NOTE ON BATTERIES

European regulations require that we provide the following information:

- Batteries and rechargeable batteries must not be disposed of in household waste. As an end user, you are legally required to return used batteries. Please use official collection facilities such as the collection points provided by public waste management authorities to do so. You can also return used batteries that we carry or have carried as new batteries to us. Please contact us at care@womanizer.com. To prevent short circuits, the poles of lithium batteries should be taped before returning. For safety reasons, we ask you not to send the batteries to us by mail and refer you to the regulations for sending hazardous goods provided by mail carriers.
- If the batteries are permanently installed in the product, please do not try to remove them yourself. This may cause permanent damage to the device. Your obligations as a customer are otherwise regulated by the WEEE Directive and the national implementation law.
- Please observe the information in the manual and the safety instructions to prevent waste and littering.
- Used batteries contain harmful substances that can damage the environment or your health if they are not stored or disposed of properly. In particular, this applies to the improper handling of lithium batteries. Batteries also contain important raw materials such as iron, zinc, manganese and nickel and can be recycled. Separate collection allows these raw materials to be recycled and prevents negative impacts on the environment and human health from released pollutants.
- The sign with the crossed-out waste bin means that you must not dispose of batteries and accumulators with household waste.

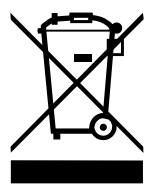

If the legal requirements are present, this sign means that the following symbols and their meaning must be used when labeling the batteries:

- Hg: Battery contains more than 0.0005 percent mercury by mass
- Pb: Battery contains more than 0.004 percent lead by mass
- Cd: Battery contains more than 0.002 percent cadmium by mass

NOTES ON THE DISPOSAL OF ELECTRICAL EQUIPMENT

European regulations require that we provide the following information:

We would like to point out to owners of electrical equipment that old electrical equipment must be collected separately from municipal waste in accordance with applicable legal regulations. Batteries and accumulators that are not firmly encased in the old electrical equipment, as well as bulbs that can be removed from the equipment without being destroyed, must be separated from the old equipment in a non-destructive way before being given to a collection point for proper disposal. Please refer to the separate instructions for the disposal of batteries. The symbol of a crossed-out waste bin shown below and affixed to old electrical equipment also indicates that the equipment must be collected separately:

According to the WEEE Directive and the national implementation law, as distributors of electrical equipment, we are required to take back certain waste electrical equipment free of charge. When you purchase a new electrical and electronic device, you can surrender an old electrical device that essentially performs the same functions as the new device to us free of charge. If your old electrical equipment is not larger than 25 centimeters in any dimension, you can also surrender it to us free of charge without purchasing a new device. Please contact us at care@womanizer.com. We will then arrange the return of the old electrical equipment. For safety reasons, we would like to ask you to refrain from shipping lighting equipment (such as bulbs). Please use the collection points provided by public waste management authorities to return lighting equipment or contact us directly at the aforementioned e-mail address. You can also return old electrical equipment to any of the collection points run by the public waste disposal authorities. You are making an important contribution to the reuse, recycling and other recovery of old appliances by sending your old electrical equipment for separate collection in the proper collection groups. As the end user, you are responsible for deleting personal data from the used electrical equipment before handing it in for disposal. Please observe the information in the manual and safety instructions to prevent waste, and please check for possible repair options.

CONSIGNES RELATIVES AUX BATTERIES

La réglementation européenne nous impose de transmettre les consignes suivantes :

- Les batteries et les piles ne doivent pas être jetées avec les déchets ménagers. En tant qu'utilisateur final, vous êtes légalement tenu de restituer les batteries usagées. Pour ce faire, utilisez les points de dépôt officiels tels que les points de collecte des services publics d'élimination des déchets. Les ba-

terries usagées que nous proposons ou avons proposées à l'état neuf peuvent nous être retournées. Pour cela, vous pouvez nous contacter à cette adresse : care@womanizer.com. Pour éviter tout risque de court-circuit, les pôles des batteries lithium doivent être recouverts d'un ruban adhésif avant la restitution. Pour des raisons de sécurité, nous vous demandons de ne pas nous retourner les batteries par voie postale. À ce sujet, nous vous renvoyons aux règlements des transporteurs relatifs à l'envoi de marchandises dangereuses.

