

FUJIFILM instax mini 9 INSTANT CAMERA

CPL10B112-100

[IMPORTANT] Taking Pictures

**Caution on holding the camera**

- For horizontal image, hold the camera with the flash lampface at the top.
- Do not take pictures where flash photography is forbidden.
- Be careful so that your fingers or the strap do not cover the light sensor, flash lampface, flash, lens, or film ejection slot.
- Do not grasp the lens barrel when positioning the camera; otherwise, the finished print may not look as expected.
- Look into the viewfinder so that the "0" mark appears in the center.
- Be careful not to touch the lens surface when you press the shutter button.

**Unloading the INSTAX mini film pack**

When "0" is displayed on the film counter, unload the film pack following the procedure below and as indicated on the INSTAX mini film pack instructions.

Using the Close-Up Lens

You can photograph objects close-up, and can photograph yourself using the self-portrait mirror.

**WARNING**

- Do not look through the close-up lens at the sun or other strong light. Blindness or vision problems could result.

**Caution**

- Do not leave the close-up lens in places exposed to strong sunlight. Personal injury or fire could result if the lens should accidentally concentrate the sunbeams on an object or a person.
- Switch off the camera before you attach/detach the close-up lens.
- Never turn the close-up lens when you attach/detach it; otherwise, the tabs on the back may be broken.

**[IMPORTANT] Taking a lighter (Hi-Key) picture**

This camera automatically determines an appropriate brightness for taking any given picture, and informs you by lighting the corresponding lamp.

To take a lighter (Hi-key) picture, set the position of the brightness adjustment dial to the position of the mode darker than the mode for which the lamp on the dial lights.

**Position at which the lamp lights**

**Position to set the dial for a lighter (Hi-Key) picture**

**Caution**

Do not use the Hi-Key (Hi-key) function outside; otherwise, the picture may be much lighter (whiter) than you intend.

SPECIFICATIONS

Film	FUJIFILM INSTAX mini film
Picture Size	62 mm x 46 mm
Lens	2 components, 2 elements, f=60 mm, 1:12.7
Viewfinder	Real image finder 0.37x with target spot
Shooting range	0.6 m and beyond
Shutter Speed	1/60 sec.
Exposure Control	Manual switching system (LED indicator in exposure meter)
Film Feeding Out	Automatic
Film Developing Time	Approximately 90 seconds (Varies depending on the ambient temperature)
Flash	Constant firing flash (automatic light adjustment) Recycle time: 0.2 sec. to 6 sec. (when using new batteries) Effective flash range: 0.6 m - 2.7 m
Power Supply	Two AA-size 1.5V alkaline batteries Capacity: 100 shots (Approximately 10 INSTAX mini 10-pack film packs with new AA batteries)
Auto power off time	5 min.
Others	Exposure counter (number of unexposed films), film pack confirmation window
Dimensions	116 mm x 118.3 mm x 68.2 mm
Weight	307 g (without batteries, strap and film pack)

\* Specifications are subject to change without notice.

TROUBLE SHOOTING

Problems	Possible Causes	Solutions
The shutter release won't trip.	1 The battery power is low. 2 The batteries are not loaded correctly. 3 Power is not turned on. 4 Camera has remained idle for roughly 5 minutes with the power turned on.	1 Replace the batteries with new ones. 2 Load the batteries correctly. 3 Press the power button to turn on the power. 4 Press the power button after retracting the lens or press the shutter release button to restore the power-on state.
The lamp on the view finder blinks and the shutter release won't trip.	1 Flash is charging.	1 Wait until the lamp on the brightness adjustment dial is lit without blinking.
The film pack won't load into your camera, or won't load into your camera smoothly.	1 The film pack is not for your camera. 2 You are not loading the film pack correctly.	1 Use FUJIFILM INSTAX mini film only. (No other films can be used.) 2 Match the yellow line on the film pack with the yellow positioning mark in your camera. Follow the INSTAX mini film pack instructions.
All lamps on the brightness adjustment dial blink at the same time.	1 The battery power is low, and it takes a long time to charge the flash. 2 A more significant issue with your camera has occurred.	1 Replace the batteries with new ones while the power is turned on (when the lens is extended). <b>IMPORTANT:</b> Replace the batteries only while the power is turned on. If you replace the batteries while the power is turned off (when the lens is retracted), the lamps on the brightness adjustment dial blink after turning on the power even with new batteries. * When the problem is due to reason (1), the lamps on the brightness adjustment dial turn off after replacing the batteries. If the problem is due to reason (2), the lamps on the brightness adjustment dial blink even after replacing the batteries. In this case, turn off the power and remove the batteries immediately, then contact an authorized FUJIFILM repair center.
The red lamp on the view finder lights up.	1 The battery power is low.	1 Replace the batteries with new ones.

