjust how much of the document extends off the paper during borderless printing.

#### **Amount of Extension**

Adjusts how much of the document extends off the paper during borderless printing.

Moving the slider to the right increases the amount of extension and allows you to perform borderless printing with no problems.

Moving the slider to the left reduces the amount of extension and expands the range of the document to print.

### **Page Layout**

Selects the size of the document you want to print and the type of printing.

#### **1 on 1 to 16 on 1**

Multiple pages of document can be printed on one sheet of paper. To change the page order, click **Preferences...** In the [Page Layout Printing dialog box](#) that appears, specify **Page Order**.

#### **Poster (1 x 2) to Poster (4 x 4)**

This function enables you to enlarge the image data and divide the enlarged data into several pages to be printed.

You can also glue together these sheets of paper to create large printed matter, such as a poster.

#### **Preferences...**

Opens the [Poster Printing dialog box](#).

Click this button to set details on poster printing.

### **Zoom**

Specifies an enlargement or reduction ratio for the document you want to print.

### **1-sided/2-sided/Booklet Printing**

#### **1-sided Printing**

Select when performing single-sided printing.

#### **2-sided Printing**

Select when performing duplex printing.

#### **Automatic**

Selects whether duplex printing is to be performed automatically or manually.

To perform duplex printing manually, uncheck this check box.

## Booklet Printing

The booklet printing function allows you to print data for a booklet. Data is printed on both sides of the paper. This type of printing ensures that pages can be collated properly, in page number order, when the printed sheets are folded and stapled at the center.

### Automatic

Selects whether duplex printing is to be performed automatically or manually.

To perform duplex printing manually, uncheck this check box.

### Preferences...

[Opens the Booklet Printing dialog box.](#) Click this button to set details on booklet printing.

## Binding Location

Selects the stapling margin position.

The printer analyzes the **Orientation** and **Page Layout** settings, and automatically selects the best stapling margin position. Check **Binding Location**, and select from the list to change it. To specify the width of the binding margin, set it from the **Page Setup** tab.

## Specify Margin...

[Opens the Specify Margin dialog box.](#) You can specify the width of the margin.

## Print Options...

Opens the [Print Options dialog box](#).

Changes detailed printer driver settings for print data that is sent from applications.

## Stamp/Background...

Opens the [Stamp/Background dialog box](#).

The **Stamp** function allows you to print a stamp text or a bitmap over or behind document data. It also allows you to print date, time and user name. The **Background** function allows you to print a light illustration behind the document data.

*Depending on the environment, **Stamp** and **Background** may not be available.*

## Defaults

Restores all the settings you have changed to their default values.

Clicking this button restores all the settings on the current screen to their default values (factory settings).

## Custom Paper Size dialog box

This dialog box allows you to specify the size (width and height) of the custom paper.

### Units

Select the unit for entering a user-defined paper size.

### Paper Size

Specifies the **Width** and the **Height** of the custom paper. Measurement is shown according to the units specified in **Units**.

## Page Layout Printing dialog box

This dialog box allows you to select the number of document pages to be placed on one sheet of paper, the page order, and whether a page border line is to be printed around each document page.

The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.

## Page Order

Specifies the document orientation to be printed on a sheet of paper.

## Page Border

Prints a page border line around each document page.

Check this check box to print the page border line.

## Exclude single page documents from Page Layout Printing

If you add a checkmark, single-page documents are printed on a single sheet without performing Page Layout Printing.

## Poster Printing dialog box

This dialog box allows you to select the size of the image to be printed. You can also make settings for cut lines and paste markers which are convenient for pasting together the pages into a poster.

The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.

### Print "Cut/Paste" in margins

Specifies whether to print the words "Cut" and "Paste" in the margins. These words serve as guidelines for pasting together the pages into a poster.

Check this check box to print the words.

#### ►►► Note

- Depending on the environment of the printer driver you are using, this function may not be available.

### Print "Cut/Paste" lines in margins

Specifies whether to print cut lines that serve as guidelines for pasting together the pages into a poster.

Check this check box to print the cut lines.

### Print page range

Specifies the printing range. Select **All** under normal circumstances.

Select **Pages** to specify a specific page or range.

#### ►►► Note

- If some of the pages have not been printed well, specify the pages that do not need to be printed by clicking them in the settings preview of the **Page Setup** tab. Only the pages shown on the screen will be printed this time.

## Booklet Printing dialog box

This dialog box allows you to set how to bind the document as a booklet. Printing only on one side and printing a page border, can also be set in this dialog box.

The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.

### Preview Icon

Shows the settings made on the **Booklet Printing** dialog box.

You can check what the document will look like when printed as a booklet.

### Margin for stapling

Specifies which side of the booklet is to be stapled.

### Insert blank page

Selects whether to print the document on one side or both sides of the booklet.

Check this check box to print the document on one side of the booklet and select the side to be left blank from the list.

### Margin

Specifies the width of the stapling margin.

The specified width becomes the stapling margin from the center of the sheet.

### Page Border

Prints a page border line around each document page.

Check this check box to print the page border line.

## Specify Margin dialog box

This dialog box allows you to specify the margin width for the side to be stapled. If a document does not fit on one page, the document is reduced when printed.

### Margin

Specifies the width of the stapling margin.

The width of the side specified by **Binding Location** becomes the stapling margin.

## Print Options dialog box

Makes changes to print data that is sent to the printer.

Depending on the environment, this function may not be available.

### Disable ICM required from the application software

Disables the ICM function required from the application software.

When an application software uses Windows ICM to print data, unexpected colors may be produced or the printing speed may decrease. If these problems occur, checking this check box may resolve the problems.

#### ▶▶▶ Important

- Uncheck this check box under normal circumstances.
- This function does not work when **ICM** is selected for **Color Correction** on the **Matching** tab of the **Manual Color Adjustment** dialog box.

### Disable the color profile setting of the application software

Checking this check box disables information in the color profile that was set on the application software.

When the information in the color profile set on the application software is output to the printer driver, the print result may contain unexpected colors. If this happens, checking this check box may resolve the problem.

#### ▶▶▶ Important

- Uncheck this check box under normal circumstances.

- Even when this check box is checked, only some of the information in the color profile is disabled, and the color profile can still be used for printing.

### **Disable the paper source setting of the application software**

Disables the paper feed method that is set by the application.

With some applications such as Microsoft Word, the data may be printed with a feed method that differs from the printer driver setting. In this case, check this function.

#### **»»» Important**

- When this function is enabled, normally the paper feeding method cannot be changed from the Canon IJ Preview.

### **Ungroup Papers**

Sets the display method of **Media Type**, **Page Size**, and **Printer Paper Size**.

To display the items separately, select the check box.

To display the items as a group, clear the check box.

### **Do not allow application software to compress print data**

Compression of the application software print data is prohibited.

If the print result has missing image data or unintended colors, selecting this check box may improve the condition.

#### **»»» Important**

- Uncheck this check box under normal circumstances.

### **Print after creating print data by page**

The print data is created in page units, and printing starts after the processing of one page of print data is complete.

If a printed document contains unintended results such as streaks, selecting this check box may improve the results.

#### **»»» Important**

- Uncheck this check box under normal circumstances.

### **Cancel the safety margin regulation for paper size**

Cancels the safety margin regulation when you set **Media Type** to **Premium Fine Art Rough** on the **Media/Quality** tab.

When you check this item, the safety margin regulation is canceled, printing in a wider print area and borderless full-page printing become possible, and printing can be performed for all paper sizes.

#### **»»» Important**

- When the safety margin regulation is canceled, the paper may become smudged or the print quality may drop depending on the paper size used and the environment.

If that happens, we recommend that you print on a paper size that has large margins.

### **Improve bleeding and thickened black text/lines (plain paper)**

If you add a checkmark, it may improve blurring in text and lines when printing on plain paper.

### **Prevention of Print Data Loss**

You can reduce the size of the print data that was created with the application software and then print the data.

Depending on the application software being used, the image data may be cut off or may not be printed properly. In such cases, select **On**. If you will not be using this function, select **Off**.

### ▶▶▶ Important

- When using this function, the print quality may drop depending on the print data.

#### Unit of Print Data Processing

Selects the processing unit of the print data to be sent to the printer.

Select **Recommended** under normal circumstances.

### ▶▶▶ Important

- A large amount of memory may be used for certain settings.  
Do not change the setting if your computer has a small amount of memory.

#### Print With

Specify the ink tank to be used from the installed ink tanks.

Select from **All Colors (Default)**, **All Except PGBK (Black)**, **Only PGBK (Black)**.

### ▶▶▶ Important

- When the following settings are specified, **Only PGBK (Black)** does not function because the printer uses an ink tank other than PGBK (Black) to print documents.
  - Other than **Plain Paper**, **Envelope**, **Ink Jet Hagaki (A)**, **Hagaki K (A)**, **Hagaki (A)**, or **Hagaki** is selected for **Media Type** on the **Media/Quality** tab
  - A checkmark is added to **Borderless Printing** on the **Page Setup** tab
- Do not detach the ink tank that is not in use. Printing cannot be performed while either ink tank is detached.

#### Print charts and diagrams in documents more vividly (plain paper)

If you select **Use Printer Settings**, printing is performed according to the printer's settings.

To see your printer settings, see "[Printing preferences](#)".

## Stamp/Background dialog box

Depending on the environment, **Stamp** and **Background** may not be available.

The **Stamp/Background** dialog box allows you to print a stamp and/or background over or behind the document pages. In addition to the pre-registered ones, you can register and use your original stamp or background.

#### Stamp

Stamp printing is a function that prints a stamp over a document.

Check this check box and select a title from the list to print a stamp.

#### Define Stamp...

Opens the [Stamp Settings dialog box](#).

You can check the details of a selected stamp or save a new stamp.

#### Place stamp over text

Sets how the stamp is to be printed over the document.

Check the **Stamp** check box to enable this.

Check this check box to print a stamp over the printed document page. The printed data may be hidden behind the stamp.

Uncheck this check box to print the document data over the stamp. The printed data will not be hidden behind the stamp. However, the sections of the stamp that are overlapped by the document may be hidden.

### **Stamp first page only**

Selects whether the stamp is to be printed on the first page only or on all pages when the document has two or more pages.

Check the **Stamp** check box to enable this.

Check this check box to print a stamp on the first page only.

### **Background**

Background printing is a function that allows you to print an illustration or a similar object (bitmap) behind the document.

Check this check box to print a background and select a title from the list.

### **Select Background...**

Opens the [Background Settings dialog box](#).

You can register a bitmap as a background, and change layout method and intensity of the selected background.

### **Background first page only**

Selects whether to print the background on the first page only or print on all pages when the document has two or more pages.

Check the **Background** check box to enable this.

Check this check box to print a background on the first page only.

## **Stamp Tab**

The Stamp tab allows you to set the text and bitmap file (.bmp) to be used for a stamp.

### **Preview Window**

Shows the status of the stamp configured in each tab.

### **Stamp Type**

Specifies the stamp type.

Select **Text** to create a stamp with characters. Select **Bitmap** to create with a bitmap file. Select **Date/Time/User Name** to display the creation date/time and user name of the printed document.

The setting items in the **Stamp** tab change depending on the selected type.

- For **Text** registration, the characters must already be entered in **Stamp Text**. If necessary, change the **TrueType Font**, **Style**, **Size**, and **Outline** settings. You can select the color of the stamp by clicking **Select Color....**
- For **Bitmap**, click **Select File...** and select the bitmap file (.bmp) to be used. If necessary, change the settings of the **Size** and **Transparent white area**.
- For **Date/Time/User Name**, the creation date/time and user name of the printed object are displayed in **Stamp Text**. If necessary, change the settings of **TrueType Font**, **Style**, **Size**, and **Outline**. You can select the color of the stamp by clicking **Select Color....**

### **When Stamp Type is Text or Date/Time/User Name**

#### **Stamp Text**

Specifies the stamp text string.

Up to 64 characters can be entered.

For **Date/Time/User Name**, the creation date/time and user name of the printed object are displayed in **Stamp Text**.

### **TrueType Font**

Selects the font for the stamp text string.

### **Style**

Selects the font style for the stamp text string.

### **Size**

Selects the font size for the stamp text string.

### **Outline**

Selects a frame that encloses the stamp text string.

If a large font size is selected for **Size**, characters may extend outside of the stamp border.

### **Color/Select Color...**

Shows the current color for the stamp.

To select a different color, click **Select Color...** to open the **Color** dialog box, and select or create a color you wish to use as a stamp.

### **When Stamp Type is Bitmap**

#### **File**

Specifies the name of the bitmap file to be used as the stamp.

#### **Select File...**

Opens the dialog box to open a file.

Click this button to select a bitmap file to be used as a stamp.

#### **Size**

Adjusts the size of the bitmap file to be used as a stamp.

Moving the slider to the right increases the size, moving the slider to the left decreases the size.

#### **Transparent white area**

Specifies whether to make white-filled areas of the bitmap transparent.

Check this check box to make white-filled areas of the bitmap transparent.

### **▶▶▶ Note**

- Click **Defaults** to set **Stamp Type** to text, **Stamp Text** to blank, **TrueType Font** to Arial, **Style** to Regular, **Size** to 36 points, **Outline** unchecked, and **Color** to gray with the RGB values (192, 192, 192).

## **Placement Tab**

The Placement tab allows you to set the position where the stamp is to be printed.

### **Preview Window**

Shows the status of the stamp configured in each tab.

### **Position**

Specifies the stamp position on the page.

Selecting **Custom** from the list allows you to enter values for the **X-Position** and **Y-Position** coordinates directly.

You can also change the stamp position by dragging the stamp in the preview window.

## Rotation

Specifies the angle of rotation for the stamp. The angle can be set by entering the number of degrees.

Negative values rotate the stamp clockwise.

### ►► Note

- **Rotation** is enabled only when **Text** or **Date/Time/User Name** is selected for **Stamp Type** on the **Stamp** tab.

### ►► Note

- Click **Defaults** to set the stamp position to **Center** and the rotation to "0."

## Save settings Tab

The **Save settings** tab allows you to register a new stamp or delete an unnecessary stamp.

### Title

Enter the title to save the stamp you created.

Up to 64 characters can be entered.

### ►► Note

- Spaces, tabs, and returns cannot be entered at the beginning or end of a title.

### Stamps

Shows a list of saved stamp titles.

Specify a title to display the corresponding stamp in **Title**.

### Save/Save overwrite

Saves the stamp.

Enter a title in **Title**, and then click this button.

### Delete

Deletes an unnecessary stamp.

Specify the title of an unnecessary stamp from the **Stamps** list, and click this button.

## Background Tab

The Background tab allows you to select a bitmap file (.bmp) to be used as a background or determine how to print the selected background.

### Preview Window

Shows the status of the bitmap set on the **Background** tab.

### File

Specifies the name of the bitmap file to be used as the background.

### Select File...

Opens the dialog box to open a file.

Click this button to select a bitmap file (.bmp) to be used as the background.

## Layout Method

Specifies how the background image is to be placed on the paper.

When **Custom** is selected, you can set coordinates for **X-Position** and **Y-Position**.

You can also change the background position by dragging the image in the preview window.

## Intensity

Adjusts the intensity of the bitmap to be used as a background.

Moving the slider to the right increases the intensity, and moving the slider to the left decreases the intensity. To print the background at the original bitmap intensity, move the slider to the rightmost position.

## ►► Note

- Depending on the environment, this function may not be available.
- Click **Defaults** to set **File** to blank, **Layout Method** to **Fill page**, and the **Intensity** slider to the middle.

## Save settings Tab

The **Save settings** tab allows you to register a new background or delete an unnecessary background.

### Title

Enter the title to save the background image you specified.

Up to 64 characters can be entered.

### ►► Note

- Spaces, tabs, and returns cannot be entered at the beginning or end of a title.

### Backgrounds

Shows a list of registered background titles.

Specify a title to display the corresponding background in **Title**.

### Save/Save overwrite

Saves the image data as a background.

After inserting the **Title**, click this button.

### Delete

Deletes an unnecessary background.

Specify the title of an unnecessary background from the **Backgrounds** list, and then click this button.

## Setting the Number of Copies and Printing Order

You can also set the number of copies on the **Basic Settings** tab.

### 1. Open the printer driver setup window

### 2. Specify the number of copies to be printed

For **Copies** on the **Page Setup** tab, specify the number of copies to be printed.

### 3. Specify the print order

Check the **Print from Last Page** check box when you want to print from the last page in order, and uncheck the check box when you want to print from the first page.

Check the **Collate** check box when you are printing multiple copies of a document and want to print out all pages in each copy together. Uncheck this check box when you want to print all pages with the same page number together.

- **Print from Last Page:**  / **Collate:**

- **Print from Last Page:**  / **Collate:**

- **Print from Last Page:**  / **Collate:**

- **Print from Last Page:**  / **Collate:**

### 4. Click **OK**

When you perform print, the specified number of copies will be printed with the specified printing order.

## »» Important

- When the application software that you used to create the document has the same function, specify the settings on the printer driver. However, if the print results are not acceptable, specify the function settings on the application software. When you specify the number of copies and the printing order with both the application software and this printer driver, the number of copies may be multiplied numbers of the two settings or the specified printing order may not be enabled.

## »» Note

- By setting both **Print from Last Page** and **Collate**, you can perform printing so that papers are collated one by one starting from the last page.

## Perform Borderless Printing

The borderless printing function allows you to print data without any margin by enlarging the data so that it extends slightly off the paper. In standard printing, margins are created around the document area. However, in borderless printing function, these margins are not created. When you want to print data such as a photo without providing any margin around it, set borderless printing.

You can also set borderless printing on the **Basic Settings** Tab.

### ▶▶ Note

- You can also set **Amount of extension** on the operation panel of the printer, but the settings on the printer driver will be prioritized.

## Setting Borderless Printing

1. Open the [printer driver setup window](#)

2. Set borderless printing

Add a checkmark to **Borderless Printing** on the **Page Setup** tab.

Click **OK** when the confirmation message appears.

When a message prompting you to change the media type appears, select a media type from the list and click **OK**.

3. Check the paper size

Check the **Page Size** list. When you want to change it, select another page size from the list. The list displays only sizes that can be used for borderless printing.

4. Adjust the amount of extension from the paper

If necessary, adjust the amount of extension using the **Amount of Extension** slider.

Moving the slider to the right increases the amount extending off the paper, and moving the slider to the left decreases the amount.

It is recommended to set the slider at the second position from the right for most cases.

### »» Important

- When the **Amount of Extension** slider is set to the rightmost position, the back side of the paper may become smudged.

#### 5. Click **OK**

When you perform print, the data is printed without any margins on the paper.

### »» Important

- When a page size that cannot be used for borderless printing is selected, the size is automatically changed to the valid page sizes for borderless printing.
- Depending on the type of the media used during borderless printing, the print quality may deteriorate at the top and bottom of the sheet or stains may form.
- When the ratio of the height to the width differs from the image data, a portion of the image may not be printed depending on the size of the media used.  
In this case, crop the image data with an application software according to the paper size.

### »» Note

- When **Plain Paper** is selected for **Media Type** on the **Media/Quality** tab, borderless printing is not recommended. Therefore, the message for media selection appears.  
When you are using plain paper for test printing, select **Plain Paper**, and click **OK**.

## Expanding the Range of the Document to Print

Setting a large amount of extension allows you to perform borderless printing with no problems. However, the portion of the document extending off the paper range will not be printed and for this reason, the subjects around the perimeter of a photo may not be printed.

When you are not satisfied with the result of borderless printing, reduce the amount of extension. The extension amount decreases as the **Amount of Extension** slider is moved to the left.

### »» Important

- When the amount of extension is decreased, an unexpected margin may be produced on the print, depending on the size of the paper.

### »» Note

- When the **Amount of Extension** slider is set to the leftmost position, image data will be printed in the full size. If you set this when printing the address side of a postcard, the postal code of the sender is printed in the correct position.
- When **Preview before printing** is checked on the **Media/Quality** tab, you can confirm whether there will be no margin before printing.
- To perform borderless full-page printing on **Premium Fine Art Rough** go to the **Page Setup** tab, display the **Print Options** dialog box, and change the [Cancel the safety margin regulation for paper size](#) setting.

## Page Layout Printing

The page layout printing function allows you to print more than one page image on a single sheet of paper.

### 1. Open the printer driver setup window

### 2. Set page layout printing

Select a page layout number from **1 on 1** to **16 on 1** from the **Page Layout** list on the **Page Setup** tab. The current settings are displayed in the settings preview on the left side of the printer driver.

### 3. Select the print paper size

Select the size of the paper loaded in the printer from the **Printer Paper Size** list.

### 4. Set the number of pages to be printed on one sheet and the page order

If necessary, click **Preferences...**, specify the following settings in the **Page Layout Printing** dialog box, and click **OK**.

#### Page Order

To change the page arrangement order, select a placement method from the list.

#### Page Border

To print a page border around each document page, check this check box.

#### Exclude single page documents from Page Layout Printing

If you add a checkmark, single-page documents are printed on a single sheet without performing Page Layout Printing.

### 5. Complete the setup

Click **OK** on the **Page Setup** tab.

When you perform print, the specified number of pages will be arranged on each sheet of paper in the specified order.

## Duplex Printing

You can also set duplex printing in the **Basic Settings** tab.

### Performing Automatic Duplex Printing

You can perform the duplex printing without having to turn over the paper.

1. Open the [printer driver setup window](#)

2. Set automatic duplex printing

Select **2-sided Printing** for **1-sided/2-sided/Booklet Printing** on the **Page Setup** tab. Confirm that **Automatic** is checked.

3. Select the layout

Select the layout you want to use from the **Page Layout** list.

4. Specify the side to be stapled

The best **Binding Location** is selected automatically from the **Orientation** and **Page Layout** settings. To change the setting, select another stapling side from the **Binding Location** list.

5. Set the margin width

If necessary, click **Specify Margin...** and set the margin width, and then click **OK**.

6. Complete the setup

Click **OK** on the **Page Setup** tab.

When you perform print, duplex printing will be started.

### Performing Duplex Printing Manually

You can perform the duplex printing manually.

1. Open the [printer driver setup window](#)

2. Set duplex printing

Select **2-sided Printing** from **1-sided/2-sided/Booklet Printing** on the **Page Setup** tab. Uncheck the **Automatic** check box.

### 3. Select the layout

Select the layout you want to use from the **Page Layout** list.

### 4. Specify the side to be stapled

The best **Binding Location** is selected automatically from the **Orientation** and **Page Layout** settings. To change the setting, select another stapling side from the **Binding Location** list.

### 5. Set the margin width

If necessary, click **Specify Margin...** and set the margin width, and then click **OK**.

### 6. Complete the setup

Click **OK** on the **Page Setup** tab.

When you perform print, the document is first printed on one side of a sheet of paper. After one side is printed, reload the paper correctly according to the message.

Then tap **Start print** on the printer operation panel to print the opposite side.

## Important

- Automatic duplex printing can be performed only when one of the following paper sizes is selected from **Page Size** on the **Page Setup** tab.
  - **Letter 8.5"x11" 22x28cm, A5, A4, B5, Hagaki 100x148mm**
- After printing the front page, there is an ink drying wait time before starting to print the back page (Operation stops temporarily). Do not touch the paper during this time.
- When you use the automatic duplex printing function to print a postcard, print the address side first and then print the message side.

## **Perform maintenance or settings (Maintenance tab)**

---

- **Maintenance Tab Description**
- **Cleaning the Print Heads**
- **Adjusting Print Head Position Automatically**
  - Adjusting Print Head Position Manually

## Maintenance Tab Description

The **Maintenance** tab allows you to change the printer settings or check its status.

### Cleaning

Performs print head Cleaning.

The print head Cleaning function allows you to clear up clogged print head nozzles.

Perform print head Cleaning if printing results are not satisfactory or if a specific color fails to print, even though there is enough ink.

### Deep Cleaning

Performs Deep Cleaning.

Perform Deep Cleaning when two Cleaning attempts do not resolve the print head problem.

### ►► Note

- **Deep Cleaning** consumes a larger amount of ink than **Cleaning**.  
Cleaning the print heads frequently will rapidly deplete your printer's ink supply. Perform Cleaning only when necessary.

### Ink Group

When you click **Cleaning** or **Deep Cleaning**, the **Ink Group** window is displayed.

Selects the ink group that you want to clean the print head for.

Click [Initial Check Items](#) to display the items that you need to check before you perform Cleaning or Deep Cleaning.

### Print Head Alignment

Adjust the print head position.

### Nozzle Check

Prints a Nozzle Check pattern.

Perform this function if printing becomes faint or a specific color fails to print. Print a Nozzle Check pattern, and check whether the print head is working properly.

If the print result for a specific color is faint, or if there are any unprinted sections, click **Cleaning** to clean the print head.

To display a list of items that you should check before printing the Nozzle Check pattern, click [Initial Check Items](#).

### Quiet Settings

Opens the [Quiet Settings dialog box](#).

**Quiet Settings** dialog box allows you to specify a setting that reduces the operating noise of the printer.

This mode comes in handy when the operating noise of the printer becomes a concern, such when printing at night. Perform this operation when you want to change the quiet mode setting.

#### ▶▶▶ Note

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status. If this happens, click **OK** to display the most recent settings specified on your computer.

### Custom Settings

Opens the [Custom Settings dialog box](#).

Perform this function to change the settings of this printer.

#### ▶▶▶ Note

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status. If this happens, click **OK** to display the most recent settings specified on your computer.

### Open Remote UI

Menu for performing printer maintenance and changing settings.

### View Printer Status

Starts the Canon IJ Status Monitor.

Perform this function when you want to check the printer status and how a print job is proceeding.

### About

Opens the [About dialog box](#).

The version of the printer driver, plus a copyright notice, can be checked.

In addition, the language to be used can be switched.

## Initial Check Items (Cleaning / Deep Cleaning)

Before running **Cleaning** or **Deep Cleaning**, check that the printer power is on, and open the cover of the printer.

Check the following items for each ink.

- [Check the amount of ink](#) remaining in the tank.
- Check that you push in the ink tank completely until you hear a clicking sound.
- If an orange tape is adhered to the ink tank, peel it off completely.  
Any remaining tape will hinder ink output.
- Check that the ink tanks are installed in their correct positions.

## Initial Check Items (Nozzle Check)

Before running **Nozzle Check**, check that the printer power is on, and open the cover of the printer.

Check the following items for each ink.

- [Check the amount of ink](#) remaining in the tank.
- Check that you push in the ink tank completely until you hear a clicking sound.
- If an orange tape is adhered to the ink tank, peel it off completely.  
Any remaining tape will hinder ink output.
- Check that the ink tanks are installed in their correct positions.

## Quiet Settings dialog box

When you click **Quiet Settings**, the **Quiet Settings** dialog box is displayed.

**Quiet Settings** dialog box allows you to specify a setting that reduces the operating noise of the printer.

Select when you wish to reduce the operating noise of the printer at night, etc.

Using this function may lower the print speed.

### Do not use quiet mode

Select this option when you wish to use the printer with volume of normal operating noise.

### Always use quiet mode

Select this option when you wish to reduce the operating noise of the printer.

### Use quiet mode during specified hours

Select this option when you wish to reduce the operating noise of the printer during a specified period of time.

Set the **Start time** and the **End time** of the quiet mode you wish to be activated. If both are set to the same time, the quiet mode will not function.

## ►► Important

- You can set the quiet mode from the operation panel of the printer, the **Maintenance** tab, or ScanGear (scanner driver).  
No matter how you use to set the quiet mode, the mode is applied when you perform operations from the operation panel of the printer or printing and scanning from the computer.
- Quiet Mode is not applied to operations (copy, direct print, etc.) performed directly from the printer even during times set for **Use quiet mode during specified hours**.

## Custom Settings dialog box

When you click **Custom Settings**, the **Custom Settings** dialog box is displayed.  
If necessary, switch between various modes of printer operation.

### Detects compatible media in the multi-purpose tray

Detects whether compatible media is loaded on the multi-purpose tray during printing using the multi-purpose tray, and displays a message if compatible media is not loaded.  
Uncheck this check box to print without detecting whether compatible media is loaded.

#### ▶▶▶ Important

- If you leave this check box unchecked, the printer may print to the multi-purpose tray even if compatible media is not loaded on the multi-purpose tray. Therefore, you should check this check box under normal circumstances.
- If you load compatible media that has already been printed onto the multi-purpose tray, the printer may detect that no compatible media is loaded on the multi-purpose tray. In this case, uncheck this check box.

### Rotate 90 degrees left when orientation is [Landscape]

On the **Page Setup** tab, you can change the rotation direction of the **Landscape** in the **Orientation**.  
To rotate the print data 90 degrees to the left during printing, check this check box.

#### ▶▶▶ Important

- Do not change this setting while the print job is displayed in the print wait list. Otherwise, characters may be omitted or the layout may become corrupt.

#### ▶▶▶ Note

- If **Envelope Com 10**, **Envelope DL**, **Yougata 4 4.13"x9.25"**, or **Yougata 6 3.86"x7.48"** is selected for **Page Size** on the **Page Setup** tab, the printer rotates the paper 90 degrees to the left to print, regardless of the **Rotate 90 degrees left when orientation is [Landscape]** setting.

### Do not detect mismatched paper settings when printing from a computer

When you print documents from your computer, the paper settings in the printer driver and the paper information registered on the printer do not match, this setting disables the message display and allows you to continue printing.

To enable detection of paper setting mismatches, uncheck this check box.

### Align heads manually

Usually, the **Print Head Alignment** function in the **Maintenance** tab is set to automatic head alignment, but you can change it to manual head alignment.

If the printing results of automatic Print Head Alignment are not satisfactory, perform [manual head alignment](#).

Check this check box to change to manual head alignment.

### Ink Drying Wait Time

You can set the length of the printer rest time until printing of the next page begins. Moving the slider to the right increases the pause time, and moving the slider to the left decreases the time.

If the paper gets stained because the next page is ejected before the ink on the printed page dries, increase the ink drying wait time.

## About dialog box

When you click **About**, the **About** dialog box is displayed.

This dialog box displays the version, copyright, and module list of the printer driver. You can select the language to be used and switch the language displayed in the setup window.

### Modules

Lists the printer driver modules.

### Language

Specifies the language you wish to use in the [printer driver setup window](#).

### ▶▶▶ Important

- If the font for displaying the language of your choice is not installed in your system, the characters will be garbled.

### Allow Google Analytics to send information

To stop sending information, uncheck this check box.

The check box appears only if a user with administrator privileges is logged on. If information is not provided, the check box will not appear.

- ➔ [Changing the Printer Operation Mode](#)

## Cleaning the Print Heads

The print head Cleaning and Deep Cleaning functions allow you to clear up clogged print head nozzles. Perform print head Cleaning if printing results are not satisfactory or if a specific color fails to print, even though there is enough ink.

### Cleaning

1. Open the **Maintenance** Tab

2. Click **Cleaning**

When the **Print Head Cleaning** dialog box opens, select the ink group for which Cleaning is to be performed.

Click **Initial Check Items** to display the items you need to check before performing Cleaning.

3. Perform Cleaning

Check that the printer is on and then click **Start**.

Print Head Cleaning starts.

4. Complete Cleaning

Click **OK** when the confirmation message is displayed.

The **Nozzle Check** dialog box will open.

5. Check the results

To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.

If cleaning the head once does not resolve the print head problem, clean it once more.

### ►►► Important

- **Cleaning** consumes a small amount of ink.

Cleaning the print head frequently will rapidly deplete your printer's ink supply. Perform Cleaning only when necessary.

### Deep Cleaning

**Deep Cleaning** is more thorough than Cleaning. Perform Deep Cleaning when two **Cleaning** attempts do not resolve the print head problem.

1. Open the **Maintenance** Tab

## 2. Click **Deep Cleaning**

When the **Deep Cleaning** dialog box opens, select the ink group for which Deep Cleaning is to be performed.

Click **Initial Check Items** to display the items you need to check before performing Deep Cleaning.

## 3. Perform Deep Cleaning

Check that the printer is on and then click **Start**.

Click **OK** when the confirmation message appears.

Print head Deep Cleaning starts.

## 4. Complete Deep Cleaning

Click **OK** when the confirmation message is displayed.

The **Nozzle Check** dialog box will open.

## 5. Check the results

To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.

### »» Important

- **Deep Cleaning** consumes a larger amount of ink than **Cleaning**.  
Cleaning the print head frequently will rapidly deplete your printer's ink supply. Perform Deep Cleaning only when necessary.