- Si les batteries sont solidement installées à l'intérieur du produit, n'essayez en aucun cas de les retirer vous-même. Cela pourrait endommager l'appareil de manière définitive. Vos obligations en tant que client relèvent par ailleurs de la directive WEEE et de sa transposition en droit national.

Cela s'applique en particulier aux batteries contenant du lithium. Les batteries contiennent également des matières premières importantes telles que le fer, le zinc, le manganèse ou le nickel qui peuvent être recyclées. Le tri sélectif permet de recycler ces matières premières et d'éviter les effets nocifs des substances toxiques libérées sur l'environnement et la santé des personnes.

Nous attirons l'attention des propriétaires d'appareils électriques sur le fait que, conformément aux dispositions légales en vigueur, les appareils électriques usagés ne doivent pas être jetés avec les déchets ménagers, mais doivent faire l'objet d'une collecte séparée. Les batteries et les piles qui ne sont pas solidement installées dans l'appareil électrique usagé, ainsi que les ampoules qui peuvent être retirées de l'appareil usagé sans être détruites, doivent être retirées de l'appareil usagé sans occasionner de destruction et éliminées conformément à la procédure prévue avant que celui-ci ne soit déposé dans un point de collecte. Pour la mise au rebut de batteries, veuillez respecter les consignes particulières. Le symbole de la poubelle barrée d'une croix, représenté ci-dessous et figurant sur les appareils électriques usagés, indique en outre l'obligation de tri sélectif :

INDICAZIONI RELATIVE ALLO SMALTIMENTO DI APPARECCHIATURE ELETTRONICHE E ELETTRICHE

In ottemperanza alle normative europee siamo tenuti a dare le seguenti indicazioni:

Segnaliamo ai proprietari di apparecchi elettronici ed elettrici che, in conformità con la normativa in vigore, i vecchi apparecchi devono essere raccolti separatamente dai rifiuti urbani. Le batterie e gli accumulatori che non sono montati in modo fisso agli apparecchi elettrici, nonché le lampade, che possono essere rimosse dall'apparecchio senza danno, devono essere separati nella loro interezza e essere consegnati al centro di smaltimento designato. Per lo smaltimento delle batterie, si prega di attenersi alle seguenti indicazioni. Il simbolo del bidone sbarrato mostrato qui sotto e apposto sugli apparecchi elettronici e elettrici indica l'obbligo di raccolta separata.

Secondo le direttive WEEE e le leggi nazionali siamo obbligati, come distributori di apparecchi elettronici e elettrici, a ritirare gratuitamente alcuni vecchi apparecchi.

Quando si acquista un nuovo apparecchio elettronico o elettrico, è possibile restituire gratuitamente il vecchio apparecchio se esso essenzialmente svolge le stesse funzioni del nuovo. Se il vecchio apparecchio non eccede i 25 cm su ogni lato, può essere restituito gratuitamente a prescindere dall'acquisto di un nuovo apparecchio. Per assistenza si prega di contattare care@womanizer.com. Organizzeremo la restituzione dei vecchi apparecchi elettronici. Per motivi di sicurezza si prega di non inviare apparecchi di illuminazione (come lampade). Per la restituzione degli apparecchi di illuminazione, si prega di utilizzare i punti di raccolta delle aziende pubbliche di smaltimento dei rifiuti o di contattarci direttamente all'indirizzo e-mail indicato sopra.

Presso i punti di raccolta delle aziende pubbliche di smaltimento dei rifiuti è possibile consegnare anche i vecchi apparecchi elettronici o elettrici. Tramite la raccolta differenziata e la consegna dei vecchi apparecchi elettronici e elettrici presso gruppi di raccolta corretti si dà un importante contributo al riutilizzo, al riciclaggio e al recupero dei vecchi apparecchi.

