LANCOM 1793VA
Quick Reference Guide

Cloud-ready

LANCOM
Systems

① VDSL / ADSL interface
Use the supplied DSL cable for the IP-based line to connect the VDSL interface and the provider's telephone socket. For more information, please contact your Internet service provider.
② Ethernet interfaces
Use the cable with the kiwi-colored connectors to connect one of the interfaces ETH 1 to ETH 4 to your PC or a LAN switch.

③ Analog interfaces
Connect analog terminal devices to the analog interfaces either directly via RJ11, or with the help of the enclosed TAE adapters, either directly or via the additionally enclosed RJ11 twin adapters. The RJ11 twin adapters are wired as listed below when looking into the ports with contacts at the bottom:
connected to router port 1/3: port 1 left, port 3 right,
connected to router port 2/4: port 2 left, port 4 right

④ Configuration interface
Use a serial configuration cable to connect the serial interface (COM) to the serial interface of the device you want to use for configuring / monitoring (separately available).

⑤ ISDN interfaces
ISDN 1:
Internal (NT) or external (TE) ISDN bus.
This feature is controlled by LCOS.
ISDN 2:
Internal (NT) ISDN bus.

A 100-Ohm resistor for line termination is switchable in LCOS.

⑥ USB interface
You can use the USB interface to connect a USB printer or a USB memory stick.

⑦ Power
After connecting the cable to the device, turn the bayonet connector 90° clockwise until it clicks into place.
Use only the supplied power adapter.

90°

**Please observe the following when setting up the device**
> Do not rest any objects on top of the device
> For devices to be operated on the desktop, please attach the adhesive rubber footpads
> In case of wall mounting, use the drilling template as supplied

> Keep the ventilation slots on the side of the device clear of obstruction
> Rack installation with the optional LANCOM Rack Mount (separately available)

Before initial startup, please make sure to take notice of the information regarding the intended use in the enclosed installation guide!
Operate the device only with a professionally installed power supply at a nearby power socket that is freely accessible at all times.

① ② ③ ④ ⑤ ⑥ ⑦⑧ ⑨

① Power
Off	Device switched off
Green, permanently*	Device operational, resp. device paired / claimed and LANCOM Management Cloud (LMC) accessible
Red / green blinking	Configuration password not set. Without a configuration password, the configuration data in the device is unprotected.
Red blinking	Charge or time limit reached
1x green inverse blinking*	Connection to the LMC active, pairing OK, device not claimed
2x green inverse blinking*	Pairing error, resp. LMC activation code not available
3x green inverse blinking*	LMC not accessible, resp. communication error

② Online
Off	WAN connection inactive
Green, permanently	WAN connection active
Red, permanently	WAN connection error

③ DSL
Off	Interface deactivated
Green, permanently	DSL connection active
Green, flickering	DSL data transfer
Red, flickering	DSL transfer error
Red / orange, blinking	DSL hardware error
Orange, blinking	DSL training
Orange, permanently	DSL sync
Green, blinking	DSL connecting

④ Analog
Off	Interface deactivated
Green, permanently	Interface activated
Orange, blinking	Incoming call
Green, blinking	Connection active

⑤ ISDN
Off	Interface deactivated
Green, permanently	D-channel active
Green, flickering	ISDN data transfer
Red, flickering	ISDN transfer error
Red / orange, blinking	ISDN hardware error

⑥ ETH
Off	No networking device attached
Green, permanently	Connection to network device operational, no data traffic
Green, flickering	Data transmission

⑦ VoIP
Off	No SIP accounts defined or VCM is off
Green, permanently	All defined and active SIP accounts (outgoing) were successfully registered
Red, permanently	Not all defined and active SIP accounts were registered (possibly still in process)
Red or green, inverse flashing	Number of currently used lines (connecting or connected)

⑧ VPN
Off	VPN connection inactive
Green, permanently	VPN connection active
Green, flashing	VPN connecting

⑨ Reset
Reset button	Operated e.g. with a paper clip
	> short press: Restart the device
	> long press: Reset the device

*) The additional power LED statuses are displayed in 5-seconds rotation if the device is configured to be managed by the LANCOM Management Cloud.