## Related Topic

➔ [Printing a Nozzle Check Pattern](#)

## Adjusting Print Head Position Automatically

Print Head Alignment corrects the installation positions of the print head and improves misalignment of colors and lines.

This printer supports two head alignment methods: automatic head alignment and manual head alignment. Normally, the printer is set for automatic head alignment, but if the printing results are not satisfactory, such as if the borders are not aligned, perform [manual head alignment](#).

The procedure for performing automatic Print Head Alignment is as follows:

### ►►► Important

- A pattern will be printed for head alignment. Do not open the scanning unit / cover while printing is in progress.

### Print Head Alignment

#### 1. Open the **Maintenance** Tab

#### 2. Click **Print Head Alignment**

The **Print Head Alignment** dialog box opens.

#### 3. Load paper in printer

Load two sheets of A4 size or Letter size plain paper into the cassette.

### ►►► Note

- The number of sheets to be used differs when you select the manual head alignment.

#### 4. Perform head alignment

Check that the printer is on and then click **Start**.

Follow the instruction in the message.

### ►►► Note

- Wait until printing ends before performing other operations. Printing takes about 3 minutes to complete.

### ►►► Note

- In the **Print Head Alignment** dialog box, click **Print Alignment Value** to print the current settings so that you can check the settings.

## Adjusting Print Head Position Manually

Print Head Alignment corrects the installation positions of the print head and improves misalignment of colors and lines.

This printer supports two head alignment methods: [automatic head alignment](#) and manual head alignment. Normally, the printer is set for automatic head alignment, but if the printing results are not satisfactory, such as if the borders are not aligned, perform manual head alignment.

The procedure for performing manual Print Head Alignment is as follows:

### ▶▶▶ Important

- Printing is required for adjusting the position of the print head. Do not open the scanning unit / cover while printing is in progress; otherwise, printing will stop.

### Print Head Alignment

1. Open the **Maintenance** Tab
2. Check that the printer power is on, and then click **Custom Settings**

The **Custom Settings** dialog box opens.

### ▶▶▶ Note

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status. If this happens, click **OK** to display the most recent settings specified on your computer.

3. Switch head alignment to manual

Check the **Align heads manually** check box.

4. Apply the settings

Click **OK** and when the confirmation message appears, click **OK**.

5. Click **Print Head Alignment**

The **Print Head Alignment** dialog box opens.

6. Load paper in printer

Load three sheets of A4 size or Letter size plain paper into the cassette.

7. Perform head alignment

Click **Start**.

Follow the instruction in the message.

## 8. Check printed pattern

In each entry field, enter the number of the pattern with the least prominent streaks from among the printed patterns.

You can also enter numbers into the entry fields automatically by clicking relevant pattern in the preview.

After completing the entries, click **OK**.

### ►► Note

- If the patterns are not uniform, select the pattern with the least prominent vertical streaks.

(A)

(B)

(A) Less prominent vertical streaks

(B) More prominent vertical streaks

- If the patterns are not uniform, select the pattern with the least prominent horizontal streaks.

(A)

(B)

(A) Less prominent horizontal streaks

(B) More prominent horizontal streaks

## 9. Check the displayed message and click **OK**

The second pattern is printed.

## 10. Check printed patterns

In each entry field, enter the number of the pattern with the least prominent streaks from among the printed patterns.

You can also enter numbers into the entry fields automatically by clicking relevant pattern in the preview.

After completing the entries, click **OK**.

**▶▶▶ Note**

- If the patterns are not uniform, select the pattern with the least prominent vertical streaks.

(A)

(B)

- (A) Less prominent vertical streaks
- (B) More prominent vertical streaks

**11. Check message content, and click **OK****

The print head adjustment patterns on the third sheet are printed.

**12. Check printed patterns**

In each entry field, enter the number of the pattern with the least prominent stripes from among the printed patterns.

You can also enter numbers into the entry fields automatically by clicking relevant pattern in the preview.

After completing the entries, click **OK**.

➤➤➤ **Note**

- If the patterns are not uniform, select the pattern with the least prominent horizontal stripes.

(A)

(B)

(A) Less prominent horizontal stripes

(B) More prominent horizontal stripes

**13. Complete head position adjustment**

Click **OK**.

The adjustment of the head position is complete.

➤➤➤ **Note**

- To print and check the current setting, open the **Print Head Alignment** dialog box, and click **Print Alignment Value**.

## Printing a Nozzle Check Pattern

The Nozzle Check function allows you to check whether the print head is working properly by printing a Nozzle Check pattern. Print the pattern if printing results are not satisfactory, or if a specific color fails to print.

### Nozzle Check

1. Open the **Maintenance** Tab

2. Click **Nozzle Check**

The **Nozzle Check** dialog box opens.

Click **Initial Check Items** to display the items that you need to check before printing the Nozzle Check pattern.

3. Load paper in the printer

Load one sheet of A4 size or Letter size plain paper into the cassette.

4. Print a Nozzle Check pattern

Check that the printer is on and then click **Print Check Pattern**.

The Nozzle Check pattern will be printed.

Click **OK** when the confirmation message appears.

The **Pattern Check** dialog box opens.

5. Check the print result

Check the print result. If the print result is normal, click **Exit**.

If the print result is smudged or if there are any unprinted sections, click **Cleaning** to clean the print head.

## Overview of the Printer Driver

---

- **Canon IJ Printer Driver**
  - Opening Printer Driver's Setup Screen
- **Canon IJ Status Monitor**
  - Checking Ink Status from Your Computer
- **Instructions for Use (Printer Driver)**

## Canon IJ Printer Driver

---

The Canon IJ printer driver (simply called printer driver below) is software that you install onto your computer so that it can communicate with the printer.

The printer driver converts the print data created by your application software into data that your printer can understand, and sends the converted data to the printer.

Because different models support different print data formats, you need a printer driver for the specific model you are using.

### Installing the Printer Driver

To install the printer driver, install the driver from the Setup CD-ROM or our website.

### Specifying the Printer Driver

To specify the printer driver, open the **Print** dialog box of the application software you are using, and select "Canon XXX" (where "XXX" is your model name).

### Displaying the Manual from the Printer Driver

To display the description of a setup tab from the printer driver's setup screen, click **Help** on that tab.

### Related Topic

➔ [Opening Printer Driver's Setup Screen](#)

## Opening Printer Driver's Setup Screen

You can display the printer driver's setup screen from your application software or by clicking the printer icon.

### Displaying the Printer Driver's Setup Screen from Your Application Software

Perform this procedure to set up the print settings during printing.

1. Select print command from application software

The **Print** command can generally be found in the **File** menu.

2. Select your printer model, and click **Preferences** (or **Properties**)

The printer driver's setup screen appears.

#### ▶▶▶ Note

- Depending on the application software you are using, the command and menu names, and the number of steps may vary. For details, refer to the operating instructions of your application software.

### Displaying the Printer Driver's Setup Screen by Clicking the Printer Icon

From the setup screen you can perform printer maintenance operations such as print head cleaning, or set print settings to be shared by all application software.

The following instructions are shown using screens displayed in Windows 11 as an example.

1. Select the **Settings** -> **Bluetooth & devices** -> **Printers & scanners**

2. Click your model name icon, and then select **Printing preferences** from the displayed menu

The printer driver setup window appears.

#### ▶▶▶ Note

- If you're using Windows 10 or earlier, follow the steps below to display the printer driver settings screen.

1. Select the **Control Panel** -> **Hardware and Sound** -> **Devices and Printers**

2. Right-click your model name icon, and then select **Printing preferences** from the displayed menu

Opening the printer driver setup window through **Printer properties** displays such tabs regarding the Windows functions as the **Ports** (or **Advanced**) tab. Those tabs do not appear when opening through **Printing preferences** or application software. For tabs regarding Windows functions, refer to the user's manual for the Windows.

## Canon IJ Status Monitor

The Canon IJ Status Monitor displays the printer status and the printing progress. The printer status is shown by the images, icons, and messages in the status monitor.

### Launching the Canon IJ Status Monitor

The Canon IJ Status Monitor launches automatically when print data is sent to the printer. When launched, the Canon IJ Status Monitor appears as a button on the task bar.

Click the button of the status monitor displayed on the task bar. The Canon IJ Status Monitor appears.

### Note

- To open the Canon IJ Status Monitor when the printer is not printing, open the [printer driver setup window](#) and click **View Printer Status** on the **Maintenance** tab.
- The information displayed on the Canon IJ Status Monitor may differ depending on the country or region where you are using your printer.

### When Errors Occur

The Canon IJ Status Monitor is automatically displayed if an error occurs (e.g., if the printer runs out of paper or if the ink is low).

In such cases, take the appropriate action as described.

### Related Topic

➔ [Canon IJ Status Monitor Description](#)

## Checking Ink Status from Your Computer

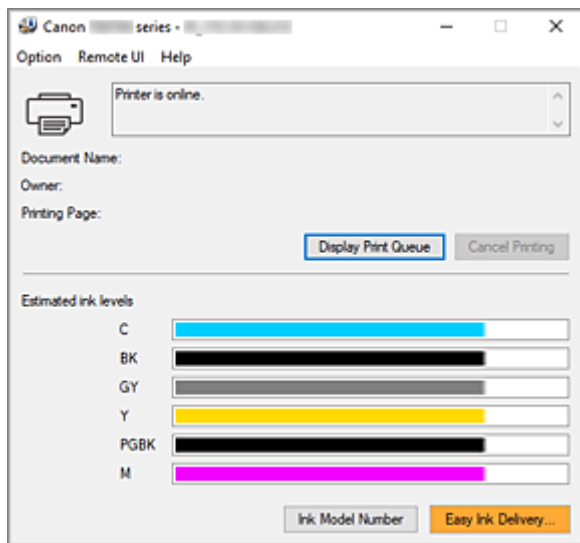

You can check the remaining ink level and the ink tank types for your model.

1. Open the [printer driver setup window](#)
2. Launching the Canon IJ Status Monitor

On the **Maintenance** tab, click **View Printer Status**.

### 3. Display **Estimated ink levels**

Ink status is displayed as an illustration.

## Instructions for Use (Printer Driver)

This printer driver is subject to the following restrictions. Keep the following points in mind when using the printer driver.

### Restrictions on the Printer Driver

- Depending on the document type to be printed, the paper feed method specified in the printer driver may not operate correctly.  
If this happens, open the [printer driver setup window](#) from the **Print** dialog box of the application software, and check the setting in the **Paper Source** field on the **Media/Quality** tab.
- With some applications, the **Copies** setting in the **Page Setup** tab of the printer driver may not be enabled.  
In this case, use the copies setting in the **Print** dialog box of the application software.
- If the selected **Language** in the **About** dialog box of the **Maintenance** tab does not match the operating system interface language, the printer driver setup window may not be displayed properly.
- Do not change the **Advanced** tab items of the printer properties. If you change any of the items, you will not be able to use the following functions correctly.  
Also, if **Print to file** is selected in the **Print** dialog box of the application software and with applications that prohibit EMF spooling, the following functions will not operate.
  - **Preview before printing** on the **Media/Quality** tab
  - **Prevention of Print Data Loss** in the **Print Options** dialog box on the **Page Setup** tab
  - **Automatic** when **2-sided Printing** is selected from **1-sided/2-sided/Booklet Printing** on the **Page Setup** tab
  - **Booklet Printing** in **1-sided/2-sided/Booklet Printing** on the **Page Setup** tab
  - **Print from Last Page, Collate, Specify Margin...**, and **Stamp/Background...** on the **Page Setup** tab
- Since the resolution in the preview display differs from the printing resolution, text and lines in the preview display may appear different from the actual print result.
- With some applications, the printing is divided into multiple print jobs.  
To cancel printing, delete all divided print jobs.
- If image data is not printed correctly, display the **Print Options** dialog box from the **Page Setup** tab and change the setting of **Disable ICM required from the application software**. This may solve the problem.
- If you are using a model that has a card slot, the card slot of the printer may become inaccessible. In such cases, restart the printer or turn it off and reconnect the USB cable.

### Points to Note About Applications with Restrictions

- There are following restrictions in Microsoft Word (Microsoft Corporation).
  - When Microsoft Word has the same printing functions as the printer driver, use Word to specify them.
  - When a setting from **2 on 1** to **16 on 1** or **Zoom** is used for **Page Layout** on the **Page Setup** tab of the printer driver, the document may not print normally in certain versions of Word.

- When **Page Size** in Word is set to "XXX Enlarge/Reduce," the document may not print normally in certain versions of Word.

If this happens, follow the procedure below.

1. Open Word's **Print** dialog box.
  2. Open the [printer driver setup window](#), and on the **Page Setup** tab, set **Page Size** to the same paper size that you specified in Word.
  3. Set **Booklet Printing** in **Page Layout** or **1-sided/2-sided/Booklet Printing** according to your requirements.
  4. Click OK to close the window.
  5. Without starting printing, close the **Print** dialog box.
  6. Open Word's **Print** dialog box again.
  7. Open the printer driver setup window and click **OK**.
  8. Start printing.
- If bitmap printing is enabled in Adobe Illustrator (Adobe Incorporated), printing may take time or some data may not be printed. Print after unchecking the **Bitmap Printing** check box in the **Print** dialog box.

## Maintenance Tab Description

The **Maintenance** tab allows you to change the printer settings or check its status.

### Cleaning

Performs print head Cleaning.

The print head Cleaning function allows you to clear up clogged print head nozzles.

Perform print head Cleaning if printing results are not satisfactory or if a specific color fails to print, even though there is enough ink.

### Deep Cleaning

Performs Deep Cleaning.

Perform Deep Cleaning when two Cleaning attempts do not resolve the print head problem.

### ►► Note

- **Deep Cleaning** consumes a larger amount of ink than **Cleaning**.  
Cleaning the print heads frequently will rapidly deplete your printer's ink supply. Perform Cleaning only when necessary.

### Ink Group

When you click **Cleaning** or **Deep Cleaning**, the **Ink Group** window is displayed.

Selects the ink group that you want to clean the print head for.

Click [Initial Check Items](#) to display the items that you need to check before you perform Cleaning or Deep Cleaning.

### Print Head Alignment

Adjust the print head position.

### Nozzle Check

Prints a Nozzle Check pattern.

Perform this function if printing becomes faint or a specific color fails to print. Print a Nozzle Check pattern, and check whether the print head is working properly.

If the print result for a specific color is faint, or if there are any unprinted sections, click **Cleaning** to clean the print head.

To display a list of items that you should check before printing the Nozzle Check pattern, click [Initial Check Items](#).

### Quiet Settings

Opens the [Quiet Settings dialog box](#).

**Quiet Settings** dialog box allows you to specify a setting that reduces the operating noise of the printer.

This mode comes in handy when the operating noise of the printer becomes a concern, such when printing at night. Perform this operation when you want to change the quiet mode setting.

#### ▶▶▶ Note

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status. If this happens, click **OK** to display the most recent settings specified on your computer.

### Custom Settings

Opens the [Custom Settings dialog box](#).

Perform this function to change the settings of this printer.

#### ▶▶▶ Note

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status. If this happens, click **OK** to display the most recent settings specified on your computer.

### Open Remote UI

Menu for performing printer maintenance and changing settings.

### View Printer Status

Starts the Canon IJ Status Monitor.

Perform this function when you want to check the printer status and how a print job is proceeding.

### About

Opens the [About dialog box](#).

The version of the printer driver, plus a copyright notice, can be checked.

In addition, the language to be used can be switched.

## Initial Check Items (Cleaning / Deep Cleaning)

Before running **Cleaning** or **Deep Cleaning**, check that the printer power is on, and open the cover of the printer.

Check the following items for each ink.

- [Check the amount of ink](#) remaining in the tank.
- Check that you push in the ink tank completely until you hear a clicking sound.
- If an orange tape is adhered to the ink tank, peel it off completely.  
Any remaining tape will hinder ink output.
- Check that the ink tanks are installed in their correct positions.

## Initial Check Items (Nozzle Check)

Before running **Nozzle Check**, check that the printer power is on, and open the cover of the printer.

Check the following items for each ink.

- [Check the amount of ink](#) remaining in the tank.
- Check that you push in the ink tank completely until you hear a clicking sound.
- If an orange tape is adhered to the ink tank, peel it off completely.  
Any remaining tape will hinder ink output.
- Check that the ink tanks are installed in their correct positions.

## Quiet Settings dialog box

When you click **Quiet Settings**, the **Quiet Settings** dialog box is displayed.

**Quiet Settings** dialog box allows you to specify a setting that reduces the operating noise of the printer.

Select when you wish to reduce the operating noise of the printer at night, etc.

Using this function may lower the print speed.

### Do not use quiet mode

Select this option when you wish to use the printer with volume of normal operating noise.

### Always use quiet mode

Select this option when you wish to reduce the operating noise of the printer.

### Use quiet mode during specified hours

Select this option when you wish to reduce the operating noise of the printer during a specified period of time.

Set the **Start time** and the **End time** of the quiet mode you wish to be activated. If both are set to the same time, the quiet mode will not function.

## ►► Important

- You can set the quiet mode from the operation panel of the printer, the **Maintenance** tab, or ScanGear (scanner driver).  
No matter how you use to set the quiet mode, the mode is applied when you perform operations from the operation panel of the printer or printing and scanning from the computer.
- Quiet Mode is not applied to operations (copy, direct print, etc.) performed directly from the printer even during times set for **Use quiet mode during specified hours**.

## Custom Settings dialog box

When you click **Custom Settings**, the **Custom Settings** dialog box is displayed.  
If necessary, switch between various modes of printer operation.

### Detects compatible media in the multi-purpose tray

Detects whether compatible media is loaded on the multi-purpose tray during printing using the multi-purpose tray, and displays a message if compatible media is not loaded.

Uncheck this check box to print without detecting whether compatible media is loaded.

#### ▶▶▶ Important

- If you leave this check box unchecked, the printer may print to the multi-purpose tray even if compatible media is not loaded on the multi-purpose tray. Therefore, you should check this check box under normal circumstances.
- If you load compatible media that has already been printed onto the multi-purpose tray, the printer may detect that no compatible media is loaded on the multi-purpose tray. In this case, uncheck this check box.

### Rotate 90 degrees left when orientation is [Landscape]

On the **Page Setup** tab, you can change the rotation direction of the **Landscape** in the **Orientation**.  
To rotate the print data 90 degrees to the left during printing, check this check box.

#### ▶▶▶ Important

- Do not change this setting while the print job is displayed in the print wait list. Otherwise, characters may be omitted or the layout may become corrupt.

#### ▶▶▶ Note

- If **Envelope Com 10**, **Envelope DL**, **Yougata 4 4.13"x9.25"**, or **Yougata 6 3.86"x7.48"** is selected for **Page Size** on the **Page Setup** tab, the printer rotates the paper 90 degrees to the left to print, regardless of the **Rotate 90 degrees left when orientation is [Landscape]** setting.

### Do not detect mismatched paper settings when printing from a computer

When you print documents from your computer, the paper settings in the printer driver and the paper information registered on the printer do not match, this setting disables the message display and allows you to continue printing.

To enable detection of paper setting mismatches, uncheck this check box.

### Align heads manually

Usually, the **Print Head Alignment** function in the **Maintenance** tab is set to automatic head alignment, but you can change it to manual head alignment.

If the printing results of automatic Print Head Alignment are not satisfactory, perform [manual head alignment](#).

Check this check box to change to manual head alignment.

### Ink Drying Wait Time

You can set the length of the printer rest time until printing of the next page begins. Moving the slider to the right increases the pause time, and moving the slider to the left decreases the time.

If the paper gets stained because the next page is ejected before the ink on the printed page dries, increase the ink drying wait time.

## About dialog box

When you click **About**, the **About** dialog box is displayed.

This dialog box displays the version, copyright, and module list of the printer driver. You can select the language to be used and switch the language displayed in the setup window.

### Modules

Lists the printer driver modules.

### Language

Specifies the language you wish to use in the [printer driver setup window](#).

### ▶▶▶ Important

- If the font for displaying the language of your choice is not installed in your system, the characters will be garbled.

### Allow Google Analytics to send information

To stop sending information, uncheck this check box.

The check box appears only if a user with administrator privileges is logged on. If information is not provided, the check box will not appear.

## Canon IJ Status Monitor Description

The Canon IJ Status Monitor displays the printer status and the printing progress. The printer status is shown by the images, icons, and messages in the status monitor.

## Features of the Canon IJ Status Monitor

The Canon IJ Status Monitor has the following functions:

### Onscreen display of printer status

The status monitor displays the printer status in real-time.

You can check the progress of each document to be printed (print job).

### Display of error content and correction procedure

The status monitor displays information on any errors that occur on the printer.

You can then immediately check what sort of action to perform.

### Ink status display

Displays the ink status.

Ink tank types and ink levels can be confirmed.

## Overview of the Canon IJ Status Monitor

The Canon IJ Status Monitor uses images, icons, and messages to display the printer status and the ink status.

During printing, you can check information about the document being printed and the print progress.

If an error occurs, the status monitor displays the error content and instructions on how to correct the error. Follow the message instructions.

### Printer

Canon IJ Status Monitor shows an icon when a warning or error occurs to the printer.

: There is a warning.

: There has been an operator error.

: There is a notice about something other than a warning or an error.

: There has been an error which requires a service.

### **Document Name**

Name of the document being printed.

### **Owner**

Owner's name of the document being printed.

### **Printing Page**

Page number of current page and the total page count.

### **Display Print Queue**

The print queue, which controls the current document and documents waiting to be printed.

### **Cancel Printing**

Cancels printing.

### **Estimated ink levels**

Displays ink tank types and estimated ink levels as images.

Also, if the remaining ink is low or empty, an icon or a message will appear (Ink level warning / Ink empty error).

Move the cursor onto the image to check detailed information such as the remaining ink levels and the names of ink tanks that the printer can use.

### **Ink Model Number**

You can look up the correct ink tank for your printer.

### **Option Menu**

If a printer message appears, select **Enable Status Monitor** to start the Canon IJ Status Monitor.

Select **Enable Status Monitor** to use the following commands:

#### **Always Display Current Job**

Displays the Canon IJ Status Monitor whenever a document is being printed.

#### **Always Display on Top**

Displays the Canon IJ Status Monitor in front of other windows.

#### **Display Guide Message**

Displays guide messages for complicated paper setting operations.

#### **Envelope Printing**

Displays a guide message when envelope printing starts.

To hide this guide message, select the **Do not show this message again** check box.

To display the guide message again, open the **Option** menu, select **Display Guide Message**, click **Envelope Printing**, and enable this setting.

#### **Display Warning Automatically**

##### **When a Low Ink Warning Occurs**

Starts the Canon IJ Status Monitor window as a pop-up, and displays it in front of the other windows when a low ink warning occurs.

#### **Display Firmware Update Notifications**

Displays firmware update notifications.

If there's a firmware update available, a dialog box is displayed when you start printing.

If you add a check mark to **Do not show this message again** in this dialog box, you can prevent it from displaying again.

### **Start when Windows is Started**

Automatically starts the Canon IJ Status Monitor when Windows is started.

### **Remote UI menu**

You are able to open the printer's Remote User Interface.

You are able to check the printer status and run maintenance functions on the printer when connected to and using it through a network.

### **»» Note**

- When the printer is being used via USB connection **Remote UI** will not display.

### **Printer Information**

Allows you check detailed information, such as the printer status, the print progress, and remaining ink levels.

### **Maintenance**

Allows you to run printer maintenance and change printer settings.

### **Download Security Certificate**

Displays the **For secure communication** window.

This window allows you to download the route certificate, register it to the browser, and disable warning displays.

### **Help Menu**

Select this menu to display Help information for the Canon IJ Status Monitor including version and copyright information.

## **Related Topic**

➔ [Canon IJ Status Monitor](#)

## Updating the Driver

Drivers include a printer driver and MP Drivers. The MP Drivers include a printer driver, ScanGear (scanner driver), and fax driver.

By updating the Driver to the latest version of the Driver, unresolved problems may be solved.

### »»» Important

- Check the following if you want to install or delete drivers.
  - Log on as a user who has the administrator account.
  - Terminate all running applications.

- [Installing the Driver](#)
- [Deleting the Unnecessary Driver](#)

## Installing the Driver

### 1. Turn on the printer

### 2. Start the installer

Double-click the icon of the downloaded file.  
The installation program starts.

### 3. Install the driver

Take the appropriate action as described on the screen.

### 4. Complete the installation

Click **Exit**.

Depending on the environment you are using, a message prompting you to restart the computer may be displayed. To complete the installation properly, restart the computer.

### »»» Important

- You can download the driver for free, but any Internet access charges incurred are your responsibility.

## Deleting the Unnecessary Driver

The printer driver which you no longer use can be deleted.

### 1. Start the uninstaller

Select **Control Panel** -> **Programs** -> **Programs and Features**.

From the program list, select "Canon XXX Printer Driver/MP Drivers" (where "XXX" is your model name) and then click Uninstall.

The confirmation window for uninstalling the model appears.

## 2. Perform the uninstaller

Click **Start**. When the confirmation message appears, click **Yes**.

When all the files have been deleted, click **Complete**.

The deletion of the Driver is complete.

## Printing from Application Software (macOS AirPrint)

---

- **Printing**  **Basic**
- **Perform Borderless Printing**
- **Printing on Postcards**
- **Adding Printer**
- **How to Open Printer Settings Screen**
- **Displaying the Printing Status Screen**
- **Deleting the Undesired Print Job**
- **Removing Printer That Is No Longer Required from List of Printers**

# Printing

---

This printer is compatible with the macOS standard printing system (AirPrint). You can start printing right away after connecting this printer to your Mac without installing any special software.

## Checking Your Environment

First, check your environment.

- AirPrint Operation Environment
  - Mac running the latest version of OS
- Requirement
  - The Mac and the printer must be connected by one of the following methods:
    - Connected to the same network over a **LAN**
    - Connected directly without wireless router (Direct Connection)
    - Connected by USB

## Print from a Mac

### 1. [Check that printer is turned on](#)

#### ▶▶▶ Note

- If **Auto power on** is enabled, printer automatically turns itself on when receiving a print job.

### 2. [Load paper](#) in printer

### 3. Select paper size and paper type from printer

Register the set paper size and paper type on the printer operation panel.  
For instructions, see "[Paper Settings](#)."

### 4. Start printing from your application software

The Print dialog opens.

### 5. Select printer

Select your model from the **Printer** list in the Print dialog.

## 6. Check print settings

Set items such as **Paper Size** to the appropriate size, as well as **Feed From** and **Media Type** from **Media & Quality**.

Set **Double-sided** to **Off** if you are not printing on both sides of the paper.

## »» Important

- An error may occur if the paper size set in the print dialog is different from the paper size registered on the printer. Select the correct items on the print dialog and the printer that correspond to the paper being printed.
- If you selected **Auto Select** in **Feed From**, the feed position will be different. Only **A4**, **A5**, and **JIS B5** plain paper can be fed from the cassette (main tray).
- If printing paper such as photo paper and postcards that cannot be printed on both sides, set **Double-sided** to **Off**.

## »» Note

- Use the Print dialog to set general print settings such as the layout and the print sequence. For information about print settings, refer to macOS help.

## 7. Click **Print**

The printer prints according to the specified settings.

## »» Note

- It can take the Wi-Fi a few minutes to get connected after the printer turns on. Print after checking that the printer is connected to the network.
- You cannot print if Bonjour settings of printer are disabled. Check **LAN** settings of printer and enable Bonjour settings.
- Refer to "Cannot Print Using AirPrint" for printing problems.
- The display of the settings screen may differ depending on the application software you are using.
- If you print with **Media Type** set to **Premium Fine Art Rough** or **Other Fine Art Paper**, the paper may get rubbed, reducing the print quality at the top and bottom edges. When creating print data with the application software, we recommend that you create 35 mm margins on the top and bottom edges.

## Printing of Envelopes

For printing on the envelope from Mac, refer to the following.

Print result image	Orientation of print data	Orientation of loading envelope
	 <p>The print data is rotated by 180 degrees against the print result image.</p>	

		Load the envelope in vertically with the address side facing up so that the folded flap of the envelope will be faced down on the right side.
--	--	---

## Perform Borderless Printing

The borderless printing function allows you to print data without any margin by enlarging the data so that it extends slightly off the paper. In standard printing, margins are created around the document area. However, in borderless printing function, these margins are not created. When you want to print data such as a photo without providing any margin around it, set borderless printing.

The procedure for performing borderless printing is as follows:

### Setting Borderless Printing

1. Set the **Amount of extension** on the printer operation panel

For information on how to set the amount of extension, see "[Print settings](#)."

#### ▶▶▶ Important

- When the **Extended amount: Large** is set, the back side of the paper may become smudged.

2. Select sheet size for borderless printing

Select **XXX Borderless** for **Paper Size** from the print dialog.

3. Click **Print**

When you perform print, the data is printed without any margins on the paper.

#### ▶▶▶ Important

- Borderless printing only supports specific paper sizes. Make sure to select a paper size with the wording "Borderless" from the **Paper Size**.
- Print quality may deteriorate or the sheet may be stained at the top and bottom depending on the type of paper used.
- When the ratio of the height to the width differs from the image data, a portion of the image may not be printed depending on the size of the media used.  
In this case, crop the image data with an application software according to the paper size.
- When scaled printing or page layout printing is enabled, you cannot perform borderless printing.

#### ▶▶▶ Note

- The use of borderless printing is not recommended if **Plain Paper** is selected for **Media Type** in **Media & Quality**.

## Expanding the Range of the Document to Print

Setting a large amount of extension allows you to perform borderless printing with no problems. However, the portion of the document extending off the paper range will not be printed and for this reason, the subjects around the perimeter of a photo may not be printed.

If you are not satisfied with the borderless printing results, reduce the amount of extension in printer operation panel.

### ▶▶ Important

- When the amount of extension is decreased, an unexpected margin may be produced on the print, depending on the size of the paper.

### ▶▶ Note

- When the **Amount: Minimum** is set, image data will be printed in the full size. If you set this when printing the address side of a postcard, the postal code of the sender is printed in the correct position.

## Printing on Postcards

---

This section describes the procedure for printing on postcards.

1. [Load postcards](#) in printer

2. Select paper size and paper type from the printer

Register **Hagaki** for paper size from the printer operation panel.

Also, register **Ink Jet Hagaki**, **Hagaki K**, or **Hagaki** for paper type, according to your purpose. When you print on the address side, register **Hagaki**.

3. Select **Paper Size** and **Media Type** from the print dialog

Select **Postcard** or **Postcard Borderless** for **Paper Size** from the print dialog. When you print on the address side, select **Postcard**.

Select the Hagaki you want to use for **Media Type** in **Media & Quality** from the print dialog.

**Important**

- This printer cannot print on postcards that have photos or stickers attached.

4. Set **Double-sided** to **Off**

**Important**

- Two-sided printing is not possible for postcards, so set **Double-sided** to **Off**. If you print with **Double-sided** set to **On**, the printing result may not be as you intended.
- You will get cleaner printing if you print the message side first and then print the address side.

5. Click **Print**

The printer prints according to the specified settings.

## Adding Printer

This section describes the procedure for adding a printer to your Mac.

To re-add a printer that was deleted, open **System Settings** -> **Printers & Scanners**, click **Add Printer, Scanner or Fax...**, and then perform the procedure described below.

If your printer is connected via USB, and you connect the USB cable to a Mac, the printer is automatically added. The below procedure is not necessary in this case.

### 1. Check whether **Default** is selected in the displayed dialog

#### »» Note

- It may take a little time for your printer to appear.

### 2. Select the printer

Select the printer listed as **Bonjour Multifunction**.

#### »» Note

- Check the following if printer does not appear.
  - Printer is on
  - Firewall function of the security software is off
  - Printer is either connected to the wireless router or directly connected to the PC (Direct Connection)

### 3. Select your printer or **Secure AirPrint** from **Use**

### 4. Click **Add**

The printer is added to your Mac.

## How to Open Printer Settings Screen

---

The settings screen of the printer can be displayed from your application software.

### Opening the Page Setup Dialog

Use this procedure to set the page (paper) settings before printing.

1. Select **Page Setup...** from the **File** menu of the application software

The Page Setup dialog opens.

### Opening the Print Dialog

Use this procedure to set the print settings before printing.

1. Select **Print...** from the **File** menu of the application software

The Print dialog opens.