L'utente finale è responsabile della cancellazione dei dati personali sugli apparecchi da smaltire prima di consegnarli.

Per ridurre la produzione di rifiuti, occorre seguire le istruzioni del manuale e le avvertenze sulla sicurezza, e informarsi sulle possibilità di riparazione.

 - Para evitar desperdícios e lixo, as instruções do manual e as instruções de segurança devem ser seguidas.
 - Os resíduos de baterias contêm substâncias nocivas que podem prejudicar o ambiente ou a sua saúde se não forem armazenados ou eliminados adequadamente. Isto aplica-se em particular ao manuseio inadequado de baterias contendo lítio. No entanto, as baterias também contêm matérias-primas importantes como ferro, zinco, manganês ou níquel e podem ser recicladas. A coleta seletiva possibilita a reciclagem dessas matérias-primas e evita os efeitos negativos dos poluentes libertados sobre o ambiente e a saúde humana.
 - O símbolo constituído por um contentor de lixo barrado por uma cruz significa que o utilizador não deve se descartar de baterias e acumuladores no lixo doméstico.

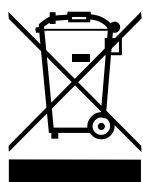

Em cumprimento dos requisitos legais, por baixo do símbolo do contentor de lixo os seguintes símbolos químicos com os respetivos significados devem ser utilizados para identificar as baterias:

- Hg: A bateria contém um teor ponderal de mercúrio superior a 0,0005 %
- Pb: A bateria contém um teor ponderal de chumbo superior a 0,004 %
- Cd: A bateria contém um teor ponderal de cádmio superior a 0,002 %

INFORMAÇÕES SOBRE O DESCARTE DE EQUIPAMENTOS ELÉTRICOS

Devido aos regulamentos europeus, somos obrigados a fornecer as seguintes informações:

Informamos aos proprietários de equipamentos elétricos que os resíduos de equipamentos elétricos e eletrónicos (REEE) devem ser recolhidos separadamente dos resíduos municipais de acordo com as normas legais aplicáveis. As baterias e acumuladores que não estejam firmemente contidos nos REEE, bem como as lâmpadas que possam ser removidas dos REEE sem serem destruídas, devem ser separadas dos REEE sem destruição antes de serem entregues a um ponto de recolha e levadas para um ponto de eliminação designado. Para a eliminação de baterias, consulte as instruções em separado. O símbolo de um contentor de lixo com rodas barrado por uma cruz mostrado abaixo e aplicado aos REEE indica adicionalmente a obrigação de recolher separadamente:

De acordo com a diretiva REEE e a lei nacional de transposição, nós como distribuidores de equipamentos elétricos e eletrónicos somos obrigados a aceitar de volta certos resíduos sem encargos.

Ao adquirir um equipamento elétrico e eletrónico novo, pode entregar-nos gratuitamente um resíduo de equipamento que cumpre essencialmente as mesmas funções que o novo equipamento. Se o seu REEE não for maior que 25 centímetros em qualquer dimensão, também nos pode entregá-lo gratuitamente sem comprar um equipamento novo. Contate-nos para isso em care@womanizer.com. Organizaremos então a devolução do resíduo de equipamento. Por razões de segurança, solicitamos que não nos envie luminárias (como lâmpadas, por exemplo). Utilize os sistemas de recolha das autoridades públicas de gestão de resíduos para a devolução dos dispositivos de iluminação ou contate-nos diretamente no endereço de e-mail acima mencionado.

Pode também entregar resíduos de equipamentos elétricos e eletrónicos em todos os pontos de coleta das autoridades públicas de eliminação de resíduos. Ao enviar seus resíduos de equipamento para a recolha separada nos grupos de coleta corretos, faz uma contribuição importante para a reutilização, reciclagem e outros tipos de recuperação de REEE.

Como utilizador final, é responsável pela remoção dos dados pessoais dos REEE a eliminar antes de os entregar.

Para evitar desperdícios e lixo, as instruções do manual e as instruções de segurança devem ser seguidas e as opções de reparação devem ser verificadas.
