EPSON[®]
EXCEED YOUR VISION

Adding collaboration and connectivity to meeting spaces

In business, productivity and efficiency are the keys to success. Epson's display solutions redefine corporate presenting, ensuring efficient and productive meetings in any working environment.

The choice is clear

The right display size for your room maximises audience engagement. Unlike fixed flat panel displays, Epson's scalable solutions project incredible quality displays up to 500", in multiple aspect ratios. You can also connect multiple projectors to create one large seamless image. And with our more mobile projectors, you are not restricted to one room, one venue, one setting.

Unrestricted viewing

A relaxed viewing environment helps the audience concentrate on the information presented. Epson display solutions are less pixelated and avoid the glare, blind spots and fingerprints associated with flat panels. They can be viewed without obstruction, from anywhere in the room.

Outstanding quality

Project vivid, engaging images in high resolution, even in brightly lit rooms, with Epson 3LCD technology. The 3LCD panel optical engine at the heart of every Epson projector combines high resolution and high contrast ratios that deliver rich colours and brightness up to three times that of 1-chip DLP projectors².

Hassle-free connectivity

Epson display solutions have comprehensive support and connectivity to match any set up or situation. Our dedicated apps and software are extremely versatile and make it easy for people to make contributions from their own devices.

Eliminate maintenance cycles

Epson's fit-and-forget display solutions combine performance with reliability, meaning lower costs, longer life cycles and impressive warranties of up to five years. You can count on up to 17,000 hours life for lamps and up to 30,000 hours for laser light sources³.

Make the sustainable choice

Unlike flat panels, many Epson business projectors are TCO Certified⁴, meeting the world's most comprehensive sustainability certification for IT products. To achieve that, we set the highest standards in our supply chains and factories. This helps your organisation to meet your own social responsibility goals.

Leading the way in visual technology excellence

Your success in the world of visual communications means having the freedom to project brighter, bolder, more creative images in every environment. That's why we work so hard to develop innovative, versatile solutions that take projected visuals to new dimensions.

Exceptional quality

Every Epson projector is the result of our commitment to research and development. We manufacture with superb image quality, ease of operation and total reliability in mind. Our solutions combine high brightness, improved texture and exceptional sharpness to produce powerful, vivid images that can cut through high levels of ambient light, even in large spaces.

Cutting-edge technology

Our projectors add flexibility, quality and creativity in almost every setting. Versatile set-up and connectivity, including 360° installation and easy networking, make great projection simple. Our 3LCD technology produces images up to three times brighter than conventional 1-chip DLP projectors². We have created the world's first 30,000 lumen 3LCD laser projector, the EB-L30000U, using the inorganic light engine in our laser projectors.

A wide range of lenses

Choose from extensive lens options with the power and flexibility to enhance any subject. They include motorised adjustment, memory function and the ultra-short-throw, zero offset lens that projects a 200-inch image from just 1.5m.

Comprehensive support

As well as building robust products that last, we offer a range of service and support options for our projectors that free you to concentrate on being creative for your customers and audiences. From pre-sales advice to ongoing assistance and access to our experts, our standard and CoverPlus 365 warranties give you extensive ongoing backup that works whenever you need it.

Exceeding audience demands

Modern audiences have high expectations, so expand your creativity at big events and attractions with features including portrait projections and split-screens, 360° installation and projection onto floors, ceilings, corners and curved surfaces. From education and art galleries to digital signage and corporate events, from in-house projector fleets to the rental market, Epson projectors are the smart, effective solution.

Easy maintenance

Dramatically reduce running costs with our highly reliable, heat-resistant projectors. Epson installation projectors are built with long-lasting light sources and filters, offering up to 20,000 hours of maintenance-free performance, and even longer in our extended modes.

Key technologies

Equal White (WLO) and Colour Light Output (CLO)

White brightness alone cannot bring the true colours you see everyday to life. That's why the 3LCD technology found in Epson's projectors delivers an equally high WLO and CLO.

CLO is a metric that measures a projector's ability to deliver colour. Developed by colour scientists using the same approach as WLO (Brightness) measurement, CLO provides a simple, accurate and easy-to-understand way to evaluate projector colour performance.

Epson projectors deliver consistently true-to-life images and rich colours that are up to three times brighter than 1-chip DLP projectors².

Laser light source

Experience astonishing quality and reliability with Epson's new laser light source projectors. The newly developed phosphor wheel and LCD panels are made of inorganic materials with superior light and heat-resistance to deliver excellent reliability. Combining an inorganic phosphor wheel with inorganic LCD panels in a laser projector results in bright, vibrant images for extremely long periods.