## Displaying the Printing Status Screen

Check the print progress according to the following procedure:

### 1. Launch the printing status screen

- If the print data has been sent to the printer  
The printing status screen opens automatically. To display the printing status screen, click the printer icon displayed on the Dock.
- If the print data has not been sent to the printer  
Open **System Settings**, and select **Printers & Scanners**.  
To display the printing status screen, select your printer model from the printer list, and then click **Printer Queue....**

### 2. Check the printing status

You can check the name of the file being printed or ready for being printed.

-  Deletes the specified print job.
-  Stops printing the specified document.
-  Resumes printing the specified document.
-  Stops printing all documents.
-  Displayed only when printing of all documents is being stopped, and resumes printing all documents.

### ▶▶▶ Important

- If an error occurs, an error message will appear on the printing progress confirmation screen.
- The content of the error message may differ depending on the OS version.
- The printer part names in the error message may differ from what is listed in this manual.
- If the content of the error message is difficult to understand, check the error message displayed on the printer operation panel.

## Deleting the Undesired Print Job

---

If the printer does not start printing, canceled or failed print job data may be remaining. Delete unnecessary print jobs from the print status check screen.

**1. Open **System Settings**, and select **Printers & Scanners****

**2. Select your model, and then click **Printer Queue...****

The print status check screen appears.

**3. Select the unnecessary print job and click  (Delete)**

The selected print jobs will be deleted.

## Removing Printer That Is No Longer Required from List of Printers

---

The printer that is no longer in use can be removed from the list of printers. Before removing the printer, remove the cable connecting the printer and PC.

You cannot remove the printer if you are not logged on as the administrator. For information about an administrative user, see **Users & Groups** from **System Settings**.

1. Open **System Settings**, and select **Printers & Scanners**

2. Delete printer from list of printers

Select the printer you wish to remove from the list of printers and click **Remove Printer...**

Click **Delete Printer** when the confirmation message appears.

## **Printing Using Canon Application Software**

## Printing Photo Data

---

- **Printing Photographs Saved on Memory Card** 📄 **Basic**
- **Setting Items for Photo Printing Using Operation Panel**

## Printing Photographs Saved on Memory Card

You can print the photograph saved on the memory card easily.

This section describes the procedure to print the photograph in **Select photo print**.

1. [Check that printer is turned on.](#)

2. [Load photo paper.](#)

3. Select  **Print** on the HOME screen.

➔ [Using Touch Screen](#)

4. Select  **Print from memory card**.

The memory card print menus are displayed.

5. Select  **Select photo print**.

6. [Insert memory card into card slot.](#)

The photo selection screen is displayed.

### ▶▶▶ Note

- When you insert the memory card before you displays the memory card print menus, the photo selection screen is displayed.
- If no printable photo data is saved on the memory card, **Saved data is not of a supported type.** is displayed on the touch screen.
- If more than 2,000 photo data are saved on the memory card, the photo data is split by group per 2,000 photos in reverse chronological order (date last modified) automatically. Check the message displayed on the touch screen and select **OK**.

7. Specify settings as necessary.

- To select the photo to print:

Flick horizontally to select the photo.

You can also select the photo by tapping  or .

You can print a copy of the displayed photo by tapping **Color**.

- To change the display method, the number of copies, or the print settings:

Tap  near the bottom of the displayed photo to display menus.

A: Total number of copies is displayed

When tapping, you can check and change the number of copies for each photo.

B: Specify the number of copies

Tap  or  to specify the number of copies.

Touch and hold to specify the number of copies by 10 copies.

You can also flick the number to specify.

## ▶▶▶ Note

- You can specify the number of copies for each photo. Display the photo you want to print and specify the number of copies when the desired photo is displayed.

C: Select to switch the photo group.

For details:

- ➔ Using Useful Display Functions

D: Select to display the **Settings** screen.

You can change the settings of page size, media type, and print quality and so on.

For more on the setting items:

- ➔ [Setting Items for Photo Printing Using Operation Panel](#)

E: Select to display two photos side-by-side.

For more on the display method:

- ➔ Using Useful Display Functions

F: Select to zoom in on the photo.

For details:

➔ Using Useful Display Functions

G: Select display photo with specifying the date (last modified date of data).

For details:

➔ Using Useful Display Functions

H: Select to display the multiple photos at once.

For more on the display method:

➔ Using Useful Display Functions

## 8. Tap **Color**.

The printer starts printing.

### ▶▶▶ **Note**

- While processing the print job, you can add the print job (Reserve photo print).

## Adding Print Job

You can add the print job (Reserve photo print) while printing photos.

Follow the procedure below to add the print job.

1. Flick photo while printing to select next photo.

### ➤➤➤ Note

- While you select the photo, the printer prints the reserved photos.

- The reserved photo icon appears on the photo included in the print job.

2. Specify number of copies and print settings for each photo.

### ➤➤➤ Note

- While processing the print job, you cannot change the setting for **Page size** or **Type** on print settings confirmation screen. The setting is the same as the setting for the photo included in the print job.

3. Tap **Color**.

The reserved photo is printed next to the photo that has already been started printing.

If you want to print more photos, operate from step 1 again.

### ➤➤➤ Note

- While processing the print job, you cannot display the HOME screen, change the print menu, or print from the computer or other devices.
- While processing the print job, the photo in other group is not selected.
- If you tap **Stop** while processing the print job, the screen to select a method to cancel reservation is displayed. If you select **Cancel all reservations**, you can cancel printing all photos. If you select **Cancel the last reservation**, you can cancel the last printing job.
- If there are many print jobs, **Cannot reserve more print jobs. Please wait a while and redo the operation.** may be displayed on the touch screen. In this case, wait a while and add the print job.

## Setting Items for Photo Printing Using Operation Panel

You can specify the setting of page size, media type, photo fix and so on to print the photos saved on the memory card.

### Print Settings Screen

How to display the print settings screen varies with the print menu.

- In **Select photo print** or **Slide show**:

The following screen is displayed by selecting **Settings**.

- In **Trimming print**:

The following screen is displayed before printing.

### Setting Items

Flick vertically to display setting items and select the setting item to display the settings. Select to specify the setting.

#### ▶▶▶ Note

- Depending on the print menu, some setting items cannot be selected. This section describes the setting items in **Select photo print**.  
The setting item which cannot be selected is displayed grayed out or not displayed.
- Some settings cannot be specified in combination with the other setting items or the print menus. If the setting which cannot be specified in combination is selected,  and **Error details** are displayed

on the touch screen. In this case, select  on the upper left on the touch screen to check the message and change the setting.

- The settings of the page size, media type, etc. are retained even if another print menu is selected or the printer is turned off.

You can specify the following setting items.

- **Paper src**

Select a paper source.

 **Note**

- When **Auto** is selected, paper is fed from the paper source where the paper that matches the paper settings (page size and media type) is loaded.

- **Page size**

Select the page size.

- **Type** (Media type)

Select the media type.

- **Print qlty** (Print quality)

Select print quality according to the photo.

- **Border** (Bordered/Borderless print)

Select bordered or borderless print.

- **Photo fix**

When **Auto photo fix** is selected, the scene or person's face of a shot photo is recognized and the most suitable correction for each photo is made automatically. It makes a darkened face by backlight brighter to print. It also analyzes a scene such as scenery, night scene, person, etc. and corrects each scene with the most suitable color, brightness, or contrasts automatically to print.

 **Note**

- As a default, photos on the memory card are printed with auto correction applied.
- If **No correction** is selected, photos are printed without correction.

- **Red-EyeCorrection**

Corrects red eyes in portraits caused by flash photography.

Depending on the type of the photo, red eyes may not be corrected or parts other than the eyes may be corrected.

- **Print date**

Activates/deactivates to print the date (shooting date) on a photo.

 **Note**

- The shooting date is printed according to the settings of **Date display format** in **Other printer settings** under **Printer settings**.

➔ [Other printer settings](#)

## Printing Hagaki and Envelopes

---

### For Windows

- [Printing on Postcards](#)
- [Setting Up Envelope Printing](#)

### For macOS

- [Printing on Postcards](#)

## Printing on Postcards

1. [Load postcard](#) on the printer

2. Open the [printer driver setup window](#)

3. Select commonly used settings

Display the **Basic Settings** tab, and for **Profiles**, select **Standard**.

4. Select the paper size

For **Printer Paper Size**, select **Hagaki 100x148mm** or **Hagaki 2 200x148mm**.

### ▶▶▶ Important

- Return postcards can be used only when you print them from the computer.
- When printing a return postcard, always set the paper size to **Hagaki 2 200x148mm** from your application software or the printer driver.
- Do not fold the return postcard. If a crease is formed, the printer will not be able to feed the postcard properly, and this condition will cause line shifts or a paper jam.
- With return postcards, automatic duplex printing and borderless printing cannot be used.

5. Select the media type

Select the Hagaki you want to use from **Hagaki** in **Media Type**.

### ▶▶▶ Important

- This printer cannot print on postcards that have photos or stickers attached.
- When you use the automatic duplex printing function to print a postcard, print the address side first and then print the message side.
- When printing on each side of a postcard separately, you will get cleaner printing if you print the message side first and then print the address side.
- The paper settings on the printer driver are different, depending on whether you are printing on the address side or the message side.  
For details about the paper information to be registered to the printer driver and on the printer, see the following:
  - [Paper Settings on the Printer Driver and the Printer \(Media Type\)](#)
  - [Paper Settings on the Printer Driver and the Printer \(Paper Size\)](#)
- When you use the automatic duplex printing function, register the paper information for the side to be printed first.

6. Set the print orientation

To print the address horizontally, set **Orientation** to **Landscape**.

7. Select the print quality

For **Quality**, select the quality according to your purpose.

**8. Click OK**

When you perform printing, the data will be printed onto the postcard.

## Printing on Postcards

---

This section describes the procedure for printing on postcards.

1. [Load postcards](#) in printer

2. Select paper size and paper type from the printer

Register **Hagaki** for paper size from the printer operation panel.

Also, register **Ink Jet Hagaki**, **Hagaki K**, or **Hagaki** for paper type, according to your purpose. When you print on the address side, register **Hagaki**.

3. Select **Paper Size** and **Media Type** from the print dialog

Select **Postcard** or **Postcard Borderless** for **Paper Size** from the print dialog. When you print on the address side, select **Postcard**.

Select the Hagaki you want to use for **Media Type** in **Media & Quality** from the print dialog.

**Important**

- This printer cannot print on postcards that have photos or stickers attached.

4. Set **Double-sided** to **Off**

**Important**

- Two-sided printing is not possible for postcards, so set **Double-sided** to **Off**. If you print with **Double-sided** set to **On**, the printing result may not be as you intended.
- You will get cleaner printing if you print the message side first and then print the address side.

5. Click **Print**

The printer prints according to the specified settings.

## Setting Up Envelope Printing

1. [Load envelope](#) on the printer

2. Open the [printer driver setup window](#)

3. Select the media type

Select **Envelope** from **Profiles** on the **Basic Settings** tab.

4. Select the paper size

When the **Envelope Size Setting** dialog box is displayed, select the envelope size you want to use, and then click **OK**.

5. Set the orientation

To print the addressee horizontally, select **Landscape** for **Orientation**.

### ▶▶▶ Note

- If **Envelope Com 10**, **Envelope DL**, **Yougata 4 4.13"x9.25"**, or **Yougata 6 3.86"x7.48"** is selected for **Printer Paper Size**, the printer rotates the paper 90 degrees to the left to print, regardless of the **Rotate 90 degrees left when orientation is [Landscape]** setting for **Custom Settings** in the [Maintenance tab](#).

6. Select the print quality

For **Quality**, select the quality according to your purpose.

7. Click **OK**

When you perform print, the information is printed on the envelope.

### ▶▶▶ Important

- When you perform envelope printing, guide messages are displayed. To hide the guide messages, check the **Do not show this message again** check box. To show the guide again, click the **View Printer Status** button on the **Maintenance** tab, and start the Canon IJ Status Monitor. Then click **Envelope Printing** from **Display Guide Message** of the **Option** menu to enable the setting.

## Other Various Printing Features

---

- ▶ **Disc Label Printing**
- ▶ **Printing Pattern Paper or Templates**

## Disc Label Printing

---

- Copying Label Side of Disc 📄 Basic
- Printing Photo from Memory Card onto Disc Label

## Copying Label Side of Disc

You can copy the label of an existing BD/DVD/CD and print it on a printable disc.

### ►► Important

- You cannot print on 3.15 in. (8 cm) printable discs.
- Do not mount the multi-purpose tray until the message prompting you to load the printable disc appears. Doing so can damage the printer.

#### 1. [Check that printer is turned on.](#)

#### 2. Select **Copy** on the HOME screen.

➔ [Using Touch Screen](#)

#### 3. Select **Disc label copy.**

#### 4. Check message and select **OK**.

The print area setting screen is displayed.

#### 5. Specify print area and select **OK**.

A: Specify the outer circle.

B: Specify the inner circle.

### ►► Note

- Measure the outer and inner diameters of the printing surface of the printable disc and make sure you set a value smaller than the measured value for the outer diameter, and a value larger than the measured value for the inner diameter.
- For information on printable discs, contact their manufacturers.

#### 6. Specify the amount of ink.

If the print result is blurry, select **Bleed-proof**. Blurring may be reduced by printing with less ink.

7. Follow on-screen instructions to load copy source BD/DVD/CD on platen and select **OK**.

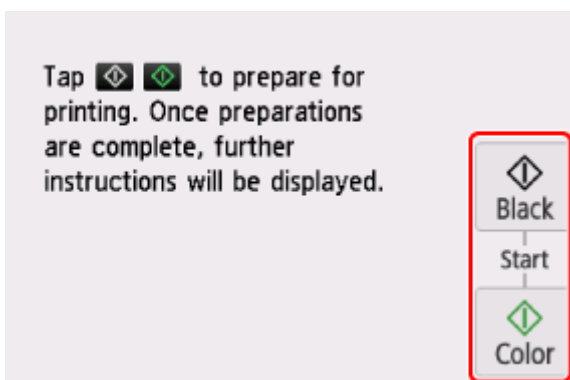

The print setting confirmation screen is displayed.

**»»» Important**

- Be sure to load the copy source BD/DVD/CD with its label side down on the center of the platen. If you load it near the edge of the platen, part of the image may be cut off.

8. After checking message, tap **Black** or **Color**.

9. Open operation panel until horizontal.

10. Follow on-screen instructions to [set printable disc](#).

**»»» Note**

- You can see the procedure to set the printable disc by selecting **How to set**.

11. Select **OK**.

The printer starts copying.

**»»» Note**

- After printing, allow the printing surface of the disc to dry naturally. Do not use hairdryers or expose the disc to direct sunlight to dry the ink. Do not touch the printing surface until the ink has dried.
- If printing is misaligned, adjust the printing position using **Adjust disc print area** in **Print settings** under **Printer settings**.

➡ [Print settings](#)

## Printing Photo from Memory Card onto Disc Label

You can print a photograph saved on a memory card onto the disc label of the printable disc.

### ▶▶▶ Important

- You cannot print on 3.15 in. (8 cm) printable discs.
- Do not mount the multi-purpose tray until the message prompting you to load the printable disc appears. Doing so can damage the printer.

#### 1. [Check that printer is turned on.](#)

#### 2. Select **Print** on the HOME screen.

➔ [Using Touch Screen](#)

#### 3. Select **Print from memory card.**

The memory card print menus are displayed.

#### 4. Select **Print photos on disc label.**

#### 5. [Insert memory card into card slot.](#)

### ▶▶▶ Note

- When you insert the memory card before you displays the memory card print menus, the photo selection screen in **Select photo print** is displayed.
- If no printable photo data is saved on the memory card, **Saved data is not of a supported type.** is displayed on the touch screen.
- If more than 2,000 photo data are saved on the memory card, the photo data is split by group per 2,000 photos in reverse chronological order (date last modified) automatically. Check the message displayed on the touch screen and select **OK**.

#### 6. Check message and select **OK**.

The print area setting screen is displayed.

#### 7. Specify print area and select **OK**.

A: Specify the outer circle.

B: Specify the inner circle.

**▶▶▶ Note**

- Measure the outer and inner diameters of the printing surface of the printable disc and make sure you set a value smaller than the measured value for the outer diameter, and a value larger than the measured value for the inner diameter.
- For information on printable discs, contact their manufacturers.

**8. Specify the amount of ink.**

If the print result is blurry, select **Bleed-proof**. Blurring may be reduced by printing with less ink.

**9. Select a photo you want to print.**

**▶▶▶ Note**

- Other Options
  - ➔ Using Useful Display Functions

**10. Specify print area with trimming and select **OK**.**

C: Drag to position the trimming frame.

D: Drag to set the trimming frame size.

**11. Check message and tap **Color**.**

12. Open operation panel until horizontal.

13. Follow on-screen instructions to [set printable disc](#).

▶▶▶ **Note**

- You can see the procedure to set the printable disc by selecting **How to set**.

14. Select **OK**.

The printer starts printing.

▶▶▶ **Note**

- After printing, allow the printing surface of the disc to dry naturally. Do not use hairdryers or expose the disc to direct sunlight to dry the ink. Do not touch the printing surface until the ink has dried.
- If printing is misaligned, adjust the printing position using **Adjust disc print area** in **Print settings** under **Printer settings**.
  - ➔ [Print settings](#)

## Paper Settings

By registering the paper size and the media type, the message is displayed before printing starts when the paper size or the media type of the loaded paper differs from the paper settings.

### After loading paper

- When the rear tray's feed slot cover is closed

The screen to register the rear tray paper information is displayed.

If the page size on the touch screen matches the size of the paper loaded in the rear tray, select **Yes**.  
If not, select **Change** to change the setting in accordance with the size of the loaded paper.

### ▶▶▶ Note

- See [Detect paper width](#) when you want to hide the screen for confirming the setting of paper.

- When you insert the cassette

Paper size is detected and set automatically in the printer.

### ▶▶▶ Note

- For more on the proper combination of paper settings you can specify by the printer driver (Windows) or on the touch screen:
  - ➔ [Paper Settings on the Printer Driver and the Printer \(Media Type\)](#)
  - ➔ [Paper Settings on the Printer Driver and the Printer \(Paper Size\)](#)

## When the paper settings for printing/copying are different from the paper information registered to the printer

Ex:

- Paper settings for printing/copying: A5
- Paper information registered to the printer: A4

When you start printing/copying, a message is displayed.

Check the message and select **Next**, and then choose one of the following.

**Print with the loaded paper.**

Select if you want to print/copy on the paper loaded without changing the paper settings.

For example, when the paper setting for printing/copying is A5 and the paper information registered to the printer is A4, the printer starts printing/copying on the paper loaded in the rear tray or in the cassette without changing the paper size setting for printing/copying.

**Replace the paper and print**

Select if you want to print after replacing the paper of the rear tray or the cassette.

For example, when the paper size setting for printing/copying is A5 and the paper information registered to the printer is A4, you load A5 sized paper in the rear tray or in the cassette before you start printing/copying.

The paper information registration screen is displayed after replacing the paper. Register the paper information according to the paper that you loaded.

**Cancel print**

Cancels printing.

Select when you change the paper settings specified for printing/copying. Change the paper settings and try printing/copying again.

## Copying

---

- ▶ **Making Copies**
- ▶ **Reducing/Enlarging Copies**
- ▶ **Two-Sided Copying**
- ▶ **Special Copy Menu**

## Making Copies

This section describes the basic procedure to perform standard copying.

1. [Check that printer is turned on.](#)

2. [Load paper.](#)

3. Select  **Copy** on the HOME screen.

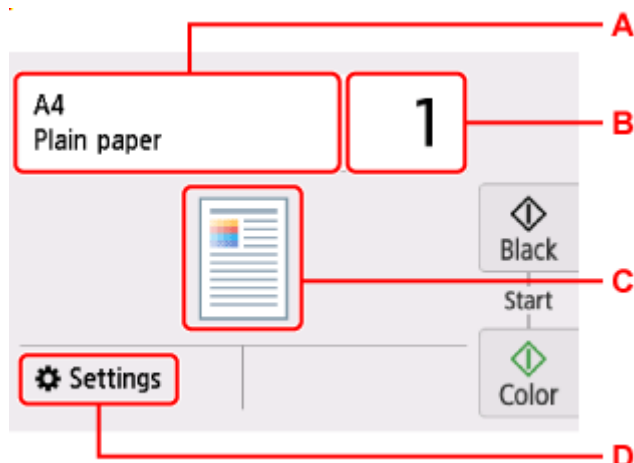

➔ [Using Touch Screen](#)

4. Select  **Standard copy.**

The Copy standby screen is displayed.

5. [Load original on platen.](#)

6. Specify settings as necessary.

A: Specify the page size and the media type.

B: Specify the number of copies.

C: The copy layout is displayed.

Switch the layout from  (one-sided),  (2-on-1),  (two-sided).

D: Display the print setting items.

For more on the setting items:

➔ [Setting Items for Copying](#)

## 7. Tap **Black** or **Color**.

The printer starts copying.

Remove the original on the platen after copying is complete.

### ▶▶▶ Important

- Do not open the document cover or remove the original from the platen until scanning is completed.

## Adding Copying Job (Reserve copy)

You can add the copying job while printing (Reserve copy).

The message is displayed when you can add the copying job.

Load the original on the platen and tap the same button (**Color** or **Black**) as the one which you previously tapped.

### ▶▶▶ Note

- When **Print qlty** (print quality) is set **High**, you cannot add the copying job.

- If you tap **Stop** while reserve copying is in progress, the screen to select the method to cancel copying is displayed. If you select **Cancel all reservations**, you can cancel copying all scanned data. If you select **Cancel the last reservation**, you can cancel the last copying job.
- If you set a document of too many pages to add the copying job, **Cannot add more copy jobs. Please wait a while and try again.** may appear on the touch screen. Select **OK** and wait a while, and then try copying again.
- If **Failed to reserve the copy job. Start over from the beginning.** appears on the touch screen when scanning, select **OK** and tap **Stop** to cancel copying. After that, copy the documents that have not been finished copying.

## Setting Items for Copying

You can change the copy settings such as magnification and intensity.

### Print Settings Screen

#### ▶▶▶ Note

- For more on the print settings screen or the setting item for **Photo copy**, see Copying Photos.

The print settings screen is displayed by selecting **Settings** in the Copy standby screen.

### Preview

When **Preview** is displayed on the print settings screen, selecting **Preview** allows you to preview an image of the printout on the preview screen.

For details, see below.

➔ Displaying Preview Screen

### Setting Items

Flick to display setting items and select the setting item to display the settings. Select to specify the setting.

Following setting items can be changed.

- **Intensity**

Specify the intensity.

A: Select to activate/deactivate automatic intensity adjustment.

When **ON** is selected, the intensity is adjusted automatically according to the originals loaded on the platen.

B: Drag to specify the intensity.

- **Magnif.**

Specify the reduction/enlargement method.

➔ Reducing/Enlarging Copies

- **Paper src**

Select a paper source.

### ➤➤➤ Note

- When **Auto** is selected, paper is fed from the paper source where the paper that matches the paper settings (page size and media type) is loaded.

- **Page size**

Select the page size.

- **Type**

Select the media type.

- **Print qlty**

Specify the print quality.

### ➤➤➤ Important

- Select **High** for **Print qlty** to copy in grayscale. Grayscale renders tones in a range of grays instead of black or white.

- **Layout**

Select the layout.

- ➔ Copying Two Pages onto Single Page
- ➔ Copying Four Pages onto Single Page

- **2-sidedPrintSetting**

Select whether to perform two-sided copying.

➔ Two-Sided Copying

## Scanning

- Scanning Easily (Auto Scan)
- Scanning Documents and Photos
- Creating/Editing PDF Files
  - Setting Passwords for PDF Files
  - Editing Password-Protected PDF Files

### ► Scanning Using Application Software (ScanGear)

### ► Scanning Tips

- Positioning Originals (Scanning from Computer)
- Network Scan Settings
  - Network Scanner Selector EX2 Menu and Setting Screen

### ►► Important

- Available functions and settings vary depending on your scanner or printer.

## Scanning According to Item Type or Purpose (Scan Utility)

---

- ▶ **Scan Utility Features**
- ▶ **Scanning Easily (Auto Scan)**
- ▶ **Scanning Documents and Photos**
- ▶ **Creating/Editing PDF Files**
  - Setting Passwords for PDF Files
  - Editing Password-Protected PDF Files

### ▶▶ Important

- Available functions and settings vary depending on your scanner or printer.

## Scan Utility Features

Use Scan Utility to scan and save documents, photos, or other items at one time by simply clicking the corresponding icon.

### ▶▶▶ Important

- Available functions, the displayed items, and available settings vary depending on your model.

## Multiple Scanning Modes

**Auto** allows for one click scanning with default settings for various items. **Document** will sharpen text in a document or magazine for better readability, and **Photo** is best suited for scanning photos.

### ▶▶▶ Note

- For details on the Scan Utility main screen, see Scan Utility Main Screen.

## Save Scanned Images Automatically

Scanned images are automatically saved to a preset folder. The folder can be changed as needed.

### ▶▶▶ Note

- The default save folders are as follows.
  - **Windows 11/Windows 10/Windows 8.1:**  
**Documents** folder
  - **Windows 7:**  
**My Documents** folder
- To change folder, see Settings Dialog Box.

## Application Integration

Scanned images can be sent to other applications. For example, display scanned images in your favorite graphics application, attach them to e-mails, or extract text from images.

## ➤➤➤ Note

- To set the applications to integrate with, see Settings Dialog Box.

## Scanning Easily (Auto Scan)

Auto Scan allows for automatic detection of the type of the item placed on the platen or ADF (Auto Document Feeder).

### »» Important

- This function is not supported depending on your model.
- The following types of items may not be scanned correctly. In that case, adjust the cropping frames (scan areas) in whole image view of ScanGear (scanner driver), and then scan again.
  - Photos with a whitish background
  - Items printed on white paper, hand-written text, business cards, and other unclear items
  - Thin items
  - Thick items
- When scanning two or more documents from the ADF, place documents of the same size.

1. Make sure scanner or printer is turned on.

2. Place items on platen or ADF.

➔ [Positioning Originals \(Scanning from Computer\)](#)

3. Start Scan Utility.

4. Click  **Auto** in the Scan Utility main screen.

Scanning starts.

### »» Note

- To cancel the scan, click **Cancel**.
- Use the Settings (Scanning from a Computer) dialog box displayed by clicking  **Settings...** to set where to save the scanned images and to make advanced scan settings.
- To scan a specific item type, see the following pages.
  - ➔ [Scanning Documents and Photos](#)
  - ➔ Scanning with Favorite Settings
  - ➔ Scanning Multiple Documents at One Time from the ADF (Auto Document Feeder)

## Scanning Documents and Photos

Scan items placed on the platen with settings suitable for documents or photos.

Save documents in formats such as PDF and JPEG, and photos in formats such as JPEG and TIFF.

1. Place the item on the platen.

➔ [Positioning Originals \(Scanning from Computer\)](#)

2. Start Scan Utility.

3. To specify the paper size, resolution, PDF settings, etc., click  **Settings...**, and then set each item in the Settings (Scanning from a Computer) dialog box.

### ▶▶▶ Note

- Once settings are made in the Settings dialog box, the same settings can be used for scanning from the next time.
- In the Settings dialog box, specify image processing settings such as slant correction and outline emphasis, set the destination of the scanned images, and more, as needed.

When setting is completed, click **OK**.

4. Click  **Document** or  **Photo** in the Scan Utility main screen.

Scanning starts.

### ▶▶▶ Note

- To cancel the scan, click **Cancel**.

## Creating/Editing PDF Files

You can create PDF files by scanning items placed on the platen or ADF (Auto Document Feeder). Add, delete, rearrange pages or make other edits in the created PDF files.

### ▶▶▶ Important

- You can create or edit up to 100 pages of a PDF file at one time.
- Only PDF files created or edited in Scan Utility or IJ PDF Editor are supported. PDF files created or edited in other applications are not supported.

### ▶▶▶ Note

- You can also create PDF files from images saved on a computer.
- Selectable file formats are PDF, JPEG, TIFF, and PNG.
- Images whose number of pixels in the vertical or horizontal direction is 10501 or more cannot be used.
- When you select a password-protected PDF file, you must enter the password.

➔ Editing Password-Protected PDF Files

1. Place items on platen or ADF.

2. Start Scan Utility.

3. Click  **PDF Editor** in the Scan Utility main screen.

IJ PDF Editor starts.

4. To specify the paper size, resolution, and other settings, click **Settings...** from the **File** menu, and then set each item in the Settings (Scanning from a Computer) dialog box.

### ▶▶▶ Note

- Once settings are made in the Settings dialog box, the same settings can be used for scanning from the next time.
- In the Settings dialog box, specify image processing settings such as slant correction and outline emphasis.

When setting is completed, click **OK**.

5. Click  (Scan) on Toolbar.

Scanning starts.

### ▶▶▶ Note

- To open a file saved on the computer, click **Open...** from the **File** menu, and then select the file you want to edit.
- You can switch the view with the Toolbar buttons. For details, see PDF Edit Screen.

## 6. Add pages as needed.

### When scanning and adding more items:

Place items, and then click  (Scan) on the Toolbar.

### When adding existing images or PDF files:

Click  (Add Page) on the Toolbar. After the **Open** dialog box appears, select the image(s) or PDF file(s) you want to add, and then click **Open**.

### »»» Note

- You can also add images or PDF files from **Add Page from Saved Data...** in the **File** menu.

## 7. Edit pages as needed.

### When changing page order:

Click the page you want to move, and then click  (Page Up) or  (Page Down) on the Toolbar to change the page order. You can also change the page order by dragging and dropping a page to the target location.

### When deleting pages:

Click the page you want to delete, and then click  (Delete Page) on the Toolbar.

### »»» Note

- These buttons appear when two or more pages have been created.

## 8. Select **Save As...** in **File** menu.

The **Save** dialog box appears.

## 9. Specify save settings.

### »»» Important

- The following items cannot be set for images whose resolution is outside the range of 75 dpi to 600 dpi or whose number of pixels in the vertical or horizontal direction is between 10201 pixels and 10500 pixels.
  - **PDF Compression**
  - **Create a PDF file that supports keyword search**
  - **Correct slanted text originals**
  - **Detect the orientation of text original and rotate image**

### File Name

Enter a file name for the PDF file to be saved. When two or more pages have been created and you are saving each page separately, a sequential number is appended to the file names.

### Save in

Set the folder in which to save PDF files. To change the folder, click **Browse...**, and then specify the destination folder.

### Save to a subfolder with current date

Select this checkbox to create a current date folder in the folder specified in **Save in** and save created or edited PDF files in it. The folder will be created with a name such as "20XX\_01\_01" (Year\_Month\_Date).

If this checkbox is not selected, files are saved directly in the folder specified in **Save in**.

### File Type

Select the file format for saving PDF files.

#### PDF

Save each page as a separate PDF file.

#### PDF (Multiple Pages)

Save multiple pages in one PDF file.

#### ▶▶▶ Note

- **PDF (Multiple Pages)** appears when two or more pages have been created.

### PDF Compression

Select the compression type for saving.

#### Standard

It is recommended that you normally select this setting.

#### High

Compresses the file size when saving. This will reduce the load on your network and server.

#### ▶▶▶ Important

- If you save PDF files with high compression repeatedly, images may degrade.

### Create a PDF file that supports keyword search

Select this checkbox to convert text in images into text data and create PDF files that support keyword search.

### Correct slanted text originals

Select this checkbox to detect the document orientation based on the text in images and correct the angle (within the range of -0.1 to -10 degrees or +0.1 to +10 degrees) for creating PDF files.

#### ▶▶▶ Important

- The following types of image may not be corrected properly since the text cannot be detected correctly.
  - Images in which the text lines are inclined more than 10 degrees or the angles vary by line
  - Images containing both vertical and horizontal text
  - Images with extremely large or small fonts
  - Images with small amount of text
  - Images containing figures/images
  - Hand-written images

### Detect the orientation of text original and rotate image

Select this checkbox to detect the page orientation based on the text in images and automatically rotate the images to the correct orientation for creating PDF files.

#### »» Important

- This function is available only for images (text documents) containing languages that can be selected from **Document Language** in the **Settings (General Settings)** dialog box of Scan Utility. This function is not available depending on the language in the image.
- The page orientation of the following types of image may not be detected since the text cannot be detected correctly.
  - Images with small amount of text
  - Images containing text whose font size is outside the range of 8 points to 48 points
  - Images containing special fonts, effects, italics, or hand-written text
  - Images with patterned backgrounds

### Set up password security

Select this checkbox to display the **Password Security Settings** dialog box for setting a password for opening the created PDF file or a password for printing/editing it.

