3.

Diagram showing a microphone connected to a PC. A blue arrow labeled 'a' points to the microphone's USB connector. Below, a Windows taskbar shows the volume icon highlighted with a red box and labeled 'b'. A context menu is open, with 'Sounds' highlighted in red. To the right, two screenshots of the Windows 'Sound' control panel are shown. The top screenshot shows the 'Recording' tab with 'Microphone' selected and 'Set Default' highlighted in red, labeled 'c'. The bottom screenshot shows the 'Speakers' tab with 'Set Default' highlighted in red, labeled 'd'.

4.

Diagram showing headphones connected to the microphone. A blue arrow labeled 'a' points to the 3.5mm jack. A circular inset shows the 'HEADPHONES' switch being rotated to the right, labeled 'b'. Below, a screenshot of the Windows 'Speakers Properties' dialog box is shown. The 'Levels' tab is active, with the 'Microphone' volume slider highlighted in red and labeled 'c'. A blue arrow labeled 'd' points to the 'Properties' button.

MONITOR VOLUME

5.

Diagram showing the microphone's control panel. A circular inset shows the 'HEADPHONES' switch being rotated to the right, labeled 'b'. Another circular inset shows the 'GAIN/LED' knob being rotated, labeled 'c'. To the right, two sets of four indicator lights are shown. The top set has all four lights lit in red, with a green microphone icon to its right. The bottom set has the first two lights lit in red and the last two unlit, with a red microphone icon to its right.

6.

Diagram showing the microphone's control panel. A circular inset shows a hand clicking the 'Click' button, labeled 'c'. Below, five different microphone models are shown in a row, each with a different colored LED ring: white, red, blue, green, and purple.