Printed pictures

Problems	Possible Causes	Solutions
The finished print looks overexposed. (White in color)	1 The method of measuring the subject brightness is unsuitable. 2 Brightness adjustment dial setting is incorrect. 3 The ambient temperature is low (below +5°C/+41°F). 4 The background is too dark in comparison with the subject. 5 The light sensor or flash sensor window is blocked.	1 Point the lens toward the center of the subject and measure the subject brightness. 2 While pointing the lens toward the subject, turn the brightness adjustment dial to set the brightness to that for which the lamp lights. 3 Before taking pictures, place your camera in a warm place to bring it to room temperature. 4 Turn the brightness adjustment dial one step toward the ☀ direction. 5 When taking a picture, be careful not to cover the two small windows next to the flash on the camera.
The finished print looks underexposed. (Dark)	1 The method of measuring the subject brightness is unsuitable. 2 Brightness adjustment dial setting is incorrect. 3 The ambient temperature is high (above +40°C/+104°F). 4 The picture was taken with direct light in front of you. 5 The flash lampface was blocked. 6 The background is too bright in comparison with the subject. 7 The flash did not reach the subject. 8 The flash reflected back from a mirror or window glass. 9 Grasping the lens barrel did not let the shutter work properly.	1 Point the lens toward the center of the subject and measure the subject brightness. 2 While pointing the lens toward the subject, turn the brightness adjustment dial to set the brightness to that for which the lamp lights. 3 Before taking pictures, place your camera in a cool place. 4 When the picture comes out from your camera, keep it away from places or objects with excessively high temperature. 5 Take a picture with the light behind you, or turn the brightness adjustment dial one step toward the ☂ direction. 6 When holding your camera, be careful not to block the flash lampface with your finger or strap. 7 Turn the brightness adjustment dial one step toward the ☂ direction. 8 Take pictures within 0.6 m to 2.7 m from the subject. 9 Adjust your position in taking the picture away from the mirror or window glass. 9 Hold your camera firmly and press the shutter release button gently.
The picture is out of focus.	1 The shooting range is too close to the subject. 2 The lens is not clean. 3 Your camera was shaken when taking pictures.	1 Take pictures with a distance of at least 0.6 m between you and your subject. 2 Clean the lens. 3 Hold your camera firmly and press the shutter release button gently.
The picture is blurred.	1 Picture was not permitted to develop without touching, pressure being applied or other interference once it ejected from the camera. 2 The picture did not come out smoothly.	1 Do not press onto or fold the picture. 2 Do not block the film exit with your finger.
The subject in the viewfinder has shifted in finished print.	1 The shooting range is too close to the subject.	1 Take pictures with a distance of at least 0.6 m between you and your subject.

IMPORTANT SAFETY NOTICE

This product has been designed with safety in mind, and to provide safe service when handled correctly and in accordance with the User's Guide and instructions. It is important that both the product and the INSTAX film are handled properly and used only to take pictures as instructed in this User's Guide and in the INSTAX mini film instructions. For your ease and safety, please follow what is written in this User's Guide. It is also a good idea to keep this User's Guide in a safe, easy to find place where you can refer to it if needed.

**WARNING**

This symbol indicates danger, which could result in injury or death. Please follow these instructions.