#### »» Important

- When a password-protected PDF file is edited, the passwords will be deleted. Reset the passwords.
  - ➔ Setting Passwords for PDF Files

## 10. Click **Save**.

The PDF file is saved.

#### »» Note

- When a password-protected PDF file is edited, the passwords will be deleted. Reset the passwords in the **Save** dialog box.
  - ➔ Setting Passwords for PDF Files
- To overwrite a saved file, click  (Save) on the Toolbar.

## Scanning Using Application Software (ScanGear)

---

- [What Is ScanGear \(Scanner Driver\)?](#)
- [Starting ScanGear \(Scanner Driver\)](#)
- [Scanning in Basic Mode](#)
- [ScanGear \(Scanner Driver\) Screens](#)
- [General Notes \(Scanner Driver\)](#)

### ➤➤ Important

- Available functions and settings vary depending on your scanner or printer.

## What Is ScanGear (Scanner Driver)?

ScanGear (scanner driver) is software required for scanning documents. Use the software to specify the output size, image corrections, and other settings.

ScanGear can be started from Scan Utility or applications that are compatible with the standard TWAIN interface. (ScanGear is a TWAIN-compatible driver.)

### Features

Specify the document type, output size, and other settings when scanning documents and preview scan results. Make various correction settings or finely adjust the brightness, contrast, and other parameters to scan in a specific color tone.

### Screens

There are two modes: Basic Mode and Advanced Mode.

Switch modes with the tabs on the upper right of the screen.

### Note

- ScanGear starts in the last used mode.
- Settings are not retained when you switch modes.

### Basic Mode

Use the **Basic Mode** tab to scan easily by following three simple on-screen steps ( **1** , **2** , and **3** ).

## Advanced Mode

Use the **Advanced Mode** tab to scan by specifying the color mode, output resolution, image brightness, color tone, and other settings.

## Starting ScanGear (Scanner Driver)

Use ScanGear (scanner driver) to make image corrections and color adjustments when scanning. Start ScanGear from Scan Utility or other applications.

### ▶▶▶ Note

- If you have more than one scanner or have a network compatible model and changed the connection from USB connection to network connection, set up the network environment.

## Starting from Scan Utility

1. Start Scan Utility.  
For how to start it, see Starting Scan Utility.
2. In Scan Utility main screen, click ScanGear.  
The ScanGear screen appears.

## Starting from Application

The procedure varies depending on the application. For details, see the application's manual.

1. Start application.
2. On application's menu, select machine.

### ▶▶▶ Note

- A machine connected over a network, will have "Network" displayed after the product name.

3. Scan document.  
The ScanGear screen appears.

## Scanning in Basic Mode

Use the **Basic Mode** tab to scan easily by following these simple on-screen steps.

To scan multiple documents at one time from the Platen, see [Scanning Multiple Documents at One Time with ScanGear \(Scanner Driver\)](#).

When scanning from the ADF (Auto Document Feeder), preview is not available.

### »» Important

- The following types of documents may not be scanned correctly. In that case, click  (Thumbnail) on the Toolbar to switch to whole image view and scan.
  - Photos with a whitish background
  - Documents printed on white paper, hand-written text, business cards, and other unclear documents
  - Thin documents
  - Thick documents
- The following types of documents cannot be scanned correctly.
  - Documents smaller than 1.2 inches (3 cm) square
  - Photos that have been cut to irregular shapes

### »» Note

- Both sides of a two sided document can be scanned simultaneously on models with ADF duplex scanning support.

1. Place document on machine's Platen or ADF, and then start ScanGear (scanner driver).

- ➔ Positioning Originals (Scanning from Computer)
- ➔ [Starting ScanGear \(Scanner Driver\)](#)

2. Set **Select Source** to match your document.

### ▶▶▶ Important

- Some applications do not support continuous scanning from the ADF. For details, see the application's manual.

### ▶▶▶ Note

- To scan magazines containing many color photos, select **Magazine (Color)**.

### 3. Click **Preview**.

Preview image appears in the Preview area.

### ▶▶▶ Important

- **Preview** is not available when scanning from the ADF.

### ▶▶▶ Note

- Colors are adjusted based on the document type selected in **Select Source**.

### 4. Set **Destination**.

### ▶▶▶ Note

- Skip ahead to Step 7 if an ADF option is selected in **Select Source**.

### 5. Set **Output Size**.

Output size options vary with the selected **Destination**.

### 6. Adjust cropping frames (scan areas) as needed.

Adjust the size and position of the cropping frames on the preview image.

- ➔ Adjusting Cropping Frames (ScanGear)

7. Set **Image corrections** as needed.

8. Click **Scan**.

Scanning starts.

### ▶▶▶ Note

- Click  (Information) to display a dialog box showing the document type and other details of the current scan settings.
- How ScanGear behaves after scanning is complete can be set from **Status of ScanGear dialog after scanning** on the **Scan** tab of the **Preferences** dialog box.

## ScanGear (Scanner Driver) Screens

---

- **Basic Mode Tab**
- **Advanced Mode Tab**
- **Preferences Dialog Box**

## Basic Mode Tab

Use the **Basic Mode** tab to scan easily by following these simple on-screen steps.

This section describes the settings and functions available on the **Basic Mode** tab.

- ➔ [\(1\) Settings and Operation Buttons](#)
- ➔ [\(2\) Toolbar](#)
- ➔ [\(3\) Preview Area](#)

### ➤➤➤ Note

- The displayed items vary by document type and view.
- Preview is not available when scanning from the ADF (Auto Document Feeder).

## (1) Settings and Operation Buttons

### Select Source

#### Photo (Color)

Scan color photos.

#### Magazine (Color)

Scan color magazines.

#### Document (Color)

Scan documents in color.

#### Document (Grayscale)

Scan documents in black and white.

#### Document (Color) ADF Simplex

Scan documents from the ADF in color.

#### Document (Grayscale) ADF Simplex

Scan documents from the ADF in black and white.

### Document (Color) ADF Duplex (only for models supporting ADF duplex scanning)

Scan both sides of documents from the ADF in color.

### Document (Grayscale) ADF Duplex (only for models supporting ADF duplex scanning)

Scan both sides of documents from the ADF in black and white.

### Important

- Some applications do not support continuous scanning from the ADF. For details, see the application's manual.

### Note

- When you select a document type, the unsharp mask function will be active.
- When you select an option other than the ADF types, the image adjustment function which adjusts images based on the document type will also be active.
- When you select **Magazine (Color)**, the descreen function will be active.

## Display Preview Image

### Preview

Performs a trial scan.

### Note

- When using the machine for the first time, scanner calibration starts automatically. Wait a while until the preview image appears.

### Destination

Select what you want to do with the scanned image.

### Print

Select this to print the scanned image on a printer.

### Image display

Select this to view the scanned image on a monitor.

### OCR

Select this to use the scanned image with OCR software.

"OCR software" is software that converts text scanned as an image into text data that can be edited in word processors and other programs.

## Output Size

Select an output size.

Output size options vary by the item selected in **Destination**.

### Flexible

Adjust the cropping frames (scan areas) freely.

#### In thumbnail view:

Drag the mouse over a thumbnail to display a cropping frame. When a cropping frame is displayed, the portion within the cropping frame will be scanned. When no cropping frame is displayed, each frame is scanned individually.

#### In whole image view:

When no cropping frame is displayed, the entire Preview area will be scanned. When a cropping frame is displayed, the portion within the cropping frame will be scanned.

### Paper Size (such as L or A4)

Select an output paper size. The portion within the cropping frame will be scanned at the size of the selected paper size. Drag the cropping frame to enlarge/reduce it while maintaining the aspect ratio.

### Monitor Size (such as 1024 x 768 pixels)

Select an output size in pixels. A cropping frame of the selected monitor size will appear and the portion within the cropping frame will be scanned. Drag the cropping frame to enlarge/reduce it while maintaining the aspect ratio.

### Add/Delete...

Displays the **Add/Delete the Output Size** dialog box for specifying custom output sizes. This option can be selected when **Destination** is **Print** or **Image display**.

In the **Add/Delete the Output Size** dialog box, multiple output sizes can be specified and then saved at one time. Saved items will be registered to the **Output Size** list and can be selected, along with the predefined items.

#### Adding:

Enter **Output Size Name**, **Width**, and **Height**, and then click **Add**. For **Unit**, select **inches** or **mm** if **Destination** is **Print**; if it is **Image display**, only **pixels** can be selected. The name of the added size appears in **Output Size List**. Click **Save** to save the items listed in **Output Size List**.

### Deleting:

Select the output size you want to delete in **Output Size List**, and then click **Delete**. Click **Save** to save the items listed in **Output Size List**.

### ►►► Important

- Predefined output sizes such as **A4** and **1024 x 768 pixels** cannot be deleted.

### ►►► Note

- Save up to 10 items.
- An error message appears when you enter a value outside the setting range. Enter a value within the setting range.

### ►►► Note

- For details on whether or how the cropping frame initially appears on a preview image, see **Cropping Frame on Previewed Images** in **Preview** tab of **Preferences** Dialog Box.

### Invert aspect ratio

Available when **Output Size** is set to anything but **Flexible**.

Click this button to rotate the cropping frame. Click again to return it to the original orientation.

### Adjust cropping frames

Adjust the scan area within the Preview area.

If an area is not specified, the document will be scanned at the document size (Auto Crop). If an area is specified, only the portion in the cropping frame will be scanned.

- ➔ Adjusting Cropping Frames (ScanGear)

### Image corrections

Correct the image to be scanned.

### ►►► Important

- **Apply Auto Document Fix** and **Correct fading** are available when **Recommended** is selected on the **Color Settings** tab of the **Preferences** dialog box.

### ►►► Note

- Available functions vary by the document type selected in **Select Source**.

### Apply Auto Document Fix

Sharpens text in a document or magazine for better readability.

### ►►► Important

- Scanning may take longer than usual when this checkbox is selected.
- The color tone may change from the source image due to corrections. In that case, deselect the checkbox and scan.
- Correction may not be applied properly if the scan area is too small.

### Correct fading

Corrects photos that have faded with time or have a colorcast.

### Correct gutter shadow

Corrects shadows that appear between pages when scanning open booklets.

#### ►►► Important

- Be sure to see **Gutter Shadow Correction** for precautions and other information on using this function.

### Color Pattern...

Adjust the image's overall color. Correct colors that have faded due to colorcast or other reasons and reproduce natural colors while previewing color changes.

➔ Adjusting Colors Using a Color Pattern

#### ►►► Important

- This setting is not available when **Color Matching** is selected on the **Color Settings** tab of the **Preferences** dialog box.

### Scan Image

#### Scan

Starts scanning.

#### ►►► Note

- When scanning starts, the progress appears. To cancel the scan, click **Cancel**.

### Preferences...

Displays the **Preferences** dialog box for making scan/preview settings.

### Close

Closes ScanGear (scanner driver).

## (2) Toolbar

Adjust or rotate preview images. The buttons displayed on the Toolbar vary by view.

#### In thumbnail view:

#### In whole image view:

Switches the view in the Preview area.

➔ [\(3\) Preview Area](#)

Rotates the preview image 90 degrees counter-clockwise.

- The result will be reflected in the scanned image.

- The image returns to its original state when you preview again.

#### **(Rotate Right)**

Rotates the preview image 90 degrees clockwise.

- The result will be reflected in the scanned image.
- The image returns to its original state when you preview again.

#### **(Auto Crop)**

Displays and adjusts the cropping frame automatically to the size of the document displayed in the Preview area. The scan area is reduced every time you click this button if there are croppable areas within the cropping frame.

#### **(Check All Frames)**

Available when two or more frames are displayed.

Selects the checkboxes of the images in thumbnail view.

#### **(Uncheck All Frames)**

Available when two or more frames are displayed.

Deselects the checkboxes of the images in thumbnail view.

#### **(Select All Frames)**

Available when two or more frames are displayed.

Selects the images in thumbnail view and outlines them in blue.

#### **(Select All Cropping Frames)**

Available when two or more cropping frames are specified.

Turns the cropping frames into thick broken lines and applies the settings to all of them.

#### **(Remove Cropping Frame)**

Removes the selected cropping frame.

#### **(Information)**

Displays the version of ScanGear, along with the document type and other details of the current scan settings.

#### **(Open Guide)**

Opens this page.

## **(3) Preview Area**

This is where a trial image appears after you click **Preview**. The results of image corrections, color adjustments, and other settings made in [\(1\) Settings and Operation Buttons](#) are also reflected.

When  (Thumbnail) is displayed on Toolbar:

Cropping frames are specified according to the document size, and thumbnails of scanned images appear. Only the images with the checkbox selected will be scanned.

►► Note

- When multiple images are previewed, different outlines indicate different selection status.
  - Focus Frame (thick blue outline): The displayed settings will be applied.
  - Selected Frame (thin blue outline): The settings will be applied to the Focus Frame and Selected Frames simultaneously. To select multiple images, click them while pressing the Ctrl key.
  - Unselected (no outline): The settings will not be applied.
- Double-click a frame to enlarge the image. Click   (Frame Advance) at the bottom of the screen to display the previous or next frame. Double-click the enlarged frame again to return it to its original state.

When  (Whole Image) is displayed on Toolbar:

Items on the Platen are scanned and appear as a single image. All portions in the cropping frames will be scanned.

## ▶▶ Note

- Create cropping frame(s) on the displayed image. In thumbnail view, one cropping frame can be created per image. In whole image view, multiple cropping frames can be created.
  - ➔ [Adjusting Cropping Frames \(ScanGear\)](#)

## Related Topic

- ➔ [Scanning in Basic Mode](#)

## Advanced Mode Tab

This mode allows you to make advanced scan settings such as the color mode, output resolution, image brightness, and color tone.

This section describes the settings and functions available on the **Advanced Mode** tab.

- ➔ (1) [Settings and Operation Buttons](#)
- ➔ (2) [Toolbar](#)
- ➔ (3) [Preview Area](#)

### ►►► Important

- The displayed items vary depending on your model, document type, and view.
- The preview function is not available when scanning from the ADF (Auto Document Feeder).

## (1) Settings and Operation Buttons

### Favorite Settings

You can name and save a group of settings (Input Settings, Output Settings, Image Settings, and Color Adjustment Buttons) on the **Advanced Mode** tab, and load it as required. It is convenient to save a group of settings if you will be using it repeatedly. You can also use this to reload the default settings.

Select **Add/Delete...** from the pull-down menu to open the **Add/Delete Favorite Settings** dialog box.

Enter **Setting Name** and click **Add**; the name appears in **Favorite Settings List**.

When you click **Save**, the item appears in the **Favorite Settings** list and can be selected, along with the predefined items.

To delete an item, select it in **Favorite Settings List** and click **Delete**. Click **Save** to save the settings displayed in **Favorite Settings List**.

### ▶▶▶ Note

- You can set **Add/Delete...** in **Favorite Settings** after preview.
- Save up to 10 items.

### Input Settings

Specify the input settings such as the document type and size.

### Output Settings

Specify the output settings such as the output resolution and size.

### Image Settings

Enable/disable various image correction functions.

### Color Adjustment Buttons

Fine corrections to the image brightness and color tones can be made including adjustments to the image's overall brightness or contrast and adjustments to its highlight and shadow values (histogram) or balance (tone curve).

### Zoom

Zooms in on a frame, or zooms in on the image in the area specified with a cropping frame (scan area). When zoomed in, **Zoom** changes to **Undo**. Click **Undo** to return the display to its non-magnified state.

#### In thumbnail view:

When multiple images are displayed in thumbnail view, clicking this button zooms in on the selected frame. Click  (Frame Advance) at the bottom of the screen to display the previous or next frame.

### ▶▶▶ Note

- You can also zoom in on an image by double-clicking the frame. Double-click the enlarged frame again to return it to its original state.

#### In whole image view:

Rescans the image in the area specified with a cropping frame at higher magnification.

## ►►► Note

- **Zoom** rescans the document and displays high-resolution image in Preview.
-  (Enlarge/Reduce) on the Toolbar zooms in on the preview image quickly. However, the resolution of the displayed image will be low.

## Preview

Performs a trial scan.

## Scan

Starts scanning.

## ►►► Note

- When scanning starts, the progress appears. To cancel the scan, click **Cancel**.
- When scanning is completed, a dialog box prompting you to select the next action may appear. Follow the prompt to complete. For details, see **Status of ScanGear dialog after scanning** in **Scan** tab of **Preferences** dialog box.
- It will take time to process the images if the total size of the scanned images exceeds a certain size. In that case, a warning message appears; it is recommended that you reduce the total size. To continue, scan in whole image view.

## Preferences...

Displays the **Preferences** dialog box for making scan/preview settings.

## Close

Closes ScanGear (scanner driver).

## (2) Toolbar

Adjust or rotate preview images. The buttons displayed on the Toolbar vary by view.

**In thumbnail view:**

**In whole image view:**

(Thumbnail) / (Whole Image)  
Switches the view in the Preview area.

➔ [\(3\) Preview Area](#)

**(Clear)**

Deletes the preview image from the Preview area.

It also resets the Toolbar and color adjustment settings.

**(Crop)**

Allows you to specify the scan area by dragging the mouse.

**(Move Image)**

Allows you to drag the image until the part you want to see is displayed when an image enlarged in the Preview area does not fit in the screen. You can also move the image using the scroll bars.

**(Enlarge/Reduce)**

Allows you to zoom in on the Preview area by clicking the image. Right-click the image to zoom out.

**(Rotate Left)**

Rotates the preview image 90 degrees counter-clockwise.

- The result will be reflected in the scanned image.
- The image returns to its original state when you preview again.

**(Rotate Right)**

Rotates the preview image 90 degrees clockwise.

- The result will be reflected in the scanned image.
- The image returns to its original state when you preview again.

**(Auto Crop)**

Displays and adjusts the cropping frame automatically to the size of the document displayed in the Preview area. The scan area is reduced every time you click this button if there are croppable areas within the cropping frame.

**(Check All Frames)**

Available when two or more frames are displayed.

Selects the checkboxes of the images in thumbnail view.

#### (Uncheck All Frames)

Available when two or more frames are displayed.

Deselects the checkboxes of the images in thumbnail view.

#### (Select All Frames)

Available when two or more frames are displayed.

Selects the images in thumbnail view and outlines them in blue.

#### (Select All Cropping Frames)

Available when two or more cropping frames are specified.

Turns the cropping frames into thick broken lines and applies the settings to all of them.

#### (Remove Cropping Frame)

Removes the selected cropping frame.

#### (Information)

Displays the version of ScanGear, along with the document type and other details of the current scan settings.

#### (Open Guide)

Opens this page.

## (3) Preview Area

This is where a trial image appears after you click **Preview**. The results of image corrections, color adjustments, and other settings made in [\(1\) Settings and Operation Buttons](#) are also reflected.

When  (Thumbnail) is displayed on Toolbar:

Cropping frames are specified according to the document size, and thumbnails of scanned images appear. Only the images with the checkbox selected will be scanned.

## ►► Note

- When multiple images are previewed, different outlines indicate different selection status.
  - Focus Frame (thick blue outline): The displayed settings will be applied.
  - Selected Frame (thin blue outline): The settings will be applied to the Focus Frame and Selected Frames simultaneously. To select multiple images, click them while pressing the Ctrl key.
  - Unselected (no outline): The settings will not be applied.

### When (Whole Image) is displayed on Toolbar:

Items on the Platen are scanned and appear as a single image. All portions in the cropping frames will be scanned.

## ►► Note

- Create cropping frame(s) on the displayed image. In thumbnail view, one cropping frame can be created per image. In whole image view, multiple cropping frames can be created.

- ➔ Scanning Multiple Documents from the ADF (Auto Document Feeder) in Advanced Mode

## General Notes (Scanner Driver)

ScanGear (scanner driver) is subject to the following restrictions. Keep these points in mind when using it.

### Scanner Driver Restrictions

- When using the NTFS file system, the TWAIN data source may not be invoked. This is because the TWAIN module cannot be written to the winnt folder for security reasons. Contact the computer's administrator for help.
- Some computers (including laptops) connected to the machine may not resume correctly from standby mode. In that case, restart the computer.
- Do not connect two or more scanners or multifunction printers with scanner function to the same computer simultaneously. If multiple scanning devices are connected, you cannot scan from the operation panel or scanner buttons of the machine and also may experience errors while accessing the devices.
- Calibration may take time if the machine is connected via USB 1.1.
- Scanning may fail if the computer has resumed from sleep or standby mode. In that case, follow these steps and scan again.

If your model has no power button, perform Step 2 only.

1. Turn off the machine.
2. Exit ScanGear, then disconnect the USB cable from the computer and reconnect it.
3. Turn on the machine.

If scanning still fails, restart the computer.

- ScanGear cannot be opened in multiple applications at the same time. Within an application, ScanGear cannot be opened for the second time when it is already open.
- Be sure to close the ScanGear window before closing the application.
- When using a network compatible model by connecting to a network, the machine cannot be accessed from multiple computers at the same time.
- When using a network compatible model by connecting to a network, scanning takes longer than usual.
- Make sure that you have adequate disk space available when scanning large images at high resolutions. For example, at least 300 MB of free space is required to scan an A4 document at 600 dpi in full-color.
- ScanGear and WIA driver cannot be used at the same time.
- Do not enter the computer into sleep or hibernate state during scanning.

### Applications with Restrictions on Use

- Some applications may not display the TWAIN user interface. In that case, refer to the application's manual and change the settings accordingly.
- Some applications do not support continuous scanning of multiple documents. In some cases, only the first scanned image is accepted, or multiple images are scanned as one image. For such applications, do not scan multiple documents from the ADF (Auto Document Feeder).
- To import scanned images into Microsoft Office 2000, first save them using Scan Utility, then import the saved files from the **Insert** menu.

- When scanning Platen size images into Microsoft Office 2003 (Word, Excel, PowerPoint, etc.), click **Custom Insert** in the **Insert Picture from Scanner or Camera** screen. Otherwise, images may not be scanned correctly.
- When scanning images into Microsoft Office 2007/Microsoft Office 2010 (Word, Excel, PowerPoint, etc.), use Microsoft Clip Organizer.
- Images may not be scanned correctly in some applications. In that case, increase the operating system's virtual memory and retry.
- When image size is too large (such as when scanning large images at high resolution), your computer may not respond or the progress bar may remain at 0 % depending on the application. In that case, cancel the action (for example by clicking **Cancel** on the progress bar), then increase the operating system's virtual memory or reduce the image size/resolution and retry. Alternatively, scan the image via Scan Utility first, then save and import it into the application.

## Scanning Tips

---

- **Positioning Originals (Scanning from Computer)**
- **Network Scan Settings**
  - Network Scanner Selector EX2 Menu and Setting Screen

## Positioning Originals (Scanning from Computer)

This section describes how to load originals on the platen or ADF (Auto Document Feeder) for scanning. If items are not placed correctly they may not be scanned correctly.

- ➔ [Placing Items \(Platen\)](#)
- ➔ [Placing Documents \(ADF \(Auto Document Feeder\)\)](#)

### Placing Items (Platen)

Place items as described below to scan by detecting the item type and size automatically.

#### ►►► Important

- Depending on your model, the function to scan by automatically detecting the item type and size does not appear.
- When scanning by specifying the paper size in Scan Utility or ScanGear (scanner driver), align an upper corner of the item with the corner at the arrow (alignment mark) of the platen.
- Reflective disc labels may not be scanned as expected.
- If scanned by detecting the item type and size automatically, the response may differ. In that case, adjust the cropping frame (scan area) manually.
- Large items (such as A4 size photos) that cannot be placed away from the edges/arrow (alignment mark) of the platen may be saved as PDF files. To save in a format other than PDF, scan by specifying the data format.

- ➔ Loading Originals on Platen
- ➔ Loading Based on Use

### Placing Documents (ADF (Auto Document Feeder))

To scan documents using the ADF, load the documents as described below.

- ➔ Loading Documents in the ADF (Auto Document Feeder)

## Network Scan Settings

You can connect your scanner or printer to a network to share it among multiple computers or scan images into a specified computer.

### ▶▶▶ Important

- Multiple users cannot scan at the same time.

### ▶▶▶ Note

- Complete the network settings of your scanner or printer beforehand by following the instructions on our website.
- With network connection, scanning takes longer than USB connection.

Complete the following settings to enable scanning over a network.

## Specifying Your Scanner or Printer

Use Network Scanner Selector EX2 to specify the scanner you want to use. By specifying the scanner, you can scan over a network from your computer or the operation panel.

### ▶▶▶ Important

- If the product you want to use is changed with Network Scanner Selector EX2, the product used for scanning with Scan Utility changes as well. The product for scanning from the operation panel also changes.

If your scanner or printer is not selected in Scan Utility, check that it is selected with Network Scanner Selector EX2.

Refer to "Network Scanner Selector EX2 Menu and Setting Screen" for details.

- To scan from the operation panel, specify your scanner or printer with Network Scanner Selector EX2 beforehand.

### 1. Check that Network Scanner Selector EX2 is running.

If Network Scanner Selector EX2 is running,  (Network Scanner Selector EX2) appears in the notification area on the desktop. Click  to check the hidden icons as well.

### ▶▶▶ Note

- If the icon is not displayed in the notification area on the desktop, follow the procedure below to start.

- **Windows 11/Windows 10:**

From the **Start** menu, click **(All apps >) Canon Utilities > Network Scanner Selector EX2**.

- **Windows 8.1:**

Click **Network Scanner Selector EX2** on the Start screen.

If **Network Scanner Selector EX2** is not displayed on the Start screen, select the **Search** charm, then search for "Network Scanner Selector EX2".

– **Windows 7:**

From the **Start** menu, click **All Programs > Canon Utilities > Network Scanner Selector EX2 > Network Scanner Selector EX2**.

The icon appears in the notification area on the desktop, and the Scan-from-PC Settings screen appears. In that case, skip ahead to Step 3.

2. In the notification area on the desktop, right-click  (Network Scanner Selector EX2), then select **Settings...**

The Scan-from-PC Settings screen appears.

3. Select your scanner or printer from **Scanners**.

Normally, the MAC address of your scanner or printer is already selected after the network setup. In that case, you do not need to select it again.

**Important**

- If multiple scanners exist on the network, multiple model names appear. In that case, you can select one scanner per model.

4. Click **OK**.

**Note**

- The scanner selected in the Scan-from-PC Settings screen will be automatically selected in the Scan-from-Operation-Panel Settings screen as well.

## Setting for Scanning with Scan Utility

To scan from Scan Utility using a scanner or printer connected to a network, specify your scanner or printer with Network Scanner Selector EX2, then follow the steps below to change the connection status between it and the computer.

1. Start Scan Utility.
2. Select "Canon XXX series Network" (where "XXX" is the model name) for **Scanner**.

3. Click  **Settings...** to use another scanner connected to a network.

4. Click  (General Settings), then click **Select** in **Product Name**.

The Scan-from-PC Settings screen of Network Scanner Selector EX2 appears.

Select the scanner you want to use and click **OK**.

5. In the **Settings (General Settings)** dialog box, click **OK**.

The Scan Utility main screen reappears. You can scan via a network connection.

## Setting for Scanning from the Operation Panel

You can make the setting for scanning from the operation panel.

### Important

- Set Scan Utility to use your scanner or printer via a network connection beforehand.

➔ [Setting for Scanning with Scan Utility](#)

1. Check that Network Scanner Selector EX2 is running.

If Network Scanner Selector EX2 is running,  (Network Scanner Selector EX2) appears in the notification area on the desktop. Click  to check the hidden icons as well.

### Note

- If the icon is not displayed in the notification area on the desktop, follow the procedure below to start.

- **Windows 11/Windows 10:**

From the **Start** menu, click **(All apps >) Canon Utilities > Network Scanner Selector EX2**.

- **Windows 8.1:**

Click **Network Scanner Selector EX2** on the Start screen.

If **Network Scanner Selector EX2** is not displayed on the Start screen, select the **Search** charm, then search for "Network Scanner Selector EX2".

- **Windows 7:**

From the **Start** menu, click **All Programs > Canon Utilities > Network Scanner Selector EX2 > Network Scanner Selector EX2**.

The icon appears in the notification area on the desktop, and the Scan-from-PC Settings screen appears. In that case, skip ahead to Step 3.

2. In the notification area on the desktop, right-click  (Network Scanner Selector EX2), then select **Settings...**

The Scan-from-PC Settings screen appears.

3. Click **Scan-from-Operation-Panel Settings**.

The Scan-from-Operation-Panel Settings screen appears.

4. Select your scanner or printer from **Scanners** and click **OK**.

Select the MAC address of your scanner or printer.

**▶▶▶ Note**

- When multiple scanners are connected via a network, you can select up to three scanners.

5. In the Scan-from-PC Settings screen, click **OK**.

**▶▶▶ Note**

- If your scanner or printer does not appear, check the following, click **OK** to close the screen, then reopen it and try selecting again.

- MP Drivers is installed
- Network settings of your scanner or printer is completed after installing the MP Drivers
- Network communication between your scanner or printer and computer is enabled

If the problem is still not solved, see Network Communication Problems.

## Scanning in macOS

---

### ► Scanning According to Item Type or Purpose (IJ Scan Utility Lite)

- IJ Scan Utility Lite Features
- Scanning Easily (Auto Scan)
- Scanning Documents and Photos

### ► Scanning Tips

- Positioning Originals (Scanning from Computer)

### ►► Important

- Available functions and settings vary depending on your scanner or printer.

## Scanning According to Item Type or Purpose (IJ Scan Utility Lite)

---

- ▶ **IJ Scan Utility Lite Features**
- ▶ **Scanning Easily (Auto Scan)**
- ▶ **Scanning Documents and Photos**

### ▶▶▶ Important

- Available functions and settings vary depending on your scanner or printer.

## IJ Scan Utility Lite Features

---

Use IJ Scan Utility Lite to scan and save documents, photos, or other items at one time by simply clicking the corresponding icon.

### ▶▶▶ Important

- The displayed items and available functions vary depending on your scanner or printer.

### Multiple Scanning Modes

**Auto** allows for one click scanning with default settings for various items. **Document** will sharpen text in a document or magazine for better readability, and **Photo** is best suited for scanning photos.

### ▶▶▶ Note

- For details on the IJ Scan Utility Lite main screen, see IJ Scan Utility Lite Main Screen.

### Save Scanned Images Automatically

Scanned images are automatically saved to a preset folder. The folder can be changed as needed.

### ▶▶▶ Note

- The default save folder is the **Pictures** folder.
- For how to specify a folder, see Settings Dialog.

### Application Integration

Scanned images can be sent to other applications. For example, display scanned images in your favorite graphics application, attach them to e-mails, or extract text from images.

## ►► Note

- To set the applications to integrate with, see Settings Dialog.

## Scanning Easily (Auto Scan)

Auto Scan allows for automatic detection of the type of the item placed on the platen or ADF (Auto Document Feeder).

### ►► Important

- This function is not supported depending on your model.
- The following types of items may not be scanned correctly. In that case, adjust the cropping frames (selection boxes; scan areas) in the screen displayed by clicking **Driver** in the IJ Scan Utility Lite main screen, and then scan again.
  - Photos with a whitish background
  - Items printed on white paper, hand-written text, business cards, and other unclear items
  - Thin items
  - Thick items
- When scanning two or more documents from the ADF, place documents of the same size.

1. Check that scanner or printer is turned on.

2. Place items on platen or ADF.

➔ [Positioning Originals \(Scanning from Computer\)](#)

3. Start IJ Scan Utility Lite.

4. Click  **Auto** in the IJ Scan Utility Lite main screen.

Scanning starts.

### ►► Note

- To cancel the scan, click **Cancel**.
- Use the Settings (Scanning from a Computer) dialog to set where to save the scanned images and to make advanced scan settings.
- To scan a specific item type, see the following pages.
  - ➔ [Scanning Documents and Photos](#)
  - ➔ Scanning with Favorite Settings
  - ➔ Scanning Multiple Documents at One Time from the ADF (Auto Document Feeder)

## Scanning Documents and Photos

Scan items placed on the platen with settings suitable for documents or photos.

Save documents in formats such as PDF and JPEG, and photos in formats such as JPEG and TIFF.

