Installation

IMPORTANT

Turn off the phone and unplug the charger before removing the battery cover.

Installing the micro-SD memory card

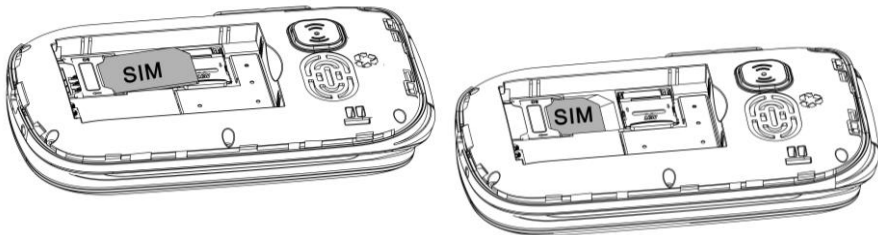

Insert the memory card into the slot under the SIM card holder, make sure the card is positioned face down. Be careful not to scratch or bend the metal contacts on the card.

Micro-Sd card is used as phone storage, when connected to computer by USB cable, you can copy music or photos inside.

Install SIM card

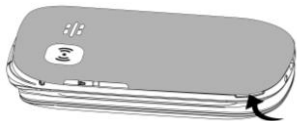

1. Insert the SIM card into the SIM card slot on top of the memory card holder.
(Make sure the SIM card contacts are facing down.)
2. Before removing the SIM card, first turn off the phone.

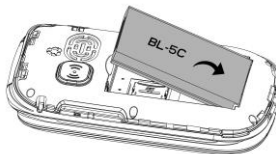

Installing the battery

The first time, charge the battery for 4 hours to get the best performance from it.

Remove the battery cover, insert it into the battery compartment, and replace the battery cover.

Contacts:

Look for

You can speed up the search for the contact's name by dialing the initial letter.

Add new contact

You can add a new contact to the SIM card or to the phone, press "save" to confirm.

1. To SIM

1.1 Enter name and phone number.

2. On the phone

2.1 Enter name and phone number.

2.2 Set caller image: press keyboard M1 to M3 the image from preset, camera or file.

2.3 Set the ringtone: press the keyboard M1 to M3 the ringtone.

2.4 Press Options to save.

3. Phone book settings

3.1 Preferred storage: you can save the new contact to SIM card, phone or both.

3.2 Memory status: to check how many contacts are on the SIM card and on the phone (max 250 in both cases).

- 3.3 Copy contacts: You can copy SIM and phone contacts between them.
- 3.4 Move contacts: You can move SIM and phone contacts between them.
- 3.5 Delete all contacts: You can delete all contacts from SIM card or phone.

In the phone book, you can check people's contacts, send SMS, make call, edit, delete, copy and add to the black list.

Warning! Check how to enter the text to see the input method.

Photo contacts

1. Press edit, enter a name and number for the new contact.
2. Use to  select caller image and ringtone.

2.1 Image of the caller (Options, Select). This image will be displayed when the contact is called or he calls us.

Please select one of the following options:

- 1) From camera and press Options to select From camera to take a photo.

Observation: use by default an image size of 240x320 for a correct visualization of the same.

2) From file and select from phone or memory card to select an existing image and press Open.

Observation: use an image size of 240x320 for its correct visualization.

2.2 Ringtone (□Options□Select) to select the desired incoming call tone. You can also use Record File to record a personal ringtone. See Sound recorder on p.16.

3. Press Options and scroll to Save, then press Select to save.

4.

Messages

Write messages

1. Press Menu, scroll to Messages.

2. Select Write message and press OK.

3. Enter your message and then press Options.

4. Choose Send to enter the destination number and then press OK to send.

Inbox

1. Press Menu go to Messages and press OK.
2. Select Inbox and press OK.
3. Select a message from the list and press Options to view the message.

Other options below:

1) **Answer**

Write the message and send to the sender.

2) **Call sender**

Press select to call the sender.

3) **Resend**

Press select to forward the message to other contacts.

4) **Get rid of**

Press select to delete the message.

5) **Erase everything**

Delete all received messages.

6) **Save to phonebook**

Here you can save the sender's phone number in the phonebook.

Eraser

Here you can see the messages that were created, but did not finish.

Outbox

1. Press Menu then go to Messages and press OK.

2. Select Outbox and press OK.
3. Select a message from the list and press Options to view, forward, edit, delete or delete all messages.

Sent messages

Here you can see all the messages we have sent.

SMS configuration

1. In standby mode, press Menu, go to Messages and press OK.
2. Go to SMS Settings and press OK to configure the message service.
- 1) **SIM:** Profile settings, Validity period, Message type, Delivery report, Reply path, Mail server.
- 2) **Memory status:** shows the status of the messages saved in the SIM and in the phone (Max 50).
- 3) **Message counter:** shows the number of messages sent and received.
- 4) **Save sent messages:** Press M1 or M2 to turn on or off.
- 5) **Storage preference:** set the storage destination (SIM or phone).