**WARNING**

- Never attempt to take this product apart. There is a danger of an electric shock.
- If this product is dropped or damaged so that the inside is showing, do not touch it. There is danger of an electric shock.
- If the camera or the batteries inside become hot, begin to smoke, make a burning smell or show any sign of unusual condition, remove the batteries right away. Use gloves to keep from burning your hands. Not removing batteries could result in burns or fire.
- Using a flash too close to a person's eyes may for the short term affect the eyesight. Take care when taking picture of infants and young children.
- If your camera gets wet or if something such as pieces of metal get inside, remove the batteries right away to avoid heat buildup or a fire starting inside the camera.
- Do not use this camera in places where there is flammable gas or near open gasoline, benzene, paint thinner or other unstable substances which can give off dangerous vapors. Doing so could result in explosion or fire.
- Store your camera out of the reach of infants and young children. Failure to do this could result in serious injury. (For example, the strap could become wrapped around a child's neck and cause choking.)
- Never take apart the batteries. Do not subject them to heat, throw them into an open fire, or attempt to short-circuit them. Doing so could result in the batteries exploding or spilling open causing burns or fire.
- Only use specified batteries in this product. Use of incorrect type of batteries could cause explosion. Dispose of used batteries according to battery disposal instructions.
- Make sure batteries are stored in a safe, secure place and well out of the reach of any infants, young children or pets. Improper storage could result in a child swallowing a battery. (If a child swallows a battery, call a doctor or a hospital right away.)
- Do not look through the close-up lens at the sun or other strong light. Blindness or vision problems could result.
- Never get this product wet or handle it with wet hands. Doing so may result in an electric shock.
- Never take flash photographs of people riding bicycles, driving cars or riding a horse. The flash can distract the driver and frighten the animal, possibly causing an accident.
- Make sure that the battery (+) and (-) polarities are installed correctly in the camera. A damaged battery or electrolyte leakage may cause a fire, injury, and contaminate the environment.
- Do not touch moving parts inside the camera. You may be injured.
- When using the camera, make sure that the battery cover is attached; otherwise, you may be injured.
- Do not leave the close-up lens in places exposed to strong sunlight. Personal injury or fire could result if the lens should accidentally concentrate the sunbeams on an object or a person.
- Do not swing around the camera. You may be injured.

**CE** The "CE" mark certifies that this product satisfies the requirements of the EU (European Union) regarding safety, public health, environment and consumer protection. ("CE" is the abbreviation of Conformite Europeenne). This product is in conformity with Directive 89/336/EEC.

**For customers in Turkey:**  
**EEE Complies with Directive.**

**For customers in the USA:**  
**FCC Statement**  
 This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**CAUTION**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by FUJIFILM responsible for compliance could void the user's authority to operate the equipment.

**For customers in Canada:**  
**CAUTION:** This Class B digital apparatus complies with Canadian ICES-003.

**Disposal of Electric and Electronic Equipment in Private Households**  
**Disposal of used Electrical & Electronic Equipment**  
 (Applicable in the European Union and other European countries with separate collection systems)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. COMMON SENSE CAMERA CARE

**CAMERA CARE**

- Your camera is a precision instrument. Do not get it wet or drop it. Also, do not expose to sand.
- Do not use a strap made for cellular phones or other similar electronic products. These straps are usually too weak to hold your camera securely. For safety, use only straps designed for your camera, and use only as specifically intended and instructed.
- If you are not using your camera for a long interval, unload the batteries and keep it where it will be safe from heat, dust, and moisture.
- Remove soil and dust from the lens, viewfinder window, etc. with an air blower and by wiping lightly with a piece of soft cloth.
- Do not use solvent such as thinner and alcohol to remove soil.
- Keep the film chamber and camera interior clean to avoid damaging films.
- In hot weather, do not leave your camera in a closed car or on the beach, and do not leave it in moist places.
- Moth-repellent gas such as naphthalene adversely affects your camera and films. Avoid keeping your camera or films in a chest with mothballs.
- Your camera is computer-controlled. If you should experience an operational issue, remove the batteries and then reload them.
- Note that the temperature range within which your camera can be used is +5°C/+41°F to +40°C/+104°F.

**INSTAX mini FILM AND PRINT CARE**

See FUJIFILM INSTAX mini film for film use instructions. Follow all instructions for safe and proper use.

- Keep the film in a cool and dry place. Do not leave the film in a place where the temperature is extremely high (e.g., in a closed car).
- When you load a film pack, use the film as soon as possible.
- If the film has been kept in a place where the temperature is extremely high or low, bring it to room temperature before starting to take pictures.
- Be sure to use the film before the expiration or "Use Before" date.
- Avoid airport checked luggage inspection and other strong X-ray illumination. The effect of fogging, etc. may appear on unused film. We recommend that you carry the camera and/or the film onto the aircraft as carry-on luggage. (Check with each airport for more information.)
- Avoiding strong light, keep the developed prints in a cool and dry place.
- Do not puncture, tear or cut INSTAX mini film. If film becomes damaged, do not use.

**Cautions on handling the film and prints**

For details, refer to the instructions and warnings on FUJIFILM INSTAX mini film.