1. Place the item on the platen.

➔ [Positioning Originals \(Scanning from Computer\)](#)

2. Start IJ Scan Utility Lite.

3. To specify the paper size, resolution, PDF settings, etc., click  **Settings...**, and then set each item in the Settings (Scanning from a Computer) dialog.

### ▶▶▶ Note

- Once settings are made in the Settings dialog, the same settings can be used for scanning from the next time.
- In the Settings dialog, specify image processing settings such as slant correction, set where to save the scanned images, and more, as needed.

When setting is completed, click **OK**.

4. Click  **Document** or  **Photo** in the IJ Scan Utility Lite main screen.

Scanning starts.

### ▶▶▶ Note

- To cancel the scan, click **Cancel**.

## Scanning Tips

---

- **Positioning Originals (Scanning from Computer)**

## Positioning Originals (Scanning from Computer)

This section describes how to load originals on the platen or ADF (Auto Document Feeder) for scanning. If items are not placed correctly they may not be scanned correctly.

### ▶▶▶ Important

- When using a personal scanner in the upright position, the item type may not be detected automatically. In that case, specify the item type in IJ Scan Utility Lite and scan.

- ➔ [Placing Items \(Platen\)](#)
- ➔ [Placing Documents \(ADF \(Auto Document Feeder\)\)](#)
- ➔ [Placing Items \(When Using Stand\)](#)

## Placing Items (Platen)

Place items as described below to scan by detecting the item type and size automatically.

### ▶▶▶ Important

- Depending on your model, the function to scan by automatically detecting the item type and size does not appear.
- When scanning by specifying the paper size, align an upper corner of the item with the corner at the arrow (alignment mark) of the platen.
- Reflective disc labels may not be scanned as expected.
- If scanned by detecting the item type and size automatically, the response may differ. In that case, adjust the cropping frame (selection box) manually.
- Large items (such as A4 size photos) that cannot be placed away from the edges/arrow (alignment mark) of the platen may be saved as PDF files. To save in a format other than PDF, scan by specifying the data format.

#### Inkjet All-In-One printer:

- ➔ Loading Originals on Platen
- ➔ Loading Based on Use

#### Personal scanner:

- ➔ Items You Can Place & How to Place Items

## Placing Documents (ADF (Auto Document Feeder))

To scan documents using the ADF, load the documents as described below.

- ➔ Loading Documents in the ADF (Auto Document Feeder)

## Placing Items (When Using Stand)

1. Place item on platen.

1. Open the document cover.
2. Place the item with the side to scan facing the platen, and then align it with the alignment mark.

### ►► Important

- If you open the document cover wide, the scanner may fall over.
- Portions placed over (A) (0.094 inch (2.4 mm) from the left edge of the platen) or (B) (0.106 inch (2.7 mm) from the front edge) cannot be scanned.

2. Gently close document cover.

While scanning, hold the document cover gently with your hand to keep it closed.

### ►► Important

- Keep these points in mind when using the scanner in the upright position.
  - Do not subject the scanner to vibration during operation. The correct image results may not be obtained (for example, images may blur).

- The item type may not be detected automatically. In that case, specify the item type in IJ Scan Utility Lite and scan.

## **Attaching Scanned Images to E-MAIL to Send**

## **Network Communication Problems**

---

- **Cannot Find Printer on Network (Windows/macOS)**
- **Wireless Router Problems**
- **Printer Settings/Smartphone/Tablet Troubles for Network**

## **Cannot Find Printer on Network (Windows/macOS)**

---

- **Cannot Find Printer on Network**
- **Cannot Proceed Beyond Printer Connection Screen (Cannot Find Printer Connected via USB)**
- **Searching Printer by IP Address or Host Name During Setup**

## Cannot Find Printer on Network

In the following cases, set up the printer again.

- When you buy a new computer or wireless router
- When you change the settings on your wireless router
- When the connection method (Wi-Fi / USB) of the printer is changed

Select **(Setup)** on **HOME** screen > **Printer settings** > **Reset settings** > **Reset all** to initialize the printer settings.

➔ [Reset settings](#)

After initializing the printer settings, redo setup.

➔ [Set Up](#)

### In Other Cases Than Above:

If the printer suddenly stops working, even though you have not changed the settings of the device or network to which it is connected, or if you cannot find the printer during the setup process, check and solve the problem, using Wi-Fi Connection Assistant. After the condition improves, redo the setup of the printer.

Wi-Fi Connection Assistant is a powerful solution tool for network problems.

|| **Step 1** | [Check Basic Items for Network.](#)

|| **Step 2** | [Solve Problems, Using Wi-Fi Connection Assistant.](#)

|| **Step 3** | [If the Solution Tool Does Not Solve the Problem.](#)

#### Step 1 : Check Basic Items for Network.

##### Check 1 | Check power status.

Check your printer and the network device (wireless router, etc.) are turned on.

If you are in the process of setting up, interrupt it and check if the wireless router (modem) is turned on and then check if the printer is turned on.

##### 1. Check if network device such as router is turned on.

If network devices are not turned on, turn on the power. If the network devices are on, turn them off and on again.

It may take a while for the network device to become ready for use once they are turned on.

Proceed once the network device such as router is ready for use.

## 2. Check if printer is turned on

If printer is not turned on, turn on the power. If the printer is on, turn it off and on again.

Proceed once you complete checking the power status above.

### Check 2 Check PC network connection.

If your computer and network devices (wireless router, etc.) are fully configured, your computer is ready to connect to the network.

#### 1. Check the settings of the network device (wireless router, etc.).

Connect to the Internet and see if you can browse any web page. If you cannot view web pages on your computer, check wireless router network connection settings, such as IP address filtering, MAC address filtering, and DHCP function.

To check the network name (SSID) of the wireless router the printer is connected to, print the network settings.

➔ [Printing Network Settings](#)

#### ▶▶▶ Note

- Depending on the wireless router, note that different network name (SSID) is assigned for a bandwidth (2.4 GHz or 5 GHz) or its usage (for PC or game machine), using alphanumeric characters at the end of network name (SSID).
- For more on checking the settings of the wireless router, refer to the instruction manual supplied with the wireless router or contact the manufacturer.

If you use an encryption key, specify it for the network name (SSID) you are using. For details, see [Setting an Encryption Key](#).

#### 2. Check PC network connection.

For the procedures, refer to the instruction manual supplied with the computer, or contact the manufacturer.

Once you complete setting up the wireless router and your computer, configure the settings on your computer in order to view web pages, using the information of the wireless router.

Proceed once you complete checking the network connection above.

### Check 3 Check printer's network settings.

Make sure the  icon is displayed on the lower left of the touch screen.

 or  icon is displayed.

 or  icon indicates that the wireless router and the printer are not connected. Check the setting of printer. Reconsider the location of the wireless router and the printer in the next check.

 icon is displayed.

"Easy wireless connect" is waiting for setup. Connect a device to the printer with the application on computer, smartphone or tablet.

If  or  icon is displayed.

The printer is not set to use Wi-Fi.

Select  (**Setup**) on **HOME** screen > **Printer settings** > **LAN settings** > **Wi-Fi** in this order, and select **Enable** for **Enable/disable Wi-Fi**.

#### Check 4 Check location of wireless router.

Make sure the printer is not placed too far away from the wireless router.

The printer can be up 50 m (164 ft.) from the wireless router indoors if unobstructed. Make sure the printer is close enough to the wireless router to be used.

Place the printer and wireless router where there are no obstacles between them. Wireless communication between different rooms or floors is generally poor. Wireless communication can be impeded by building materials containing metal or concrete. If the printer cannot communicate with the computer over a Wi-Fi due to a wall, place the printer and the computer in the same room.

In addition, if a device like a microwave oven that emits radio waves of the same frequency bandwidth as a wireless router is nearby, it may cause interference. Place the wireless router as far away from interference sources as possible.

#### Step 2 : Solve Problems, Using Wi-Fi Connection Assistant.

Diagnose and repair the network connections using Wi-Fi Connection Assistant.

Download Wi-Fi Connection Assistant from the below page, and install it on your computer.

➡ [Checking Printer Connection Status Using Wi-Fi Connection Assistant](#)

Refer to below in regard to starting up Wi-Fi Connection Assistant.

- **For Windows:**

- ➡ [Starting Up Wi-Fi Connection Assistant](#)

- **For macOS:**

- ➡ [Starting Up Wi-Fi Connection Assistant](#)

### Step 3 : If the Solution Tool Does Not Solve the Problem.

**Check 1** Check that **Enable bidirectional support** is selected in **Ports** sheet of **Printer properties** dialog box(Windows).

If not, select it to enable bidirectional support.

**Check 2** Make sure security software's firewall is off.

If your security software's firewall is on, a message may appear warning you that Canon software is attempting to access the network. If this warning message appears, set security software to always allow access.

If you are using any programs that switch between network environments, check their settings.

**Check 3** If printer is connected to AirPort Base Station via Wi-Fi, make sure you use alphanumeric characters for network name (SSID). (macOS)

If your network name (SSID) contains characters other than single-byte alphanumeric characters, the connection is not established properly. Change the network (SSID) to use only single-byte alphanumeric characters.

**Check 4** Solve network troubles with the printer's diagnostic functions.

See below.

➔ [Solve Network Troubles with The Printer's Diagnostic Functions](#)

## **Related Topics**

➔ [Network Communication Problems](#)

## Cannot Proceed Beyond Printer Connection Screen (Cannot Find Printer Connected via USB)

If you cannot proceed beyond the **Printer Connection** screen, check the following.

**Check 1** Make sure USB cable is securely plugged in to printer and computer.

Connect the printer and the computer using a USB cable as the illustration below. The USB port is located at the back of the printer.

### ►► Important

- Check the orientation and angle of the "Type-B" connector when connecting to the printer. The connection part is slightly oblique. For details, refer to the instruction manual supplied with the USB cable.

**Check 2** Follow procedure below to connect printer and computer again.

1. Unplug USB cable from printer and computer and connect it again.
2. Make sure no printer operation is in progress and turn off.
3. Turn on printer.

**Check 3** Follow the steps below to install MP Drivers (Printer Driver) again.

1. Download the latest MP Drivers (Printer Driver).
2. Turn off printer.
3. Restart computer.

After restarting, install the latest MP Drivers (Printer Driver) downloaded in step 1.

### ►► Important

- When installing the MP Drivers (Printer Driver), make sure you select the correct printer name.

- For Windows:

To restart your computer, choose **Restart** instead of **Shut down**.

## Wireless Router Problems

---

- **Network Key (Password) Unknown**
- **Checking Wireless Router SSID/Key**
- **Printer Cannot Be Used After Replacing Wireless Router or Changed Router Settings**
- **WPS (Router Button) Connection**
- **Privacy Separator/SSID Separator/Network Separation Function**

## Network Key (Password) Unknown

---

Diagnose and repair the network connections using Wi-Fi Connection Assistant.

Download Wi-Fi Connection Assistant from the below page, and install it on your computer.

- ➔ [Checking Printer Connection Status Using Wi-Fi Connection Assistant](#)

Refer to below in regard to starting up Wi-Fi Connection Assistant.

- **For Windows:**
  - ➔ [Starting Up Wi-Fi Connection Assistant](#)
- **For macOS:**
  - ➔ [Starting Up Wi-Fi Connection Assistant](#)

If the problem persists after diagnosis and repair with Wi-Fi Connection Assistant, check the following items.

- ➔ [WPA/WPA2/WPA3 Key Set for Wireless Router Unknown, Cannot Connect](#)
- ➔ [Setting an Encryption Key](#)

### WPA/WPA2/WPA3 Key Set for wireless router Unknown, Cannot Connect

---

#### 

Check the wireless router settings. For more on setting up a wireless router, see the instruction manual provided with the wireless router or contact its manufacturer. Make sure your computer can communicate with the wireless router.

### Setting an Encryption Key

---

#### 

Select the encryption containing WPA2.

#### Note

- The factory default of wireless router supporting WPA3 may be set to WPA3.

Make sure your computer can communicate with the wireless router using the settings you have selected. For more on setting up a wireless router, see the instruction manual provided with the wireless router or contact its manufacturer.

- **Using WPA2/WPA3 (Windows)**

The authentication method, Wi-Fi password, and dynamic encryption type must be identical among the wireless router, the printer, and your computer.

Enter the Wi-Fi password configured on the wireless router.

Either TKIP (basic encryption) or AES (secure encryption) is selected automatically as the dynamic encryption method.

For details, see [If WPA/WPA2/WPA3 Details Screen Appears](#).

### ▶▶▶ Note

- This printer supports the following.
  - WPA-PSK (WPA-Personal)
  - WPA2-PSK (WPA2-Personal)
  - WPA3-SAE (WPA3-Personal)
- Some printers support IEEE802.1X/EAP (WPA/WPA2/WPA3 Enterprise). To configure IEEE802.1X/EAP (WPA/WPA2/WPA3 Enterprise), you also need to configure the authentication (Radius) server.

Contact the network administrator for more information.
- This web page contains information about several models. Depending on the specifications of the printer you are using, some of the features described (connection, scanner/copy and etc.) may not apply.

For details about the functions of your printer, see [Product Specifications](#).

## Printer Cannot Be Used After Replacing Wireless Router or Changed Router Settings

When wireless router is replaced or router settings are changed, the network settings of your computer, smartphone/tablet or printer must be reconfigured according to the new wireless router.

**Check 1** Check if your computer or smartphone/tablet can be connected to Internet through the new wireless router.

If your computer or smartphone/tablet cannot be connected to Internet, check if the wireless router setup is completed and configure the settings on the computer or smartphone/tablet to connect to the wireless router.

**Check 2** Resetup printer network

Refer to Setup Guide to setup.

### ▶▶▶ Note

- Wi-Fi Connection Assistant allows you to diagnose and repair the network status.

Select the link below to download Wi-Fi Connection Assistant and install it.

- ➔ [Checking Printer Connection Status Using Wi-Fi Connection Assistant](#)

Refer to below in regard to starting up Wi-Fi Connection Assistant.

– For Windows:

- ➔ [Starting Up Wi-Fi Connection Assistant](#)

– For macOS:

- ➔ [Starting Up Wi-Fi Connection Assistant](#)

If this does not solve the problem, see below.

- ➔ [Cannot Communicate with Printer After Enabling MAC/IP Address Filtering or Encryption Key on Wireless Router](#)
- ➔ [With Encryption On, Cannot Communicate with Printer After Changing Encryption Type at Wireless Router](#)
- ➔ Privacy Separator/SSID Separator/Network Separation Function

### Cannot Communicate with Printer After Enabling MAC/IP Address Filtering or Encryption Key on wireless router

**Check 1** Check wireless router setting.

For more on setting up a wireless router, see the instruction manual provided with the wireless router or contact its manufacturer. Make sure the computer and the wireless router can communicate with each other under this setting.

**Check 2** If filtering MAC addresses or IP addresses at wireless router, check that MAC addresses or IP addresses for computer, network device, and printer are registered.

**Check 3** If using WPA/WPA2/WPA3 key or a password, make sure encryption key for computer, network device, and printer matches key set for wireless router.

The length or format of the Wi-Fi password and authentication method must be identical among the wireless router, the printer, and your computer.

For details, see [Setting an Encryption Key](#).

### ➤➤➤ Note

- Some printers support IEEE802.1X/EAP (WPA/WPA2/WPA3 Enterprise). To configure IEEE802.1X/EAP (WPA/WPA2/WPA3 Enterprise), you also need to configure the authentication (Radius) server.  
Contact the network administrator for more information.
- This web page contains information about several models. Depending on the specifications of the printer you are using, some of the features described (connection, scanner/copy and etc.) may not apply.  
For details about the functions of your printer, see [Product Specifications](#).

## **Q** With Encryption On, Cannot Communicate with Printer After Changing Encryption Type at wireless router

### **A**

If the printer cannot communicate with the computer after you change the encryption type for the wireless router, make sure the encryption type and passkey or password for the computer matches that of the wireless router.

- ➔ [Cannot Communicate with Printer After Enabling MAC/IP Address Filtering or Encryption Key on Wireless Router](#)

## **Printer Settings/Smartphone/Tablet Troubles for Network**

---

- **Printing Network Settings**
- **Restoring Printer's LAN Settings to Defaults**
- **Default Network Settings**
- **Connecting with Wireless Direct**

## Solve Network Troubles with The Printer's Diagnostic Functions

- If the printer and wireless router are connected or the printer and computer are connected by USB cable but you cannot print:
  - ➔ [Change to Offline \(Windows\)](#)
- In other cases than above:
  - ➔ [Cannot Find Printer on Network/Cannot Print](#)
  - ➔ [Cannot Connect to Printer through Wireless Direct](#)

### Cannot Find Printer on Network/Cannot Print

#### Printing Out Network Settings Information:

Follow the procedure below to print out the network settings information.

**Step 1** Check that printer and wireless router are turned on.

Turn the wireless router back on.

Wait about five minutes and then turn the printer back on.

**Step 2** Check your devices (e.g. computer/smartphone/tablet) are connected to Internet.

Make sure that devices and the wireless router are connected to via Wi-Fi, and that the Internet can be used without problems.

**Step 3** Make sure the printer's Wi-Fi setting is enabled and the  or  icon is displayed.

**Step 4** Move the printer and device (computer/smartphone/tablet) closer to the wireless router.

Wireless communication quality deteriorates if the printer or devices are too far from the wireless router. Move the printer and device closer to the wireless router.

**Step 5** Print the network settings

Print out the network settings information on your printer.

➔ [Printing Network Settings](#)

#### Checking Printed Network Settings Information:

From the printed network settings information, check the entries in item "2-2"

## C-0

It is connected correctly. If, nevertheless, the printer is not found on the network or printing is not possible, check the following items.

### ▶▶▶ Note

- If codes other than "C-0" are displayed at the same time in the item "2-2" see also the correspondence of the other codes.

#### Check 1 Check that security software's firewall is off.

A message may appear warning you that Canon software is attempting to access the network. If this warning message appears, set the security software to always allow access.

Quit the security software and make sure that the printer is recognized and ready to use. If so, the cause is the firewall setting. Change the firewall settings so that the printer is recognized and ready to use. For details, contact the manufacturer of the security software.

If you are using any programs that switch between network environments, check their settings.

#### Check 2 Does network name (SSID) of printer match network name (SSID) setting of wireless router that communicates?

Check the "3-2-6" item in the printed network settings information and the network name (SSID) of the wireless router you want to connect to. If they are not matched, check the SSID and password of the wireless router you want to connect to, and then setup manually.

#### Check 3 Is privacy separator, SSID separator, or Network separation function enabled on wireless router?

If it is enabled, disable these functions before performing the setup. To check the settings of the wireless router, refer to the instruction manual provided with it or contact its manufacturer.

#### Check 4 Are MP Drivers (Printer Driver) installed? (Windows)

If you are using Windows and MP Drivers (Printer Driver) are not installed, install it.

➡ Set Up

## C-1

The printer's Wi-Fi setting is disabled. (You can also check if the Wi-Fi icon  does not appear on the printer's screen.)

Enable the Wi-Fi setting in the printer's settings screen.

## C-3

No IP address is assigned. (You can also check that the item "3-2-12" in the printed network settings information is blank.)

Check the following items.

**Check 1** Is printer set to obtain an IP address automatically, or is wireless router requesting manual addressing?

Refer to the wireless router's manual to enable DHCP (auto-acquisition) settings on the wireless router or to set a valid IP address on the printer.

**Check 2** When you set printer's IP address manually, correct IP address may not be set.

Check the network name (SSID) and the password of the wireless router you want to connect to, the IP address applicable range, and then enter the appropriate IP address on the printer side. If you are unsure, set the printer's IP address to automatic (DHCP).

## C-5

Unable to connect to the specified network. Check the following items.

**Check 1** Check power status of printer, network devices (e.g. wireless router), and your computer/smartphone/tablet.

Communication with a wireless router must be tuned to either the 2.4 GHz or 5 GHz frequency band. The network name (SSID) of the 2.4 GHz frequency band and the network name (SSID) of the 5 GHz frequency band cannot be used in combination. Depending on the wireless router, note that different network name (SSID) is assigned for a bandwidth (2.4 GHz or 5 GHz) or its usage (for PC or game machine), using alphanumeric characters at the end of network name (SSID).

Check the network name (SSID) set for the printer, and match it with the network name (SSID) of the correct frequency band of the wireless router.

**Check 2** Password on your wireless router may not match password you entered.

Passwords are case sensitive.

Enter the password correctly.

**Check 3** Monitor signal status and move printer and wireless router as necessary.

- Place the printer and wireless router where there are no obstacles between them. Wireless communication between different rooms or floors is generally poor.
- Wireless communication can be impeded by building materials containing metal or concrete. If the printer cannot communicate with the computer over a Wi-Fi due to a wall, place the printer and the computer in the same room.
- After changing the installation location, print out the network settings information again and check the status of the signal. Compare with the value in section "3-2-1" in the printed network settings information to determine the installation location.

**Check 4** Check wireless channel number of Wi-Fi you are using on computer.

Make sure that the wireless channel number on the wireless router is included in the wireless channel number you checked. If the wireless channel number set for the wireless router is not included, change the wireless channel number of the wireless router.

**Check 5** In case of Wi-Fi connection, check if computer that can be accessed by wireless router is restricted.

The wireless router settings may be limiting the number of devices that can be connected at the same time. Remove or relax the restrictions.

To check the settings of the wireless router, refer to the instruction manual provided with it or contact its manufacturer.

#### **▶▶▶ Note**

- To check the MAC address or IP address of your computer, see [Checking Computer IP Address or MAC Address](#).

**Check 6** If problem occurs only when wireless router is in energy-saving mode, turn off energy-saving mode of wireless router.

If the problem seems to occur suddenly, it may be resolved by updating the wireless router firmware (e.g. update interval of a key, problems of DHCP update interval, etc.). For details, refer to the wireless router's instruction manual.

**Check 7** If printer is connected to AirPort Base Station via LAN, make sure you use alphanumeric characters for network name (SSID). (macOS)

If your network name (SSID) contains characters other than single-byte alphanumeric characters, the connection is not established properly. Change the network (SSID) of the printer to use only single-byte alphanumeric characters.

#### **C-4**

No default gateway is set.

When you set the IP address of the printer manually, enter a valid default gateway IP address. If you don't know the default gateway, set the IP address to automatic.

#### **C-7**

There may be a problem with the signal.

Check the following items.

**Check** Monitor signal status and move printer and wireless router as necessary.

- Place the printer and wireless router where there are no obstacles between them. Wireless communication between different rooms or floors is generally poor.
- Wireless communication can be impeded by building materials containing metal or concrete. If the printer cannot communicate with the computer over a Wi-Fi due to a wall, place the printer and the computer in the same room.
- After changing the installation location, print out the network settings information again and check the status of the signal. Compare with the value in section "3-2-1" in the printed network settings information and place the printer in the location with a higher value.

## ►► Note

- In some cases, "C-7" and "C-9" are displayed at the same time. In that case, refer to both items.

### C-8

Too many clients are connected.

Wireless Direct does not allow more than 5 devices to be connected.

If you want to connect additional devices to the printer, unplug any devices that are not in use before adding them.

### C-9

The noise level is high and does not differ from the signal level due to various devices other than the printer.

- If devices (microwave oven, external hard disk drive, and other USB 3.0 devices) that emit radio waves of the same frequency bandwidth as a wireless router is nearby, it may cause interference. Place the printer and the wireless router as far away from interference sources as possible.
- After you change the location of the printer, check the signal quality. Compare with the value of "3-2-2" in the network settings information and place the printer in the location with a higher value.

## ►► Note

- In some cases, "C-7" and "C-9" are displayed at the same time. In that case, refer to both items.

### C-10

No IP address is assigned by the wireless router.

Check the following items.

**Check 1** Password on your wireless router may not match password you entered.

Passwords are case sensitive.

Enter the password correctly.

**Check 2** Set up printer again and reconnect to Wi-Fi.

**Check 3** Check DHCP on wireless router. If DHCP is off, set it on.

For details, refer to the wireless router's instruction manual.

### C-11

The network name (SSID) remains the default value (The network name (SSID) has not been set). Check the network name (SSID) of the wireless router.

Verify the network name (SSID) and password of the wireless router you want to connect to, and then set it up manually.

## ►► Note

- Wi-Fi Connection Assistant allows you to diagnose and repair the network status.  
Select the link below to download Wi-Fi Connection Assistant and install it.

➔ Checking Printer Connection Status Using Wi-Fi Connection Assistant

Refer to below in regard to starting up Wi-Fi Connection Assistant.

– **For Windows:**

➔ [Starting Up Wi-Fi Connection Assistant](#)

– **For macOS:**

➔ [Starting Up Wi-Fi Connection Assistant](#)

## **Cannot Communicate with Printer while It Is in Wireless Direct**

### **A**

**Make sure the following check items**

**Check 1** Check power status of printer and other devices (e.g. computer/smartphone/tablet).

Turn on the printer or devices.

If the power is already turned on, cycle the power switch.

**Check 2** Check settings of your device (e.g. computer/smartphone/tablet).

Make sure Wi-Fi is enabled on your device.

For details, refer to the device's instruction manual.

**Check 3** Print out network settings information.

See "Step 1" to "Step 5" in [Cannot Find Printer on Network/Cannot Printing](#).

In the printed network settings information, check if the item "2-2" is not "C-8". If this is the case, the number of connected printers is too many.

Wireless Direct does not allow more than 5 devices to be connected.

When you want to connect additional devices, disconnect any devices that are not in use before adding them.

**Check 4** Check that printer is selected as connection for various devices (e.g. computer/smartphone/tablet).

Select the network name (SSID) for Wireless Direct specified for the printer as the connection destination for devices.

Check the destination on your device.

For details, refer to your device's instruction manual or visit the manufacturer's website.

To check the network name (SSID) for Wireless Direct specified for the printer, display it using the operation panel of the printer or print out the network settings information of the printer.

- Display on the operation panel of the printer.

➔ [LAN settings](#)

- Print the network settings.

➔ [Printing Network Settings](#)

**Check 5** Check that Wireless Direct password set for printer is entered correctly.

To check the password specified for the printer, display it using the operation panel of the printer or print out the network settings information of the printer.

- Display on the operation panel of the printer.

➔ [LAN settings](#)

- Print the network settings.

➔ [Printing Network Settings](#)

**Check 6** Check that printer is not placed too far away from device.

If the distance between the printer and the device is too far, wireless communication becomes poor. Place the printer and the device close to each other.

## Checking Network Information of Printer

---

- ➔ [Checking Printer IP Address or MAC Address](#)
- ➔ [Checking Computer IP Address or MAC Address](#)
- ➔ [Checking Communication Between the Computer, the Printer, and the Wireless Router](#)
- ➔ [Checking Network Setting Information](#)

### Checking Printer IP Address or MAC Address

---

#### A

To check the printer's IP Address or MAC Address, print out the network settings information or use the operation panel to display it.

- Display on the operation panel.
  - ➔ [LAN settings](#)
- Print the network settings.
  - ➔ [Printing Network Settings](#)

For Windows, you can check the network setting information on the computer screen.

- ➔ [Canon Wi-Fi Connection Assistant Screen](#)

### Checking Computer IP Address or MAC Address

---

#### A

To check the IP Address or MAC Address of your computer, follow the instructions below.

- **For Windows:**

1. Select **Command Prompt** from **Start**.
2. Enter "ipconfig/all" and press **Enter**.

The IP Address and MAC Address of your computer appear. If your computer is not connected to a network, the IP Address does not appear.

- **For macOS:**

1. Select **System Settings** from Apple menu, and then click **Network**.
2. Make sure network interface used by computer is selected.

Make sure **Wi-Fi** is **Connected** when connecting via Wi-Fi or **Ethernet** is **Connected** for Wired LAN connection and click.

3. Click **Details** to check the IP Address.

The IP Address of your computer appears. To check the MAC Address, click **Hardware**.

## **Checking Communication Between the Computer, the Printer, and the wireless router**

---

### **A**

Perform a ping test to check if communication is taking place.

- **For Windows:**

1. Select **Command Prompt** from **Start**.
2. Type "ping XXX.XXX.XXX.XXX" and press **Enter**.

"XXX.XXX.XXX.XXX" is the IP Address of the target device.

If communication is taking place, a message like the one shown below appears.

```
Reply from XXX.XXX.XXX.XXX: bytes=32 time=10ms TTL=255
```

If **Request timed out** appears, communication is not taking place.

- **For macOS:**

1. Start **Terminal** as shown below.

Select **Computer** from **Go** menu of Finder, double-click **Macintosh HD > Applications > Utilities > Terminal**.

2. Type "ping -c3 XXX.XXX.XXX.XXX" and press **Enter**.

"XXX.XXX.XXX.XXX" is the IP Address of the target device.

If communication is taking place, a message like the one shown below appears.

```
64 bytes from XXX.XXX.XXX.XXX: icmp_seq=0 ttl=64 time=3.394 ms
```

```
64 bytes from XXX.XXX.XXX.XXX: icmp_seq=1 ttl=64 time=1.786 ms
```

```
64 bytes from XXX.XXX.XXX.XXX: icmp_seq=2 ttl=64 time=1.739 ms
```

```
--- XXX.XXX.XXX.XXX ping statistics ---
```

```
3 packets transmitted, 3 packets received, 0% packet loss
```

If the following message is displayed, communication is not working properly.

```
PING XXX.XXX.XXX.XXX (XXX.XXX.XXX.XXX) : 56 data bytes
```

```
---XXX.XXX.XXX.XXX ping statistics ---
```

```
3 packets transmitted, 0 packets received, 100% packet loss
```

## Checking Network Setting Information

---

### A

To check the printer's network settings information, display it using the operation panel of the printer or print it out.

Display on the operation panel.

➔ [LAN settings](#)

Print the network settings.

➔ [Printing Network Settings](#)

## Printing Network Settings

Use the operation panel to print the printer's current network settings.

### ▶▶▶ Important

- The network settings printout contains important information about your network. Handle it with care.

1. Check that printer is turned on.
2. [Load three or more sheets of A4 or Letter-sized plain paper.](#)
3. Select  (**Setup**) on **HOME** screen.
4. Select **Printer settings**.
5. Select **LAN settings**.
6. Select **Print details**.
7. Check message and select **Yes**.
8. When the confirmation screen for printing passwords appears, select **ON** or **OFF**.

The printer starts printing the network setting information.

The following information on the printer's network setting is printed out. (Some setting values are not displayed depending on the printer settings.)

Item Number	Item	Description	Setting
1	Product Information	Product information	–
1-1	Product Name	Product name	XXXXXXXX
1-2	ROM Version	ROM version	XXXXXXXX
1-3	Serial Number	Serial number	XXXXXXXX
2	Network Diagnostics	Network diagnostics	–
2-1	Diagnostic Result	Diagnostic result	XXXXXXXX

2-2	Result Codes	Result codes	XXXXXXXX
2-3	Result Code Details	Result code details	See <a href="#">Solve Network Troubles with The Printer's Diagnostic Functions</a> to check details on the diagnostic result and result codes.
3	Wireless LAN	Wireless LAN	Enable/Disable
3-2	Infrastructure	Infrastructure	Enable/Disable
3-2-1	Signal Strength	Signal strength	0 to 100 [%]
3-2-2	Link Quality	Link quality	0 to 100 [%]
3-2-3	Frequency	Frequency	2.4/5 [GHz]

("XX" represents alphanumeric characters.)

## Restoring Printer's LAN Settings to Defaults

---

### »» Important

- Initialization erases all network settings on the printer, making printing/scanning/faxing operation from a computer over a network impossible. To use the printer over a network again after restoring it to the factory defaults, refer to Setup Guide and redo setup.

Initialize the network setting using the printer's operation panel.

➔ [Reset settings](#)

## Default Network Settings

### LAN Connection Defaults

Item	Default
Network name (SSID)	BJNPSETUP
Wi-Fi security	Disable
IP address (IPv4)	Auto setup
IP address (IPv6)	Auto setup
Set printer name*	XXXXXXXXXXXXXXXXXXXX
Enable/disable IPv6	Enable
Enable/disable WSD	Enable
Timeout settings (WSD)	15 minutes
Enable/disable Bonjour	Enable
Bonjour service name*	Canon ModelName
LPR protocol settings	Enable
RAW protocol	Enable
LLMNR	Enable
Wi-Fi DRX settings	Enable

("XX" represents alphanumeric characters.)

\* Default value depends on printer. To check value, use operation panel.

