Operating instructions

IMPORTANT SAFEGUARDS

When using electrical appliances, basic precautions should always be followed, including the points listed below. Read all instructions and safeguards before using.

DANGER

To reduce the risk of injury or death by electric shock:

1. Do not reach for an appliance that has fallen into water. Unplug immediately from the outlet.
2. Do not use while bathing or in a shower.
3. Do not place or store appliance where it can fall or be pulled into a tub or shower. Do not place it in or drop into water or other liquid.
4. Always unplug the appliance from the electrical outlet immediately after using.
5. Always unplug this appliance before cleaning.

WARNING

To reduce the risk of burns, fire, electric shock or injury to persons:

- This appliance can be used by children aged from 14 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children should not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Warning: Keep the Product Dry. It is essential to PREVENT electrical equipment from coming into contact with water or other liquids.
- Use the appliance only as intended use as described in this manual. Do not use attachments not recommended by the manufacturer.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- Keep the cord away from heated surfaces.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Do not use the appliance with a damaged or broken cord with bare metal twisting from bare metal twisting from the manufacturer.

SAVE THESE INSTRUCTIONS

This clipper has been designed for household use.

A- Bottom blade D- Switch
B- Blade side (on Multi-cut (MC) clipper only) E- Top handle
C- Taper head F- Power screw

CLIPPER MAINTENANCE

Your Wahl clipper blades are oiled and aligned before leaving the factory; however, it is possible for blades to get bumped out of alignment. Blades must be realigned if they have been removed for cleaning or replacement. To determine if realignment is necessary, compare your clipper blades with diagram 6.

1. If your clipper has a taper lever, position the taper lever in the close cut position. (H)
2. End of top blade teeth should be approximately 1/32" (4 mm) back from bottom blade. This is important so that the clipper does not cut too close or allow the moving cutter to touch the skin.
3. Extreme left-hand tooth of top blade must be covering or to the left of the first small tooth of bottom blade.
4. Extreme right-hand tooth of top blade must be touching the top left of the bottom blade.

If blade cannot be incremented, add a few drops of Wahl Clipper Oil to the blades, turn clipper "On" for a few moments, turn "Off" and unplug. Loosen screws slightly and adjust (steps 2-4 listed above). Tighten screws after blades are aligned. Other than blades this clipper has no user serviceable parts. (diagram 1)

OIL

The blades of your clipper will only need to be oiled every few haircuts. Simply place a few drops of Wahl Clipper Oil on the blades. Use only the Wahl Clipper Oil included in the pack. Due to the high speed of your Wahl clipper, the correct type of oil must be used. Do not use pure oil, grease or oil mix mixed with kerosene or any solvent, as the solvent will evaporate and leave the cut oil, slowing down the blades. Wahl Clipper Oil is a very natural, viral oil that will evaporate and will not slow down the blades.

POWER SCREW (not found on all models of Wahl Clippers)

If your clipper has a power screw, it has been adjusted for peak efficiency before leaving the factory. However, if voltage in your home is low, you may need to readjust it.

To adjust power, use the nearest screwdriver, a screwdriver or a thin coin to turn power screw in a clockwise direction until the arm strikes the coil, making a noise. Then, slowly turn power screw out (counterclockwise), until only noise stops. This is the maximum power setting. (K)

CORD

Your clipper should not be used to pull the clipper. Since freedom of movement needs to be maintained, care should be used to keep the cord untwisted and unobstructed. When stored, the cord should be coiled and the unit placed in original box or storage pouch (if provided).

Your clipper has a polarized plug. To reduce the risk of electric shock, this appliance has a polarized plug that will only fit in a polarized outlet only one way. In the event the plug does not fit fully in the outlet, reverse the plug. In the event it still does not fit, contact a qualified electrician to install the proper plug and receptacle in the plug in any way.

TAPER LEVER (not found on all models of Wahl Clippers)

If your clipper has an adjustable taper level, it is conveniently located near your thumb (if you're right-handed), so it can easily be adjusted while the clipper is in your hand.

The taper lever adds versatility to your clipper by allowing you to gradually change the closeness of your cut without a comb. When the lever is in the upmost position, the blades will give you the closest cut and leave the hair very short. (diagram H) Pushing the lever downward gradually increases the cutting length. In its lowest position, the taper lever will leave the hair approximately the same length as the 1/8" guide comb. (diagram K2)

The taper lever will also extend the use of your blades since a different cutting edge is used in each setting. In addition, if extremely heavy haircutting has jammed the blades, it will help you remove hair that has become wedged between the two blades without removing the blades. While the clipper is running, rapidly move the lever from "close" to "long" and you will find a couple of extra strokes using your clipper will help clear the blades clear of cut hair. If your clipper stops cutting and this does not help, your cutting blades may be dull. Either replace them or return them to Wahl for sharpening.

WAHL'S GUIDE TO FOOLPROOF HOME HAIRCUTTING Before you cut your hair

1. Your clipper should be used, oiled and in perfect working condition.
2. If your kit includes a plastic cape, place it around the neck, tying the strings and overlapping the cape portion to prevent hair from falling down into the collar. If no cape is provided, a towel will do nicely.
3. Position the person whose hair is to be cut on a stool or chair so that the top of his head is about even with your eyes.
4. Remove the hair to the temples and behind the ears. Then, hold the clipper in a relaxed, comfortable grip, with the palm under the palm near your index finger. This grip will help you maintain comfortable, accurate cutting length.

NOTE: To attach guide comb, hold comb with the teeth up. Snap guide comb attachment firmly to the bottom of the clipper head.

Depending on the kit you purchased your kit may include one of the following:

Adjustable Guide Combs - allowing multiple cutting lengths in the convenience of a single comb.

Individual Black Guide Combs - providing predetermined lengths indicated on each guide comb.

Individual Color Guide Combs - providing predetermined lengths indicated on each guide comb. Combs are color-coded for quick and easy setting identification.

Using adjustable guide combs:

The small adjustable guide comb has five settings from 1/8" to 5/8" (3mm to 16mm) in 1/8" (3mm) increments. (M)

The large adjustable guide comb has five settings from 3/4" to 1-1/4" (19mm to 32mm) in 1/8" (3mm) increments. (N)

Using your thumb, you can change the length of the cut by simply sliding the adjustable lever to the next position. Both adjustable guide combs have positive click stops and indicators that show position number and cutting length.

The large adjustable guide comb can be used from the ear to the crown of the head. (O1)

The small adjustable guide comb can be used from the nape of the neck to the ear area. (O2)

Using individual (black or colored) guide combs:

The small adjustable guide comb has five settings from 1/8" to 5/8" (3mm to 16mm) in 1/8" (3mm) increments. (M)

The large adjustable guide comb has five settings from 3/4" to 1-1/4" (19mm to 32mm) in 1/8" (3mm) increments. (N)

Individual guide comb can be used from the ear to the crown of the head. (O1)

Individual guide comb can be used from the nape of the neck to the ear area. (O2)