4K PRO-UHD

4K PRO-UHD⁵ delivers a bright, amazingly sharp lifelike picture by combining advanced Epson technologies with the ability to accept native 4K content and upscale non-4K content exceeding Full HD resolution.

sound by  YAMAHA

Sound by YAMAHA

Enhance your home entertainment experience with premium sound featuring Yamaha's unique and powerful DSP processing technology AudioEngine™, that delivers stunning 3D surround sound to match the immersive screen size.

*EF-12 and EH-LS300 only

Stream, share and collaborate

Wirelessly stream and share

iProjection for PC / Mac

Wireless Screen Mirroring solution that utilises the built-in Wi-Fi connection of the presenter's device to stream and share content to the projector. Up to 50 devices can be connected to the same projector and up to four can present their content at the same time. The built-in moderator mode allows one user to take control of incoming content from the connected devices.

iProjection App for iOS / Android

Feature-rich BYOD solution for smartphones and tablets allows users to stream and share content, annotate and even control the projector, all directly from their devices. There is also a multi device mode for group collaboration. The built-in moderator mode allows one user to take control of incoming content from the connected devices.

iProjection App for Chromebooks

Supports fully mirrored display of all your Chromebook content including Google Docs, Slides, Sheets and Chrome browser.

Screen Mirroring (Miracast)

Industry-wide standard that enables Screen Mirroring from compatible smartphones, tablets and PCs to enhance BYOD flexibility and provide the freedom of wireless connectivity.

Interactivity and collaboration

GoBoard Education

GoBoard Education software enables users to connect, create and collaborate through a whiteboard canvas with many integrated features driven from the Hub software. Combined wireless connectivity allows all students in the lesson to view the whiteboard and share their screen.

Easy Interactive Tools

Gives you annotation and drawing capability on projected images or a whiteboard. You can also perform simple control of your document camera and projector.

Projector management solutions

Monitoring and control

Epson Projector Management

The free-to-download centralised management utility lets IT, facilities and network managers efficiently monitor, control and manage their Epson display solution fleet. The software is also compatible with PJLink certified devices. Functions include operation status, error reporting and input source switching. The scheduling feature can power down all the projectors in a building, while error monitoring helps avoid delays and downtime.

Epson Projector Professional Tool

You can quickly and easily create perfectly aligned images with the Epson Projector Professional Tool. Our free, downloadable software utility improves the speed of set-up for multi-projector installations. It also gives you access to more advanced techniques straight out of the box.

Epson Projector Configuration Tool

This free application for smart devices makes setting up and configuring multiple projectors easy. Simply register the projector's data using NFC connectivity, read and edit the settings in the app and then upload the settings to a fleet of projectors without even needing to power the projectors on.

Content management

Epson Projector Content Manager

Create playlists using photos, videos, shape filters and effects, which can be scheduled and saved to an external storage device for cableless content playback directly on the projector.

Epson Creative Projection

Create custom content on your smartphone or tablet, with ease. Enliven rooms and product displays by combining your photos and movies with the app's built-in templates and stamps.

Utilities

Epson has the tools to help you select the perfect projector for your application; with calculators to help you work out the ideal display size and select the Epson display solution to suit the environment.

Throw distance calculator

Easily work out image sizes and projection distance dimensions across our entire projector range. Simply select your desired screen size or the projection distance, and the smart online tool will automatically calculate all the necessary installation dimensions.

Laser projection TV EpiqVision Mini EF-11/EF-12

Project in any direction and on to almost any surface with Epson's smallest laser projectors. These mini laser projectors are sleek and sophisticated in design, are easy to use and come with a range of connectivity solutions.

Epson's smallest consumer laser projector range
 Modern and contemporary design
 High colour light output of up to 1,000 lumens
 Laser light source provides up to 10 years of entertainment¹
 Project in any direction

EF-11

EF-12

Remote control to match the stylish look
 Smart home entertainment²
 Built-in speaker
 Premium sound by YAMAHA (EF-12 only)
 5 year warranty³

Android TV™ Google, Android, YouTube, Android TV and other marks are trademarks of Google LLC. Subscriptions may be required for certain content providers.

¹ Based on watching content for five hours every day with the projector on Eco mode.

² Miracast built-in (EF-11); Android TV, Google Assistant® and Chromecast built-in[®] (EF-12).

³ 5 years or 12,000 hours, whichever comes first.

Model specific options

Ultra short throw and short throw wall mounts

ELPMB62 for the EB-1485Fi, EB-760W, EB-760Wi, EB-770F, EB-770Fi, EB-775F, EB-800F and EB-805F.

ELPMB45 or ELPMB64 for the EB-L210SW and EB-L210SF

Finger Touch Unit

ELPFT01 for the EB-1485Fi, EB-760Wi and EB-770Fi.

Finger Touch Unit bracket

ELPMB63 for attaching the ELPFT01 directly to the wall - optional usage depending on installation.