➔ [LAN settings](#)

### Wireless Direct Defaults

Item	Default
Network name (SSID)	DIRECT-abXX-ModelName *1 *2
Password	YYYYYYYYYYY *3

<b>Wi-Fi security</b>	<b>WPA2-PSK (AES)</b>
<b>Connection request confirmation</b>	Displayed
<b>2.4GHz/5GHz Switch</b>	2.4GHz

\*1 Default value depends on printer. To check value, use operation panel.

\*2 "ab" is specified at random and "XX" represents last two digits of printer's MAC address. (The value is specified when the printer is turned on for the first time.)

\*3 The password is specified automatically when the printer is turned on for the first time.

## Connecting with Wireless Direct

You can connect devices (e.g. computer, smartphone, or tablet) to the printer by two methods below.

- Wireless connection (connecting devices via a wireless router)
- Direct wireless connection (connecting devices directly without a wireless router)

This section describes Wireless Direct, which allows you to print by connecting the devices to the printer directly.

### »» Important

- You can connect up to 5 devices to the printer at the same time with Wireless Direct.
- Check the usage restrictions and connect the printer to the Wireless Direct.

➔ [Restrictions](#)

### Connecting a smartphone/tablet/computer to the printer

1. Enable Wi-Fi function on smartphone/tablet/computer.

Enable Wi-Fi in the Settings menu on your smartphone/tablet/computer.

For instructions on enabling the Wi-Fi function, refer to the instruction manual for your smartphone/tablet/computer.

2. Select  (**Setup**) on **HOME** screen.
3. Select **Printer settings**
4. Select **LAN settings**
5. Select **Wireless Direct**.
6. Select **Connect to smartphone**.

7. Select **iPhone/iPad** to connect with an iPhone/iPad, **Android device** to connect with an Android device, and **Others** to connect with other device.

- **iPhone/iPad**

1. Select **QR Code**.
2. Scan the displayed QR code with the iPhone/iPad standard camera app or smartphone/

The iPhone/iPad is connected to the printer.

▶▶▶ **Note**

- If the QR code cannot be read, select  (Back) in the screen displayed QR code and connect the printer from **Connect to smartphone > Others**.

- **Android device**

1. Select **QR Code**.
2. Scan the displayed QR code with the Android device in one of the following ways.
  - Select network and Wi-Fi on the setting of Android device. Select **QR code** icon to the right of the **Add network** at the bottom of the list of Wi-Fi connections and scan the QR code.
  - Scan the displayed QR code with the Android standard camera app or smartphone/

- Scan the displayed QR code with a QR code reading app.

The Android device is connected to the printer.

▶▶▶ **Note**

- Wireless Direct using QR code can be used with Android 5.0 or later.
- It is available in Android 10 or later to scan QR code from setting and read QR code with the Android standard camera.
- Depending on the smartphone/tablet, QR code may not be readable.
- If the QR code cannot be read, select  (Back) in the screen displayed QR code and connect the printer from **Connect to smartphone > Others**.

- **Others**

1. Select **Next**.

**Network name (SSID)** and **Password** are displayed.

▶▶▶ **Note**

- To show the password, select **Show password**. To hide the password, select **Hide password**.
- The password is required when connecting smartphone/tablet/computer to the printer.

2. Select "DIRECT-XXXX-ModelName" ("X" represents alphanumeric characters) on your smartphone/tablet/computer.
3. Enter **Password** on smartphone/tablet/computer.

The smartphone/tablet/computer is connected to the printer.

### »» Note

- If the printer is set to display a confirmation screen in **Connection request confirmation** of [Changing Wireless Direct Setting](#), when the wireless direct compatible device connects to the printer, a confirmation screen asking for permission to connect is displayed on the printer operation panel.

Make sure the name on the operation panel is the same as that of your wireless communication device and select **Yes**.

You can print from your smartphone or tablet by installing the App. Download it from App Store and Google Play.

- ➔ For iOS device
- ➔ For Android device

## Changing Wireless Direct Setting

Change the settings for the Wireless Direct following the procedure below.

1. Make sure that printer is turned on.

2. Select  (**Setup**) on **HOME** screen and select **Printer settings**.

3. Select **LAN settings**

4. Select **Wireless Direct**.

### »» Note

- To change the Wireless Direct settings, you need to enable Wireless Direct in advance. Select **Enable/disable Wireless Direct** on the menu screen displayed when selecting **Wireless Direct** and enable Wireless Direct.

5. Select a setting item.

Scroll down if necessary.

- **See settings**

The setting values for using the printer with Wireless Direct are displayed.

- **Change network name (SSID)**

Change the identifier (SSID) for Wireless Direct.

The identifier (SSID) is the printer's name (device name) displayed on a Wi-Fi Direct compatible device.

Follow the procedure below to change the identifier (SSID).

- To set manually
  1. Select the displayed identifier (SSID).
  2. Change using the keyboard that appears.
  3. When you have finished making changes, select **OK**.
- To set automatically
  1. Select **Auto update**.
  2. Select **Yes**.

You can check the updated setting.

**»» Note**

- To show the password, select **Show password**. To hide the password, select **Hide password**.

- **Change password**

Change the password for Wireless Direct.

- To set manually
  1. Select **Change manually**.
  2. Select the displayed password.
  3. Enter the new password (10 characters).  
Change using the keyboard that appears.
  4. When you have finished making changes, select **OK**.
- To set automatically
  1. Select **Auto update**.
  2. Select **Yes**.

You can check the updated setting.

**»» Note**

- To show the password, select **Show password**. To hide the password, select **Hide password**.

- **Connection request confirmation**

Change the confirmation screen setting when a Wi-Fi Direct compatible device is connecting to the printer.

If you want the printer to display the screen to inform you a Wi-Fi Direct compatible device is connecting to the printer, select **ON**.

### **»» Important**

- To prevent an unauthorized access, we recommend you should select the setting to display the confirmation screen.

#### **• 2.4GHz/5GHz Switch**

Change the frequency used for Wireless Direct.

While using Wireless Direct (2.4 GHz), the connection of nearby Bluetooth speakers may be interrupted from time to time. In such a case, switching to 5 GHz will reduce the trouble.

### **»» Note**

- If you change the Wireless Direct setting of the printer, also change the wireless router setting of the device.

## **Problems While Printing (Scanning) from Smartphone/Tablet**

---

- **Cannot Print (Scan) from Smartphone/Tablet**

## Cannot Print (Scan) from Smartphone/Tablet

If you cannot Print (Scan) from your smartphone/tablet, it is possible that your smartphone/tablet cannot communicate with the printer.

Check the cause of your problem according to the connection method.

- ➔ [Cannot Communicate with Printer via Wi-Fi](#)
- ➔ [Cannot Connect to Printer through Wireless Direct](#)

### ▶▶▶ Note

- For problems on printing with other connection methods or more on performing settings of each connection method:
  - ➔ Using PIXMA/MAXIFY Cloud Link
  - ➔ Printing from iOS Device (AirPrint)

## Q Cannot Communicate with Printer via Wi-Fi

### A

If your smartphone/tablet cannot communicate with the printer, check the following.

**Check 1** Check power status of printer, network devices (e.g. wireless router), and your smartphone/tablet.

- Turn on the printer or devices.
- If the power is already turned on, cycle the power switch.
- It may be necessary to resolve wireless router problems (e.g. update interval of a key, problems of DHCP update interval, energy saving mode) or to update the wireless router firmware.

For details, contact the manufacturer of your wireless router.

**Check 2** Check settings of your smartphone/tablet.

Make sure Wi-Fi is enabled on your device.

For details, refer to your device's instruction manual.

**Check 3** Is printer connected to wireless router?

- Use the  icon on the lower left of the touch screen to check the connection status between the printer and wireless router.

If the  icon is not displayed, Wi-Fi is disabled. Turn on wireless communication on the printer.

- Make sure the network settings of the printer (e.g. network name (SSID) or network key (password), etc.) are identical with those of the wireless router.

To check the settings of the wireless router, refer to the instruction manual provided with it or contact its manufacturer.

To check the current network settings of the printer, print out the network settings information or use the operation panel to display it.

- Display on the operation panel of the printer.

➡ [LAN settings](#)

- Print the network settings.

➡ [Printing Network Settings](#)

## ▶▶▶ Note

- If you have a computer, Wi-Fi Connection Assistant allows you to diagnose and repair the network status.

Select the link below to download Wi-Fi Connection Assistant and install it.

➡ [Checking Printer Connection Status Using Wi-Fi Connection Assistant](#)

Refer to below in regard to starting up Wi-Fi Connection Assistant.

- For Windows:

➡ [Starting Up Wi-Fi Connection Assistant](#)

- For macOS:

➡ [Starting Up Wi-Fi Connection Assistant](#)

### Check 4 Are network settings of your smartphone/tablet identical with those of wireless router?

Make sure the network settings of the printer (e.g. network name (SSID) or network key password) are identical with those of the wireless router.

To check the settings of your smartphone/tablet, refer to the instruction manual provided with it.

If the network settings of your smartphone/tablet are not identical with those of the wireless router, change the network settings of it to match with those of the wireless router.

### Check 5 Make sure the printer is not placed too far away from the wireless router.

If the distance between the printer and wireless router is too far, wireless communication becomes poor. Place the printer and wireless router close to each other.

### Check 6 There may be a problem with the signal. Monitor signal status and move printer and wireless router as necessary.

Place the printer and wireless router where there are no obstacles between them. Wireless communication between different rooms or floors is generally poor. Wireless communication can be impeded by building materials containing metal or concrete. If the printer cannot communicate with the computer over a Wi-Fi due to a wall, place the printer and the computer in the same room.

In addition, if a device like a microwave oven that emits radio waves of the same frequency bandwidth as a wireless router is nearby, it may cause interference. Place the wireless router as far away from interference sources as possible.

Check the signal strength on the touch screen.

➔ [Using Touch Screen](#)

## ▶▶▶ Note

- If the web page cannot be printed using an Android device, it may be possible to print it by changing Wireless Direct connection.

➔ [Connecting with Wireless Direct](#)

## Cannot Communicate with Printer while It Is in Wireless Direct

### 

If your smartphone/tablet cannot communicate with the printer in the Wireless Direct, check the following.

**Check 1** Check power status of printer and device (e.g. smartphone/tablet).

Turn on the printer or devices.

If the power is already turned on, cycle the power switch.

**Check 2** Check if the  icon is displayed on the touch screen of the printer.

If it is not displayed, Wireless Direct is disabled. Please turn on the Wireless Direct.

**Check 3** Check settings of your smartphone/tablet.

Make sure Wi-Fi is enabled on your device.

For details, refer to your device's instruction manual.

**Check 4** Check that printer is selected as connection for devices (e.g. smartphone/tablet).

Select the network name (SSID) for Wireless Direct specified for the printer as the connection destination for devices.

Check the destination on your device.

For details, refer to your device's instruction manual or visit the manufacturer's website.

To check the network name (SSID) for Wireless Direct specified for the printer, print out the network settings information or use the operation panel to display it.

- Display on the operation panel of the printer.

➔ [LAN settings](#)

- Print the network settings.

➔ [Printing Network Settings](#)

**Check 5** Check that Wireless Direct password set for printer is entered correctly.

To check the password specified for the printer, print out the network settings information or use the operation panel to display it.

- Display on the operation panel of the printer.

➡ [LAN settings](#)

- Print the network settings.

➡ [Printing Network Settings](#)

**Check 6** Check that printer is not placed too far away from device.

If the distance between the printer and the device is too far, wireless communication becomes poor. Place the printer and the device close to each other.

**Check 7** Check that 5 devices are already connected.

Wireless Direct does not allow more than 5 devices to be connected.

### ▶▶▶ Note

- This web page contains information about several models. Depending on the specifications of the printer you are using, some of the features described (connection, scanner/copy and etc.) may not apply.

For details about the functions of your printer, see [Product Specifications](#).

## Printing Problems

---

- **Printer Does Not Print**
- **Printer Does Not Pick Up or Feed the Paper/"No Paper" Error**
- **Cannot Print on the Disc Label**
- **Resolving Print Quality Problems**
- **Change to Offline (Windows)**
- **No Ink Level Appears in Canon IJ Printer Status Monitor (Windows)**

## Printer Does Not Print

**Check 1** Make sure printer is turned on.

If not, make sure the printer is securely plugged in and press ON button to turn on.

The **ON** lamp flashes while the printer is initializing. Wait until the **ON** lamp stops flashing and remains lit.

### ▶▶▶ Note

- If you are printing large data such as photos or other graphics, printing may take longer to start. The **ON** lamp flashes while the computer is processing data and sending it to the printer. Wait until printing starts.

**Check 2** Make sure that the paper output tray is at the normal print position.

When you are not using the multi-purpose tray, pull the paper output tray out to the front side until you see a ▲ and select **OK** on the touch screen.

**Check 3** Make sure that the cassette is correctly inserted.

If there is an object under the printer, the cassette cannot be correctly inserted and paper may not be correctly fed.

Make sure there are no objects under the printer and push the cassette flatly into the printer until it stops.

➔ [Loading Plain Paper in Cassette](#)

**Check 4** Make sure printer is properly connected to computer.

If you are using a USB cable, make sure it is securely connected to both the printer and the computer. When the USB cable is securely plugged in, check the following:

- If you are using a relay device such as a USB hub, disconnect it, connect the printer directly to the computer, and retry the printing. If printing starts normally, there is a problem with the relay device. Contact the vendor of the relay device.
- There could also be a problem with the USB cable. Replace the USB cable and retry the printing.

If you use the printer with a network connection, make sure the printer is correctly set up for network use.

➔ [Cannot Find Printer on Network](#) (Windows/macOS)

### ➤➤➤ Note

- Wi-Fi Connection Assistant allows you to diagnose and repair the network status.

Select the link below to download Wi-Fi Connection Assistant and install it.

➔ [Checking Printer Connection Status Using Wi-Fi Connection Assistant](#)

Refer to below in regard to starting up Wi-Fi Connection Assistant.

– **For Windows:**

➔ [Starting Up Wi-Fi Connection Assistant](#)

– **For macOS:**

➔ [Starting Up Wi-Fi Connection Assistant](#)

**Check 5** Make sure paper settings match information set for rear tray or cassette.

If the paper settings do not match the information set for the rear tray or cassette, an error message appears on the operation panel. Follow the instructions on the operation panel to solve the problem.

### ➤➤➤ Note

- You can select whether the message which prevents misprinting is displayed.
  - To change the message view setting when printing using the printer's operation panel:
    - ➔ [Feed settings](#)
  - To change the message view setting when printing using the Printer Driver:
    - ➔ [Changing the Printer Operation Mode](#) (Windows)
    - ➔ [Changing the Printer Operation Mode](#) (macOS)

**Check 6** If printing from a computer, delete unnecessary print jobs.

• **For Windows:**

➔ [Deleting the Undesired Print Job](#)

• **For macOS:**

➔ [Deleting the Undesired Print Job](#)

**Check 7** Are your printer's Printer Driver selected when printing?

The printer will not print properly if you are using a printer driver for a different printer.

• **For Windows:**

Make sure "Canon XXX series" (where "XXX" is your **printer's** name) is selected in the Print dialog box.

### ➤➤➤ Note

- If multiple printers are registered to your computer, set your printer as default printer to make the one selected by default.

## ➔ Default Printer Keeps Changing (Windows)

- **For macOS:**

Make sure your printer's name is selected in **Printer** in the Print dialog.

### »» Note

- If multiple printers are registered to your computer, select **Set as Default Printer** from **System Preferences > Printers & Scanners** for a printer to make the one selected by default.

## Check 8 Are you trying to print a large data file? (Windows)

If you are trying to print a large data file, it takes a long time to start printing.

If the printer does not start printing after a certain period of time, select **On** for **Prevention of Print Data Loss** on the **Print Options** dialog box.

For details, refer to [Page Setup Tab Description](#).

### »» Important

- Selecting **On** for **Prevention of Print Data Loss** may reduce print quality.
- After printing is completed, select **Off** for **Prevention of Print Data Loss**.

## Check 9 If printing from your computer, restart the computer.

Restart the computer and try printing again.

### »» Important

- For Windows:  
To restart your computer, choose **Restart** instead of **Shut down**.

## Printer Does Not Pick Up or Feed the Paper/"No Paper" Error

---

**Check 1** Check the printer is placed on the right spot.

Place the printer on a flat table or similar platform.

**Check 2** Make sure paper is loaded in the specified cassette or rear tray.

➔ [Paper Sources](#)

**Check 3** When loading paper, consider the following.

- When loading two or more sheets of paper, align the edges of the sheets before loading the paper.
- When loading two or more sheets of paper, make sure the paper stack does not exceed the paper load limit.

However, paper may not feed correctly at the maximum capacity, depending on the type of paper or environmental conditions (very high or low temperature and humidity). In such cases, reduce the amount of paper you load at a time to less than half of the paper load limit.

- Always load the paper in portrait orientation, regardless of the printing orientation.
- When you load the paper on the rear tray, place the print side facing UP and align the right and left paper guides with the paper stack.

➔ [Paper Sources](#)

- In the cassette, be sure to load only plain paper.
- When you load the paper on the cassette, place the print side facing DOWN and align the right/left/front paper guides with the paper stack.

➔ [Paper Sources](#)

**Check 4** Is paper too thick or curled?

➔ [Unsupported Media Types](#)

**Check 5** When loading envelopes, consider the following.

- When printing on envelopes, see [Loading Envelopes in Rear Tray](#), and prepare the envelopes before printing.

Once you have prepared the envelopes, load them in portrait orientation. If the envelopes are placed in landscape orientation, they will not feed properly.

**Check 6** Make sure media type and paper size settings match with loaded paper.

**Check 7** Open the feed slot cover to make sure that there are not any foreign objects in the rear tray.

If the paper tears in the rear tray, see [What to Do When Paper Is Jammed](#) to remove it.

If there are any foreign objects in the rear tray, be sure to turn off the printer, unplug it from the power supply, then remove the foreign object.

## ▶▶▶ Note

- If the feed slot cover is opened, close it slowly.
- See below if problem occurs right after jammed paper is removed from rear side.
  - ➔ [Removing Jammed Paper from Rear Side](#)

### Check 8 Clean Paper Feed Roller.

- ➔ [Cleaning Paper Feed Rollers](#)

## ▶▶▶ Note

- Cleaning the paper feed roller abrades it, so do this only when necessary.

### Check 9 If two or more sheets of paper feed from cassette at once, clean inside of cassette.

See below for cleaning cassette pads.

- ➔ [Cleaning Cassette Pads](#)

### Check 10 Are transport unit attached properly?

See [Rear View](#) for the positions of the transport unit and the rear cover.

If the measures above do not solve the problem, contact your nearest Canon service center to request a repair.

## Cannot Print on the Disc Label

---

- ➔ [Disc Label Printing Does Not Start](#)
- ➔ [Multi-Purpose Tray Does Not Feed Properly](#)
- ➔ [Multi-Purpose Tray Jammed](#)

### Disc Label Printing Does Not Start

---

#### A

##### **Check 1** Is multi-purpose tray placed properly?

Place the multi-purpose tray properly again and tap **OK** on the touch screen.

Use the multi-purpose tray supplied with this printer.

For more on placing the multi-purpose tray, see [Placing a Printable Disc](#).

##### **Check 2** Is printable disc placed on multi-purpose tray?

Place the printable disc on the multi-purpose tray properly and tap **OK** on the touch screen.

Use the multi-purpose tray supplied with this printer.

For more on placing the multi-purpose tray, see [Placing a Printable Disc](#).

##### **Check 3** Has time elapsed since you placed the multi-purpose tray?

If a certain period of time has elapsed since you placed the multi-purpose tray, it may be ejected.

Follow the instructions on the touch screen and try the operation again.

### Multi-Purpose Tray Does Not Feed Properly

---

#### A

##### **Check 1** Is multi-purpose tray placed properly?

Place the multi-purpose tray properly again and tap **OK** on the touch screen.

Use the multi-purpose tray supplied with this printer.

For more on placing the multi-purpose tray, see [Placing a Printable Disc](#).

##### **Check 2** Unrecognizable printable disc may be placed.

Canon recommends that you use printable discs specially processed to be printed on by an inkjet printer.

## Multi-Purpose Tray Jammed

---

### A

Pull out the multi-purpose tray gently.

If the multi-purpose tray cannot be pulled out, cycle the power switch. The multi-purpose tray will automatically be ejected.

When the multi-purpose tray is pulled out, place the multi-purpose tray again and retry printing. For more on placing the multi-purpose tray, see [Placing a Printable Disc](#).

If the multi-purpose tray is still jammed, check if there is a problem with the printable disc.

➡ [Multi-Purpose Tray Does Not Feed Properly](#)

## Resolving Print Quality Problems

---

If the print results are unsatisfactory due to white streaks, misaligned/distorted lines, or uneven colors, check the paper and print quality settings first.

### Check 1 Do page size and media type settings match size and type of loaded paper?

If these settings do not match, it is not possible to obtain the proper result.

If you are printing a photograph or an illustration, an incorrect paper type setting may reduce the quality of the printout color.

Also, if you print with an incorrect paper type setting, the printed surface may be scratched.

In borderless printing, uneven coloring may occur depending on the combination of the paper type setting and the loaded paper.

The method for checking the paper and print quality settings differs depending on what you are using your printer for.

- **Copying from printer or printing from memory card**

Check the settings using the operation panel of the printer.

- ➔ [Setting Items for Copying](#)
- ➔ [Setting Items for Photo Printing Using Operation Panel](#)

- **Printing from your computer**

Check the settings using the Printer Driver.

- ➔ [Basic Printing Setup](#)

- **Printing from your smartphone/tablet using App**

Check the settings on the App.

- ➔ Print Photos from Your Smartphone

### Check 2 Make sure appropriate print quality is selected (see list above).

Select a print quality suited to the paper and to what you are printing. If you notice blurs or uneven colors, increase the print quality setting and retry the printing.

### Check 3 If problem is not resolved, click on illustration that corresponds to problem.

[Ink Does Not Come Out](#)

Smudged](#)

[Uneven Colors](#)

[Streaked Colors](#)

## ▶▶▶ Note

- This web page contains information about several models. Depending on the specifications of the printer you are using, some of the features described (connection, scanner/copy and etc.) may not apply.

For details about the functions of your printer, see [Product Specifications](#).

## Ink Does Not Come Out/Blurry or Fuzzy/Inaccurate or Bleeding Colors/Streaks

Ink Does Not Come Out

Blurry or Fuzzy

Inaccurate or Bleeding Colors

Streaks

### ▶▶▶ Note

- If printouts are blank, black does not print, is faint, or has a blue or red tint, refer to this web page.

**Check 1** Check paper and print quality settings.

➔ [Resolving Print Quality Problems](#)

**Check 2** Check status of ink tanks. Replace ink tank if ink has run out.

➔ [Checking Ink Status on the Touch Screen](#)

➔ [Replacing Ink Tanks](#)

**Check 3** Are the orange tape and plastic wrap still on the ink tank?

Make sure all the protective plastic wrap is peeled off to expose the Y-vent area, as shown below (A).

If the orange tape remains on the ink tank (B), peel it off.

## Check 4 Are the print head nozzles clogged?

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzles.

### Step 1 Printing a Nozzle Check Pattern

After printing the nozzle check pattern, examine the pattern.

- From the printer

➡ [Printing the Nozzle Check Pattern](#)

If the pattern is not printed correctly, Check if the ink tank for the problem color is empty.

if the ink tank is not empty, go to the next step.

### Step 2 Clean the print head.

After cleaning the print head, print the nozzle check pattern and check the result.

- From the printer

➡ [Cleaning the Print Head](#)

If it still does not improve, go to the next step.

### Step 3 Clean the print head again.

After cleaning the print head again, print the nozzle check pattern and check the result.

If it still does not improve, go to the next step.

### Step 4 Clean the print head deeply.

After cleaning the print head deeply, print the nozzle check pattern and check the result.

- From the printer

➡ [Deep Print Head Cleaning](#)

If it does not improve, turn off the printer, wait for more than 24 hours without unplugging the power supply, and go to the next step.

### Step 5 Clean the print head deeply again.

After cleaning the print head deeply again, print the nozzle check pattern and check the result.

If it still does not improve, go to the next step.

### Step 6 Request a repair

If problem is not resolved after performing print head deep cleaning twice, the print head may be damaged. Contact your nearest Canon service center to request a repair.

For details on printing the nozzle check pattern, print head cleaning, and print head deep cleaning, see [If Printing Is Faint or Uneven](#).

## Check 5 When using paper with one printable surface, check the correct printable side of the paper.

Printing on the wrong side of such paper may cause unclear prints or prints with reduced quality.

When you load paper on the rear tray, load paper with the printable side facing up. When you load paper in the cassette, load paper with the printable side facing down.

Refer to the instruction manual supplied with the paper for detailed information on the printable side.

- **When copying, see also the sections below:**

## Check 6 Is platen glass dirty?

Clean the platen glass.

➔ Cleaning Platen and Document Cover

**Check 7** Make sure original is properly loaded on platen.

When you load the original on the platen, load it with the side to be copied facing down.

➔ [Loading Originals](#)

**Check 8** Is copy source a printed paper by printer?

If you use a printout done by this printer as the original, print quality may be reduced depending on the condition of the original.

Print from the printer directly, or reprint from the computer if you can reprint from it.

## Lines Are Misaligned/Distorted

### ▶▶▶ Note

- For the case of misaligned or distortion, refer to this web page.

**Check 1** Check paper and print quality settings.

➔ [Resolving Print Quality Problems](#)

**Check 2** Perform print head alignment.

If printed lines are misaligned/distorted or print results are otherwise unsatisfactory, adjust the print head position.

➔ [Aligning the Print Head](#)

### ▶▶▶ Note

- If the problem is not resolved after performing the print head alignment, perform print head alignment manually.

➔ [Aligning the Print Head Manually](#)

**Check 3** Increase print quality and try printing again.

Increasing the print quality using operation panel of the printer or from computer may improve the print result.

## Paper Is Smudged/Printed Surface Is Scratched/Ink Blots/Paper Curl

**Check 1** Check paper and print quality settings.

➔ [Resolving Print Quality Problems](#)

**Check 2** Check paper type.

Make sure you are using the right paper for what you are printing. To print data with high color saturation such as photographs or images with dark colors, we recommend that you use **Photo Paper Plus Glossy II** or other Canon specialty paper.

➔ [Supported Media Types](#)

**Check 3** Correct curl before loading paper.

When using **Photo Paper Plus Semi-gloss**, even if the sheet is curled, load one sheet at a time as it is. Rolling this paper in the opposite direction to flatten it may crack the paper surface and reduce the print quality.

We recommend putting unused paper back into the package and storing it flat.

- **Plain Paper:**

Turn the paper over and reload it to print on the other side.

- **Other Paper such as envelope:**

If the paper corners curl more than 0.1 in. / 3 mm (A) in height, the paper may smudge or may not feed properly. Follow the instructions below to correct the paper curl.

1. Roll up paper in opposite direction to paper curl as shown below.

2. Check that paper is now flat.

We recommend printing curl-corrected paper one sheet at a time.

### ►►► Note

- Depending on paper type, the paper may smudge or may not feed properly even if it is not curled inward. Follow the instructions below to curl the paper outward up to 0.1 in. / 3 mm (C) in height before printing. This may improve the print result.

(B) Print side

We recommend feeding paper that has been curled outward one sheet at a time.

#### Check 4 Set printer to prevent paper abrasion.

Adjusting the setting to prevent paper abrasion will widen the clearance between the print head and the paper. If you notice abrasion even with the media type set correctly to match the paper, set the printer to prevent paper abrasion using the operation panel or the computer.

This may reduce the print speed.

\* Once you have finished printing, undo this setting. Otherwise, it will apply to subsequent print jobs.

Select **(Setup)** on **HOME** screen, select **Printer settings** > **Print settings** in this order, and then set **Prevent paper abrasion** to **ON**.

➔ [Changing Settings from Operation Panel](#)

#### Check 5 If ink bleeds, make sure that **Improve bleeding and thickened black text/lines (plain paper)** is checked. (Windows)

It may be possible to improve the bleeding of characters and lines when printing on plain paper.

Set it at **Print Options** dialog box on **Page Setup** sheet in the Printer Driver.

Restore the setting after printing.

➔ [Improve bleeding and thickened black text/lines \(plain paper\)](#)

**Check 6** If brightness is set low, increase brightness setting and try printing again.

If you are printing with a low brightness setting on plain paper, the paper may absorb too much ink and become wavy, causing paper abrasion.

- Printing from your computer (Windows)

Check the brightness setting in the Printer Driver.

➔ [Adjusting Brightness](#)

- Copying

➔ [Setting Items for Copying](#)

**Check 7** Is platen glass dirty?

Clean the platen glass.

➔ [Cleaning Platen and Document Cover](#)

**Check 8** Is paper feed roller dirty?

Clean paper feed roller.

➔ [Cleaning Paper Feed Rollers](#)

### ▶▶▶ Note

- Cleaning the paper feed roller abrades it, so do this only when necessary.

**Check 9** Is inside of printer dirty?

During 2-sided printing, ink may stain the inside of the printer, smudging the printout.

Perform bottom plate cleaning to clean inside of printer.

➔ [Cleaning Inside the Printer \(Bottom Plate Cleaning\)](#)

### ▶▶▶ Note

- To prevent staining inside the printer, be sure to set the correct paper size.

**Check 10** Set longer ink drying time.

This allows the printed surface to dry, preventing smudges and scratches.

- **For Windows:**

Set the waiting time using Remote UI.

1. Open **Remote UI** on the web browser of your device.

➔ [Configuration Changes / Display Printer Status Using Web Browser](#)

2. Select **Log in** on Remote UI.

**▶▶▶ Note**

- If you specify the administrator password, enter the password.

3. Select **Printer settings**

4. Select **Ink drying wait time**

• **For macOS:**

Set the waiting time using Remote UI.

➡ [Opening Remote UI for Maintenance](#)

## Vertical Line Next to Image

### Check Is loaded paper size correct?

If the loaded paper is larger than the size you specified, vertical lines (A) may appear in the left margin or the both margins.

Set the paper size to match the loaded paper.

➔ [Resolving Print Quality Problems](#)

### ▶▶▶ Note

- The direction or pattern of the vertical lines (A) may vary depending on the image data or the print setting.
- This Product performs automatic cleaning when necessary to keep printouts clean. A small amount of ink is ejected for cleaning.

Although the ink is normally ejected onto the ink absorber at the outer edge of the paper, it may get onto the paper if the loaded paper is larger than the set size.

## Images Incomplete/Cannot Complete Printing

If the printing of photos, images, stops in the middle of printing and cannot be printed to the end, check the following items.

**Check 1** Select setting not to compress printing data(Windows).

If you select the setting not to compress the printing data with an application software you are using, the printing result may be improved.

Click **Print Options** on **Page Setup** sheet of the Printer Driver. Select the **Do not allow application software to compress print data** check box and click **OK**.

### ▶▶▶ Important

- Clear the check box once printing is complete.

**Check 2** Are you trying to print a large data file? (Windows)

If you are trying to print a large data file, printing may not be performed properly due to missing print data.

Select **On** for **Prevention of Print Data Loss** on the **Print Options** dialog box of the Printer Driver.

For details, refer to [Page Setup Tab Description](#).

### ▶▶▶ Important

- Selecting **On** for **Prevention of Print Data Loss** may reduce print quality.
- After printing is completed, select **Off** for **Prevention of Print Data Loss**.

**Check 3** Your hard disk may not have sufficient free space to store job.

Delete unnecessary files to free up disk space.

## Lines Incomplete or Missing (Windows)

	Tokyo	London
Jan.	12,000	10,500
Feb.	11,500	10,800
Mar.	13,800	12,800
Apr.	12,000	10,500
May.	11,500	10,800
June	13,800	12,800

### Check 1 Are you using Page Layout Printing or Binding Margin function?

When the Page Layout Printing or Binding margin function is in use, thin lines may not be printed. Try thickening the lines in the document.

### Check 2 Are you trying to print a large data file? (Windows)

If you are trying to print a large data file, printing may not be performed properly due to missing print data.

Select **On** for **Prevention of Print Data Loss** on the **Print Options** dialog box of the Printer Driver.

For details, refer to [Page Setup Tab Description](#).

### »» Important

- Selecting **On** for **Prevention of Print Data Loss** may reduce print quality.
- After printing is completed, select **Off** for **Prevention of Print Data Loss**.