T E C H N I C A L   D E T A I L S

Hardware
Power supply	12 V DC, external power adapter (230 V); bayonet connector to secure against disconnection
Power consumption	Max. ca. 15 W
Environment	Temperature range 0–35 °C; humidity 0–95 %; non-condensing
Housing	Robust synthetic housing, rear connectors, ready for wall mounting, Kensington lock; measures 210 x 45 x 140 mm (W x H x D)
Number of fans	None; fanless design, no rotating parts, high MTBF

Interfaces
WAN: VDSL2	> VDSL2 as per ITU G.993.2; profiles 8a, 8b, 8c, 8d, 12a, 12b, 17a, 35b > VDSL Supervectoring as per ITU G.993.2 (Annex Q) > VDSL2 vectoring as per ITU G.993.5 (G.Vector) > Compatible to VDSL2 from Deutsche Telekom > Compatible to U-R2 from Deutsche Telekom (1TR112) > ADSL2+ over ISDN as per ITU G.992.5 Annex B/J with DPBO, ITU G.992.3, and ITU G.992.1 > ADSL2+ over POTS as per ITU G.992.5 Annex A/M with DPBO, ITU G.992.3, and ITU G.992.1 > Supports just one virtual connection at a time in ATM (VPI-VCI pair)
ETH	4 individual ports, 10 / 100 / 1000 Mbps Gigabit Ethernet, by default set to switch mode. Up to 3 ports can be operated as additional WAN ports. Ethernet ports can be electrically disabled in the LCOS configuration.
USB	USB 2.0 hi-speed host port for connecting USB printers (USB print server), serial devices (COM-port server) or USB drives (FAT file system)
ISDN 1 / ISDN 2	ISDN 1: Internal (NT) or external (TE) ISDN bus. This feature is controlled by LCOS. According to the settings, connect the light-blue ISDN cable either to the NTBA or the ISDN terminal device. ISDN 2: Internal (NT) ISDN bus. Use the light-blue ISDN cable to connect the ISDN device to the ISDN interface.
Analog 1 / Analog 3 Analog 2 / Analog 4	Use the cable of your analog devices to connect them with the analog interfaces. If necessary, use the enclosed adapter.
Config (Com) / V.24	Serial configuration interface/COM-port (8-pin mini-DIN): 9,600 - 115,200 baud, suitable for optional connection of analog/GPRS modems. Supports internal COM-port server and provides transparent asynchronous serial-data transfer via TCP.

WAN protocols
VDSL, ADSL, Ethernet	PPPoE, PPPoA, IPoA, Multi-PPPoE, ML-PPP, PPTP (PAC or PNS) and IPoE (with or without DHCP), RIP-1, RIP-2, VLAN
ISDN	DSS1 (Euro-ISDN), PPP, X75, HDLC, ML-PPP, V.110/GSM/HSCSD

Declaration of Conformity
Hereby, LANCOM Systems GmbH | Adenauerstrasse 20/B2 | D-52146 Wuerselen, declares that this device is in compliance with Directives 2014/30/EU and 2014/35/EU.
The full text of the EU declaration of conformity is available at the following internet address:
www.lancom-systems.com/ce/

Package content
Manual	Quick Reference Guide (DE/EN); Installation Guide (DE/EN)
Cable	1 Ethernet cable, 3 m (kiwi colored connectors); 1 DSL cable for an IP-based line, 4.25 m; 1 ISDN cable, 3 m (light-blue connectors)
Adapters	4 TAE adapters (RJ11 – TAE), 2 RJ11 twin adapters
Power adapter	External power supply adapter (230 V); NEST 12 V / 2 A DC/S; barrel / bayonet (EU), LANCOM item no. 111303 (not for WW devices)