ELPMB52, ELPMB59 Stacking frames

Specialist frames designed by LANG AG for the EB-PU to EB-L30000U products for portrait projection and projector stacking.

ELPEC01 Camera unit

Optional external camera module designed for the EB-PU Series and ELPLX Series ultra-short-throw lenses.

ELPAF63 External air filter

Optional external air filter designed for the EB-PU1000 Series. This filter extends the dust resistance and minimises maintenance intervals, even when used in high dust environments.

Complementary solutions

Wireless presentation systems

ELPWP10 / ELPWP20

Epson's new wireless presentation systems make it easy for you to share your screen and increase your productivity.

Automatic start-up

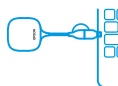

Epson display solutions automatically turn on when the transmitter is plugged into a laptop.

Receiver functionality

The receiver functionality can be integrated with Epson display solutions* reducing your initial costs (ELPWP10 only).

Intuitive design

It's simple enough that anyone can use it without training. Sharing your screen, swapping to a different device or sharing up to four devices simultaneously is as simple as a click of a button.

1 Plug into a laptop

2 Click the button

3 Collaborate on the big screen

Document cameras

ELPDC30 Desktop Visualiser

13M pixel camera (4k)
Up to 60 frames per second
A3 shooting area
4K UHD images via HDMI/Miracast
10x optical/23x digital zoom
Kensington lock security
Built-in, easy-to-use carry handle

ELPDC21 Desktop Visualiser

2M pixel camera (1920 x 1080)
Up to 30 frames per second
A3 shooting area
Built-in LED lights
Supports parallel video output and Split screen functionality
1080p images via VGA, HDMI, USB outputs
12x optical/10x digital zoom
Enhanced security with Kensington lock and security bar

ELPDC13 Desktop Visualiser

2M pixel camera (1920 x 1080)
Up to 30 frames per second
A3 shooting area
Built-in LED lights
Supports parallel video output and Split screen functionality
1080p images via VGA, HDMI, USB outputs
16x digital zoom
Enhanced security with Kensington lock and security bar

ELPDC07 Portable Visualiser

2M pixel camera (1920 x 1080)
Up to 30 frames per second
A3 shooting area
Built-in LED lights
USB powered
8x digital zoom

Options

ELPAP10/ELPAP11 Wireless LAN adapter

Upgrade the connectivity of your compatible Epson display solution with this easy-to-install wireless LAN adapter (please check product specifications for compatibility).

ELPCB03 Control and Connection Box

Epson's tailor-made Control and Connection Box is designed to meet the needs of education users. It offers a neat and tidy cable management solution, and is compatible with the Epson education classroom projectors that feature up to 3 x HDMI inputs and an RS232C connection. With large, clearly marked buttons to match those on Epson's projectors, ease of use is assured, allowing presenters to quickly power on and adjust source and volume. Compatible with Epson's 3-in-1 USB Display, the USB signal is also boosted to extend up to 10m.

ELPSP02 External speakers

An optional extra fully compatible with Epson's Control and Connection Box, the ELPSP02 speakers offer powerful 2 x 15W stereo audio support, for perfect clarity even in larger rooms.

ELPSC21 80" Mobile

16:9 screen

80 inch portable screen

16:9 aspect ratio perfect for 1080p gaming and movies

Less than 4kg, with included carry case

Easy set up

ELPSC32 50"

4:3 Desktop screen

50 inch pull out screen

4:3 aspect ratio for presentations - ideal for SVGA and XGA projectors

Quick set up for desktop usage

Perfect for travelling presenters – weighs just 3kg

Glossary and features

Look out for additional features that further improve the user experience. Features are specific to particular models – please check individual product specifications for details.

Auto calibration

Epson's interactive projectors offer the ability to automatically calibrate the interactive surface area. With just a couple of clicks an interactive workspace can be calibrated without needing to perform a lengthy manual process.

Auto lamp dimming

This feature automatically adjusts the brightness of the projector according to either the ambient light conditions or the content of the projected image.

Auto screen fit

This feature allows a projector to be roughly set up in front of a framed screen, and with a simple press of the 'Screen Fit' button, the image is aligned perfectly to the screen borders for quick and easy set up.

Colour calibration

Keep images consistent and maintenance to a minimum using the built-in or optional camera. The camera detects image colours that have become uneven over time, detects subtle inconsistencies between multiple projectors and enables automatic colour correction.

Constant brightness mode

The constant brightness mode maintains the projector's brightness at a specified level for up to 97,000 hours, helping to ensure the longevity of the light source.

Contrast ratio

The degree of difference between the lightest and darkest areas of the projected image. A high contrast ratio is particularly important for home cinema projectors.

Copy OSD settings

A feature that allows the cloning of the projectors OSD menu settings like user logo and colour mode via a USB thumb drive or USB-B cable, to transfer to other compatible projectors in the environment.