## Back of Paper Is Smudged

**Check 1** Check paper and print quality settings.

➔ [Resolving Print Quality Problems](#)

**Check 2** Perform bottom plate cleaning to clean inside of printer.

➔ [Cleaning Inside the Printer \(Bottom Plate Cleaning\)](#)

### ▶▶▶ Note

- During 2-sided printing, or too much printing, ink may stain the inside of the printer.

## Uneven or Streaked Colors

**Check 1** Increase print quality and try printing again.

Increasing the print quality using operation panel of the printer or from computer may improve the print result.

**Check 2** Perform print head alignment.

➔ [Aligning the Print Head](#)

### ▶▶▶ Note

- If the problem is not resolved after performing the print head alignment, perform print head alignment manually.

➔ [Aligning the Print Head Manually](#)

## Change to Offline (Windows)

---

If the printer cannot communicate with the computer, an error message "Offline" may be displayed when printing. To bring the printer back online, try the following.

1. Check the connection (USB/Wi-Fi).

**For USB connection:**

Make sure that the USB-connected printer is recognized by the computer.

**For Wi-Fi connections:**

Make sure that  icon appears on the printer's touch screen.

2. Turn off printer and then turn it on again.

Confirm that the offline mode has been disabled. If the printer is still offline, proceed to the next step.

3. Check the name of the MP Drivers (Printer Driver).

Check the names of the printer and MP Drivers (Printer Driver) match. Set the using printer as default.

➡ Default Printer Keeps Changing (Windows)

Confirm that the offline mode has been disabled. If the printer is still offline, proceed to the next step.

4. Make sure that printer is not set to **Use Printer Offline** mode.

**For Windows 11:**

1. Open Set Printers & scanners.

2. Click the name of printer you want to configure.

3. Click **Print preferences**.

Print preferences window opens.

4. Click **Maintenance** sheet.

5. Click **View Printer Status**.

The Canon IJ Status Monitor window is displayed.

6. Click **Display Print Queue** of the Canon IJ Status Monitor window.

The Print Queue window is displayed.

7. Click **Printer** menu in the window displayed.

Make sure **Use Printer Offline** is not selected.

If it is selected, click **Use Printer Offline** to deselect it.

Confirm that the offline mode has been disabled. If the printer is still offline, proceed to the next step.

#### **For Windows 10:**

1. Open Set Printers & scanners.

2. Click the name of printer you want to configure, and select **Open queue**.

The Print Queue window is displayed.

3. Click **Printer** menu in the window displayed.

Make sure **Use Printer Offline** is not selected.

If it is selected, click **Use Printer Offline** to deselect it.

Confirm that the offline mode has been disabled. If the printer is still offline, proceed to the next step.

5. For Wi-Fi/Wired LAN connections, use Wi-Fi Connection Assistant to change settings.

Diagnose and repair the network connections using Wi-Fi Connection Assistant.

Download Wi-Fi Connection Assistant from the below page, and install it on your computer.

- ➔ [Checking Printer Connection Status Using Wi-Fi Connection Assistant](#)

Refer to below in regard to starting up Wi-Fi Connection Assistant.

- ➔ [Starting Up Wi-Fi Connection Assistant](#)

Confirm that the offline mode has been disabled. If the printer is still offline, proceed to the next step.

6. Uninstall MP Drivers (Printer Driver) and reinstall MP Drivers (Printer Driver).

If your MP Drivers (Printer Driver) version is old or not installed correctly, you may not be able to print.

Confirm that the offline mode has been disabled. If the printer is still offline, proceed to the next step.

7. Restart computer.

The computer may be unstable for some reason. Restart the computer and try to print.

#### **»»» Important**

- To restart your computer, choose **Restart** instead of **Shut down**.

## Scanning Problems (Windows)

---

- [Scanning Problems](#)

## **Scanning Problems**

---

- **Scanner Does Not Work**
- **ScanGear (Scanner Driver) Does Not Start**

## Scanner Does Not Work

---

**Check 1** Make sure that your scanner or printer is turned on.

**Check 2** Check for any printer errors.

For messages, see When Error Occurred.

**Check 3** Connect the USB cable to a different USB port on the computer.

**Check 4** If the USB cable is connected to a USB hub, remove it from the USB hub and connect it to a USB port on the computer.

**Check 5** With network connection, check the connection status and reconnect as needed.

➔ [Network Scan Settings](#)

**Check 6** Restart the computer.

**Check 7** Reinstall MP Drivers from the Setup CD-ROM or our website.

## ScanGear (Scanner Driver) Does Not Start

---

**Check 1** Make sure MP Drivers is installed.

If not installed, install MP Drivers from the Setup CD-ROM or our website.

**Check 2** Select your scanner or printer on the application's menu.

### ▶▶▶ Important

- If your scanner or printer name is displayed multiple times, select the one that does not include WIA.

### ▶▶▶ Note

- The operation may differ depending on the application.
- Use the WIA driver when scanning from a WIA-compliant application.
  - ➔ Scanning with WIA Driver

**Check 3** Make sure that the application supports TWAIN.

You cannot start ScanGear (scanner driver) from applications not supporting TWAIN.

**Check 4** Scan and save images with Scan Utility and open the files in your application.

## Scanning Problems (macOS)

---

- Scanning Problems

## **Scanning Problems**

---

- **Scanner Does Not Work**
- **Scanner Driver Does Not Start**

## Scanner Does Not Work

---

**Check 1** Check that your scanner or printer is turned on.

**Check 2** Check for any printer errors.

For messages, see *When Error Occurred*.

**Check 3** With network connection, check the connection status and reconnect as needed.

**Check 4** With USB connection, connect the USB cable to a different USB port on the computer.

**Check 5** If the USB cable is connected to a USB hub, remove it from the USB hub and connect it to a USB port on the computer.

**Check 6** Restart the computer.

**Check 7** To scan from the printer's operation panel with USB connection, click **Scan-from-Operation-Panel Settings** in the **Settings (General Settings)** dialog, and then check that the following checkboxes are selected.

- Your scanner or printer
- **Enables scanning from the operation panel**

## Scanner Driver Does Not Start

---

**Check 1** Make sure the application software supports AirPrint.

**Check 2** Select your scanner or printer on the application's menu.

### ▶▶▶ Note

- The operation may differ depending on the application.

**Check 3** Scan and save images with IJ Scan Utility Lite and open the files in your application.

**Check 4** Your scanner may be locked. (Personal scanners only)

If IJ Scan Utility Lite or the application is running, exit it. Slide the scanner lock switch to the release position (  ), then reconnect the USB cable.

## **Mechanical Problems**

---

- **Printer Does Not Turn On**
- **Printer Turns Off Unexpectedly or Repeatedly**
- **USB Connection Problems**
- **Switching Printer's Connection to Network or Devices**
- **Wrong Language Appears in Touch Screen**

## Printer Does Not Turn On

---

**Check 1** Press **ON** button

➔ [Turning the Printer On and Off](#)

**Check 2** Make sure power cord is securely connected to printer, and then turn on again.

The Power Cord Connector is slightly oblique.

**Check 3** Unplug printer, leave it for at least 2 minutes, and then plug it back in and turn on again.

If this does not solve the problem, contact your nearest Canon service center to request a repair.

## Printer Turns Off Unexpectedly or Repeatedly

---

**Check** If printer is set to turn off automatically after a certain time, disable this setting.

If you have set the printer to turn off automatically after a specified time, the power will shut off by itself once that time has elapsed.

1. Check that printer is turned on.
2. Select  (**Setup**) on **HOME** screen.
3. Select  **ECO**.
4. Select **Energy saving settings**.
5. Select **Auto power off**.
6. Select **Never**.

The setting to shut off the power automatically is disabled.

## USB Connection Problems

If the printer connected to the computer via USB is not recognized, check the following items.

➔ [USB Connection Not Recognized](#)

The following problems may occur even though the USB connection is recognized.

- Printing (scanning) is slow.
- Hi-Speed USB connection does not work.
- A message such as "**This device can perform faster**" appears(Windows).

If the above is the case, check the following.

➔ [USB Connection Does Not Work Properly](#)

### ▶▶▶ Note

- If your system environment does not support Hi-Speed USB, the printer operates at the slower speed of Full-Speed or Low-Speed. In this case, the printer works properly but printing (scanning) speed may slow down due to the communication speed.

## USB Connection Not Recognized

**Check 1** Make sure printer is turned on.

**Check 2** Unplug the USB cable from the printer and the computer, and then connect it again.

As the illustration below, the USB port is at the back of the printer.

### ▶▶▶ Important

- Check the orientation and angle of the "Type-B" connector when connecting to the printer. The connection part is slightly oblique. For details, refer to the instruction manual supplied with the USB cable.

**Check 3** Check that **Enable bidirectional support** is selected in **Ports** sheet of **Printer properties** dialog box(Windows).

If not, select it to enable bidirectional support.

➔ [Opening Printer Driver's Setup Screen](#)

**Check 4** Initialize the printer settings.

Select (**Setup**) on **HOME** screen > **Printer settings** > **Reset settings** > **Reset all**.

➔ [Reset settings](#)

After initializing the printer settings, redo setup.

Refer to Setup Guide and redo setup.

## **USB Connection Does Not Work Properly**

**Check** Check following to make sure your system environment supports Hi-Speed USB connection.

- The types of USB cables that can be used differ depending on your printer. Check the shape of the USB cable connection of the printer.

➔ [What Is USB Cable?](#)

- Does the USB port on your computer support Hi-Speed USB connection?
- Does the USB cable or the USB hub support Hi-Speed USB connection?

Be sure to use a certified Hi-Speed USB cable. We recommend that the USB cable be no longer than 10 feet / 3 meters or so.

- Is the Hi-Speed USB driver working properly on your computer?

Make sure the latest Hi-Speed USB driver is working properly and install the latest version of the Hi-Speed USB driver for your computer, if necessary.

### **▶▶▶ Important**

- For more information, contact the manufacturer of your computer, USB cable, or USB hub.

## Wrong Language Appears in LCD

---

Follow the instructions below to select your language.

1. Select  (**HOME**) button.

2. Select  (**Setup**).

➔ [Using Touch Screen](#)

3. Select .

4. Select fifth setting item from top.

5. Select a language for touch screen.

6. Select button on lower left.

The desired language appears.

## **Installation and Download Problems**

---

- **Failed to MP Drivers (Printer Driver) Installation (Windows)**
- **Cannot Proceed Beyond Printer Connection Screen (Cannot Find Printer Connected via USB)**
- **Updating MP Drivers (Printer Driver) in Network Environment (Windows)**
- **Disable Function to Send Usage Information of Printer**

## Failed to MP Drivers (Printer Driver) Installation (Windows)

---

If the MP Drivers (Printer Driver) were not installed correctly, make sure that all **Windows Updates** have been applied. If all **Windows Updates** have not been applied, apply all **Windows Updates**.

After confirming **Windows Update**, perform the following operations to install the MP Drivers (Printer Driver).

1. Open screen to uninstall MP Drivers (Printer Driver).

**For Windows 11:**

Select **Settings > Apps**.

Select **Apps & features**.

**For Windows 10:**

Select **Settings > Apps**.

**For Windows 8.1 / Windows 7:**

Select **Control Panel > Programs and Features**.

2. Check if there is "**Canon XXX series Driver**" or "**Canon XXX series Printer Driver**" you want to install in list.

"XXX" is the model name.

3. If you find MP Drivers (Printer Driver) for printer you want to install, uninstall it.

If not found, proceed to the next step.

4. Restart computer.

After restarting, install the latest MP Drivers (Printer Driver).

### **»» Important**

- For Windows:

To restart your computer, choose **Restart** instead of **Shut down**.

## Cannot Proceed Beyond Printer Connection Screen (Cannot Find Printer Connected via USB)

If you cannot proceed beyond the **Printer Connection** screen, check the following.

**Check 1** Make sure USB cable is securely plugged in to printer and computer.

Connect the printer and the computer using a USB cable as the illustration below. The USB port is located at the back of the printer.

### ►► Important

- Check the orientation and angle of the "Type-B" connector when connecting to the printer. The connection part is slightly oblique. For details, refer to the instruction manual supplied with the USB cable.

**Check 2** Follow procedure below to connect printer and computer again.

1. Unplug USB cable from printer and computer and connect it again.
2. Make sure no printer operation is in progress and turn off.
3. Turn on printer.

**Check 3** Follow the steps below to install MP Drivers (Printer Driver) again.

1. Download the latest MP Drivers (Printer Driver).
2. Turn off printer.
3. Restart computer.

After restarting, install the latest MP Drivers (Printer Driver) downloaded in step 1.

### ►► Important

- When installing the MP Drivers (Printer Driver), make sure you select the correct printer name.

- For Windows:

To restart your computer, choose **Restart** instead of **Shut down**.

## Updating MP Drivers (Printer Driver) in Network Environment (Windows)

---

Download the latest MP Drivers (Printer Driver) in advance.

Download the latest MP Drivers (Printer Driver) for your model on the download page of the Canon website.

After the download is completed, overwrite and install the new version of the MP Drivers (Printer Driver) according to the specified installation procedure.

### **Note**

- The network settings on the printer are not affected, so the printer can be used on the network without redoing settings.

## **Errors and Messages**

---

- **When Error Occurred**
- **Message Is Displayed**

## When Error Occurred

If an error occurs while printing, for example, if the paper runs out or jams, a troubleshooting message is displayed automatically. For some errors, a support code (error number) is also displayed.

Take the appropriate action described in the message.

### When a Support Code and a Message are displayed on the Computer Screen (Windows):

Canon [series] series - [model] [model].canon.com

Support Code : 1000

The paper set for printing is not loaded.  
Media Type : Plain Paper  
Page Size : A4  
Paper Source: Rear Tray

To print with different settings click [Cancel Printing] to cancel printing.  
Then, check the settings above on the printer properties screen, and try printing again.

1. Load paper into the rear tray correctly.
2. Tap [OK] on the printer.

If Error Persists

Cancel Printing

## When a Support Code and a Message are displayed on the Printer's Touch Screen:

For details on how to resolve errors with Support Codes, see [List of Support Codes for Printer Errors](#).

For details on how to resolve errors without Support Codes, see [Message Is Displayed](#).

## Message Is Displayed

This section describes some of the messages.

If a message is displayed on the printer's touch screen, see below.

➔ [Message Is Displayed on Printer's Touch Screen](#)

If a message is displayed on the computer, see below.

➔ [Error Regarding Automatic 2-sided Printing Is Displayed](#)

➔ [Error Regarding Power Cord Being Unplugged Is Displayed \(Windows\)](#)

➔ [Writing Error/Output Error/Communication Error \(Windows\)](#)

➔ [Other Error Messages \(Windows\)](#)

## Message Is Displayed on Printer's Touch Screen

Check the message and take appropriate action.

- **Power was not turned off correctly the last time. Press the  button when turning power off.**

The printer may have been unplugged while the power was still on.

Select **OK** on the printer's touch screen to cancel the error.

Refer to [Turning the Printer On and Off](#) for the correct way to turn the power off.

- **Cannot connect to the server. Please wait a while and try again.**

The printer cannot connect to the server due to a communication error.

Select **OK** on the printer's touch screen to cancel the error and try again after a while.

- **Saved data is not of a supported type.**

- There is no image data or document data saved on the memory card that can be read by this printer.
- The printer may not recognize the file if the file name or folder path contains certain characters. Use only alphanumeric characters.
- Image data edited or processed on a computer must be printed from the computer.

### ▶▶▶ Note

- When a photo which has been processed on a computer is selected, "?" is displayed on the printer's touch screen.

## Error Regarding Automatic 2-sided Printing Is Displayed

**Check** See Automatic 2-sided Printing Problems and take the appropriate action.

## Error Regarding Power Cord Being Unplugged Is Displayed (Windows)

The printer may have been unplugged while it was on.

Check the error message displayed on the computer and click **OK**.

The printer starts printing.

Refer to [Turning the Printer On and Off](#) for the correct way to turn the power off.

## Writing Error/Output Error/Communication Error (Windows)

**Check 1** If the **ON** lamp is off, make sure printer is plugged in and turn on.

The **ON** lamp flashes while the printer is initializing. Wait until the **ON** lamp stops flashing and remains lit.

**Check 2** Make sure printer is properly connected to computer.

If you are using a USB cable, make sure it is securely connected to both the printer and the computer. When the USB cable is securely plugged in, check the following:

- If you are using a relay device such as a USB hub, disconnect it, connect the printer directly to the computer, and retry the printing. If printing starts normally, there is a problem with the relay device. Contact the vendor of the relay device.
- There could also be a problem with the USB cable. Replace the USB cable and retry the printing.

If you use the printer over a LAN, make sure the printer is correctly set up for network use.

**Check 3** Make sure MP Drivers are installed correctly.

Refer to [Updating the Driver](#) to uninstall unnecessary drivers and install the latest drivers.

**Check 4** When printer is connected to your computer with a USB cable, check device status from your computer.

Follow the procedure below to check the device status.

1. Select **Control Panel > Hardware and Sound > Device Manager**.

### ▶▶▶ Note

- If the **User Account Control** screen is displayed, select **Yes**.

2. Open **USB Printing Support Properties**.

Double-click **Universal Serial Bus controllers** and **USB Printing Support**.

### ▶▶▶ Note

- If the **USB Printing Support Properties** screen is not displayed, make sure the printer is correctly connected to the computer.

➔ **Check 2** [Make sure printer is properly connected to computer](#).

3. Click **General** tab and check for a device problem.

If a device error is shown, see Windows Help to resolve it.

## Other Error Messages (Windows)

**Check** If an error message is displayed somewhere other than printer status monitor, check the following:

- **"Could not spool successfully due to insufficient disk space"**

Delete any unnecessary files to increase the amount of free space on the disk.

- **"Could not spool successfully due to insufficient memory"**

Close other applications to increase the available memory.

If you still cannot print, restart your computer and retry the printing.

- **"Printer driver could not be found"**

Refer to [Updating the Driver](#) to uninstall unnecessary drivers and install the latest drivers.

- **"Could not print Application name - File name"**

Try printing again once the current job is complete.

## When Error Occurred

If an error occurs while printing, for example, if the paper runs out or jams, a troubleshooting message is displayed automatically. For some errors, a support code (error number) is also displayed.

Take the appropriate action described in the message.

### When a Support Code and a Message are displayed on the Computer Screen (Windows):

Canon [series] series - [model] [model].canon.com

Support Code : 1000

The paper set for printing is not loaded.  
Media Type : Plain Paper  
Page Size : A4  
Paper Source: Rear Tray

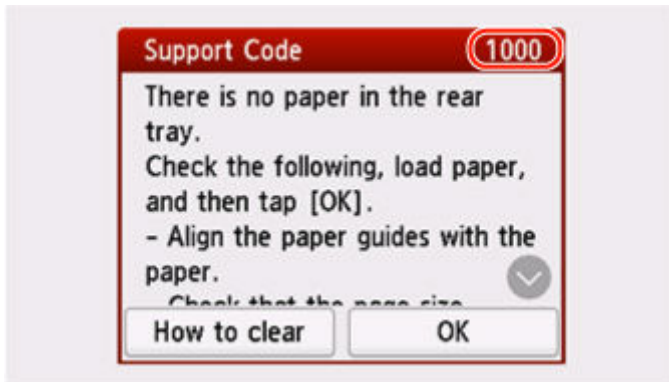

To print with different settings click [Cancel Printing] to cancel printing.  
Then, check the settings above on the printer properties screen, and try printing again.

1. Load paper into the rear tray correctly.
2. Tap [OK] on the printer.

If Error Persists

Cancel Printing

## When a Support Code and a Message are displayed on the Printer's Touch Screen:

For details on how to resolve errors with Support Codes, see [List of Support Codes for Printer Errors](#).

For details on how to resolve errors without Support Codes, see [Message Is Displayed](#).

## List of Support Codes for Printer Errors

Support codes are displayed on the printer's touch screen and your computer screen when errors occur.

A "support code" is an error number, and is displayed along with an error message.

When an error occurs, check the support code and take the appropriate action in response.

### **Note**

- If no support code is displayed but the paper is not fed or output normally, see [What to Do If Paper Is Not Fed/Output Normally](#).

## What to Do When Paper Is Jammed

If a paper jam occurs during printing (support code 1300/1303/1304/1313 is displayed), follow the procedure below.

### ▶▶▶ Note

- If the paper is not jammed (no support code displayed) but the paper is not fed or output normally, see [What to Do If Paper Is Not Fed/Output Normally](#).

#### Check 1 Is the multi-purpose tray stored correctly?

If the multi-purpose tray is stored incorrectly, the printer may detect it as a paper jam.

- ➔ [Storing the Multi-purpose Tray](#)

#### Check 2 Is the jammed paper visible in the paper output slot (A)?

- ➔ [Removing Jammed Paper through Paper Output Slot](#)

#### Check 3 Are there any foreign objects in the feed slot of the rear tray (B)?

- ➔ [What to Do If Paper Is Not Fed/Output Normally](#)

#### Check 4 Is the jammed paper visible in the feed slot of the rear tray (B)?

Remove any paper other than the jammed paper on the rear tray, and then check if the jammed paper is visible in the feed slot of the rear tray.

- ➔ [Removing Jammed Paper through Feed Slot of Rear Tray](#)

#### Check 5 Is the jammed paper visible in the feed slot of the cassette (C)?

Retract the paper output support and the paper output tray, remove the cassette, and then check if the jammed paper is visible in the feed slot of the cassette.

- ➔ [Removing Jammed Paper through Feed Slot of Cassette](#)

**Check 6** If the jammed paper is not visible in the paper output slot or the feed slot.

➔ [Removing Jammed Paper inside Printer](#)

## Storing the Multi-purpose Tray

When the multi-purpose tray is not in use, store it in the multi-purpose tray storage compartment on the back of the cassette.

➔ [How to Detach / Attach Multi-purpose Tray](#)

If the measures above do not solve the problem, check **Check 2** through **Check 6**.

## Removing Jammed Paper through Paper Output Slot

1. Hold jammed paper firmly with both hands and pull it out slowly.

Slowly pull out the paper so as not to tear it.

### ➤➤➤ Note

- If you cannot pull out the paper, turn the printer back on without pulling forcibly. The paper may be ejected automatically.

Tap **Stop** on the printer's touch screen to stop printing, and then turn off the printer.

- If the paper cannot be pulled out or is torn, open the printer's scanning unit / cover and remove jammed paper inside the printer.

➔ [Removing Jammed Paper inside Printer](#)

2. Select **OK** on printer's touch screen.

The printer resumes printing. Reprint the page you were printing if it was not printed properly due to the paper jam.

If you turned off the printer in step 1, all jobs in the print queue are canceled. Redo the printing.

## ►►► Note

- When reloading the paper, make sure you are using suitable paper and loading it correctly.
- We recommend using paper sizes other than A5 to print documents with photos or graphics. A5 paper may curl and jam as it leaves the printer.

➔ [1240 error is displayed](#)

➔ [1259 error is displayed](#)

If the measures above do not solve the problem, a bit of paper may remain in the printer. See [Removing Jammed Paper inside Printer](#).

## Removing Jammed Paper through Feed Slot of Rear Tray

1. Hold jammed paper firmly with both hands and pull it out slowly.

Slowly pull out the paper so as not to tear it.

## ►►► Note

- If the paper cannot be pulled out or is torn, refer to the following page to detach the transport unit and then pull out the jammed paper from the feed slot of the rear tray.

➔ [Removing Jammed Paper from Rear Side](#)

2. Load paper in rear tray.

➔ [Loading Photo Paper / Plain Paper in Rear Tray](#)

➔ [Loading Envelopes in Rear Tray](#)

## ►►► Note

- Make sure you are using suitable paper and loading it correctly.
- We recommend using paper sizes other than A5 to print documents with photos or graphics. A5 paper may curl and jam as it leaves the printer.

3. Select **OK** on printer's touch screen.

The printer resumes printing. Reprint the page you were printing if it was not printed properly due to the paper jam.

➔ [1240 error is displayed](#)

➔ [1259 error is displayed](#)

If the measures above do not solve the problem, a bit of paper may remain in the printer. See [Removing Jammed Paper inside Printer](#).

## Removing Jammed Paper through Feed Slot of Cassette

1. Retract paper output support and paper output tray, and close operation panel.
2. Hold jammed paper firmly with both hands and pull it out slowly.

Slowly pull out the paper so as not to tear it.

### ▶▶▶ Note

- If the paper cannot be pulled out or is torn, detach the rear cover and remove the jammed paper from the rear side.

➔ [Removing Jammed Paper from Rear Side](#)

3. Load paper in cassette.

➔ [Loading Plain Paper in Cassette](#)

### ▶▶▶ Note

- The loadable paper in the cassette is A4, A5 or B5 plain paper.

4. Open operation panel, and pull out paper output tray and paper output support.
5. Select **OK** on printer's touch screen.

The printer resumes printing. Reprint the page you were printing if it was not printed properly due to the paper jam.

➔ [1240 error is displayed](#)

➔ [1259 error is displayed](#)

If the measures above do not solve the problem, a bit of paper may remain in the printer. See [Removing Jammed Paper inside Printer](#).

## Removing Jammed Paper inside Printer

1. Tap **Stop** on printer's touch screen.
2. Turn off printer and unplug it.
3. Open scanning unit / cover.

### ►► Important

- Do not touch the clear film (A).

If you soil or scratch this part by touching it with paper or your hand, it could damage the printer.

4. Check if jammed paper is under print head holder.

If the jammed paper is under the print head holder, move the print head holder to the far right or left, whichever makes it easier to remove the paper.

When moving the print head holder, hold the print head holder and slide it slowly to the far right or left.

5. Hold jammed paper firmly with both hands.

If the paper is rolled up, pull it out and grasp the edges of the paper.

6. Slowly pull out jammed paper so as not to tear it.

**7. Make sure all jammed paper is removed.**

If the paper tears when you pull out it, a bit of paper may remain in the printer. Check the following and remove any remaining paper.

- Any paper left under the print head holder?
- Any small bits of paper left in the printer?
- Any paper left in the left and right empty spaces (D) in the printer?

**8. Close scanning unit / cover.**

To close the scanning unit / cover, lift it up slightly and then lower it gently.

9. Plug printer back in and turn printer back on.

10. Load paper.

- ➔ [Loading Photo Paper / Plain Paper in Rear Tray](#)
- ➔ [Loading Envelopes in Rear Tray](#)
- ➔ [Loading Plain Paper in Cassette](#)

➤➤➤ **Note**

- Make sure you are using suitable paper and loading it correctly.
- We recommend using paper sizes other than A5 to print documents with photos or graphics. A5 paper may curl and jam as it leaves the printer.

11. Redo printing.

All jobs in the print queue are canceled. Redo the printing.

- ➔ [1240 error is displayed](#)
- ➔ [1259 error is displayed](#)

If the measures above do not solve the problem, see [Removing Jammed Paper from Rear Side](#).

## Removing Jammed Paper from Rear Side

1. Tap **Stop** on printer's touch screen.
2. Turn off printer and unplug it.
3. Retract rear tray, paper output support and paper output tray, and then close operation panel.
4. Turn printer so that rear side of printer faces toward you.

5. Open rear tray cover and pull up paper support.

6. Detach rear cover.  
Pull out the rear cover.

7. Hold jammed paper firmly with both hands and pull it out slowly.

If the paper is rolled up, pull it out and grasp the edges of the paper.

**▶▶▶ Note**

- Do not touch the inner parts of the printer.

If you are unable to remove the jammed paper, follow the steps below to detach the transport unit and then remove the paper.

1. Detach transport unit.

Lift up the transport unit and pull it out.

2. Slowly pull out jammed paper.

**▶▶▶ Note**

- Do not touch the inner parts of the printer.

3. Make sure all jammed paper is removed.
4. If parts (A) are raised, tip them toward you.

**▶▶▶ Important**

- If you replace the transport unit without lowering parts (A) toward you, it could damage the printer.

**5. Replace transport unit.**

Insert the transport unit until it reaches the back of the printer.

**8. Attach rear cover.**

Insert the projections of the right side of the rear cover into the printer, and then push the left side of the rear cover until it is closed completely.

9. Plug printer back in and turn printer back on.

10. Load paper.

- ➔ [Loading Photo Paper / Plain Paper in Rear Tray](#)
- ➔ [Loading Envelopes in Rear Tray](#)
- ➔ [Loading Plain Paper in Cassette](#)

▶▶▶ **Note**

- Make sure you are using suitable paper and loading it correctly.
- We recommend using paper sizes other than A5 to print documents with photos or graphics. A5 paper may curl and jam as it leaves the printer.

11. Redo printing.

All jobs in the print queue are canceled. Redo the printing.

▶▶▶ **Note**

- If 1300 error recurs, check the feed slot of the rear tray again. If a foreign object is in the rear tray, refer to **Check 1** in What to Do If Paper Is Not Fed/Output Normally and take appropriate action.

- ➔ [1240 error is displayed](#)
- ➔ [1259 error is displayed](#)

If the measures above do not solve the problem, contact your nearest Canon service center to request a repair.

## Cause

Possible causes include the following.

- There is no paper in the rear tray.
- Paper is not loaded in the rear tray properly.
- There are any foreign objects in the rear tray.

## What to Do

- After loading the paper in the rear tray correctly, follow the messages displayed on the printer's touch screen.
  - ➔ [Loading Photo Paper / Plain Paper in Rear Tray](#)
  - ➔ [Loading Envelopes in Rear Tray](#)
- If a foreign object is in the rear tray, refer to **Check 1** in What to Do If Paper Is Not Fed/Output Normally and take appropriate action.

## 1003

---

### Cause

Possible causes include the following.

- There is no paper in the cassette.
- Paper is not loaded in the cassette properly.

### What to Do

After loading the paper in the cassette correctly, follow the messages displayed on the printer's touch screen.

➔ [Loading Plain Paper in Cassette](#)

### ▶▶▶ Note

- This error may occur if the transport unit is not installed correctly. Refer to the following page to check the transport unit.

➔ [Removing Jammed Paper from Rear Side](#)

## Cause

Compatible media is not loaded, or is loaded incorrectly in the multi-purpose tray.

## What to Do

Remove the multi-purpose tray, load the multi-purpose tray compatible media correctly, and then place the multi-purpose tray back into the printer.

➔ [Placing Multi-purpose Tray](#)

Select **OK** on the printer's touch screen to cancel the error.

### ▶▶ Important

- When printing on multi-purpose tray compatible media, use the multi-purpose tray provided with the printer.

### ▶▶ Note

- To cancel printing, tap **Stop** on the printer's touch screen.

## 1200

---

### Cause

Scanning unit / cover is open.

### What to Do

Close the scanning unit / cover and wait for a while.

Make sure to close the scanning unit / cover after replacing ink tanks.

## 1240

---

### Cause

Operation panel is closed or could not be opened.

### What to Do

Remove any obstructions preventing the operation panel from opening.

Open the operation panel.

### ▶▶ Important

- Do not close the operation panel during printing.

### ▶▶ Note

- To cancel printing, tap **Stop** on the printer's touch screen.

## Cause

Paper output tray is not pulled out fully.

## What to Do

1. If there is anything obstructing operation panel from opening, remove it.
2. Open operation panel (A).
3. Check the position of paper output tray (B).

4. Pull out paper output tray firmly toward you by hand.

Pull out the paper output tray until you see ▲ on the paper output tray.

## Important

- Do not retract the paper output tray while the printer is operating.
- This error may occur if the paper output tray is not fully pulled out after clearing a paper jam.

**»» Note**

- To cancel printing, tap **Stop** on the printer's touch screen.

## 1401

---

### Cause

Print head may be damaged.

### What to Do

Turn off the printer and turn it back on.

If this does not solve the problem, contact your nearest Canon service center to request a repair.

## Shipping Tape etc. Are Still Attached (15A3)

### Cause

Tape for securing print head holder during transportation may still be attached.

### What to Do

Open the scanning unit / cover and make sure the tape for securing the print head holder during transportation has been removed.

If the tape is still there, remove it and close the scanning unit / cover.

When setting up the printer for the first time, click [here](#) and select your printer, and then follow the instructions.

## 1600

---

### Cause

Ink may have run out.

### What to Do

Replacing the ink tank is recommended.

If printing is in progress and you want to continue printing, tap **OK** on the printer with the ink tank installed. Then printing can continue. Replacing the ink tank is recommended after the printing.

## 1660

---

### Cause

The ink tank cannot be recognized.

### What to Do

Printing cannot be performed because the ink tank is not installed or is not compatible with this printer.

