### Regulatory Compliance Statements for the Stealth™ 600X Gen 2

**Local Restrictions on 802.11a, 802.11b, 802.11g and 802.11n Radio Usage**  
**Caution:** Due to the fact that the frequencies used by 802.11a, 802.11b, 802.11g and 802.11n wireless LAN devices may not yet be harmonized in all countries, 802.11a, 802.11b, 802.11g and 802.11n products are designed for use only in specific countries, and are not allowed to be operated in countries other than those of designated use. As a user of these products, you are responsible for ensuring that the products are used only in the countries for which they were intended and for verifying that they are configured with the correct selection of frequency and channel for the country of use. Any deviation from the permissible power and frequency settings for the country of use is an infringement of national law and may be punished as such.

To determine whether you are allowed to use your wireless network device in a specific country, please check to see if the radio type number that is printed on the identification label of your device is listed in the manufacturer's OEM Regulatory Guidance document at the following URL: <http://www.turtlebeach.com/homologation> or contact Turtle Beach directly.

**Federal Communications Commission (FCC) Compliance Notices**  
This section includes the following FCC statements for the Stealth™ 600X Gen 2:  
• FCC ID: X036-182315  
• Class B Interference Statement  
• Radio Frequency Exposure & Hazard Warning  
• Non-Modification Statement  
• Unlicensed National Information Infrastructure Bands Operation Statement

**Class B Interference Statement**  
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment operates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
• Reorient or relocate the receiving antenna.  
• Increase the separation between the equipment and receiver.  
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
• Consult the dealer or an experienced radio/TV technician for help.

**FCC Caution:**  
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: [1] This device may not cause harmful interference, and [2] this device must accept any interference received, including interference that may cause undesired operation.

**RF Radiation Exposure & Hazard Statement**  
To ensure compliance with FCC RF exposure requirements, this device must be installed in a location such that the antenna of the device will be greater than 2 cm (0.8 in.) from all persons. Using higher gain antennas and types of antennas not covered under the FCC certification of this product is not allowed. Installers of the radio and end users of the product must adhere to the installation instructions provided in this manual. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

**Unlicensed National Information Infrastructure (U-NII) Bands Operation Statement**  
Within the 5.25-5.35 GHz band, U-NII devices will be restricted to indoor operations to reduce any potential for harmful interference to co-channel MDS operations.  
The U-NII devices shall accept any interference from legal communications and shall not interfere with the legal communications. If interference is caused, the user must stop operating the device immediately and cannot resume operation until the harmful interference is clear.  
Manufacturers of U-NII devices are responsible for ensuring frequency stability such that an emission is maintained within the band of operation under all conditions of normal operation as specified in this user manual.

**Dynamic Frequency Selection (DFS)**  
U-NII devices operating in the 5.25-5.35 GHz and 5.47-5.725 GHz bands shall employ a DFS radar detection mechanism to detect the presence of radar systems and to avoid co-channel operation with radar systems in order to reduce the likelihood of interference to radar. The modification of wireless broadband or other transmitter to operate on unauthorized frequencies or the disabling of DFS capabilities is a violation of FCC rules and may result in unlawful interference to radio communications services critical to public safety. This product is compliant with the Consumer Product Safety Improvement Act of 2008, Public Law 110-314 (CPSIA).

**Canadian ICES Statements (IC: 3879A-215) (Stealth™ 600X Gen 2)**  
This device complies with ICES-003 and ICES-007 of Industry Canada. Operation is subject to the following two conditions:  
1. This device may not cause interference, and  
2. This device must accept any interference, including interference that may cause undesired operation of the device.

**Ce dispositif est conforme aux normes NRB002 et CNR-247 de l'industrie Canadienne.**  
L'utilisation de ce dispositif est autorisée seulement aux conditions suivantes:  
1. Il ne doit pas produire de brouillage et l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.  
2. Le produit doit accepter toute interférence radioélectrique légitime qu'il pourrait subir.  
To prevent radio interference to the licensed service (i.e., co-channel Mobile Satellite Systems) this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment for its transmit antenna is installed outdoors is subject to licensing and not supported by Stealth™ 600X Gen 2 Models.

**Pour éviter les interférences radio au service agréé (i.e., à-d. Les systèmes par satellite mobile co-canal), cet appareil est destiné à fonctionner à l'intérieur et à l'extérieur des fenêtres pour assurer un blindage maximal. L'équipement pour son antenne d'émission installée à l'extérieur est soumise à l'octroi de licences et n'est pas pris en charge par les modèles Stealth™ 600X Gen 2.**

**RF Radiation Exposure & Hazard Statement**  
To ensure compliance with FCC RF exposure requirements, this device must be installed in a location such that the antenna of the device will be greater than 2 cm (0.8 in.) away from all persons. Using higher gain antennas and types of antennas not covered under the IC certification of this product is not allowed. Installers of the radio and end users of the product must adhere to the installation instructions provided in this manual. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

**Exposition aux radiations RF et Mention de danger**  
Pour assurer la conformité avec les exigences RF-02 d'exposition aux RF (Radio Fréquences), cet appareil doit être installé dans un endroit où l'antenne de l'appareil sera située à une distance de plus de 2 cm (0,8 po) de toutes personnes. L'utilisation d'antennes à gain plus élevé et les types d'antennes qui ne sont pas couverts par le de certification IC de ce produit n'est pas autorisés. Les installateurs de la radio et les utilisateurs du produit final doivent se conformer aux instructions d'installation fournies dans ce manuel. Cet émetteur ne doit pas être co-implanté ou exploité en conjonction avec toute autre antenne ou transmetteur.

**Déclaration de déploiement**  
Ce produit est certifié pour le déploiement à l'intérieur tout en rencontrant les limites de cette bande de fréquences: 5150-5250 MHz. Ne pas installer ou utiliser ce produit à l'extérieur du Canada, si ce bande de fréquences ne peut être rencontré.

**Operation in the Frequency Bands 5170-5225 MHz and 5250-5850 MHz**  
This device complies with the Canadian ICES-003 and ICES-007 of Industry Canada. Operation is subject to the following two conditions:  
1. This device may not cause interference, and  
2. This device must accept any interference, including interference that may cause undesired operation of the device.

**Fonctionnement dans les bandes de fréquence 5170-5225 MHz et 5250-5850 MHz**  
Jusqu'à nouvel avis, les appareils soumis à cette section ne doivent pas être transmis dans la bande de 5150-5250 MHz. Cette restriction concerne la protection des radars météorologiques d'Environnement Canada opérant dans cette bande. Les utilisateurs des avisés que les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (i.e., à-d., qu'ils ont la priorité) pour les bandes 5250-5350 MHz et 5450-5850 MHz et que ces radars pourraient causer du brouillage à d'autres utilisateurs des dispositifs LAN-E.