Curved surface and corner wall correction

Enhanced geometric correction capability allowing large images to be wrapped around curved surfaces or corners, creating engaging displays in innovative spaces.

Detail enhancement

Improve perceived detail with processing that enhances the contrast and texture of content.

DICOM simulation

This dedicated colour mode is designed to show off the best greyscale range – perfect for viewing medical images such as X-rays (cannot be used for diagnostic purposes).

Edge blending

Built-in ability to use multiple projectors vertically or horizontally for one giant image. Edge blending manages the overlaps between projectors to produce seamless large scale images.

Focus help

An easy to use built-in test pattern that enables the focus to be perfectly adjusted in seconds.

Frame interpolation

Video processing technology that inserts additional frames between the original ones to produce a smoother and sharper playback – particularly important for fast-moving action sequences in high definition movie content.

High dynamic range (HDR)

HDR presents the optimal visual experience by increasing the contrast ratio to deliver a far greater range between the darkest and lightest areas of the screen. It gives images more depth and allows you to see incredible detail that's previously not been possible. It enriches colours making images feel more natural yet intense, and ultimately, more immersive.

Keystone correction

A digital image adjustment used to realign the image when projected at an angle to the screen, producing a rectangular image rather than a 'keystone' shape. On some models this is available for horizontal correction as well as vertical, while more advanced models have the ability to make these corrections automatically.

Lens position memory

Specific lens positions can be stored in the projector memory, including lens shift positions, focus and projection sizes, allowing you to quickly adjust the projector depending on the aspect ratio of the content.

Lens shift

A feature of high-end products, this is a physical adjustment of the lens position to allow an image to be moved horizontally or vertically with no loss of image quality, perfect for easy installation.

MHL

Mobile High-Definition Link is a connectivity technology that enables you to easily share your content directly from a compatible smartphone or tablet and is capable of charging the device at the same time.

Multi location interactivity

This feature allows up to four projectors to be connected using iProjection for PCs, with content and interactivity shared across all users. This means that people in different locations can collaborate on the same content remotely.

PC-free presentation

Display files from USB memory without the need for a laptop and cables. Compatible file formats vary by projector.

Picture-in-picture

Display one source in full screen, whilst showing a secondary source as a smaller inset picture.

Point and arc correction

Geometric correction that enables small corrections to be made for screens that are uneven in places or slightly curved – perfect for large scale installations.

Portrait projection

Allows projection of portrait orientated images by placing the projector on its side (please note, a different lamp set may be required for this feature).

QR code function

Display an on-screen QR code to easily connect wirelessly via iProjection.

Real time keystone correction

Keeps the image perfectly aligned by constantly monitoring the projector's positioning and maintaining a rectangular image in real time.

Resolution and aspect ratio

The native resolution is the number of distinct pixels in each dimension that can be displayed. This is stated as the number of columns and rows of pixels creating the display e.g. 1920 x 1080 (1080p). The greater the resolution, the greater the detail and sharpness of the projected image. The ratio of horizontal to vertical lines also gives the native aspect ratio. In this instance 1920 x 1080 equates to a native aspect ratio of 16:9. It is best to match the input signal resolution to the projector's output resolution where possible to achieve the best image.

Schedule function

Built-in schedule management that allows timer setting of many projector functions, without the need to be connected to a PC or network – perfect for events and staging.

Screen Mirroring (Miracast)

Easy wireless transmission of Full HD (1080p) video and sound from compatible smartphones, tablets or PCs.

Screen sharing

Content can be shared between displays on the same network, promoting higher engagement and collaboration without the need for additional software.

Up to four projectors can be connected, with everyone viewing the content at the same time as other Epson displays (selected models only).

Split screen

This feature enables content from two different sources to be played simultaneously, with one image larger than the other or both of equal size.

Super resolution

Image processing that upscales standard definition content to produce a sharper and more detailed output image.

Throw ratio

The projection distance divided by the width of the projected image. A smaller throw ratio will enable large projection sizes from a shorter distance. The range of throw ratios for any given projector will also depend on the range of its zoom capability.

USB display

3-in-1 USB display enables simple plug-and-play capability. One USB cable can be used for image, audio and control. This saves time when making a connection, as the computer image should automatically be displayed, and prevents the need for multiple cables.

Warranty

To ensure customer satisfaction and complete peace of mind, Epson boast a market leading service organisation. All business and home cinema projectors in this guide are covered by a minimum of two years hardware and one year lamp warranty. For exact details of each model and to see options for warranty extension please visit www.epson.eu/warranty

Web-based control (with smart device support)

Use a computer web browser or smart device to adjust projector settings. The newly designed OSD Control Pad function allows control of the OSD menu and shows a representation of the lens-shift range that is available.