Call History

Call History

1. In standby mode, press Menu, go to Call History and press OK.
2. All missed, made and received calls are saved here.
3. Use to  move between the different types of calls described.
- 4.

Magnifying glass

MAGNIFYING GLASS

In standby mode, press Menu, go to Magnifier and press OK.

With the camera's magnifying glass, you can zoom by adjusting the focus distance.

With this feature, older users can use it to read texts more easily. Using the keys you can increase or decrease the size.

Sound recorder

The sound recorder allows you to record voice memos to keep as a reminder.

1. Press Menu go to Sound Recorder.
2. Press 2 to record / pause. Press 5 to play / pause / stop recordings. Press 8 to delete the recordings.
3. To listen to one of the recordings: press Sound Recorder-> List, choose the position of the list that you want to listen to.
4. With this function, recordings can be made to use as ringtones.

Observation:The internal memory of the phone only supports short recordings. You need to use a memory card to have more recordings.

Voice memories

This menu option allows you to configure tasks that the phone can later remember later. Accessing this menu option shows a list of configured tasks.

The options allow you to add new tasks, edit them or delete an existing one.

If we add a new task or edit an existing one, go to Subject , Remember sound, due time, Sound loop (10 times by default) and Remember interval (5 minutes by default).

Press Menu go to Voice Notes. You can use Remember Sound to record what you want to be remembered instead of the default entries.

Observation:

1. When the preset time arrives, the phone will play the recorded sound and there is a pop-up window with these options: Meet and Repeat. Press Meet or End the call to exit the task.
- 2 In case of not being able to hear the reminder task in time, press Repeat, the phone will play the recorded sound again with the frequency that we have predefined in: Repeat

Organizer

Calendar

1. Press Menu go to Organizer, press OK and select Calendar.
The current day and time are displayed on the screen.

The default code for the phone is "1122".

Reset factory settings

In this menu after entering the phone's security code (0000) you can reset the phone to its

original settings

Recommendations and safety

- Be careful when you are near chemical plants, gas stations, tanks with flammable liquids or anything else that could explode as the phone emits RF signals even when it is in standby mode. Turn off the phone around these items.
- Do not use the phone while driving. If you need to use the phone, park your vehicle first.
- Do not use the phone in hospitals so as not to interfere with medical equipment.

Obey the current regulations on the use of the aforementioned devices before using the telephone.

- Keep the phone and accessories out of the reach of children.
- This device is designed to be marketed in the EEC.
- If you are on an airplane, turn off your phone before it takes off so as not to interfere with the airplane's equipment. The use of mobile phones during the journey is dangerous and illegal.
- Accessories and Battery: Use accessories and batteries supplied by the manufacturer. The use of non-original accessories may damage the phone and lead to dangerous situations and invalidate the warranty. Do not tamper with, adapt or break the battery. If the phone becomes too hot, swells, or you notice any other unusual phenomenon, stop using the phone and change the battery. Put the old batteries in the clean points.
- Do not charge the phone without the battery. Turn off the phone before removing the battery. The socket outlet must be easily accessible. The load feeder is the disconnect device.

- The phone is not waterproof so keep it dry. Avoid using the phone in very hot or very cold temperatures.
- Do not throw, drop or hit the phone as both internal and external parts may be damaged.
- If you have any problem contact the authorized technical service, do not try to open the phone yourself as it could be dangerous.
- Many hearing aids on the market are compatible with this phone, but compatibility is not assured.

Zaragoza to 08/06/ 2018 Jose Maria Miranda Diez

THIS MODEL COMPLIES WITH THE INTERNATIONAL GUIDELINES ON EXPOSURE TO RADIO WAVES, as well as the requirements of the EU 2014/53 / EU standard.

Your mobile device is the transmitter and receiver of radio waves. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines.

The guidelines for exposure to radio waves use a unit of measurement known as the Specific Absorption Limit (SAR). The SAR limit for mobile phones is 2 watts / kg.

The highest SAR values according to the ICNIRP guidelines for this device model are as follows:

Head SAR: 0.373W / kg.

SAR on body: 0.628W / kg.

WEEE Directive 2002/96 / EC of the European Parliament of January 27, 2003 on waste electrical and electronic equipment.

For these products to undergo a proper treatment, recovery and recycling process, please take them to designated collection points, where they will be admitted free of charge. By disposing of the product correctly, you are helping to conserve valuable resources and avoid any potential negative effects on human health and the environment that could result from improper waste treatment. Please contact your local authority for detailed information on the nearest designated collection point.

According to national legislation, fines may apply for improper disposal of these wastes.