Check the ink tank.

If you want to cancel printing, tap **Stop** on the printer.

## Cause

The 1688 support code signifies that the printer has detected that one or more of your ink tanks is empty.

## What to Do

The action you should take to resume operating the printer depends upon which function(s) of the printer you intend to use.

### 1. To PRINT or COPY

If you intend to PRINT or COPY, you should take one of the following steps:

(a) For each ink tank identified by the printer as being empty, disable the function that detects the level of ink remaining by touching the **Stop** button on the printer for at least five (5) seconds and then releasing it.

If, due to individual usage factors, there is some residual amount of ink in the tank(s), you will be able to PRINT or COPY until the remaining ink is depleted.

Please note that image quality may be diminished if you PRINT or COPY when there is little ink remaining in the tank(s).

OR

(b) Open the scanning unit / cover, replace each ink tank identified by the printer as being empty, and close the printer's cover.

Canon recommends the use of new, genuine Canon ink tanks for optimal image quality.

### 2. To SCAN or FAX

If you intend to SCAN (or FAX if your printer has that capability), you should take one of the following steps:

(a) For each ink tank identified by the printer as being empty, disable the function that detects the level of ink remaining by touching the **Stop** button on the printer for at least five (5) seconds and then releasing it.

You will be able to SCAN (or FAX if your printer has that capability) as long as the empty ink tanks remain installed in the printer.

OR

(b) Open the scanning unit / cover, replace each ink tank identified by the printer as being empty, and close the scanning unit / cover.

Canon recommends the use of new, genuine Canon ink tanks for optimal image quality.

## ▶▶▶ Note

- If the function for detecting the level of ink remaining in an ink tank is disabled, the ink tank will be displayed in white on the touch screen (if the printer has a touch screen) when you check the estimated remaining ink level.

## Cause

The 1689 support code signifies that the printer has detected an issue with one or more of your ink tanks.

## What to Do

The action you should take to resume operating the printer depends upon which function(s) of the printer you intend to use.

### 1. To PRINT or COPY

If you intend to PRINT or COPY, you should take one of the following steps:

(a) For each ink tank identified by the printer as having an issue, disable the function that detects the level of ink remaining by touching the **Stop** button on the printer for at least five (5) seconds and then releasing it.

If there is ink in the tank(s), you will be able to PRINT or COPY until the remaining ink is depleted.

Please note that image quality may be diminished if you PRINT or COPY when there is little ink remaining in the tank(s).

OR

(b) Open the printer's cover, replace each ink tank identified by the printer as having an issue, and close the printer's cover.

Canon recommends the use of new, genuine Canon ink tanks for optimal image quality.

### 2. To SCAN or FAX

If you intend to SCAN (or FAX if your printer has that capability), you should take one of the following steps:

(a) For each ink tank identified by the printer as having an issue, disable the function that detects the level of ink remaining by touching the **Stop** button on the printer for at least five (5) seconds and then releasing it.

You will be able to SCAN (or FAX if your printer has that capability) as long as all of the ink tanks remain installed in the printer.

OR

(b) Open the printer's cover, replace each ink tank identified by the printer as having an issue, and close the printer's cover.

Canon recommends the use of new, genuine Canon ink tanks for optimal image quality.

## ▶▶▶ Note

- If the function for detecting the level of ink remaining in an ink tank is disabled, the ink tank will be displayed in white on the touch screen (if the printer has a touch screen) when you check the estimated remaining ink level.

## 1700

---

### Cause

Ink absorber is almost full.

### What to Do

Select **OK** on the printer's touch screen to continue printing. Contact your nearest Canon service center to request a repair.

### ▶▶ Note

- In the case of warnings or errors caused by remaining ink levels, the printer cannot print or scan.

## Cassette Is Not Installed (1876)

---

### Cause

Possible causes include the following.

- The cassette is not installed.
- The cassette is not pushed all the way into the printer.

### What to Do

After loading the paper in the cassette and installing the cassette in the printer, and then follow the messages displayed on the printer's touch screen.

### »» Important

- Align the paper guides of the cassette with both edges of the paper.

Push the cassette all the way into the printer.

Load the paper correctly and install the cassette correctly, referring to [Loading Plain Paper in Cassette](#).

## 2110

### Cause

An incompatible print setting combination has been specified for the paper loaded in the cassette.

### Note

- [To disable notifications for this error, disable the function to detect paper setting mismatch.](#)

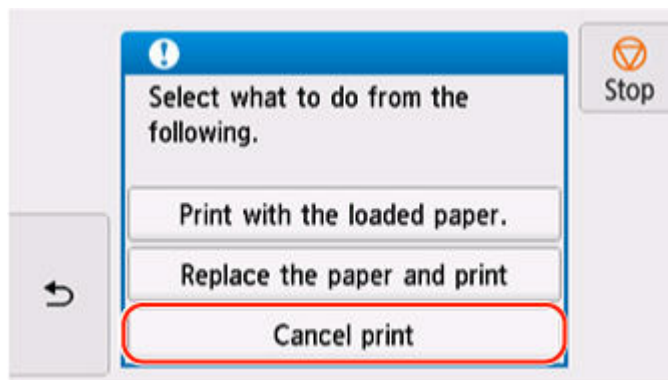

### What to Do

To specify the appropriate print settings for the paper loaded in the cassette and retry printing/copying, follow the steps below.

1. Select **Next**.

2. Select **Cancel print**.

3. Reinstall cassette into printer.

**4. Check paper information (paper size and media type).**

The paper information is used to specify the print settings in step 5.

**5. Specify paper information (paper size and media type).**

- When copying:

**1. Select **Settings**.**

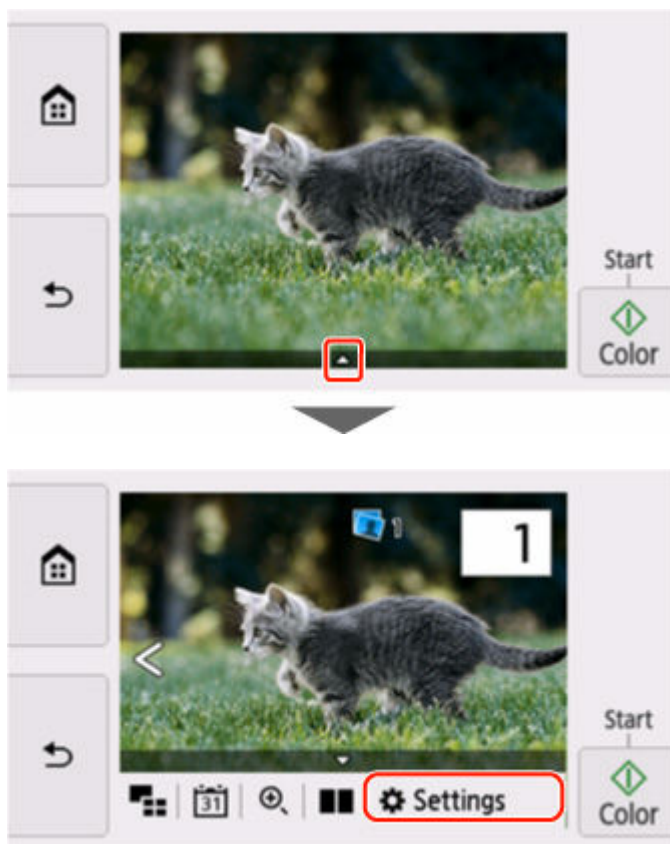

**2. Specify paper information (paper size and media type) that you checked in step 4.**

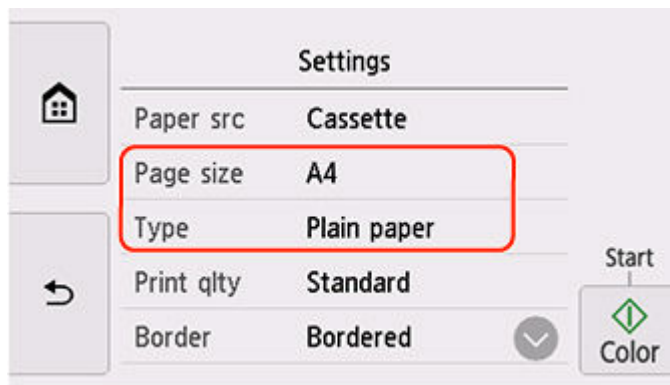

- When printing photos saved on memory card:

1. Select  at the bottom of the screen, and then select **Settings**.

2. Specify paper information (paper size and media type) that you checked in step 4.

### ▶▶▶ Note

- For the proper combination of paper size and media type, see below.
  - ➔ [Paper Settings on the Printer Driver and the Printer \(Paper Size\)](#)
  - ➔ [Paper Settings on the Printer Driver and the Printer \(Media Type\)](#)

6. Redo printing/copying.

## Other Measures

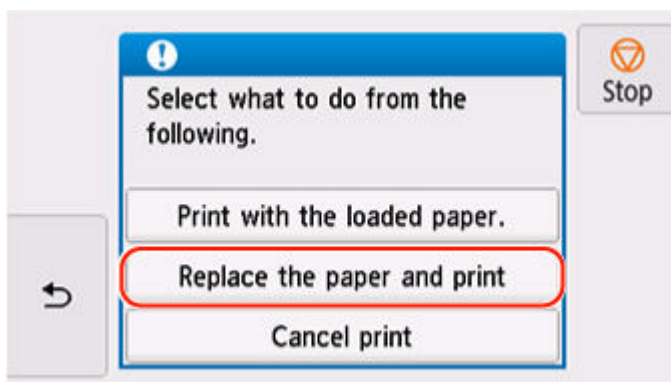

### Load paper specified in print settings

To replace the paper in the cassette with paper suitable for the print settings and continue printing/copying, follow the steps below.

1. Check print settings, and select **Next**.

2. Select **Replace the paper and print**.

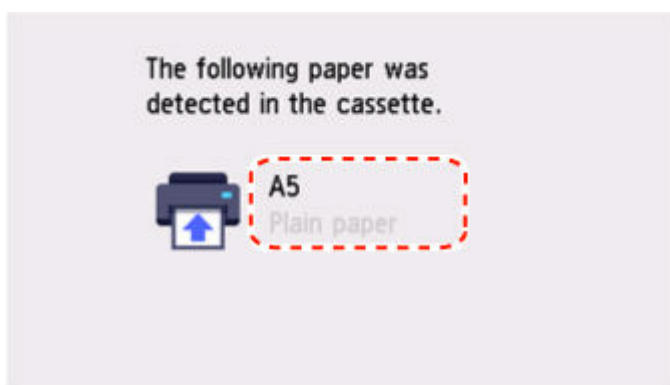

3. Load paper specified in print settings into cassette.

4. Check paper information (paper size and media type).

Confirm that the displayed paper information matches the print settings.

#### Print without changing paper and print settings

For example, to continue printing/copying with a mismatch between the paper loaded in the cassette and the paper information registered in the printer, follow the steps below.

#### »»» Important

- The printed result may not be the intended color or size.

1. Select **Next**.

2. Select **Print with the loaded paper..**

▶▶▶ **Note**

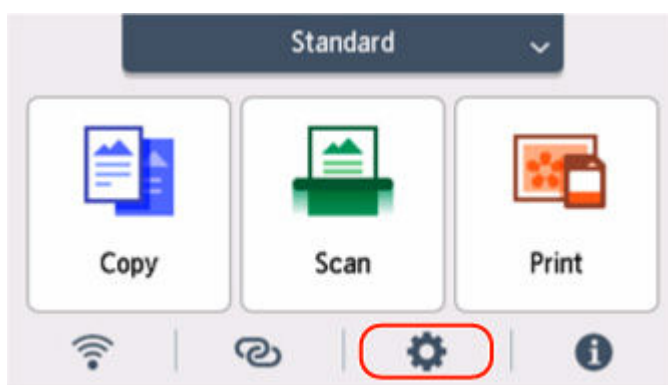

- Depending on your printer's settings, **Print with the loaded paper.** may not be displayed.

## Disable notifications for 2110 error

To disable the function to detect paper setting mismatch, follow the steps below.

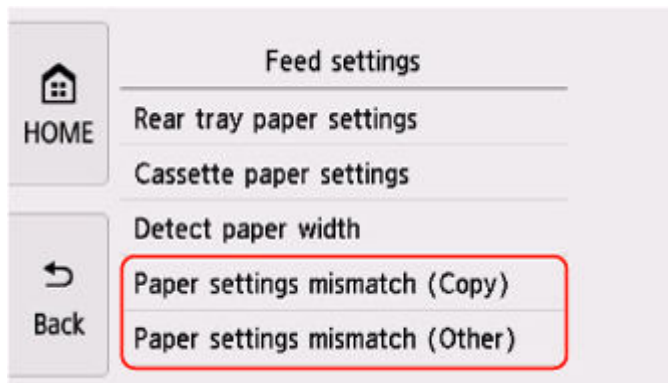

1. Select  (**Setup**) on printer's **HOME** screen.

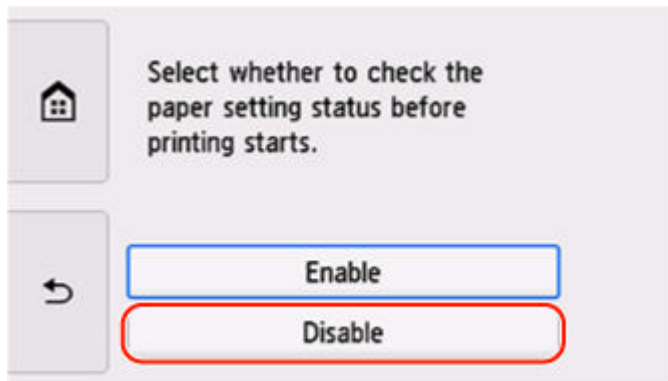

2. Select **Feed settings.**

3. Select **Paper settings mismatch (Copy)** or **Paper settings mismatch (Other)**.

4. Select **Disable**.

## Cause

The print settings specified at the start of printing/copying are not suitable for either the paper loaded in the rear tray or the paper loaded in the cassette.

## Note

- [To disable notifications for this error, disable the function to detect paper setting mismatch.](#)

## What to Do

To specify the appropriate print settings for the paper loaded in the printer and retry printing/copying, follow the steps below.

1. Select **Next**.

2. Select **Cancel print**.

3. Reload paper used for printing/copying.

- When using paper from the rear tray:

- When using paper from the cassette:

#### 4. Check paper information (paper size and media type).

The paper information is used to specify the print settings in step 5.

- When using paper from the rear tray:

Check the paper information (paper size and media type) and select **Yes**.

- When using paper from the cassette:

Check the paper information (paper size and media type).

5. Specify paper information (paper size and media type).

- When copying:

1. Select **Settings**.

2. Specify paper information (paper size and media type) that you checked in step 4.

- When printing photos saved on memory card:

1. Select  at the bottom of the screen, and then select **Settings**.

2. Specify paper information (paper size and media type) that you checked in step 4.

### ▶▶▶ Note

- For the proper combination of paper size and media type, see below.
  - ➔ [Paper Settings on the Printer Driver and the Printer \(Paper Size\)](#)
  - ➔ [Paper Settings on the Printer Driver and the Printer \(Media Type\)](#)

6. Redo printing/copying.

## Other Measures

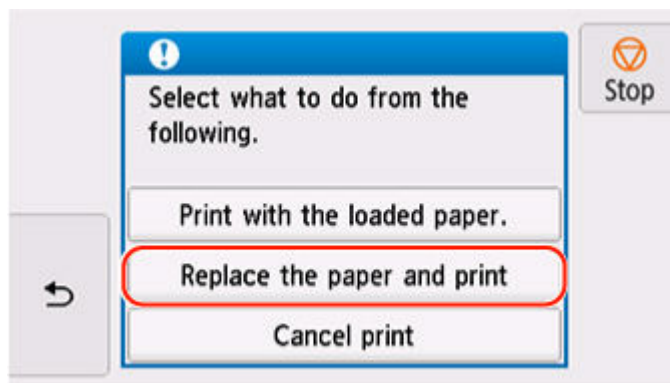

### Load paper specified in print settings

To replace the paper in the rear tray / cassette with paper suitable for the print settings and continue printing/copying, follow the steps below.

1. Check print settings, and select **Next**.

2. Select **Replace the paper and print**.

3. Load paper specified in print settings into rear tray / cassette.

- When changing the paper in the rear tray:

- When changing the paper in the cassette:

#### 4. Check paper information (paper size and media type).

- When the paper in the rear tray is changed:

Confirm that the paper information displayed matches the print settings, and then select **Yes**.

- When the paper in the cassette is changed:

Confirm that the displayed paper information matches the print settings.

### Print without changing paper and print settings

For example, to continue printing/copying with a mismatch between the paper loaded in the rear tray and the paper information registered in the printer, follow the steps below.

### »»» Important

- The printed result may not be the intended color or size.

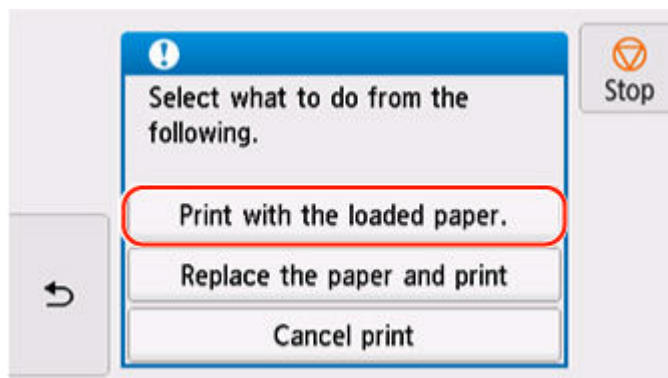

#### 1. Select **Next**.

#### 2. Select **Print with the loaded paper..**

### »»» Note

- Depending on your printer's settings, **Print with the loaded paper.** may not be displayed.

## Disable notifications for 2113 error

To disable the function to detect paper setting mismatch, follow the steps below.

1. Select  (Setup) on printer's HOME screen.

2. Select **Feed settings**.

3. Select **Paper settings mismatch (Copy)** or **Paper settings mismatch (Other)**.

4. Select **Disable**.

 Select whether to check the paper setting status before printing starts.

## 2114

### Cause

An incompatible print setting combination has been specified for the paper loaded in the rear tray.

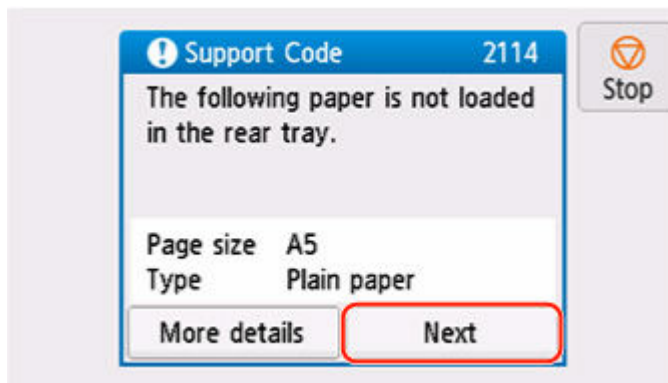

### Note

- [To disable notifications for this error, disable the function to detect paper setting mismatch.](#)

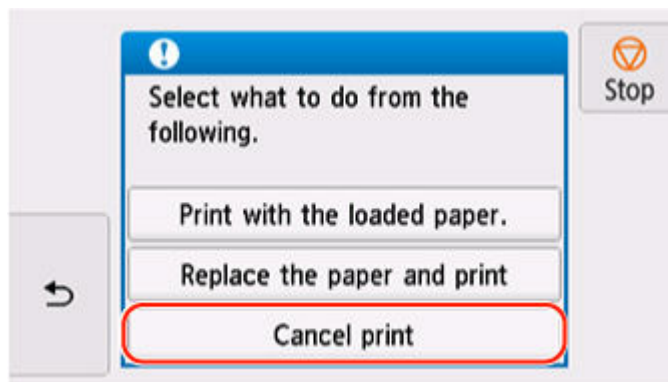

### What to Do

To specify the appropriate print settings for the paper loaded in the rear tray and retry printing/copying, follow the steps below.

1. Select **Next**.

2. Select **Cancel print**.

3. Reload paper in rear tray and close feed slot cover.

**4. Check paper information (paper size and media type).**

The paper information is used to specify the print settings in step 5.

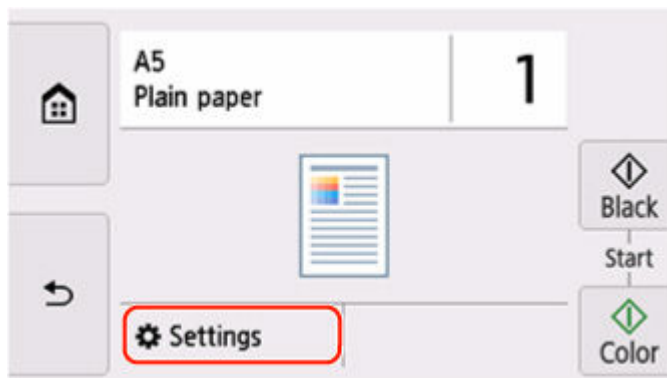

Check the paper information (paper size and media type) and select **Yes**.

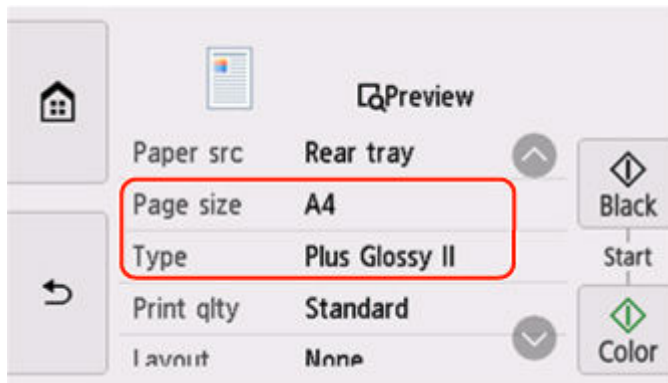

**5. Specify paper information (paper size and media type).**

- When copying:

**1. Select Settings.**

2. Specify paper information (paper size and media type) that you checked in step 4.

- When printing photos saved on memory card:

1. Select  at the bottom of the screen, and then select **Settings**.

2. Specify paper information (paper size and media type) that you checked in step 4.

### ▶▶▶ Note

- For the proper combination of paper size and media type, see below.
  - ➔ [Paper Settings on the Printer Driver and the Printer \(Paper Size\)](#)
  - ➔ [Paper Settings on the Printer Driver and the Printer \(Media Type\)](#)

6. Redo printing/copying.

## Other Measures

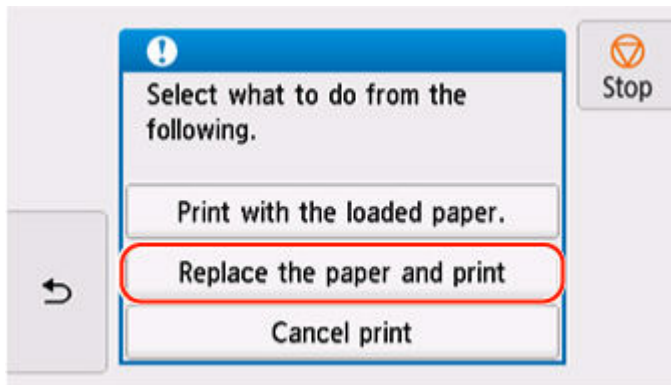

### Load paper specified in print settings

To replace the paper in the rear tray with paper suitable for the print settings and continue printing/copying, follow the steps below.

1. Check print settings, and select **Next**.

2. Select **Replace the paper and print**.

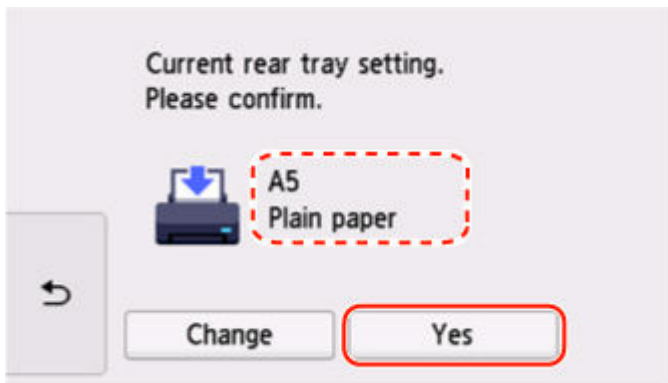

3. Load paper specified in print settings into rear tray.

4. Check paper information (paper size and media type).

Confirm that the paper information displayed matches the print settings, and then select **Yes**.

#### Print without changing paper and print settings

For example, to continue printing/copying with a mismatch between the paper loaded in the rear tray and the paper information registered in the printer, follow the steps below.

#### »»» Important

- The printed result may not be the intended color or size.

1. Select **Next**.

2. Select **Print with the loaded paper..**

▶▶▶ **Note**

- Depending on your printer's settings, **Print with the loaded paper.** may not be displayed.

## Disable notifications for 2114 error

To disable the function to detect paper setting mismatch, follow the steps below.

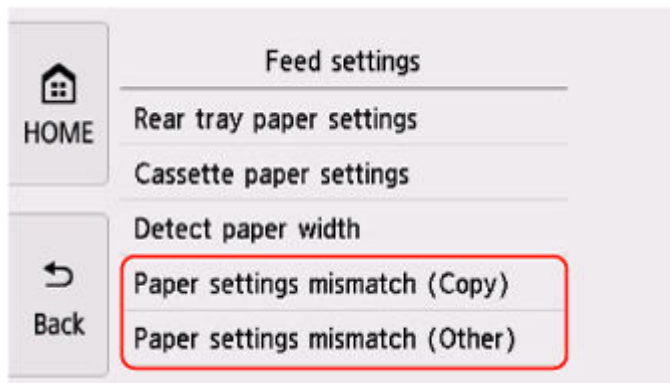

1. Select  (**Setup**) on printer's **HOME** screen.

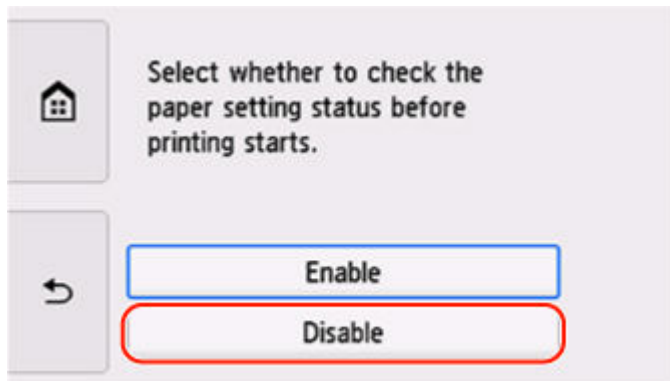

2. Select **Feed settings**.

3. Select **Paper settings mismatch (Copy)** or **Paper settings mismatch (Other)**.

4. Select **Disable**.

## 4103

---

### Cause

Cannot perform printing with current print settings.

### What to Do

Tap **Stop** on the printer's touch screen to cancel printing.

Change the print settings specified when printing and retry printing.

## Cause

Printer error has occurred.

## What to Do

Cancel printing and turn off the printer.

Check the following:

- Make sure the ink tanks are properly installed.

Check that the direction of the  is correct as shown in the illustration below.

Press the ink tank until it clicks into place.

- Make sure print head holder motion is not impeded by protective material, jammed paper, etc.

Remove any impediment.

### ►► Important

- When clearing an impediment to print head holder motion, be careful not to touch clear film (A).

If you soil or scratch this part by touching it with paper or your hand, it could damage the printer.

Turn the printer back on.

- ➔ [1240 error is displayed](#)
- ➔ [1259 error is displayed](#)

If the measures above do not solve the problem, contact your nearest Canon service center to request a repair.

## 5200

---

### Cause

Printer error has occurred.

### What to Do

Turn off the printer and unplug it.

After a while, plug in the printer again and turn it back on.

If this does not solve the problem, contact your nearest Canon service center to request a repair.

## 5B00

---

### Cause

Printer error has occurred.

### What to Do

Contact your nearest Canon service center to request a repair.

### ▶▶ Note

- In the case of warnings or errors caused by remaining ink levels, the printer cannot print or scan.

## 6000

---

### Cause

Printer error has occurred.

### What to Do

If paper is jammed, see below.

➔ [What to Do When Paper Is Jammed](#)

Turn off the printer and unplug it.

Plug in the printer again and turn it back on.

If this does not solve the problem, contact your nearest Canon service center to request a repair.

## Message Is Displayed

This section describes some of the messages.

If a message is displayed on the printer's touch screen, see below.

➔ [Message Is Displayed on Printer's Touch Screen](#)

If a message is displayed on the computer, see below.

➔ [Error Regarding Automatic 2-sided Printing Is Displayed](#)

➔ [Error Regarding Power Cord Being Unplugged Is Displayed \(Windows\)](#)

➔ [Writing Error/Output Error/Communication Error \(Windows\)](#)

➔ [Other Error Messages \(Windows\)](#)

## Message Is Displayed on Printer's Touch Screen

Check the message and take appropriate action.

- **Power was not turned off correctly the last time. Press the  button when turning power off.**

The printer may have been unplugged while the power was still on.

Select **OK** on the printer's touch screen to cancel the error.

Refer to [Turning the Printer On and Off](#) for the correct way to turn the power off.

- **Cannot connect to the server. Please wait a while and try again.**

The printer cannot connect to the server due to a communication error.

Select **OK** on the printer's touch screen to cancel the error and try again after a while.

- **Saved data is not of a supported type.**

- There is no image data or document data saved on the memory card that can be read by this printer.
- The printer may not recognize the file if the file name or folder path contains certain characters. Use only alphanumeric characters.
- Image data edited or processed on a computer must be printed from the computer.

### ▶▶▶ Note

- When a photo which has been processed on a computer is selected, "?" is displayed on the printer's touch screen.

## Error Regarding Automatic 2-sided Printing Is Displayed

**Check** See Automatic 2-sided Printing Problems and take the appropriate action.

## Error Regarding Power Cord Being Unplugged Is Displayed (Windows)

The printer may have been unplugged while it was on.

Check the error message displayed on the computer and click **OK**.

The printer starts printing.

Refer to [Turning the Printer On and Off](#) for the correct way to turn the power off.

## Writing Error/Output Error/Communication Error (Windows)

**Check 1** If the **ON** lamp is off, make sure printer is plugged in and turn on.

The **ON** lamp flashes while the printer is initializing. Wait until the **ON** lamp stops flashing and remains lit.

**Check 2** Make sure printer is properly connected to computer.

If you are using a USB cable, make sure it is securely connected to both the printer and the computer. When the USB cable is securely plugged in, check the following:

- If you are using a relay device such as a USB hub, disconnect it, connect the printer directly to the computer, and retry the printing. If printing starts normally, there is a problem with the relay device. Contact the vendor of the relay device.
- There could also be a problem with the USB cable. Replace the USB cable and retry the printing.

If you use the printer over a LAN, make sure the printer is correctly set up for network use.

**Check 3** Make sure MP Drivers are installed correctly.

Refer to [Updating the Driver](#) to uninstall unnecessary drivers and install the latest drivers.

**Check 4** When printer is connected to your computer with a USB cable, check device status from your computer.

Follow the procedure below to check the device status.

1. Select **Control Panel > Hardware and Sound > Device Manager**.

### ▶▶▶ Note

- If the **User Account Control** screen is displayed, select **Yes**.

2. Open **USB Printing Support Properties**.

Double-click **Universal Serial Bus controllers** and **USB Printing Support**.

### ▶▶▶ Note

- If the **USB Printing Support Properties** screen is not displayed, make sure the printer is correctly connected to the computer.

➔ **Check 2** [Make sure printer is properly connected to computer](#).

3. Click **General** tab and check for a device problem.

If a device error is shown, see Windows Help to resolve it.

## Other Error Messages (Windows)

**Check** If an error message is displayed somewhere other than printer status monitor, check the following:

- **"Could not spool successfully due to insufficient disk space"**

Delete any unnecessary files to increase the amount of free space on the disk.

- **"Could not spool successfully due to insufficient memory"**

Close other applications to increase the available memory.

If you still cannot print, restart your computer and retry the printing.

- **"Printer driver could not be found"**

Refer to [Updating the Driver](#) to uninstall unnecessary drivers and install the latest drivers.

- **"Could not print Application name - File name"**

Try printing again once the current job is complete.
